Dancer, Dr. John : Synergistic Effect of Zinc and Gibberellin, 901
Danckwerts, Prof. P. V. : Appointed to the Shell chair of chemical engineering in the University of Cambridge, 719 ; work of, 719
  Appointed to the Board of the College of Technologists, 1500
D'Ancona, Prof. Umberto : Old and New Solutions to the Eel Problem, 1405
Daniel, Dr. Vera : Relaxation Processes (Results of Measurements on a Group of Long-chain Alcohols), 583
Danielli, Prof. J. F. (edited by) : General Cytochemical Methods, Vol. I, *review* by Dr. R. Barer, 1355
Danielli, Prof. J. F. (Coombs, Dr. M. M., and) : Chlorination of Proteins as a Method of Increasing their Opacity in the Electron Microscope, 1257
Daniels, jun., Prof. F., and others : Ultra-violet Carcinogenesis in Albino and Pigmented Mice receiving Furocoumarins—Psoralen and 8-Methoxypsoralen, 728
Danish Atomic Energy Commission (European Nuclear Energy Agency of the Organization for European Economic Co-operation and the) : Symposium on the Scientific and Technical Aspects of Health Physics in Atomic Installations, 934
Dannebrog : Appointment of Prof. J. M. Yoffey as a Knight first class of the Order of the, 154
Daphnia: The Systematics of North American (Dr. John Langdon Brooks), 93
D'Arcy, Dr. P. F., and others : Resolution of Chlorpheniramine and the Pharmacological Properties of its Isomers, 734
Dark : Listening in the—the Acoustic Orientation of Bats and Men (Prof. Donald R. Griffin), *review* by Prof. R. J. Pumphrey, 1554
Dark Fixation of Carbon Dioxide in *Kalanchoe blossfeldiana* in relation to Photoperiodism (Dr. G. Zabka, Prof. F. G. Gregory and Dr. J. Edelman), 1375
Darkness (Old) : New Light on, *review* by Prof. R. J. Pumphrey, 1554
Darlington, Prof. C. D. : Evolution of Genetic Systems, second edition, *review* by Prof. Curt Stern, 1553
Darrieus, G. : Presented with a Gold Medal of the Institut Français des Combustibles et de l'Energie, 151
Dart, M. C., and Henbest, Prof. H. B. : Effect of Alkali Salts on the Steric Course of Hydrogenation of a Cyclic Allylic Alcohol, 817
Dart, Prof. Raymond A. : An 'Australopithecine' Scoop from Herefordshire, 844
Darveniza, M. : Light Emission from Insulating Liquids due to Excitation by d.c. Fields near Breakdown, 743
Darwin, Wallace and Linnaeus Celebrations in Singapore (Prof. R. D. Purchon), 723
Darwin, G. E. : Nuclear Fuel Cycles, 1647
Darwinism and the Study of Society (Scottish Branch of the British Sociological Association Conference to mark the Centenary of 'The Origin of Species'), 1562
Das, T. P., and Hahn, E. L. : Nuclear Quadrupole Resonance Spectroscopy, *review* by Dr. R. H. Tredgold, 1078
Dassualt, Marcel : Awarded the Gold Medal of the Royal Aeronautical Society, 794
Data (Geophysical) : Automatic Reduction of (Royal Astronomical Society Geophysical Discussion on), 1166
Data Processing : Digitizers and other Equipment for (Hilger and Watts, Ltd.), 651
Dating of Meteorites : Dirac's Cosmology and the (Prof. R. H. Dicke), 170
Datta, Dr. S. P., and others : Relationship between Proton and Metal Binding by some Peptides, Amino-acid Amides and Amino-acids, 745
Davey, C. L. : Synthesis of Adenylosuccinic Acid in Preparations of Mammalian Skeletal Muscle, 995
Davey, Dr. K. G. : Serotonin and Change of Colour in Frogs, 1271
David, Dr. W. A. L. : Chemicals and Insects, *review*, 352
Davidson, Prof. C. F. : How Old is the Cambrian System ?, 768
Davidson, Harold (Bukovac, Prof. Martin J., and) : Gibberellin Effects on Photoperiod-controlled Growth of *Weigela*, 59
Davidson, Prof. J. N. : Biochemistry in Medicine, *review*, 5
Davies, B. L., and others : Existence of Two Liquid Phases in the System Cobalt Chloride–Water–Acetone, 459
Davies, Dr. D. D. : Title of reader in plant biochemistry in the University of London (at King's College) conferred on, 86
Davies, D. W. : Mechanization of Thought Processes, 225
Davies, D. W. (Wilkinson, J. H., and) : The Automatic Computing Engine at the National Physical Laboratory, 22
Davies, Dr. E. : Gas Discharges (Influence of Work Function in the Range 2·0–4·5 eV. on the Sparking Potential in Hydrogen at Low Pressures), 92
Davies, Elwyn: Appointed a member of the National Parks Commission, 1094
Davies, Dr. J. G. : Space Research (Terrestrial Radio Astronomy), 363
Davies, Dr. Mansel : Relaxation Processes, 584
Davies, Max, and Verhulst, Michel (edited by) : Operational Research in Practice—Report of a NATO Conference, *review* by Dr. Cecil Gordon, 424
Davies, Robert K., and others : Formation of Urea from Arginine in the Brain of the Living Rat, 1520
Davies, Dr. R. R. : Detachment of Conidia by Cloud Droplets, 1695
Davies, S. F. M. : Parasitology (Possibility that the Onset of Sexual Reproduction of some Parasites is related to Hormonal Changes in the Host), 1506
Davies, Trefor (edited by Cremer, Herbert W., and) : Chemical Engineering Practice, Vol. 5, Fluid Systems I, *review* by Prof. J. M. Coulson, 492
Davis, Dr. D. Russell : Psychiatry in Wartime, *review*, 208
Davis, the late F. M. : An Account of the Fishing Gear of England and Wales, revised edition, 1023
Davis, Dr. G. : Nuclear Fuel Cycles, 1648
Davis, Dr. G. H. G., and Baird-Parker, A. C. : Cell-Wall Composition of *Leptotrichia* spp., 1206
Davis, Dr. J. G. : Elected chairman of the Association of Consulting Scientists, 651
Davis, J. M. : Preparation and Sectioning of Tissues embedded in 'Araldite' for Electron Microscope Examination, 200
Davis, P. S. : Separation of Strontium-90 from Calcium, 674
Davis, Dr. Richard B. (Conn, jun., Dr. Rex B. and) : Green Fluorescence of Guanidinium Compounds with Ninhydrin, 1053
Davison, Dr. A. N., and Wajda, Martha : Persistence of Cholesterol-4-^{14}C in the Central Nervous System, 1606
Dawbin, W. H. : Evidence on Growth-rates obtained from Two Marked Humpback Whales, 1749
Dawes, Dr. Ben : Classification of the Digenetic Trematodes, *review*, 957
Dawes, Dr. Ben, and Griffiths, Dr. Ivor : Relationship between *Dictyocotyle* and *Calicotyle*, 835

Dawkins, M. J. R., and others : Differential Effect of Phenothiazines on Oxidative Phosphorylation, 821
Dawn of Life (Dr. J. H. Rush), *review* by T. H. Hawkins, 966
Dawson, Christine O., and Gentles, J. C. : Perfect Stage of *Keratinomyces ajelloi*, 1345
Dawson, Dr. R. M. C. : Hydrolysis of Lecithin and Lysolecithin by Rumen Micro-organisms of the Sheep, 1822
Dawson, Warren R. (edited by) : The Banks Letters—a Calendar of the Manuscript Correspondence of Sir Joseph Banks preserved in the British Museum, the British Museum (Natural History), and other collections in Great Britain, *review* by Dr. W. B. Turrill, 1353
Day, K. B. : Precipitation in Alloys (The Oxide Replica Technique for Studying Precipitation in Aluminium Alloys), 797
Day : Response of Rice to Small Differences in Length of (Dr. J. Dore), 413 ; (Dr. E. Njoku), 1598
Dazai, Michio (Ono, Hideo, and) : Unfermentable Sugars in Barley Mash fermented by the Amylo Process, 1055
De, Prof. S. N. : Enterotoxicity of Bacteria-free Culture-filtrate of *Vibrio cholerae*, 1533
de Almeida Franco, L. T., and others : Haemoglobin *N* in Portuguese Guinea, 193
de Bodo, Prof. R. C., and others : Mechanism of Action of Insulin, 1123
de Franciscis, Dr. P., and Landauer, Prof. W. : Effect of Amniotic Fluid on Inhibition of Growth by Cortisone in Chicken Embryos, 617
De Groodt, Dr. M., and others : Virus-like Particles in Chemically induced Carcinoma of the Uterine Cervix, 694
de Groot, A. P., and Reed, S. A. : Influence of Dietary Cod-Liver Oil and some Fractions of Cod-Liver Oil on Serum Cholesterol-level of Rats, 1191
de Gruchy, Dr. G. C. : Clinical Haematology in Medical Practice, *review* by Dr. R. Biggs, 1151
de Haan, Hugo : Elected a Fellow of the International Academy of Management, 1719
de Haan, Dr. Reysenbach : The Ear under Water (Aspects of Mammalian Hearing under Water), 1788
De Haas–Van Alphen Effect in Copper (Dr. D. Shoenberg), 171
de Paor, Máire and Liam : Early Christian Ireland, *review* by Joseph Raftery, 1704
de Pietri-Tonelli, P. (Santi, R., and) : Mode of Action and Biological Porperties of the S-(Methylcarbamyl) Methyl 0,0-Dimethyl-Dithiophosphate, 398
De Rom, Prof. F., and others : Virus-like Particles in Chemically induced Carcinoma of the Uterine Cervix, 694
de Rosayro, R. A. : Humid Tropics Vegetation (Aerial Photography applied to Forestry Problems in Ceylon), 795
De Rothschild (James A.) Expedition at Hazor : Hazor I, an Account of the First Season of Excavations, 1955 (Yigael Yadin, Yohanan Aharoni, Ruth Amiran, Trude Dothan, Immanuel Dunayevsky and Jean Perrot), *review* by Peter J. Parr, 951
de Silva, Dr. A. R. : Wheat Genetics, 26
de Vilmorin, Dr. R. : Wheat Genetics, 26
de Vries, J. A., and others : Ethylenediamine Tetraacetate and the Intestinal Absorption of Vitamin B_{12}, 1395
de Winton, John C. P. : Appointed a member of the National Parks Commission, 1094
de la Mare, Dr. P. B. D. : Theoretical Principles of Organic Chemistry, *review*, 852
Deacon, Dr. G. E. R. : Turbidity Currents, 657
Dean, Dr. A. C. R. : Bacterial Population Studies in the Chemostat, *review*, 424
Dearnley, R. (von Knorring, Dr. O., and) : Niobium–Zirconium–Thorium–Uranium and Rare-Earth Minerals from the Pegmatites of South Harris, Outer Hebrides, 255
Death in the Bronze Age : Life and (Sir Cyril Fox), *review* by M. C. Burkitt, 1486
Debt to the Future : Our—Symposium presented on the Seventy-fifth Anniversary, 1957 (Royal Society of Canada 'Studia Varia' Series, Vol. 2, edited by E. G. D. Murray), *review* by R. Brightman, 1702
Decade (Fourth) : Quantum Mechanics in its, *review* by Prof. N. Kemmer, 705
Decay of Intensity of Luminescence of Short-Persistence Phosphors : Rise and (Dr. R. Feinberg), 1546
Decay (Passive Antibody), in Thyroidectomized Rabbits (Dr. Ignatius L. Trapani, Dr. Allen Lein and Dr. Dan H. Campbell), 982
Decay Kinetics of the Metastable State of Chlorophyll *b* : Absorption Spectrum and (Prof. Stig Claesson, Lars Lindqvist and Bertil Holmström), 661
Deciduous Woody Plants : Effect of Gibberellic Acid on Development of Autumn Colour and Leaf-fall of (Dr. P. W. Brian, J. H. P. Petty and P. T. Richmond), 58
Decomposed Crystals (Pure and), of Thallous Azide : Absorption Spectra and Associated Photoconductivity of (B. L. Evans and A. D. Yoffe), 1241
Decomposition of Anionic Surface-Active Agents by Soil Bacteria (Dr. F. A. Skinner), 548
Decomposition of Nitrous Oxide : Effect of Thermal Neutron Irradiation on Oxide Catalysts for the (Yasukazu Saito, Yukio Yoneda and Shoji Makishima), 388
Decomposition Processes (Simultaneous), in Soils (H. F. Birch), 1415
Decomposition (Thermal), of Irradiated Solids (Dr. E. G. Prout), 884
Dedrick (Berry and) : Reactivation of Heat-inactivated Pox viruses—a General Phenomenon which includes the Fibroma–Myxoma Virus Transformation of (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340
Deduction of Ionospheric Electron Content from the Faraday Fading of Signals from Artificial Earth Satellites (W. T. Blackband, B. Burgess, I. L. Jones and G. J. Lawson), 1172
Dee (Aberdeenshire) : *Vibrio* spp. in Finnock from the (Isabel W. Smith), 1409
Defalco, Alfred, and others : Formation of Urea from Arginine in the Brain of the Living Rat, 1520
Defect (Erythrocytic), associated with Drug-Sensitivity among Oriental Subjects : Incidence of the (Dr. Ernest Beutler, Mary K. Y. Yeh and Thomas Necheles), 684
Defence : Central Organisation for (White Paper on), 1483
Defence, Ministry of : Promotion of R. V. Whelpton to Deputy Chief Scientific Officer and appointment as Ministry of Supply representative on the Defence Research Policy Staff, 647
Defence Plan : Progress of the Five-Year (White Paper on), 1483
Defence Research Policy Staff : Promotion of R. V. Whelpton to Deputy Chief Scientific Officer and appointment as Ministry of Supply representative on the, 647
Defence Science, Commonwealth Advisory Committee on—Meeting in Australia (Sir Leslie Martin), 1165
Defence Standards Laboratories, Australian : Annual Report for 1956, 581
Defence Statistics 1950-60 (White Paper on), 1483
Deficiency of Pantothenic Acid : Effects of, on Oxygen Poisoning in the Rat (Dr. D. W. Taylor), 257
Deficiency (Acute Insulin) : Production of, by Administration of Insulin Antiserum (P. H. Wright), 829
Deficiency (Erythrocyte), of Glucose-6-phosphate Dehydrogenase : Gene Action in—Tissue Enzyme-Levels (Prof. Paul A. Marks, Dr. Ruth T. Gross and Dr. Ruth E. Hurwitz), 1266
Deficiency (Nitrogen) : Phosphates and Organic Substances in (International Association for Research on Phosphates Congress on), 513
Deficiency (Oxygen), and Radiation Damage in the Insect *Rhodnius* (W. F. Baldwin and T. N. Salthouse), 974
Deficiency (A Possible Vitamin E), occurring in a Herd of Pigs fed Standard Rations in the Tropics (W. J. A. Payne), 828
Defined Glucose-containing Media : Detection of Gentiobiose and Sophorose in Cultures of certain Micro-organisms growing in (A. W. Khan, D. N. Pelligrino and Prof. T. K. Walker), 682
Degeneration (Dietary Necrotic Liver) : Ineffectiveness of Molybdenum, Osmium and Cobalt in (Dr. Klaus Schwarz, Edward E. Roginski and Calvin M. Foltz), 472
Degenhardt and Co. Ltd. : Exhibition of German Precision Measuring Equipment, 1163
  Exhibition of Photometric Instruments and Microscopes, 1164
Degradation of High Polymers by Gas Chromatography : Direct Examination of the (Dr. R. S. Lehrle and Prof. J. C. Robb), 1671
Degraded Ribonucleic Acid : Inhibition of Polynucleotide Phosphorylation by—its Reversal by various Agents (Dr. Roland F. Beers, jun.), 1335
Dehydrogenase : A Microsomal Malic (Kenneth H. Shull), 259
Dehydrogenase (Glucose-6-phosphate) : Gene Action in Erythrocyte Deficiency of—Tissue Enzyme-Levels (Prof. Paul A. Marks, Dr. Ruth T. Gross and Dr. Ruth E. Hurwitz), 1266
Dehydrogenase (α-Glycerophosphate) : Anion Inhibition of (Dr. Otto Z. Sellinger and Dr. O. Neal Miller), 889
Dehydrogenase (Liver Xanthine), of Rats : Effect of Salicylate on Blood and (Emilio Mitideri and Ottilia R. Affonso), 471
Dehydrogenase Activity (Succinic), in Brain Tissue of Rats after Ovariectomy and Steroid Administration (H. Sobel and B. Eckstein), 54
Dekker, Prof. Adrianus J. : Solid State Physics, *review* by Prof. G. F. J. Garlick, 1007
Delayed Denervation and Accessory Limb Formation in Urodeles (Dr. Laurens N. Ruben), 765
Delaying Pupation in *Drosophila melanogaster* : A New Method for (Dr. A. Abd-el-Wahab), 127
Delinquency : Association between Psychomotor Behaviour and (H. S. Anthony), 343
Delta (Catskill) : *Spirifer disjunctus*, its Evolution and Paleoecology in the (Hugo Greiner), *review* by Dr. H. M. Muir-Wood, 959
δ-Tocopherols (Pure α-, β-, γ- and), in the Growing Chick : Relative Rates of Liver Storage of (T. W. Griffiths), 1061
Demarteau-Ginsburgh, Dr. H., and others : Structure of Phthiocerol, 1117
Demerec, Dr. M. (Miyake, T., and) : *Salmonella–Escherichia* Hybrids, 1586
Demonstration of Endogenous Pyrogen in Serum during Systemic Tuberculin Reaction in Rabbits (Dr. J. Johanovsky), 693
Demonstration of Small Components in Red Cell Haemolysates by Starch-gel Electrophoresis (Dr. Phaedon Fessas and N. Mastrokalos), 1261
Demonstration (Histochemical), of A and B Antigens in Platelets (Dr. B. D. Jankovič and K. Arsenijevič), 695
Demonstration (Histochemical), of Lipase and Alkaline Phosphatase Activity in the Fat Body of the Desert Locust (J. C. George and J. Eapen), 268
Dempsey, Mary, and Green, G. H. : An Abnormality in the Skin of Sheep, 909
Denbigh, Prof. Kenneth G. (Beveridge, Gordon S. G., and) : High-Temperature Oxidation of Zinc Sulphide, 106
Dendrite Spines of the Cerebral Cortex : Electron Microscopy of Synaptic Contacts on (Dr. E. G. Gray), 1592
Denervation (Delayed), and Accessory Limb Formation in Urodeles (Dr. Laurens N. Ruben), 765
Dénes, Dr. G., and Polgár, L. : *T2* Phage Infection of 'Protoplasts' obtained by Penicillin Treatment of *Escherichia coli B*, 696
Denes, P. : The Mechanization of Thought Processes (Speech Recognition), 226
Dennis, Dr. S. C. R. : Appointed lecturer in engineering mathematics at Queen's University, Belfast, 1024
Dennis, S. M. : Isolation of a Lipopoly-saccharide from *Vibrio fetus*, 186
Dennison, A. : Automatic Reduction of Geophysical Data (Echo Method for the Exploration of Underground Geological Formations), 1167
Denotation : Truth and—a Study in Semantical Theory (Prof. R. M. Martin), *review* by F. I. G. Rawlins, 1628
Density of the Atmosphere at Heights between 200 km. and 400 km., from Analysis of Artificial Satellite Orbits (D. G. King-Hele), 1224
Density of Deoxyribonucleic Acids : Dependence of the, on Guanine–Cytosine Content (Heterogeneity in Deoxyribonucleic Acids, 2), (Dr. Noboru Sueoka, Dr. Julius Marmur and Prof. Paul Doty), 1429
Density of the Upper Atmosphere (Dr. George Grimminger), 811
  Irregularities in the—Results from Satellites (D. G. King-Hele and D. M. C. Walker), 527
Density of Water Sorbed on Montmorillonite (Dr. W. F. Bradley), 1614 ; (Dr. Robert C. Mackenzie), 1615
Density (Cohesive Energy), of Polystyrene (Dr. J. H. S. Green), 818
Density (Larval Population) : Influence of, on Fluctuation in Mosquito Numbers (Gordon Surtees), 269
Density-Dependent Factors in Ecology (Dr. H. G. Andrewartha), 200 ; (Prof. G. C. Varley), 911 ; (A. J. Nicholson), 911
Dentice di Accadia, F., and others : Penicillin Derivatives of *p*-Aminobenzylpenicillin, 180, *erratum*, 224

Denton, W. H. (Shaw, Dr. B., and) : Hydrogen Liquefaction and Associated Techniques (Storing Liquid Hydrogen), 1505
Denudation and Burial of Archaeological Structures (Formation by Section H of the British Association for the Advancement of Science of a special Committee to investigate the), 1233
2-Deoxy-D-glucose (Glucose Antimetabolite) : Inhibition of Influenza Virus Multiplication with a (Prof. Edwin D. Kilbourne), 271
Deoxyribonucleic Acid : Content of, of the Germinal Vesicle of the Primary Oocyte in the Rabbit (D. Van de Kerckhove), 329
  Distribution of Newly Synthesized, in Dividing Chromosomes (Philip S. Woods and Marie U. Schairer), 303
  Synthesis of, by Phage-infected *Escherichia coli* in the Presence of Mitomycin *C* (Dr. Matsuo Sekiguchi and Dr. Yasuyuki Takagi), 1134
Deoxyribonucleic Acid in *Bacillus cereus* growing synchronously out of Spores : Pattern of Synthesis of (Dr. I. Elizabeth Young and Prof. Philip C. Fitz-James), 372
Deoxyribonucleic Acid in *Esherichia coli* : Selective Inhibition of Formation of, by Mitomycin *C* (S. Shiba, A. Terawaki, T. Taguchi and Prof. J. Kawamata), 1056
Deoxyribonucleic Acid of Human Leukaemic Leucocytes : Incorporation of 5-Iodouracil labelled with Iodine-131 into the, following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131 (Dr. M. L. Eidinoff, L. Cheong, E. Gambetta Gurpide, R. S. Benua and R. R. Ellison), 1686
Deoxyribonucleic Acid in *L*-strain Fibroblasts : Variability of Content of (Rolla B. Hill, jun., Klaus G. Bensch, Stanley Simbonis and Prof. Donald W. King), 1818
Deoxyribonucleic Acid in the Silk Glands of the Spider *Nephila maculata* Fabr., 1763 : Amounts of (Prof. N. B. Inamdar and U. V. Wagh), 1541
Deoxyribonucleic Acid from various Tissues : Differences in Chromatographic Patterns of (Nobuko Kondo and Syozo Osawa), 1602
Deoxyribonucleic Acid Content of the Cell-Nuclei in the Adrenal Medulla after Exposure to Low Temperatures (L. Leeman), 1188
Deoxyribonucleic Acid (Irradiated) : Electron Spin Resonance in (Dr. J. W. Boag and A. Müller), 831
Deoxyribonucleic Acids : Dependence on Composition of the Configurational Stability of (Heterogeneity in Deoxyribonucleic Acids, 1), (Dr. Julius Marmur and Prof. Paul Doty), 1427
  Dependence of the Density of, on Guanine–Cytosine Content (Heterogeneity in Deoxyribonucleic Acids, 2), (Dr. Noboru Sueoka, Dr. Julius Marmur and Prof. Paul Doty), 1429
  Heterogeneity in—1, Dependence on Composition of the Configurational Stability of Deoxyribonucleic Acids (Dr. Julius Marmur and Prof. Paul Doty), 1427 ; 2, Dependence of the Density of Deoxyribonucleic Acids on Guanine–Cytosine Content (Dr. Noboru Sueoka, Dr. Julius Marmur and Prof. Paul Doty), 1429
Deoxyribonucleotides (Pyrimidine) : Effect of, on the Regeneration of Bone-Marrow in Irradiated Mice (Dr. Z. Karpfel, J. Soška and V. Drášil), 1600
Dependence on Composition of the Configurational Stability of Deoxyribonucleic Acids (Heterogeneity in Deoxyribonucleic Acids, 1), (Dr. Julius Marmur and Prof. Paul Doty), 1427
Dependence of the Density of Deoxyribonucleic Acids on Guanine–Cytosine Content (Heterogeneity in Deoxyribonucleic Acids, 2), (Dr. Noboru Sueoka, Dr. Julius Marmur and Prof. Paul Doty), 1429
Dependence of the Heat Resistance of Bacterial Endospores on their Dipicolinic Acid Content (Brooks D. Church and Harlyn Halvorson), 124
Deposition (Electrolytic), of Beryllium (Dr. I. A. Menzies, D. L. Hill and L. W. Owen), 816
Deposits (Managanese-rich), of the Sea Floor : Biological Origin of (John W. Graham and Susan C. Cooper), 1050
Depression in Percentage of Milk Fat by Parenteral Glucose Infusion and Glycerol Feeding (W. S. Vallance and Prof. G. L. McClymont), 466
Derivatives : Bromination of Nucleic Acids and their (A. S. Jones and D. L. Woodhouse), 1603
Derivatives (Penicillin), of *p*-Aminobenzyl-penicillin (A. Ballio, Prof. E. B. Chain, F. Dentice di Accadia, Dr. G. N. Rolinson and F. R. Batchelor), 180, *erratum*, 224
Derivatives (Polyphenyl), of the Elements of Groups IV*b* and V*b* : Infra-red and the Near Ultra-violet Absorption Spectra of (Dr. C. N. R. Rao, J. Ramachandran, M. S. C. Iah, S. Somasekhara and T. V. Rajakumar), 1475
Derivatives (Reserpine), with Specific Hypotensive or Sedative Activity (S. Garattini, A. Mortari, A. Valsecchi and L. Valzelli), 1273
Derivatographic Investigation of the Anthracite of the Don (M. Weltner), 1254
Desalting and Group Separation : Gel Filtration—a Method for (Dr. Jerker Porath and Dr. Per Flodin), 1657
Desborough, Sharon, and others : Chromosome Maps of *Saccharomyces*, 800
Desert Locust : Function of certain Prothoracic Hair Receptors in the (Hair Receptors in Locusts), (Dr. P. T. Haskell), 1107
  Histochemical Demonstration of Lipase and Alkaline Phosphatase Activity in the Fat Body of the (J. C. George and J. Eapen), 268
Desert (Libyan) Silica-Glass : Origin of (Dr. Alvin J. Cohen), 1548
Design : Missile Engineering, *review*, 210
Design of Magnetic Amplifiers : The Theory and (Dr. E. H. Frost-Smith), *review* by J. G. Henderson, 1627
Design of Office Chairs and Tables : Anatomical, Physiological and Anthropometric Principles in the (Dr. W. F. Floyd and Dr. D. F. Roberts), 1022
Design for Tropical Living (Report of the Symposium on, prepared by the National Building Research Institute of the South African Council for Scientific and Industrial Research), 1022
Design (Plant) : Instrumentation and Computation in Process Development and (Institution of Chemical Engineers, the Society of Instrument Technology and the British Computer Society Joint Symposium on), 652
Desorption of Moisture in Fired Ceramic Materials : Adsorption and (F. Vaughan and A. Dinsdale), 600
Destruction of Cortisone and related Steroids by Traces of Copper during Purification Procedures (Marvin L. Lewbart and Vernon R. Mattox), 820
Destruction (Chemical), of Mature Perithecia of *Mycosphaerella pinodes* (M. V. Carter), 162 ; *erratum*, 438
Desty, D. H., and others : Separation of *m*-Xylene and *p*-Xylene by Gas Chromatography, 107
Desulphovibrio desulphuricans : A Diagnostic Reaction of (Dr. John Postgate), 481
Deszyck, Dr. E. J. (Ting, Dr. S. V., and) : Isolation of *l*-Quinic Acid in Citrus Fruit, 1404
Detachment of Conidia by Cloud Droplets (Dr. R. R. Davies), 1695
Detecting Power (Magnetic), of Iron-cored Search Coils : Improvement in the (D. F. Walker), 173
Detecting Volatile Airborne Droplets (K. R. May), 742
Detecting and Evaluating Optical Radiation : Modern Systems for (International Commission for Optics Symposium on), 1571
Detection of Antigens as Specific Precipitates on Paper Electrophoresis Strips (S. Buttery), 686
Detection of Carriers in Hereditary Galactosaemia (Dr. Herman M. Kalckar), 1266
Detection of Gentiobiose and Sophorose in Cultures of certain Micro-organisms growing in Defined Glucose-containing Media (A. W. Khan, D. N. Pellegrino and Prof. T. K. Walker), 682
Detection of Heterozygous Carriers in Glycogen Storage Disease of the Liver (von Gierke's Disease), (Dr. David Yi-Yung Hsia and Eva Gawronska Kot), 1331
Detection of Hydroxyl Groups in Porphyrins and Chlorins (J. Barrett), 1185
Detection of Keto-Acids (Dr. F. Dobinson), 675
Detection of Meprobamate on Paper Chromatograms (H. S. Bedson and T. H. Farmer), 43
Detection of Phosphate Ester Spots on Paper : Ultra-violet Fluorescence of Quinine Sulphate for (Dr. Edward S. Rorem), 1739
Detection of Sialic Acid in various *Escherichia coli* Strains and in other Species of Bacteria (Prof. Guy T. Barry), 117
Detection and Estimation of Benzenoid Compounds by Chromatography (P. Moss and A. J. Thomas), 1611
Detector (Thermal-conductivity), in Gas Chromatography : Effect of the Carrier Gas on the Sensitivity of a (L. J. Schmauch and R. A. Dinerstein), 673 ; (Dr. N. H. Ray), 674
Detectors (Thermal Conductivity), in Gas Chromatography : Effect of the Carrier Gas on the Sensitivity of (Dr. B. A. Scott and Dr. A. G. Williamson), 1322
Detergence : The Mechanism of (Dr. A. S. C. Lawrence), 1491
Detergent Chemistry : Some Alkyl-Aryl Sodium Sulphonates as Standard Substances in (E. Q. Laws and W. Hancock), 1473
Detergents, Textiles and Dyes (Textile Institute, in collaboration with the Branded Textiles Group Conference on), 1236
Determination of Aldosaccharides in Body Fluids : Rapid Specific Method for (Dr. Eric Hultman), 108
Determination of Aspartic and Glutamic Acids : Rapid Quantitative Horizontal Paper Chromatography at an Elevated Temperature—(Henry R. Roberts and Michael G. Kolor), 460
Determination of Chlorine : A Spectrophotometric Method for the (Zd. Spurny), 1390
Determination of Galactosediethylmercaptal and 3,6 Anhydrogalactosediethylmercaptal with the Anthrone and Seliwanoff Reagents (W. Yaphe), 44
Determination of Human Urinary Œstrogens : A Simplified Physico-chemical Method for (Dr. Tawfik El-Attar), 1607
Determination of its Lethal Dose : Effect of the Rate of Elimination of Digoxigenin in the Guinea Pig on the (M. Rand and Anne Stafford), 688
Determination of Molecular Weights of Polysaccharides by Over-oxidation with Periodate (F. W. Parrish and Dr. W. J. Whelan), 991
Determination of Nitrogen in Proteins by means of Indanetrione Hydrate (Dr. S. Jacobs), 262
Determination of Transaminase Activity in Dogs' Serum and Lymph after Hepatic Damage due to Acute Biliary Obstruction (Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 48
Determination of the Yields of Molecular Hydrogen Peroxide in the Radiolysis of Water labelled with Oxygen-18 (Dr. J. D. Backhurst, Dr. G. R. A. Johnson, Dr. G. Scholes and Prof. J. Weiss), 176
Determination (Amperometric), of Sulphydryl Content of Blood and Tissues (Dr. S. K. Bhattacharya), 1327
Determination (Direct), of Drug Concentrations in Biological Fluids by Polarography (Dr. P. O. Kane), 1674
Determination (Micro), of Calcium (A. B. Gilbert), 888, 1754
Determination (X-Ray Spectrographic), of Strontium (J. T. Campbell and H. I. Shalgosky), 1481
Determining the Concentration of Ammonium Sulphate Solutions : A Rapid Method for (Dr. John A. Whitaker and Dr. Robert Hughes), 603
Determining the Displacement and Velocity of a Piston in a Hypersonic Gun Tunnel : A Microwave Method of (L. Pennelegion), 246
Determining the Duration of Antibody Formation by Transferred Cells : Presence of Antigen—a Factor (Dr. J. Sterzl), 547
Detonation : Suppressed Light Emission of the Reaction Zone in (Prof. C. H. Johansson and L. Sternhoff), 247
Detonation (Advance), in a Tubular Charge of Explosive (Dr. D. W. Woodhead), 1756
Dettbarn, Dr. Wolf D. : Distinction between Sodium and Potassium in Change in Permeability effected by Lipid-Soluble Analogues of Acetylcholine, 465
Deutsch, Dr. J. A., and Clarkson, J. K. : Nature of the Vibrato and the Control Loop in Singing, 167
Deutsch, Dr. J. A., and Jones, A. D. : The Water–Salt Receptor and Preference in the Rat, 1472
Deutsche Akademie der Naturforscher Leopoldina : Election of new Members, 652
Dev, Sukh (Bose, Dr. M. N., and) : Occurrence of Two Characteristic Wealden Ferns in the Jabalpur Series, 130
Development of Autumn Colour and Leaf-fall of Deciduous Woody Plants : Effect of Gibberellic Acid on (Dr. P. W. Brian, J. H. P. Petty and P. T. Richmond), 58
Development in Britain : Scientific Man-power and, 67
Development of Electric Cables (S. E. Goodall), 226 ; (Prof. James Greig), 226
Development in a Mutelid Lamellibranch (Dr. G. Fryer), 1342
Development of Ovarial Teratomas in Viviparous Toothcarps by Pathological Parthenogenesis (Prof. A. Stolk), 763

Development of Resistance against Fluorouracil in Ascites Tumours : Possible Enzymic Mechanism for the (Dr. Peter Reichard and Ola Sköld, and Prof. George Kein), 939
Development of Shoot Buds on the Protonema of (*Pohlia nutans*: Effects of Kinetin, Gibberellic Acid and certain Auxins on the (Dr. G. C. Mitra and Dr. A. Allsopp), 974
Development of the Steel Industry (Political and Economic Planning, Broadsheet No. 428), 222
Development of Tumours : Cell Growth and the (Anna Kane Laird and A. D. Barton), 1655
Development Commissioners, in association with the Ministry of Agriculture, Fisheries and Food, and the Scottish Home Department : Postgraduate Training Grants in Fishery Research, 1094
Development and Genetic Assimilation of Acquired Characters : Canalization of (Prof. C. H. Waddington), 1654
Development and Welfare Bill, Colonial : Second reading of the, 793
Development (Abnormal), of the Basis in *Balanus amphitrite* var. *stutsburi* Darwin (Dr. H. G. Stubbings), 1282
Development (Mycorrhiza), on Fly Ash : Forest Seedlings and (A. Sobotka and J. Materna), 1066
Development (Process), and Plant Design : Instrumentation and Computation in (Institution of Chemical Engineers, the Society of Instrument Technology and the British Computer Society Joint Symposium on), 652
Development (Scientific Research and), in Colleges and Universities—Expenditure and Manpower, 1953-54 (National Science Foundation), 1717
Development (Scientific and Engineering Research and), in British Manufacturing Industry (1955) : Estimates of Resources devoted to (Department of Scientific and Industrial Research), 847
Developmental Cycle in Domestic Groups (edited by Dr. Jack Goody), *review* by Dr. Rodney Needham, 1625
Developments in Adult Education, *review* by T. H. Hawkins, 1419
Developments in Photoelasticity—Commemoration at University College, London (Prof. R. E. D. Bishop), 1495
Developments in Plant Physiology : Recent, *review* by Prof. W. Stiles, 1703
Developments (Current), in the Production of High Vacua (Institute of Physics Symposium on), 368
Devices : Dielectric (Electrical Engineering Department of the University of Birmingham Residential Conference on), 1783
Devil's Repertoire or Nuclear Bombing and the Life of Man (Victor Gollancz), *review* by R. Brightman, 952
Devonian (Upper) Spirifers of the Catskill Delta, *review* by Dr. H. M. Muir-Wood, 959
Dew-Hughes, D., and Robertson, W. D. : Interfacial Phenomena (Mechanism of Hardening in Aluminium–Copper Alloys), 1099
Dewar, Prof. M. J. S. : Chemistry in Schools, *review*, 566
Dewey, D. L., and Boag, Dr. J. W. : Modification of the Oxygen Effect when Bacteria are given Large Pulses of Radiation, 1450
Dexter Award for 1959 of the American Chemical Society awarded to Prof. John Read, 1304
Dextran Sulphate labelled with Carbon-14 : Synthesis of, and Tracer Experiments in the Rat (Dr. H. Weigel and Dr. K. Walton), 981
Dhar, Prof. N. R. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
  Obituary of Sir J. C. Ghosh, 645
Di Sabato, Dr. G. : Effect of Reduced Diphosphopyridine Nucleotide on the Swelling of Isolated Mitochondria, 997
Di-*n*-butyl Phosphate : Separation of Mono-*n*-butyl Phosphate and, by means of Ion Exclusion (E. Cerrai and F. Gadda), 1528
Diabetes Insipidus : Chlorothiazid in (Dr. J. D. Crawford and Dr. G. C. Kennedy), 891, 1368
Diagnostic Feature of *T. vavilovi* : An Induced Mutant in *Triticum carthlicum* with the (Z. Barabás, jun.), 1349
Diagnostic Performance Tests (Boris Semeonoff and Eric Trist), *review* by Prof. O. L. Zangwill, 1767
Diagnostic Reaction of *Desulphovibrio desulphuricans* (Dr. John Postgate), 481
Diamant, Herman (Zotterman, Prof. Yngve, and) : Has Water a Specific Taste ?, 191
Diamond, Prof. J. : Nuclear Fuel Cycles, 1648
Diamond : Absolute Measurement of the Intensity of the (111) Reflexion for (Prof. R. Brill and H. Zandy), 1387
Diapause : Control of, by an 'Internal Clock' in *Anthrenus verbasci* (L.) (Col., Dermestidae), (G. M. Blake), 126
Diapause Embryos of *Acheta commodus* W. : A Rapid Method for examining (T. W. Hogan), 269
Diaphragm (Rat) : Influence of Ions on the Uptake of Glucose and on the Effect of Insulin on it by (Dr. Gangagobinda Bhattacharya), 324
Diaphragms of Hypophysectomized Rats : *In vitro* Effects of Insulin and Glucose on Leucine-2-^{14}C Incorporation into Protein of (Dr. J. L. Kostyo), 1518
Diathesis : Hyperglobulinaemic Thrombo-Haemorrhagic (Dr. Henry H. Henstell and Miriam Kligerman), 978
Diatomic Band Spectra : Changes in Transition Probability due to the Interaction of Rotation and Vibration in (R. C. M. Learner and Dr. A. G. Gaydon), 242
Dibromide (β-Aminoethyl*iso*thiouronium) : Anti-Thyroid Action of, in Rats (John Osmer, Dr. Robert B. Jennings and Dr. Robert M. Dowben), 470
2,4-Dichlorophenoxyacetic Acid : Spraying of Barley with (E. L. Leafe), 621
Dick, Prof. J. : *Obituary* of Prof. A. R. Fulton, 505
Dicke, Prof. R. H. : Dirac's Cosmology and the Dating of Meteorites, 170
Dickens, P. G., and others : Use of Approximate Wave Functions for Extrapolation to True Energy Values, 175
Dicobalt Octacarbonyl at Elevated Temperature and Carbon Monoxide Pressure : Behaviour of (Sol Metlin, Irving Wender and Heinz W. Sternberg), 457
Dictionary (Oxford English) : Books required for the, 1434
Dictionary of Physics (compiled and edited by H. J. Gray), *review* by Prof. H. Lipson, 1768
Dictynidae (The Spider Family), in America North of Mexico (Prof. Ralph V. Chamberlin and Willis J. Gertsch), 1170
Dictyocotyle and *Calicotyle* : Relationship between (Dr. J. Llewellyn), 835 ; (Dr. Ben Dawes and Dr. Ivor Griffiths), 835
Diecke, F. P. J., and others : Pattern of Recurrent Conditioning of Spinal Reflexes, 824
Dieldrin in Trinidad : Resistance of *Anopheles aquasalis* Curry to (T. A. Omardeen), 131
Dieldrin Resistance in *Lucilia cuprina* Wied. : Genetics of (G. J. Shanahan), 1540
Dielectric Constant of the Interior of Erythrocytes : Electrical Conductance and (H. Pauly), 333
Dielectric Devices (Electrical Engineering Department of the University of Birmingham Residential Conference on), 1783
Dielectric Properties (Microwave), of Indian Shellac in the 8-mm. Range (Dr. S. S. Srivastava and Dr. D. D. Puri), 37
Diet : A Relationship between some Bacteria, Protozoa and, in Early Weaned Calves (J. Margaret Eadie, Dr. P. N. Hobson and S. O. Mann), 624
Diet (Protein-free) : Effect of, on the Vitamin A Storage in the Rat Liver (M. Rechcigl, jun., S. Berger, J. K. Loosli and H. H. Williams), 1597
Dietary Change in *Harmolita hyalipenne* Walker : Facultative Parasitism and (R. Bailey), 341
Dietary Cod-liver Oil and some Fractions of Cod-liver Oil : Influence of, on Serum Cholesterol-level of Rats (A. P. de Groot and S. A. Reed), 1191
Dietary Necrotic Liver Degeneration : Ineffectiveness of Molybdenum, Osmium and Cobalt in (Dr. Klaus Schwarz, Edward E. Roginski and Calvin M. Foltz), 472
Dietary Phytate : Effect of, on Faecal Absorption of Radioactive Ferric Chloride (Dr. Henry Foy, Athena Kondi and W. H. Austin), 691
Dietary Protein : Effect of, on the Severity of Experimental Mouse Hepatitis (Dr. Boris Ruebner and James L. Bramhall), 609
Diethyl Acetamidomalonate : Asymmetric Hydrolysis of, by Chymotrypsin (Prof. Saul G. Cohen and Lucille Altschul), 1678
Diethyl Sulphate and Labelled Sulphuric Acid : Exchange Reaction induced by Radiation between—a Possibly Ionic Reaction (Dr. Paul Y. Feng and Ahren Jacobson), 251
Diethylamide (Lysergic Acid) : Quantitative Measurement of the Effect of, on Mice and its Interactions with other Drugs (Dr. J. R. Smythies), 545
Difference between Cosmic-Ray Equator and the Geomagnetic Dip Equator (Takashi Oguchi and Masahiro Kodama), 103
Difference (Reciprocal) : Assortative Mating and, in the Blue–Snow Goose Complex (Dr. F. G. Cooch and Dr. J. A. Beardmore), 1833
Difference Equations : Introduction to, with Illustrative Examples from Economics, Psychology and Sociology (Prof. Samuel Goldberg), *review* by Dr. L. S. Goddard, 970
Differences in Chromatographic Patterns of Deoxyribonucleic Acid from various Tissues (Nobuko Kondo and Syozo Osawa), 1602
Differences in Cyst(e)ine Content between Vegetative Cells and Spores of *Bacillus cereus* and *Bacillus megaterium* (Vladimir Vinter), 998
Differences in Mechanism in Staining Reactions for Mast Cells (Dr. Harold M. Fullmer), 1274
Differences between Self-Incompatibility and Self-Sterility (J. S. Bubar), 411
Differences (Small), in Length of Day : Response of Rice to (Dr. E. Njoku), 1598
Different Combinations of Chance and Skill in Gambling : Preferences for (Prof. John Cohen and C. E. M. Hansel), 841
Differential Distribution of Radioactive Strontium and Yttrium in the Tissues of the Rabbit's Eye (R. H. Mole, Antoinette Pirie and Janet M. Vaughan), 802
Differential Effect of Phenothiazines on Oxidative Phosphorylation (J. D. Judah, Dr. K. R. Rees and M. J. R. Dawkins), 821
Differential Equations : Boundary Problems in (Mathematics Research Center, United States Army, Symposium on, at the University of Wisconsin), 224
Differential Fungicidal Effect : 'Karathane'—the value of its, in relation to Mildew and Yellow Rust of Wheat (D. A. Doling and Shirley Hepple), 622
Differential Reaction to Saprophytic and Parasitic Soil-inhabiting Fungi to Indoleacetic Acid (E. W. B. Ward and Prof. A. W. Henry), 1064
Differential Response of Human Serum Cholinesterase Types to an Inhibitor in Potato (Dr. H. Harris and Mary Whittaker), 1808
Differential Response of Male and Female Adults fo *Trogoderma granarium* Everts towards Sterilizing Doses of Gamma-radiation (G. C. Carney), 338
Differentiation (Biochemical), of Group *A* and 'Human *C*' *Streptococci* (R. W. Henningson), 182
Differentiation (Population), within Plant Species in Response to Soil Factors (A. D. Bradshaw and R. W. Snaydon), 129, *erratum*, 368
Differentiation (Strain), in a Root-infecting Fungus (Dr. Ida Levisohn), 1065
Diffraction (Neutron), at a High-Flux Reactor (Dr. G. E. Bacon and R. F. Dyer), 35
Diffraction (X-Ray) : Fourier Transforms and (Prof. H. Lipson and Dr. C. A. Taylor), *review* by Dame Kathleen Lonsdale, 969
Diffraction Lines (X-Ray), in Teeth affected by Fluorine : Broadening of the (Mrs. E. A. Scott and Dr. F. H. Scott), 479
Diffraction Measurement (X-Ray), of Radiation Damage in Stretched Rubber (Wesley E. Shelberg and Lewis H. Geventman), 456
Diffraction Patterns (X-Ray), from the Egg Membrane of the Egg of the Brook Trout (Dr. Mamoru Kusa and Tsuguyasu Wada), 410
Diffusion and Extraction Studies across the Liquid–Liquid Interface : An Experimental Method for (Dr. Thomas W. Martin), 312
Diffusion Methods (Gel) : Estimation of the Size of Antigens by (Dr. A. C. Allison and Dr. J. H. Humphrey), 1590
Diffusion Plates (Agar) : Photographic Recording of (J. R. Hunter), 1283
Diffusion (Immuno-) : Cellulose Acetate as a Medium for (R. Consden and J. Kohn), 1512
Difluorophosphate and Fluoroborate Ions (Monofluorosulphonate,) : Effect of, on the Iodine Uptake of the Thyroid Gland (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Digenetic Trematodes : Classification of the, *review* by Dr. Ben Dawes, 957
Digestion (Anaerobic) : Gas–Chromatographic Observation of the Reduction of Carbon Dioxide to Methane during (J. Chmielowski and Peter C. G. Isaac), 1120
Digital Computer (Electronic) : The Preparation of Programs for an (Dr. Maurice V. Wilkes, Dr. David J. Wheeler and Dr. Stanley Gill), second edition, *review* by E. L. Albasiny, 969
Digital Computers : Automatic Programming of (Brighton Technical College Residential Working Conference on), 438, 1779
Digital Computers (Electronic), and their Industrial Applications (Conference at the Birmingham College of Technology), 154

Digitizers and other Equipment for Data Processing (Hilger and Watts, Ltd.), 651
Digoxigenin in the Guinea Pig : Effect of the Rate of Elimination of, on the Determination of its Lethal Dose (M. Rand and Anne Stafford), 688
Dihydrobromide (1,6-Di-(2-Bromoethylamino)-1,6-Dideoxy-D-Mannitol)—a New Cytostatic Agent (L. Vargha and T. Horváth), 394
Dihydrobromide (1,6-Di-(2-Bromoethylamino)-1,6-Dideoxy-D-Mannitol) : Effect of, on Tumours of Laboratory Animals (Prof. J. Baló, G. Kendrey, J. Juhász and I. Besznyák), 395
Dihydrodiphosphopyridine Nucleotide : Structure of (Sidney Shifrin and Dr. Nathan O. Kaplan), 1529
Dihydrogen (Ammonium) Phosphate Crystals : Effect of Tartar Emetic on the Growth of (Yutaka Kunisaki), 105
Dijkgraaf, Prof. S. : The Ear under Water (Hearing in Bony Fishes), 1788
Dijksterhuis, Prof. E. J. : Le Système du Monde, *review*, 964
β-Diketones : Metal–Oxygen Stretching Frequencies in the Metal Chelate Compounds of (Kazuo Nakamoto, Paul J. McCarthy and Arthur E. Martell), 459
Dikshit, P. K. : Influence of Vitamin D on Synthesis of Hexosamine by Rachitic Rat Cartilage, 334
Dillinger, Joseph R. (edited by) : Low Temperature Physics and Chemistry—Proceedings of the Fifth International Conference on Low Temperature Physics and Chemistry, Madison, 1957, *review* by Dr. K. Mendelssohn, 1150
Dilution Series (Exponential), for the Study of Antibiotic Combinations : Application of Logarithms to the Base 2 in the Use of (H. J. Oskam and A. Koelman), 840
Dimensionless Groups : Correlation of Sedimentation-Rates by (Colin Harris), 530
Dimensions (Cell) : Variation in Etch Behaviour of Jacobsite with Different (Dr. Supriya Roy), 1256
Dimensions (Peak), in Gas Chromatography (C. H. Bosanquet), 252
1:4-Dimethanesulphonyloxybutane : Metabolism of Myleran (Dr. J. J. Roberts and Dr. G. P. Warwick), 1509
Dimethylaniline : Kinetic Isotope Effect in the Bromination of (P. G. Farrell and Dr. S. F. Mason), 250
Dimethyl Ether : Stable Configuration of Methyl Groups in (Katsumi Kimura and Masaji Kubo), 533
Dimethyl Sulphoxide : Prevention of Freezing Damage to Living Cells by (Dr. J. E. Lovelock and Dr. M. W. H. Bishop), 1394
Dineley, D. L., and Garrett, P. A. : Whale Remains in Glacier Ice, 272
Dinerstein, R. A. (Schmauch, L. J., and) : Effect of the Carrier Gas on the Sensitivity of a Thermal-conductivity Detector in Gas Chromatography, 673
Dingle, Prof. Herbert : A Possible Experimental Test of Einstein's Second Postulate, 1761
Dingle, J. T. (Thomas, D. P. Page, and) : Entropy and Synovial Pathology, 543
Dingman, Wesley, and others : Formation of Urea from Arginine in the Brain of the Living Rat, 1520
Dingwall, Dr. Eric J., and Hall, Trevor H, : Four Modern Ghosts, *review* by Dr. D. J. West, 351
2,4-Dinitrophenol : Thyroxine-releasing Effect of Salicylate and of (Dr. L. Korsgaard Christensen), 1189
2:4-Dinitrophenol and other Agents : Effects of, on the Swelling of Isolated Mitochondria (Dr. J. B. Chappell and Dr. G. D. Greville), 1737
Dinsdale, A. (Vaughan, F., and) : Adsorption and Desorption of Moisture in Fired Ceramic Materials, 600
Dioxide (Carbon) : Gas–Chromatographic Observation of the Reduction of, to Methane during Anaerobic Digestion (J. Chmielowski and Peter C. G. Isaac), 1120
Dioxide (Carbon), in *Kalanchoe blossfeldiana* : Dark Fixation of, in relation to Photoperiodism (Dr. G. Zabka, Prof. F. G. Gregory and Dr. J. Edelman), 1375
Diphenylamine : Effects of Starvation and, on Carotenoids in *Phycomyces* (T. N. R. Varma, Prof. C. O. Chichester and G. Mackinney), 188
Diphosphate (Adenosine) : Interaction of Magnesium and, in Photosynthetic Phosphorylation (J. B. Mudd), 900
Diphosphopyridine Nucleotidases : Mechanism of Action of (Prof. Spyridon G. A. Alivisatos), 1034
Diphosphopyridine Nucleotide : Effect of Reduced, on the Swelling of Isolated Mitochondria (Dr. G. Di Sabato), 997
  Reduced-Neotetrazolium Reductase (Dr. T. F. Slater), 1679
Dipicolinic Acid Content : Dependence of the Heat Resistance of Bacterial Endospores on their (Brooks D. Church and Harlyn Halvorson), 124
Dipolar Broadening of Nuclear Magnetic Resonance Spectra of Solids : Removal of, by Specimen Rotation (Prof. E. R. Andrew, A. Bradbury and R. G. Eades), 1802
Dirac's Cosmology and the Dating of Meteorites (Prof. R. H. Dicke), 170
d.c. Fields near Breakdown : Light Emission from Insulating Liquids due to Excitation by (M. Darveniza), 743
Direct-Current Plasma-heating Mechanism : A Non-Thermal (Daryl Reagan), 102
Direct Determination of Drug Concentrations in Biological Fluids by Polarography (Dr. P. O. Kane), 1674
Direct Examination of the Degradation of High Polymers by Gas Chromatography (Dr. R. S. Lehrle and Prof. J. C. Robb), 1671
Direct Recording of Column Chromatograms : Adaptation of a Photometer for the (Prof. M. Verzele), 604
Directions of Air Shower Particles : Multiple Geiger Counter Telescope Measurements of the (Dr. H. D. Rathgeber), 386
Directory of Natural History and other Field Studies (British Association for the Advancement of Science), 1723
Disarmament : Nuclear, 1351
Disarmament (Nuclear) : The Vienna Declaration and, 1303
Disarmament (World) : The Arms Race, a Programme for (Philip Noel-Baker), *review* by R. Brightman, 952
Discharge (Electrical) : Effects of Arc Stage of, on Ignition of Inflammable Gas (I. Berz), 669 ; (W. Nethercot and H. G. Riddlestone), 669
Discharge (Electrodeless) : Some Experiments with an (J. K. Wright, W. T. Eeles and J. D. Herbert), 1665
Discharge (Gas) : Alfvén Waves in a (D. F. Jephcott), 1652
Discharges : Electrical (Dr. J. Dutton and Dr. E. Jones), 91
  Gas (Physical Society Conference on), 91
Discharges (Electrical) : Effect of Cathode Inclusions on (P. C. L. Pfeil and L. B. Griffiths), 1481
Discoloration of Wool Fibres by a Fungus (A. P. Mulcock), 1281
Discovery (Scientific) : The Logic of (Prof. Karl R. Popper), *review* by Dr. E. H. Hutten, 1078
  Tools of (City Literary Institute, London, Course of Science Lectures), 18
Discrepancy between the Distributions of Iodine in Human Serum when estimated by Iodine-131 and Iodine-127 (Dr. Sidney C. Werner and Dr. Richard J. Block), 406, *erratum*, 722
Discussion : Rational, *review* by Dr. E. H. Hutten, 1078
Disease : Biological Aspects of the Transmission of—Report of the Institute of Biology Symposium (edited by C. Horton-Smith), *review* by Dr. C. W. Dixon, 1221
  Phenolics in Plants in Health and (Plant Phenolics Group Symposium on), 510
Disease of Cacao (Witch Broom) : Absence of Gibberellin-like Substances in Filtrates of *Marasmius perniciosos* Stahel (W. F. Dudman and R. Nichols), 899
Disease (Foot-and-Mouth) : Changes in Specificity and Electrophoretic Mobility of the Precipitating Antibodies present in the Serum of Cattle recovering from (F. Brown and J. H. Graves), 1688
Disease (Glycogen Storage), of the Liver (von Gierke's Disease) : Detection of Heterozygous Carriers in (Dr. David Yi-Yung Hsia and Ena Gawronska Kot), 1331
Disease (Lumpy Skin), of Cattle in Kenya (M. L. Burdin and J. Prydie), 949
Disease (Vascular Wilt), of Bananas caused by *Fusarium oxysporum* f. *cubense* (R. H. Stover), 1782
Disease (von Gierke's) : Detection of Heterozygous Carriers in Glycogen Storage Disease of the Liver (Dr. David Yi-Yung Hsia and Eva Gawronska Kot), 1331
Diseases : Infectious, *review* by Prof. P. C. C. Garnham, 352
Diseases of the Blood : Research on (Lady Tata Memorial Trust Grants, Scholarships and Fellowships for), 581
Diseases of Domestic Animals in New Zealand (prepared by the Technical Committee of the New Zealand Veterinary Association, Inc.), *review* by Dr. J. N. Oldham, 967
Diseases (Facial Eczema), in Sheep : A Hepatotoxin from *Sporidesmium bakeri* capable of producing (Dr. R. H. Thornton and J. C. Percival), 63
Diseases (Hemophilioid) : Hemophilia and—International Symposium (edited by Prof. Kenneth M. Brinkhous), *review* by Prof. J. V. Dacie, 1221
Diseases (Murine Virus) : Sparing Effect of Serum from Mice treated with Endotoxin upon certain (A. W. Gledhill), 185
Diseases (Parasitic) : Chemotherapy of (Parasitology Group of the Institute of Biology Discussion on), 1029
Disilicides (Uranium and Thorium) : Beta-Polymorphs of (A. Brown and J. J. Norreys), 673
Disinfection and Sterilization (G. Sykes), *review* by Dr. A. M. Cook, 277
Disitzer, L. V., and others : Electrophoretic Heterogeneity of Trypsin, 605
Dislocation : Precipitation on a (R. Bullough, R. C. Newman, J. Wakefield and J. B. Willis), 34
Disney, Virgil H. : Elected president of the United States National Electronics Conference for 1959, 582
Disorders (Allergic) : Immunological Aspects of (British Society for Immunology and the British Association of Allergists Symposium on), 296
Dispersal of New Zealand Gannets : Migration and (Kazimierz Wodzicki and Peter Stein), 1790
Dispersion Wave-lengths (Infra-red), for Solid Lithium Fluoride containing varying Proportions of Lithium Isotopes (Prof. D. J. Montgomery and R. H. Misho), 103
Displacement (Horizontal), along Faults in the Ocean Floor : Measurement of (Dr. Victor Vacquier), 452
Displacement and Velocity of a Piston in a Hypersonic Gun Tunnel : A Microwave Method of determining the (L. Pennelegion), 246
Disposal of Radioactive Waste, 437
Disputa Leibniz–Newton sull'Analisi (translated into Italian by Dr. G. Cantelli), *review* by L. Roth, 1081
Dissociated Nystagmus in the Rabbit (Dr. J. Lachmann and Prof. F. Bergmann), 1065
Distance (Radial), of 107,400 km. : Radiation around the Earth to a (Prof. James A. Van Allen and Louis A. Frank), 430
Distilled Water : A Source of Error in Microbiological Assays attributable to a Bacterial Inhibitor in (S. A. Price and L. Gare), 838
Distinction between Sodium and Potassium in Change in Permeability effected by Lipid-soluble Analogues of Acetylcholine (Dr. Wolf D. Dettbarn), 465
Distinguishing Samples labelled with Phosphorus-32 and Sulphur-35 : An Autoradiographic Method for (Dr. W. G. Duncombe), 319
Distinguishing between Substances shown on Electron Micrographs : The Possibility of (Dr. Robin C. Valentine), 761
Distorted Sounds : Unpleasantness of—a Criterion derived from the Distortion Spectrum (E. R. Wigan), 1320
Distortion Spectrum : Unpleasantness of Distorted Sounds—a Criterion derived from the (E. R. Wigan), 1320
Distribution of Alkaline Phosphatase in the Arteries of several Species (Dr. Manuel René Malinow, Martha A. Fernandez, Alvaro L. Gimeno and Grato E. Bur), 1262
Distribution of Haptoglobins in Native Venezuelans (Dr. M. L. Gallango de Rodríguez and Dr. Tulio Arends), 1465
Distribution of 5-Hydroxytryptamine in Scorpion Venoms (Dr. K. R. Adam and Dr. C. Weiss), 1398
Distribution of Kappa-Casein in Skim Milk (Royal A. Sullivan, Margaret M. Fitzpatrick and Elizabeth K. Stanton), 616
Distribution of Melanophore-aggregating Hormone in the Pituitary of the Minnow (A. K. Kent), 544
Distribution of Newly Synthesized Deoxyribonucleic Acid in Dividing Chromosomes (Philip S. Woods and Marie U. Schairer), 303
Distribution (Differential), of Radioactive Strontium and Yttrium in the Tissues of the Rabbit's Eye (R. H. Mole, Antoinette Pirie and Janet M. Vaughan), 802
Distribution (Nutrition, Food and Beverage Technology and), 1936-56 : Bibliography of Food—a Select International Bibliography of (E. Alan Baker and D. J. Foskett), *review* by Dr. Magnus Pyke, 351, 582
Distribution (Size), of Tobacco Smoke Particles (Elaine Harris and Dr. H. F. Kay), 741
Distributions of Iodine in Human Serum : Discrepancy between the, when estimated by Iodine-131 and Iodine-127 (Dr. Sidney C. Werner and Dr. Richard J. Block), 406, *erratum*, 722

Distributions (Molecular Weight) : Characterization of, by a Viscometric Method (Dr. P. F. Onyon), 1670
Disturbance in the Pattern of Serum Proteins in Experimental Atherosclerosis and its Prevention (Prof. M. C. Nath, A. Saikia and B. I. Uppin), 894
Disturbance Current System (Magnetic) : Movement of Auroral Echoes and the (R. S. Unwin), 1044
Disturbances (Giant Travelling Ionospheric), at Night : Occurrence of (L. H. Heisler), 383
Disulphide (Molybdenum) : Melting Point and Sublimation of (Dr. Peter Cannon), 1612
Disulphoxide' ('Cystine') : Structure of (B. J. Sweetman), 744
Ditton Laboratory of the Department of Scientific and Industrial Research to be transferred to the Agricultural Research Council, 862
Diurnal Lapse of Signals from *Sputnik III* (G. H. Munro), 1549
Divalent Copper : 5-Co-ordination of (Dr. D. P. Graddon), 1610
Diversity : Human, *review* by Dr. C. E. Ford, 1354
Dividing Chromosomes : Distribution of Newly Synthesized Deoxyribonucleic Acid in (Philip S. Wood and Marie U. Schairer), 303
Division of Pediococci : Mode of (Dr. Helge-Liane Gunther), 903
Division Cycle of Bacteria : Synthesis of Ribonucleic Acid during the (M. Schaechter, M. W. Bentzon and Prof. O. Maaløe), 1207
Division (Cell) : Phagocytosis and (Klaus G. Bensch, Stanley Simbonis, Rolla B. Hill, jun., and Prof. Donald W. King), 476
Dixey, Dr. Frank : Retirement from the directorship of Overseas Geological Surveys, 1230 ; work of, 1230
Dixon, Dr. C. W. : Biological Aspects of the Transmission of Disease, *review*, 1221
Dixon, P. S., and others : Co-ordination Chemistry (Alkyl and Aryl Palladium Compounds), 1785
Dixon, S. L. : Appointed lecturer in mechanical engineering at the University of Liverpool, 581
Doak, P. E. : Appointed lecturer in applied mathematics at the University of Liverpool, 581
Dobinson, Dr. F. : Detection of Keto-Acids, 675
Dobson, Marjorie J., and others : Assimilation of Ammonia Nitrogen by Rumen Bacteria, 402
Dobzhansky, Prof. Th. : Natural Selection in Man, 159
Documentation Institute, American, and others : International Conference on Scientific Information, 147
Dodd, D. C. (Crawley, W. E., and): A Bacterium with Fungicidal Activity, 63
Dodge, J. W. (Peters, F. E., and) : Changes in *p*H and Temperature in Poultry Breast Muscles at Slaughter, 687
Does Rhodopsin contain a Trace Metal ? (Isao Fukami, Prof. Bert L. Vallee and Prof. George Wald), 28
Doetsch, Prof. Raymond N., and others : Dairy Microbiology, *review* by Dr. C. A. E. Briggs, 637
Dog : Effect of Morphine upon the Adrenal 17-Hydroxycorticosteroid Secretion in the (Prof. Tatuzi Suzuki, Kazukuni Yamashita, Seiichi Zinnouchi and Takaaki Mitamura), 825
Dogs : Changes produced in Serum Lipoproteins of, by Cellulose containing Methyl Groups (Margaret M. Fröhlich, V. Balázs, K. Kovács and A. Benkö), 1119
  The Colours of, *review* by Dr. Alex Comfort, 5
  The Inheritance of Coat Color in (Dr. Clarence C. Little), *review* by Dr. Alex Comfort, 5
Dogs' Serum and Lymph : Determination of Transaminase Activity in, after Hepatic Damage due to Acute Biliary Obstruction (Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 48
Doling, D. A., and Hepple, Shirley : 'Karathane'—the Value of its Differential Fungicidal Effect in relation to Mildew and Yellow Rust of Wheat, 622
Domagk, Prof. Gerhard : Elected a Foreign Member of the Royal Society, 1230, 1498 ; work of, 1498
Domains (Ferroelectric) : Powder Patterns of (G. L. Pearson and W. L. Feldmann), 367
Dombrow, Bernard A. : Polyurethanes, *review* by Dr. S. H. Pinner, 851
Domestic Animals in New Zealand : Diseases of (prepared by the Technical Committee of the New Zealand Veterinary Association, Inc.), *review* by Dr. J. N. Oldham, 967
Domestic Groups: The Developmental Cycle in (edited by Dr. Jack Goody), *review* by Dr. Rodney Needham, 1625
Domont, G., and others : Electrophoretic Heterogeneity of Trypsin, 605
Domovs, Kelvin (Freund, Ernest H., and) : Methanol-soluble Carbohydrate Complexes, 1526
Don : Derivatographic Investigation of the Anthracite of the (M. Weltner), 1254
Donahue, Dr. T. M. : Awarded a grant of 41,600 dollars by the U.S. Office of Naval Research, to continue studies on capture-ions and ionization cross-sections of ions and neutral particles, 86
  Origin of Sodium and Lithium in the Upper Atmosphere, 1480
Donaldson, P. E. K. (Gregory, R. L., and) : A 'Solid-image' Microscope, 246
Donors (Electron) : Ionization Potentials of (Dr. R. Foster), 1253
Donovan, Dr. D. T. : Awarded the Murchison Fund for 1959 of the Geological Society, 364
Dopamine : A New Type of Chromaffin Cells, probably storing (Bengt Falck, Prof. Nils-Åke Hillarp and Alf Torp), 267
Dore, Dr. J. : Response of Rice to Small Differences in Length of Day, 413
Dormancy in some Seeds : Effect of Gibberellin on the Termination of (Prof. Paavo Kallio and Pirkko Piiroinen), 1830
Dormancy of Wheat : Effects of Heat and Loss of Moisture on the, and some Interactions with 'Mergamma D' (P. D. Hewett), 1600
Dormancy (Prolonging), in *Vitis vinifera* with Gibberellin (Robert J. Weaver), 1198
Dornhorst, Dr. A. C., and others : Fast and Slow Muscles in Mammals, 1516
Dose (Lethal) : Effect of the Rate of Elimination of Digoxigenin in the Guinea Pig on the Determination of its (M. Rand and Anne Stafford), 688
Dose–Response Relationship in Radiation Leukaemia—the Marking Probit (Dr. D. J. Mewissen), 401
Dose Test for Irradiated Polyethylene (E. H. Cornish and D. M. Cutting), 1804
Doses (Increasing), of Radiation : Changes in the Electron Spin Resonance Spectrum of Glycine with (Dr. J. W. Boag and A. Müller), 831
Doses (Sterilizing), of Gamma-radiation : Differential Response of Male and Female Adults of *Trogoderma granarium* Everts towards (G. C. Carney), 338
Dostál, Prof. R. : Gibberellic Acid and Growth Correlations, 1338
Dothan, Trude, and others : Hazor I, an Account of the First Season of Excavations, 1955 (The James A. De Rothschild Expedition at Hazor), *review* by Peter J. Parr, 951
Doty, Prof. Paul, and others : Heterogeneity in Deoxyribonucleic Acids, 2, Dependence of the Density of Deoxyribonucleic Acids on Guanine–Cytosine Content, 1429
Doty, Prof. Paul (Marmur, Dr. Julius, and) : Heterogeneity in Deoxyribonucleic Acids, I, Dependence on Composition of the Configurational Stability of Deoxyribonucleic Acids, 1427
Double Layer (Electrical), in Colloid Science (Colloid and Biophysics Committee of the Faraday Society Discussion on), 78
Doubly Abnormal Haemoglobins (Normal and) : Formation of, by Recombination of Haemoglobin I with S and C (Constituents of Human Haemoglobin), (Dr. Harvey A. Itano and Elizabeth Robinson), 1799
Doudoroff, Prof. M., and Stanier, Prof. R. Y. : Role of Poly-β-Hydroxybutyric Acid in the Assimilation of Organic Carbon by Bacteria, 1440
Douglas, Prof. G. V. : *Obituary* by Prof. G. C. Milligan, 860
Douglas, Dr. H. W. : Electrical Double Layer in Colloid Science (Electrophoresis of a Synthetic Polycarboxylic Acid having a Hydrocarbon-Ester Backbone), 79
Dovell, W. H. : Science and Education, 300
Dover, Cedric : *Obituary* of the Hon. Mrs. Ursula Grant Duff, 577
Dow, J. K. D. : Function of the Rumen (Application of Recent Scientific Information through the Feeding-stuffs Industry), 1646
Dow, Prof. Robert Stone, and Moruzzi, Prof. Giuseppe : The Physiology and Pathology of the Cerebellum, *review* by Dr. C. G. Phillips, 954
Dowben, Dr. Robert M., and others : Antithyroid Action of β-Aminoethyl*iso*thiouronium Dibromide in Rats, 470
Dowden, R. L., and Goldstone, G. T. : 'Whistler Mode' Echoes remote from the Conjugate Point, 385
Dowdeswell, W. H. : A Guide to Field Biology, *review*, 1081
Downie, A. R., and others : Optical Rotation and Configuration of Poly-L-tyrosine, 110
  α-Helices and a New Polypeptide Fold in Poly-β-Benzyl-L-Aspartate, 1736
Doyle, F. P., and others : Synthesis of Penicillin—6-Aminopenicillanic Acid in Penicillin Fermentation, 257
Drabkin, Prof. David L : Thudichum—Chemist of the Brain, *review* by H. W. Kosterlitz, 568
Dragon project of the European Nuclear Energy Agency, 507
Drášil, V., and others : Effect of Pyrimidine Deoxyribonucleotides on the Regeneration of Bone-Marrow in Irradiated Mice, 1600
Dressler, R. F. : Turbidity Currents, 658
Drever, Prof. J. : Elected a Fellow of the Royal Society of Edinburgh, 719
Drew, Dr. H. D. K. : *Obituary* by Dr. W. J. Hickinbottom, 718
Dried Leaf Tissue : Persistence of Tomato Aucuba Mosaic Virus in (Prof. John Caldwell), 1142
Dried Milk : Caesium-137 in (D. V. Booker), 921
Drift of Toxic Chemicals released from a Low-flying Aircraft (D. Yeo, N. B. Akesson and H. H. Coutts), 131
Drifts of the F2 Region : Effect of Magnetic Activity on (Prof. B. Ramachandra Rao, E. Bhagiratha Rao and Y. V. Ramana Murty), 667
Drilling a Borehole to the Earth's Mantle (Prof. Hans Pettersson), 436
Drinking Water : International Standards for (United Nations : World Health Organization), 867
Drinnan, R. E. : Feeding of the Oystercatcher (*Haematopus ostralegus*) on the Edible Mussel (*Mytilus edulis*) in the Estuary of the River Conway, 163
Drop-plate Assay of Antibiotics : Micro-volume (Dr. M. R. S. Iyengar), 684
Droplets : Detecting Volatile Airborne (K. R. May), 742
Droplets (Cloud) : Detachment of Conidia by (Dr. R. R. Davies), 1695
Drosophila : Early Formation of Sperms in the ey^2 Mutant of (H. H. Shatoury), 1696
  Mutagenic Activity of the Alkaloid Heliotrine in (Dr. A. M. Clark), 731
  Ratio of Visible to Lethal Mutations produced in, by Phenylalanine Mustard (L. S. Altenburg and Edgar Altenburg), 699
  Sexual Maturity in (Øistein Strømnaes), 409
Drosophila melanogaster : Characterization of a Second Yellow Compound from (Dr. H. S. Forrest, Dolph Hatfield and Dr. C. Van Baalen), 1269
  A New Method for Delaying Pupation in (Dr. A. Abd-el-Wahab), 127
  Oxidative Metabolism and Puparium Formation in the Ebony Mutant of (Alexander Wolsky and Henrietta G. Kalicki), 1129
Drosophila Sperm : Recoverable Lethal Mutations in (Prof. K. G. Lüning and H. O. Henriksson), 1211
Drucker, Peter F. : Elected a Fellow of the International Academy of Management, 1719
Drug Concentrations in Biological Fluids : Direct Determination of, by Polarography (Dr. P. O. Kane), 1674
Drug-Sensitivity among Oriental Subjects : Incidence of the Erythrocytic Defect associated with (Dr. Ernest Beutler, Mary K. Y. Yeh and Thomas Necheles), 684
Drug-induced Immunological Tolerance (Dr. Robert Schwartz and Dr. William Dameshek), 1682
Drugs : Effect of, upon Components of Bacterial Cytoplasm (Dr. S. Dagley and J. Sykes), 1608
  Quantitative Measurement of the Effect of Lysergic Acid Diethylamide on Mice and its Interactions with other (Dr. J. R. Smythies), 545
Drugs (Anti-Parkinsonian) : Use of 'Tremorine' for screening (E. M. Trautner and S. Gershon), 1462
Drugs (New), used by Psychiatrists, *review* by Dr. Marthe Vogt, 1007
Drugs and Physical Agents : Method for Testing the Influence of, upon Mitosis (Prof. Elio Guido Rondanelli, Pasquale Gorini and Domenico Pecorari), 190
Dry, Dr. F. W. : Mammalian Hair, *review*, 851
Dry Fruits : Phenolic Acids as Growth and Germination Inhibitors in (M. Varga and E. Köves), 401
Dryden, Dr. Hugh L. : Elected home secretary of the United States National Academy of Sciences, 1575
Drying (Partial), of Hardened Portland Cement during Testing : Errors caused by (Dr. K. M. Alexander), 885
Du Bois, P. M. : Late Tertiary Geomagnetic Field in Northwestern Canada, 1617

du Vigneaud, Prof. Vincent (Bodanszky, Dr. Miklos, and) : Synthesis of Oxytocin by the Nitrophenyl Ester Method, 1324
Dual Antagonists': Alkyl N-(*bis*-(ethylenimido)phosphoro)-carbamates, a New Series of Anti-Tumour Agents (Thomas J. Bardos, Zinon B. Paranastassiou, Albert Segaloff and Julian L. Ambrus), 399
Dual Pumping Speeds of some Ionization Pumps (G. Carter), 1619
Duck Blood incubated *in vitro* with NaH^{14}CO$_3$: Labelled Keto-Acids in (A. Breccia, A. L. Fantola, G. Giustina and E. Lazzarini), 1328
Duckham, Prof. A. N.: The Fabric of Farming, *review* by Harwood Long, 280
  Appointed chairman of the Milk and Milk Products Technical Advisory Committee of the Ministry of Agriculture, Fisheries and Food, 368
  Ecology and Economics of Agricultural Geography, *review*, 423
Duckworth, Prof. Henry E. : Mass Spectroscopy, *review* by Prof. K. T. Bainbridge, 638
Duckworth, J. C. : Appointed managing director of the National Research Development Corporation, 861 ; work of, 861
Ductile Cleavage Fracture of Molybdenum (A. A. Johnson and B. J. Shaw), 1542
Ductility of Rhodium (A. Calverley and D. W. Rhys), 599
Duddingston Loch, Edinburgh : A New Leech-infesting Cercaria from (Prof. M. B. Lal), 697
Duddington, Dr. C. L. (Feder, William A., and) : Freeze-drying of *Harposporium anguillulae* Lohde in its Nematode Host, 767
Dudley, Carlton, and others : Malonate Metabolism by Plant Tissues, 683
Dudley, Dr. N. A. : Appointed to the chair of engineering production in the University of Birmingham, 791 ; work of, 791
Dudman, W. F., and Nichols, R. : Absence of Gibberellin-like Substances in Filtrates of *Marasmius perniciosus* Stahel (Witch Broom Disease of Cacao), 899
Dudok van Heel, W. H.: Audio-direction Finding in the Porpoise (*Phocaena phocaema*), 1063
Duff, R. B., and others : Effect of Substitution in the Side-Chain on β-Oxidation of Aryloxy-alkylcarboxylic Acids by *Nocardia opaca*, 748
Duff, Hon. Mrs. Ursula Grant : *Obituary* by Cedric Dover, 577
Duffey, Dr. Eric : Natural History of British Spiders, review, 1079
Duffus, H. J., and others : Possible Causes of Geomagnetic Fluctuations having a 6-Sec. Period, 1479, *erratum*, 1783
Duhem, Prof. Pierre : Le Système du Monde, Tome 8, Histoire des Doctrines Cosmologiques de Platon à Copernic, *review* by Prof. E. J. Dijksterhuis, 964
Dulbecco, Dr. Renato : Grant of 73,594 dollars from the United States National Foundation, for investigations on virus inheritance in experiments involving polio virus mutations, 224
Dunayevsky, Immanuel, and others : Hazor I, an Account of the First Season of Excavations, 1955 (The James A. De Rothschild Expedition at Hazor), review by Peter J. Parr, 951
Dunbar, Prof. C. O. : Retirement from the directorship of the Peabody Museum, Yale University, 1019 ; work of, 1019
Dunbar, Dr. Max : Self-regulation in Living Systems (Large-scale Aspects of Self-regulation), 370
Duncan, G. L. : Awarded a Ciba Fellowship for 1959-1960, 1161
Duncan, R. A., and Ellis, G. R. : Simultaneous Occurrence of Sub-Visual Aurorae and Radio Noise Bursts on 4·6 kc./s., 1618
Duncombe, Dr. W. G. : An Autoradiographic Method for distinguishing Samples labelled with Phosphorus-32 and Sulphur-35, 319
Dunham, J. : Awarded the N. E. Rowe Medal of the Royal Aeronautical Society, 1648
Dunitz, J. D. (Brown, I. D., and) : Co-ordination Chemistry (The Cuprous–Diazo-aminobenzene Complex), 1784
Dunn, A., and others : Mechanism of Action of Insulin, 1123
Dunning, W. J., and Fox, P. G. : Interfacial Phenomena (Influence of Imperfections in the Substrate upon the Mode of Epitaxial Growth), 1907
Dunworth, Dr. J. V. : Nuclear Fuel Cycles, 1646
Duperier, Prof. Arturo : *Obituary* by Prof. P. M. S. Blackett, 1015
Duration of Antibody Formation by Transferred Cells : Presence of Antigen—a Factor determining the (Dr. J. Sterzl), 547
Duration (Short) : Neuromuscular Blocking Agents of (C. G. Haining, R. G. Johnston and J. M. Smith), 542
Durban Museum and Art Gallery : Annual Report for 1957-58, 1641
Durie, A. C. : Changing Industry (Effect on Quality of Administration on Technical and Commercial Efficiency), 657
Dust (Atmospheric), and Fluorescence (Dr. K. Przibram), 1048
Dust (Cosmic), in the Atmosphere (Dr. D. W. Parkin and W. Hunter), 732
Dust and Fumes in Industry : The Control of (British Occupational Hygiene Society Conference on), 865
Dutton, G. F. : Stereophonic Sound Recording, Reproduction and Broadcasting (Magnetic Tape Recording), 1720 ; (Disk Recording), 1721
Dutton, Dr. J. : Gas Discharges (Precision Measurements in Hydrogen at High Pressure of the Secondary Ionization Coefficient), 92
Dutton, Dr. J., and Jones, Dr. E. : Electrical Discharges, 91
Dvořák, K., and others : Stress Activation of Adrenal Glomerulosa, 1819
Dwarfing (Physiological), in Peach Seedlings : Temperature Control of (Prof. Bruce M. Pollock), 1687
Dwyer, D. W. (edited by Gee, C. C., with the assistance of) : Communications and Electronics Buyers' Guide, Who's Who and Reference Book, 1958-59 edition, *review* by Prof. D. G. Tucker, 354
Dye (Carcinogenic Azo) : Prevention of Adaptive Formation of Tryptophan Peroxidase by a (Dr. Silvio Fiala and Anna E. Fiala), 1532
Dye-Sorption (Neuronal), as a Histochemical Indicator of Nervous Activity (Prof. Roland Fischer and Prof. Wolfgang Zeman), 1337
Dyer, R. F. (Bacon, Dr. G. E., and) : Neutron Diffraction at a High-Flux Reactor, 35
Dyes : Detergents, Textiles and (Textile Institute, in collaboration with the Branded Textiles Group Conference on), 1236
Dyes (Cellulose-reactive) : Labelling of Proteins with (Dr. R. Hess and Dr. A. G. E. Pearse), 260
Dyes (Thioindigo), in the Solid State : *Cis–trans* Isomerism of (Dr. G. S. Egerton), 369
Dyestuffs (Synthetic) : Perkin Centenary, London—100 Years of, *review* by R. Brightman, 709
Dynamics of Bacterial Populations maintained in the Chemostat (Hermann Moser), *review* by Dr. A. C. R. Dean, 424
Dynamics (Fluid) : An Introduction to (Dr. F. J. Bayley), *review* by J. L. Stollery, 421
  An Introduction to (Prof. G. Temple), *review* by J. L. Stollery, 421
Dynamos : Geomagnetic (A. Herzenberg), 937
Dyrssen, D., and collaborators : Co-ordination Chemistry (Stability of Metal Complexes—Silver (I)-oxine Complexes), 1784
Dyson, B. H. : Changing Industry, 656
Dystrophy (Human Muscular), as an Aberration of the Connective Tissue (Prof. Geoffrey H. Bourne and M. Nelly Golarz), 1741
Dzerdzeevski, B. L. : Antarctic Meteorology, 1503

E-REGION Ionization (Sporadic), 'Spread F,' and the Twinkling of Radio Stars (Dr. D. F. Martyn), 1382
Eades, R. G., and others : Removal of Dipolar Broadening of Nuclear Magnetic Resonance Spectra of Solids by Specimen Rotation, 1802
Eadie, Dr. J. Margaret : Function of the Rumen (Some Aspects of Rumen Ciliate Protozoa), 1645
Eadie, Dr. J. Margaret, and others : A Relationship between some Bacteria, Protozoa and Diet in Early Weaned Calves, 624
Eapen, J. (George, J. C., and) : Histochemical Demonstration of Lipase and Alkaline Phosphatase Activity in the Fat Body of the Desert Locust, 268
Ear under Water : The (Royal Society Discussion on), 1787
Earliest Geological Treatise (1667), (Nicolaus Steno), (Niels Stensen), translated from 'Canis Carchariae Dissectum Caput' with introduction and notes by Dr. Axel Garboe, *review* by Prof. L. Hawkes, 1487
Earliest Remains of Man : The Age of the, 1433
Early American Naturalists, review by Dr. L. Harrison Matthews, 1006
Early Christian Ireland (Máire and Liam de Paor), *review* by Joseph Raftery, 1704
Early Factory System : The Strutts and the Arkwrights, 1758-1830—a Study of the (R. S. Fitton and A. P. Wadsworth), *review* by Prof. W. H. G. Armytage, 635
Early Foetal Mortality in Cattle : β-Globulin Polymorphism and (Dr. G. C. Ashton), 404
Early Formation of Sperms in the ey^2 Mutant of *Drosophila* (H. H. Shatoury), 1696
Early Steamboats, *review* by A. W. Jones, 1626
Early Textile Technologists, *review* by Prof. W. H. G. Armytage, 635
Early Weaned Calves : A Relationship between some Bacteria, Protozoa and Diet in (J. Margaret Eadie, Dr. P. N. Hobson and S. O. Mann), 624
Earth : Magnetic Field of the (Prof. T. G. Cowling), 937
  Origin of the Radiation near the, discovered by means of Satellites (Prof. T. Gold), 355
  Radiation around the, to a Radial Distance of 107, 400 km. (Prof. James A. Van Allen and Louis A. Frank), 430
Earth Satellite Observations : Atmospheric Tides and (D. G. Parkyn), 1045 ; (G. V. Groves), 1047
Earth Satellites : Artificial (Royal Society Programme), 1640
  Deduction of Ionospheric Electron Content from the Faraday Fading of Signals from Artificial (W. T. Blackband, B. Burgess, I. L. Jones and G. J. Lawson), 1172
  Recording Radio Signals from (G. H. Munro and L. H. Heisler), 809
  Scientific Uses of (edited by Prof. James A. Van Allen), second edition, *review* by Dr. E. B. Armstrong, 963
  Table of Artificial (Royal Aircraft Establishment), 1566
Earth's Core : Fusion Curve of Iron to 96,000 Atmospheres—Temperature of the (Dr. H. M. Strong), 1381
Earth's Crust in Antarctica : Thickness of the (F. F. Evison, C. E. Ingham and R. H. Orr), 306
Earth's Flattening : A New Value for the, derived from Measurements of Satellite Orbits (D. G. King-Hele and R. H. Merson), 881
Earth's Mantle : Drilling a Borehole to the (Prof. Hans Pettersson), 436
Earth's Surface : Emissivity of the (J. T. Houghton), 367
Earthquake : A Mongolian, 367
Earthquakes : Study of, *review* by Ernest Tillotson, 708
East Africa : A Study of the Aphididae (Homoptera) of (V. F. Eastop), *review* by Dr. W. J. Hall, 208
East Africa High Commission : Annual Report for 1958, 1781
  Annual Report for 1957-1958 of the East African Industrial Research Organization, 1789
East African Industrial Research Organization : Annual Report for 1957-1958 (East Africa High Commission), 1789
East African (British) Waters : Marlins in (F. Williams), 762
Eastop, V. F. : A Study of the Aphididae (Homoptera) of East Africa, *review* by Dr. W. J. Hall, 208
Eastwood, E., and others : 'Ring Angels' over South-East England, 1759
Eastwood, W. S., and others : The American Miniature Nuclear Generator, *SNAP III*, 643
Ebashi, Dr. Fumiko (Ebashi, Dr. Setsuro, and) : Relaxation of Glycerol-treated Muscle Fibres by Acetone, 687
Ebashi, Dr. Setsuro, and Ebashi, Dr. Fumiko : Relaxation of Glycerol-treated Muscle Fibres by Acetone, 687
Ebony Mutant of *Drosophila melanogaster* : Oxidative Metabolism and Puparium Formation in the (Alexander Wolsky and Henrietta G. Kalicki), 1129
Echoes (Auroral) : Movement of, and the Magnetic Disturbance Current System (R. S. Unwin), 1044
Echoes ('Whistler Mode'), remote from the Conjugate Point (R. L. Dowden and G. T. Goldstone), 385
Ecklund, Barton A. (Ellwood, Eric L., and) : Bacterial Action in Pond-stored Logs, 1206
Eckstein, B. (Sobel, H., and) : Succinic Dehydrogenase Activity in Brain Tissue of Rats after Ovariectomy and Steroid Administration, 54
Eclipse of the Moon, 722
Ecological Research : Nature Conservation and, 205
Ecology : Animal—Aims and Methods (A. Macfadyen), *review* by Dr. E. B. Ford, 707
  Density-Dependent Factors in (Dr. H. G. Andrewartha), 200 ; (Prof. G. C. Varley), 911 ; (A. J. Nicholson), 911
  Marine (Prof. Hilary B. Moore), *review* by Prof. C. M. Yonge, 420
  Population, *review* by Dr. A. Milne, 1220
Ecology (Animal), Today (Prof. F. S. Bodenheimer), *review* by Dr. A. Milne, 1220
Ecology (Plant), of Ancient Periods (Prof. Tom M. Harris), 1370

Ecology of Lagos Lagoon, 1, The Lagoons of the Guinea Coast (J. E. Webb) ; 2, The Topography and Physical Conditions of Lagos Harbour and Lagos Lagoon (M. B. Hill and J. E. Webb) ; 3, The Life History of *Branchiostoma nigeriense* Webb (J. E. Webb) ; 4, On the Reactions of *Branchiostoma nigeriense* Webb to its Environment (M. B. Hill and J. E. Webb), 295
Ecology of *Mucor ramannianus* Moller (Dr. Geoffrey W. F. Sewell and Dr. Juliet C. Brown), 1344
Ecology and Economics of Agricultural Geography, *review* by Prof. A. N. Duckham, 423
Economic History Society (British Agricultural History Society and the) : Joint Conference on Agriculture and Rural Life, 582
Economics : Railway, 938
  Telecommunication (T. J. Morgan), *review* by Prof. Colin Cherry, 778
Economics of Agricultural Geography : Ecology and, *review* by Prof. A. N. Duckham, 423
Economics of Telecommunication, *review* by Prof. Colin Cherry, 778
Economics, Psychology and Sociology : Introduction to Difference Equations with Illustrative Examples from (Prof. Samuel Goldberg), *review* by Dr. L. S. Goddard, 970
Ectoparasite of the Jelly-fish, *Cyanea capillata* : The Amphipod, *Hyperia galba*, in (Prof. Erik Dahl), 1749
Eczema Diseases (Facial), in Sheep : A Hepatotoxin from *Sporidesmium bakeri* capable of producing (Dr. R. H. Thornton and J. C. Percival), 63
Eddington Medal of the Royal Astronomical Society awarded to Dr. J. S. Hey, 151
Eddington Memorial Lecture for 1959 (Sir Russell Brain), 154, 1022
Eddy, A. A., and Williamson, D. H. : Formation of Aberrant Cell Walls and of Spores by the Growing Yeast Protoplast, 1101
Eddy, Dr. Bernice E., and others : Induction of Subcutaneous Nodules in Rabbits with the SE Polyoma Virus, 766
Eddy, Dr. B. P. (edited by) : The Microbiology of Fish and Meat Curing Brines—Proceedings of the Second International Symposium on Food Microbiology (Cambridge, 1957), *review* by Dr. Magnus Pyke, 351
Edelman, Dr. J. : Appointed reader in enzymology at the Imperial College of Science and Technology, 1571
Edelman, Dr. J., and others : Dark Fixation of Carbon Dioxide in *Kalanchoe blossfeldiana* in relation to Photoperiodism, 1375
Edels, Dr. H. : Gas Discharges (Measurements of the Gas Temperature using Shock-wave Measuring Techniques), 92
Eden, A. : Appointed lecturer in education, and women's warden, at University College of North Staffordshire, 1783
Eden, Murray, and others : Use of Katharometers in Gas Chromatography, 1322
Edinburgh, H.R.H. The Duke of : The New Ferodo Research Laboratories opened by, 297
  Scientific Co-operation within the British Commonwealth, 425
Edinburgh : A New Leech-infesting Cercaria from Duddingston Loch (Prof. M. B. Lal), 697
Edinburgh Geological Society : Grants from the Clough Memorial Research Fund for geological research in Scotland and the north of England, 582
Edinburgh Mathematical Society : Mathematical Colloquium, 1234
Edmonds, E. R. : Angular Momentum in Quantum Mechanics, *review* by Prof. N. Kemmer, 705
Edsall, Prof. John T. : Elected a member of the Physiological Chemistry Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Edsall, Prof. John T., and others (edited by) : Advances in Protein Chemistry, Vol. 12, *review* by Dr. M. F. Perutz, 1290
Educated Life : The American College and the (Dr. Douglas M. Knight), 1769
Educated Man Today and Tomorrow (Sir John Wolfenden), 1780
Education : The Aims of (A. N. Whitehead), 1437
  Public Expenditure on, 16
  The Relation of, to Research, 1145
  Science and (Science Masters' Association Discussion on), 300
Education in the Age of Science, 1436
Education of our Future Rulers should be primarily in the Sciences rather than the Humanities (London Section of the Royal Institute of Chemistry, the London Branch of the Classical Association and the Haldane Society Debate on the Motion that the), 510, 1235
Education for Government (N. Lindop), 1235
Education of Instrument Technologists and Control Engineers (J. F. Coales), 1433
Education, Ministry of : Pamphlet No. 36, Teaching Mathematics in Secondary Schools, *review* by W. J. Langford, 1076
  The Structure of the Public Library Service in England and Wales, 1289, 1437
Education, Scottish Council for Research in : Publication No. 42, Eleven-Year-Olds Grow Up (John S. Macpherson), *review* by Jean Floud, 493
Education (Adult) : Trends in English (edited by Prof. S. G. Raybould), *review* by T. H. Hawkins, 1419
  Developments in, *review* by T. H. Hawkins, 1419
Education (Balanced) : The Need for a, 1075
Education (Further), Southern Regional Council for : Eleventh Annual Report (1957-58), 1021
Education (Higher), in Nigeria : International Commission on, 1231
Education (Scientific and Technical) : Expansion of, 1763
Education (Secondary), for All—a new Drive (White Paper on), 511
Education (Secondary), in Britain, 511
Education (Technical) Consultative Council, Scottish : Terms of reference, 1367
Education (Technological), in India, 85
Education and Careers Exhibition : National (National Union of Teachers), 794
Educational Advancement and the Underdeveloped Countries, 633
Educational Progress in Scotland : Intelligence, Family Background and, *review* by Jean Floud, 493
Educational Research, Vol. 1, No. 2, 863
Edvarson, K. (Löw, K., and) : Caesium-137 in Swedish Milk and Soil, 1104
Edwards, Dr. D. K. : A Photographic Method for Recording Activity and Behaviour in a Group of Small Animals, 625
Edwards, Sir George R. : Made an Honorary Fellow of the American Institute of the Aeronautical Sciences, 368
Edwards, J. : Appointed to the new chair of nuclear science and technology at the Royal Naval College, Greenwich, 791 ; work of, 791
  Interfacial Phenomena (Smoothing of Electrode Surfaces by Anodic Dissolution or Cathodic Deposition), 1098
Edwards, jun., Philip R. (Nakamura, Prof. Mitsuru, and) : Casease in *Entamoeba histolytica*, 397
Edwards, Dr. R., and others : Fast and Slow Muscles in Mammals, 1516
Edwards, Dr. R. G., and Sirlin, J. L. : Fate of Spermatozoa penetrating into the Tissues of the Fallopian Tube, 1744
Edwards, S. F. : Problems of Collective Motion in Physics (Gaseous Plasmas), 866 ; (Plasma Problems in the Electron Theory of Metals), 866
Eel Problem : Old and New Solutions to the (Prof. Umberto D'Ancona), 1405 ; (Dr. Denys W. Tucker), 1406
Eel Problem (Atlantic) : A New Solution to the (Dr. Denys W. Tucker), 495
Eel (Electric) : Stability of Cholinesterase of the (J. F. Scaife), 541
Eeles, W. T., and others : Some Experiments with an Electrodeless Discharge, 1665
Eels (Young), in Kenya Rivers : Records of (Dr. Vernon D. van Someren and Peter J. P. Whitehead), 950
Eelworm (Beet), *Heterodera schachtii* Schmidt : Testing Populations of, for Resistance-breaking Biotypes, using the Wild Beet (*Beta patellaris* Moq.) as Indicator (Audrey M. Shepherd), 1141
Eelworm (Potato Root), *Heterodera rostochiensis* Wollenweber : Chromosome Number of the (J. Cotten), 128
Effect of Alkali Salts on the Steric Course of Hydrogenation of a Cyclic Allylic Alcohol (M. C. Dart and Prof. H. B. Henbest), 817
Effect of Amniotic Fluid on Inhibition of Growth by Cortisone in Chicken Embryos (Dr. P. de Franciscis and Prof. W. Landauer), 617
Effect of Azaserine (o-Diazoacetyl-L-serine) on the Pyridine Nucleotide Levels of Mouse Liver (Stuart A. Narrod, Thomas A. Langan, jun., Prof. Nathan O. Kaplan and Abraham Goldin), 1674
Effect of Boron on the Rooting of Clematis Cuttings (Dr. C. J. Weiser), 559
Effect of Boron Supply on the Sugars, Soluble in 80 per cent Ethanol, in Flax Seedlings (T. F. Neales), 483
Effect of Brain Ganglioside on the Heart of the Clam (Dr. Samuel Bogoch and Elenore S. Bogoch), 53
Effect of Carrier Gas on Katharometer Response (W. A. Wiseman), 1321
Effect of the Carrier Gas on the Sensitivity of a Thermal-conductivity Detector in Gas Chromatography (L. J. Schmauch and R. A. Dinerstein), 673 ; (Dr. N. H. Ray), 674
Effect of the Carrier Gas on the Sensitivity of Thermal Conductivity Detectors in Gas Chromatography (Dr. B. A. Scott and Dr. A. G. Williamson), 1322
Effect of Cathode Inclusions on Electrical Discharges (P. C. L. Pfeil and L. B. Griffiths), 1481
Effect of Chloral Hydrate on Growth of Hair (Prof. J. Randolph Murray), 984
Effect of Clipping the Coat on the Thermoregulatory Reactions of Dairy Heifers (N. Berman and H. H. Kibler), 606
Effect of Colchicine on the Utilization of Thymidine labelled with Tritium during Chromosomal Reproduction (L. F. La Cour and Dr. S. R. Pelc), 1455
Effect of Controlled Lighting on Production Characters in the Fowl (J. C. Bowman and J. D. H. Archibald), 1138
Effect of Coumarin on the Germination and Growth of Rice Seedlings (Dr. G. Misra and S. N. Patnaik), 989
Effect of Cross-linking by Formaldehyde on the Contraction–Relaxation of Rat Tail Tendon (Dr. H. R. Elden), 332
Effect of 1,6-Di-(2-Bromoethylamino)-1,6-Dideoxy-D-Mannitol Dihydrobromide of Laboratory Animals (Prof. J. Baló, G. Kendrey, J. Juhász and I. Besznyák), 395
Effect of Dietary Phytate on Faecal Absorption of Radioactive Ferric Chloride (Dr. Henry Foy, Athena Kondi and W. H. Austin), 691
Effect of Dietary Protein on the Severity of Experimental Mouse Hepatitis (Dr. Boris Ruebner and James L. Bramhall), 609
Effect of Drugs upon Components of Bacterial Cytoplasm (Dr. S. Dagley and J. Sykes), 1608
Effect of Enucleation : Action of Auxins on *Acetabularia* and the (Prof. Kenneth V. Thimann and Dr. Kurt Beth), 946
Effect of Enzymes on Mechanical Properties of Tissues (Margaret L. R. Harkness and R. D. Harkness), 1821
Effect of Fatty Acid Mixtures on the Rice Stylet Nematode (*Tylenchorhynchus martini* Fielding, 1956), (Dr. Titus M. Johnston), 1392
Effect of Gibberellic Acid on Development of Autumn Colour and Leaf-fall of Deciduous Woody Plants (Dr. P. W. Brian, J. H. P. Petty and P. T. Richmond), 58
Effect of Gibberellic Acid on Length and Number of Epidermal Cells in Petioles of Strawberry (C. G. Guttridge and P. A. Thompson), 197
Effect of Gibberellin on the Termination of Dormancy in some Seeds (Prof. Paavo Kallio and Pirkko Piiroinen), 1830
Effect on Growth of Two Stalk-rotting Fungi : An Antifungal Substance in the Corn Plant and its (N. J. Whitney and C. G. Mortimore), 341
Effect of Heavy Water on the Growth of *Chlorella vulgaris* (Janet R. Walker and P. J. Syrett), 1193
Effect of High Oxygen Pressure on the Protective Action of Cystamine and 5-Hydroxytryptamine in Irradiated Rats (H. A. S. van den Brenk and Ruth Moore), 1530
Effect of the Histamine Liberator 48/80 and Methotrimeprazine : Action of Ultra-violet Light on Skin— (Prof. S. Claesson, G. Wettermark and L. Juhlin), 1451
Effect of Histidine on Rabbit Atheromatosis : Lack of (Dr. G. G. Pinter and Dr. D. B. Zilversmit), 1272
Effect of Humidity on the Breakdown of a 1-cm. Homogeneous Field Spark Gap in Air (Dr. K. Phillips, K. R. Allen and A. Refsum), 532
Effect of Humidity on the Spark Breakdown Voltage (K. R. Allen and Dr. K. Phillips), 174
Effect of Hydrolysis by Papain on the Combining Sites of an Antibody (Dr. A. Nisonoff and D. L. Woernley), 1325
Effect of β-Hydroxybutyrate Injections on the Pancreatic Activity of Guinea Pigs (Dr. H. D. Brahmachari and Mahendra Kumar), 51
Effect of Infection with Myxomatosis Virus on the Endoparasites of Rabbits (Dr. R. Mykytowycz), 555
Effect of Insulin on Peptide Synthesis independent of Glucose or Amino-Acid Transport (Prof. Ira G. Wool and Dr. M. E. Krahl), 1399
Effect of Insulin on it by Rat Diaphragm : Influence of Ions on the Uptake of Glucose and on the (Dr. Gangagobinda Bhattacharya), 324

Effect of Insulin on Sulphydryl Groups in Muscle (Dr. G. Ungar and Dr. S. Kadis), 49
Effect of Insulin and Phenazine Methosulphate on Pathways of Glucose Catabolism in the Mammary Gland of the Rat (P. McLean), 182
Effect of Light on Maturing Broad Bean Seeds (Dr. G. R..Lane and R. D. Butler), 1063
Effect of Low Concentrations of Alcohols on the Interfacial Tension between Water and Hydrocarbons (F. Franks and Dr. D. J. G. Ives), 316
Effect of Lysergic Acid Diethylamide on Mice and its Interactions with other Drugs : Quantitative Measurement of the (Dr. J. R. Smythies), 545
Effect of Lytic Enzyme from *Bacillus circulans* and Chitinase from *Streptomyces* sp. on *Aspergillus oryzae* (Koki Horikoshi and Dr. Shigeji Iida), 186
Effect of Magnetic Activity on Drifts of the *F*2 Region (Prof. B. Ramachandra Rao, E. Bhagiratha Rao and Y. V. Ramana Murty), 667
Effect of Monofluorosulphonate, Difluorophosphate and Fluoroborate Ions on the Iodine Uptake of the Thyroid Gland (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Effect of Morphine upon the Adrenal 17-Hydroxycorticosteroid Secretion in the Dog (Prof. Tatuzi Suzuki, Kazukuni Yamashita, Seiichi Zinnouchi and Takaaki Mitamura), 825
Effect of Neutral Red on Plaque Formation by Fowl Plague Virus (Dr. A. P. Waterson), 628
Effect of Norleucine and related Compounds on Growth of the White Rat (M. Rechcigl, jun., H. H. Williams and J. K. Loosli), 1519
Effect of Ouabain on Sodium Flux in Human Red Cells (Thomas J. Gill and Prof. A. K. Solomon), 1127
Effect of Oxide Layers on the Behaviour of Vacuum Arc Cathode Spots (H. Wroe and R. H. Alderson), 1544
Effect of Phosphorylated Methyl-naphthohydroquinones on the Response to Radiation in Barley Roots (A. D. McKelvie), 1194
Effect of Protein-free Diet on the Vitamin A Storage in the Rat Liver (M. Rechcigl, jun., S. Berger, J. K. Loosli and H. H. Williams), 1597
Effect of Pyrimidine Deoxyribonucleotides on the Regeneration of Bone-Marrow in Irradiated Mice (Dr. Z. Karpfel, J. Soška and V. Drášil), 1600
Effect of Radiation on the Breakdown of Homogeneous Field and Sphere Gaps (K. R, Allen and Dr. K. Phillips), 233
Effect of γ-Radiation on Weeds (H. J. M. Bowen and S. R. Smith), 907
Effect of the Rate of Elimination of Digoxigenin in the Guinea Pig on the Determination of its Lethal Dose (M. Rand and Anne Stafford), 688
Effect of Reduced Diphosphopyridine Nucleotide on the Swelling of Isolated Mitochondria (Dr. G. Di Sabato), 997
Effect of Reduction of Stimulation on Consumption of Food, Intake of Water and Weight of Body in Rats (Dr. Karl Weiss and Harry M. B. Hurwitz), 344
Effect of Residual House Spraying in the Plains on Anopheline Densities in Huts on the Pare Mountains (Dr. A. Smith), 198
Effect of Salicylate on Blood and Liver Xanthine Dehydrogenase of Rats (Emilio Mitidieri and Ottilia R. Affonso), 471
Effect of Salicylate on Muscle Phosphorylase (Dr. Stanton Segal and Alberta Blair), 1609
Effect of D-Sorbitol on the Absorption of Orally Administered Vitamin B_{12} (Dr. J. N. Marshall Chalmers and N. K. Shinton), 120
Effect of Streptomycin on the Incorporation of Amino-Acids labelled with Carbon-14 into Ribonucleic Acid and Protein in a Cell-free System of a *Mycobacterium* (T. Erdös and Agnes Ullmann), 618
Effect of Substitution in the Side-Chain on β-Oxidation of Aryloxy-alkylcarboxylic Acids by *Nocardia opaca* (D. M. Webley, R. B. Duff and V. C. Farmer), 748
Effect of a Sympathomimetic Agent (Methoxamine Hydrochloride) on Growth of Hair in the House Mouse (*Mus musculus*), (F. Cockrem), 614
Effect of Tartar Emetic on the Growth of Ammonium Dihydrogen Phosphate Crystals (Yutaka Kunisaki), 105
Effect of Thermal Neutron Irradiation on Oxide Catalysts for the Decomposition of Nitrous Oxide (Yasukazu Saito, Yukio Yoneda and Shoji Makishima), 388
Effect of Thyroid Hormones : Rate of Exchange of Phosphate in Red Blood Cells— (A. M. Ermans and Prof. P. A. Bastenie), 679
Effect of Toxopyrimidine on Glutamic-decarboxylase and Glutamic-oxalacetic Transaminase of Rat Brain (Dr. G. Rindi, V. Perri and U. Ventura), 1126
Effect of Tranquillizing Agents on the Resistance of Rats to Histamine Stress (Dr. Arthur M. Sackler, Dr. A. S. Weltman and Dr. Raymond R. Sackler), 896
Effect of X-Rays on the Cell (Dr. M. Silha), 1531
Effect of Yeast Extract on the Growth of *Chlorella* (P. J. Casselton), 1404
Effect (Apparent Anti-complementary) : Normal Components of Guinea Pig Serum which may cause Antigens to show an (M. M. H. Sewell), 1062
Effect (Bohr) : Molecular Adaptation in Haemoglobins—Nature of the (Austen Riggs), 1037
Effect (Crabtree), with Ehrlich Ascites Carcinoma Cells : Energy Compensation in the (K. H. Ibsen, E. L. Coe and Dr. R. W. McKee), 1471
Effect (The De Haas–Van Alphen), in Copper (Dr. D. Shoenberg), 171
Effect (Differential), of Phenothiazines on Oxidative Phosphorylation (J. D. Judah, Dr. K. R. Rees and M. J. R. Dawkins), 821
Effect (Differential Fungicidal) : 'Karathane'—the Value of its, in relation to Mildew and Yellow Rust of Wheat (D. A. Doling and Shirley Hepple), 622
Effect (Inhibitory), of Colchicine upon the Transplantable Fibroma of the Skin in the Newt *Triturus taeniatus* (Prof. A. Stolk), 555
Effect (Kinetic Isotope), in the Bromination of Dimethylaniline (P. G. Farrell and Dr. S. F. Mason), 250
Effect (Oxygen): Modification of the, when Bacteria are given Large Pulses of Radiation (D. L. Dewey and Dr. J. W. Boag), 1450
Effect (Protective), of β-Aminoethylthiosulphuric Acid against Ionizing Radiation (Bo Holmberg and Bo Sörbo), 832
Effect (Sparing), of Serum from Mice treated with Endotoxin upon certain Murine Virus Diseases (A. W. Gledhill), 185
Effect (Synergistic), of Zinc and Gibberellin (Dr. John Dancer), 901
Effect (Thyroxine-releasing), of Salicylate and of 2,4-Dinitrophenol (Dr. L. Korsgaard Christensen), 1189
Effect (Transformative), of Symbiosis : An Unusual Strain of *Escherichia coli* in Seoticaemia as an example of the (Dr. R. Reitler, M. Teicher and Dr. A. Valero), 339
Effects of Arc Stage of Electrical Discharge on Ignition of Inflammable Gas (I. Bertz), 669 ; (W. Nethercot and H. G. Riddlestone), 669
Effects of the Aurora on Radio Reception, 579
Effects of Auxins on Membrane Permeability and Pectic Substances in Bean Endocarp (J. A. Sacher and K. T. Glasziou), 757
Effects of Deficiency of Pantothenic Acid on Oxygen Poisoning in the Rat (Dr. D. W. Taylor), 257
Effects of 2:4-Dinitrophenol and other Agents on the Swelling of Isolated Mitochondria (Dr. J. B. Chappell and Dr. G. D. Greville), 1737
Effects of Electron Bombardment upon Bromides of Cadmium and Silver (Sho Suzuki), 1755
Effects of Gamma-Radiation on some Carbohydrates, Hydroxyacids and Amino-acids in Aqueous Solutions (Dr. S. A. Barker, Dr. P. M. Grant, Prof. M. Stacey and Dr. R. B. Ward), 376
Effects of Gibberellic Acid on Winter Pasture Production (Dr. G. Scurfield and E. F. Biddiscombe), 1196
Effects of Heat and Loss of Moisture on the Dormacy of Wheat, and some Interactions with 'Mergamma *D*' (P. D. Hewett), 1600
Effects of Independent Variations in Stimulus and Response Probability (P. M. A. Rabbit), 1212
Effects of Ionizing Radiation on Natural and Synthetic High Polymers (Dr. Frank A. Bovey), *review* by Prof. C. E. H. Bawn, 637
Effects of Ionizing Radiations on Plants, 1896-1955 : Bibliography on the (Arnold H. Sparrow, John P. Binnington and Virginia Pond), *review* by Dr. Alma Howard, 639
Effects of Kinetin, Gibberellic Acid and certain Auxins on the Development of Shoot Buds on the Protonema of *Pohlia nutans* (Dr. G. C. Mitra and Dr. A. Allsopp), 974
Effects of Pyridoxine Withdrawal on Cerebral Circulation and Metabolism in a Pyridoxine-dependent Child (Dr. Louis Sokoloff, Dr. Niels A. Lassen, Dr. Guy M. McKhann, Dr. Donald B. Tower and Dr. Wayne Albers), 751
Effects of Starvation and Diphenylamine on Carotenoids in *Phycomyces* (T. N. R. Varma, Prof. C. O. Chichester and G. Mackinney), 188
Effects of Vanadium upon Liver Coenzyme *A* in Rats (E. Mascitelli-Coriandoli and C. Citterio), 1527
Effects of Wave-length and Time of Irradiation on Internode Length in *Pisum sativum* and *Tropaeolum majus* (P. J. M. Sale and Dr. D. Vince), 1174
Effects of X- and Ultra-violet Irradiation on the Incorporation of Phosphorus-32 into Isolated Nuclei of Rabbit Appendix (Yuong-Tchel Tchoe and Prof. A. Sibatani), 1334
Effects (Biological), of Space Flight, 651
Effects (Fluorescence), from Corals irradiated with Ultra-Violet Rays (Dr. R. Catala-Stucki), 949
Effects (Geophysical), associated with High-Altitude Explosions (Dr. P. J. Kellogg, Prof. E. P. Ney and Prof. J. R. Winckler), 358
Effects (Geophysical), of High-Altitude Nuclear Explosions (T. Obayashi, S. C. Coroniti and E. T. Pierce), 1476
Effects (Gibberellin), on Photoperiod-controlled Growth of *Weigela* (Prof. Martin J. Bukovac and Harold Davidson), 59
Effects (*In vitro*), of Insulin and Glucose on Leucine-2-^{14}C Incorporation into Protein of Diaphragms of Hypophysectomized Rats (Dr. J. L. Kostyo), 1518
Effects (Lethal), of Radiations on *Escherichia coli B* : Reduction in the, by Treatment with Chloramphenicol (Dr. N. E. Gillies and Tikvah Alper), 237
Effects (Some), of Colchicine on Lampbrush Chromosomes (A. P. Amarose), 975
Effects (Specific and Non-Specific), of Chemicals on Plants : Separation of (Prof. T. J. Muzik and J. M. Lawrence), 482
Effects (Two Atmospheric), in the Orbital Acceleration of Artificial Satellites (Dr. Luigi G. Jacchia), 526
Efferents (Visceral), in the Rat Brain Stem : Selective Staining of, by a Modified Koelle Technique (Dr. P. R. Lewis and Dr. C. C. D. Shute), 1743
Efficiency (Individual), in Industry, 1953-57 : Final Report of the Joint Committee on Human Relations in Industry, 1954-57, and Report of the Joint Committee on (Department of Scientific and Industrial Research), 301
Egerton, Dr. G. S. : *Cis-trans* Isomerism of Thioindigo Dyes in the Solid State, 389
Egg of the Brook Trout : X-Ray Diffraction Patterns from the Egg Membrane of the (Dr. Mamoru Kusa and Tsuguyasu Wada), 410
Egg Membrane of the Egg of the Brook Trout : X-Ray Diffraction Patterns from the (Dr. Mamoru Kusa and Tsuguyasu Wada), 410
Eggert, Frederick O. (Cranston, Dr. Hoy A., and) : Homologous Species Neoplastic Antibodies, 1471
Egyptian Birds : Systematic and Experimental Studies on Protozoal Blood Parasites of (Dr. A. H. Helmy Mohammed), *review* by Dr. Elizabeth U. Canning, 1081
Ehrenberg, Dr. W. : Electric Conduction in Semiconductors and Metals, *review* by Dr. P. T. Landsberg, 138
Ehrlich Ascites Carcinoma Cells : Energy Compensation in the Crabtree Effect with (K. H. Ibsen, E. L. Coe and Dr. R. W. McKee), 1471
Eidinoff, Dr. M. L., and others : Incorporation of 5-Iodouracil labelled with Iodine-131 into the Deoxyribonucleic Acid of Human Leukaemic Leucocytes following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131, 1686
Eilenberg, Prof. Samuel : Elected a member of the United States National Academy of Sciences, 1575
Eilon, Dr. S. : Appointed reader in production engineering at the Imperial College of Science and Technology, 1571
Einstein's Second Postulate : A Possible Experimental Test of (Prof. Herbert Dingle), 1761
Eisenbud, Dr. Leonard, and Wigner, Prof. Eugene P. : Nuclear Structure, *review* by Prof. B. H. Flowers, 492
Eisler, Dr. Paul : The Technology of Printed Circuits, *review* by J. C. Cluley, 1487
El-Attar, Dr. Tawfik : A Simplified Physico-chemical Method for Determination of Human Urinary Œstrogens, 1607
Elaphoidella gracilis (Sars) : Haemoglobin and the Habitat of the Harpacticoid Copepod (J. Green), 1834
Elastic Waves (Finite), in Rubber : Propagation of (P. Mason), 812
Elastin : Spectrophotometric Investigation on the Orcein Derivative of (V. Scarselli), 1739

Elden, Dr. H. R. : Effect of Cross-linking by Formaldehyde on the Contraction–Relaxation of Rat Tail Tendon, 332
  Elongation of Rat-Tail Tendon on Hydration, 1681
Electric Activity in a Non-myelinated Nerve Ending : Spatial Summation of (Properties of a Receptor Membrane), (Prof. Werner R. Loewenstein), 1724
Electric Arc in Welding (University of Birmingham Conference on), 1164
Electric Cables : Development of (S. E. Goodall), 226 ; (Prof. James Greig), 226
Electric Conduction in Semiconductors and Metals (Dr. W. Ehrenberg), *review* by Dr. P. T. Landsberg, 138
Electric Eel : Stability of Cholinesterase of the (J. F. Scaife), 541
Electric Strength and High-Field Conduction Current in *n*-Hexane (A. M. Sletten), 311
Electrical Conductance and Dieletric Constant of the Interior of Erythrocytes (H. Pauly), 333
Electrical Discharge : Effects of Arc Stage of, on Ignition of Inflammable Gas (I. Berz), 669 ; (W. Nethercot and H. G. Riddlestone), 669
Electrical Discharges (Dr. J. Dutton and Dr. E. Jones), 91
  Effect of Cathode Inclusions on (P. C. L. Pfeil and L. B. Griffiths), 1481
Electrical Double Layer in Colloid Science (Colloid and Biophysics Committee of the Faraday Society Discussion on), 78
Electrical Engineer : Physics for the, *review* by Dr. B. A. Bell, 707
Electrical Engineering at Saskatchewan, 1302
Electrical Engineering : Measurement and Control in (Dr. A. H. M. Arnold), 89
  Physical Basis for (Prof. Thomas L. Martin, Jr.), *review* by Dr. D. A. Bell, 707
Electrical Engineers, American Institute of (Bell Telephone Laboratories and the) : Establishment of the Kelly Award, 510
Electrical Engineers, American Institute of, and others : Twelfth Annual Conference on Electrical Techniques in Medicine and Biology, 1434
Electrical Engineers, Institution of : Organization and Division of the Activities of the, 89
  Chairman's Address to the Measurement and Control Section (J. K. Webb), 89
  Presidential Address, Development of Electric Cables (S. E. Goodall), 226
  Election of Charles W. Spiers to honorary membership, 507
  Faraday Medal awarded to Luigi Emanueli, 507
  International Convention on Transistors and Associated Semiconductor Devices, 652
  Convention on Stereophonic Sound Recording, Reproduction and Broadcasting, 1720
Electrical Engineers, Institution of (Radio and Telecommunication Section) : Convention on Long-Distance Transmission by Wave-Guide, 727
Electrical Instrument Test Service (British Scientific Instrument Research Association), 436
Electrical Response to Illumination of the Euphausiid Crustacean Eye (Elizabeth M. Kampa, Brian P. Boden and Bernard C. Abbott), 1820
Electrical Techniques in Medicine and Biology (American Institute of Electrical Engineers, the Institute of Radio Engineers and the Instrument Society of America twelfth Annual Conference on), 1434
Electrically Exploded Wires (Thermal Radiation Laboratory of the Geophysics Research Directorate of the United States Air Force Cambridge Research Center Conference on), 224
Electricity (Borrowing Powers) Bill : Second reading of the, 794
Electricity and Gas Industries (Coal,) : Investment in the, 1650
Electrode (Platinum) : Cyclic Alternating-Current Voltammetry with a (André L. Juliard), 1040
Electrode Potentials and Compound Formation in the Palladium–Platinum–Hydrogen System (A. W. Carson, Dr. T. B. Flanagan and Dr. F. A. Lewis), 39, 510
Electrode (Micro-) Penetration of Ascites Tumour Cells (B. M. Johnstone), 411
Electrodeless Discharge : Some Experiments with an (J. K. Wright, W. T. Eeles and J. D. Herbert), 1665
Electrodes (Intracellular) : Recording Inhibition and Excitation in the Cat's Retinal Ganglion Cells with (Dr. Torsten N. Wiesel), 264
Electrolyte Metabolism in relation to Age and Sex : Water and (Ciba Foundation Colloquia on Ageing, Vol. 4), (edited by G. E. W. Wolstenholme and Maeve O'Connor), *review* by Prof. P. L. Krohn, 777
Electrolytic Deposition of Beryllium (Dr. I. A. Menzies, D. L. Hill and L. W. Owen), 816
Electron Affinities : Atomic (H. R. Johnson and Dr. F. Rohrlich), 244
Electron Affinity of Atomic Lithium (E. Holøien), 173
Electron Affinity of Oxygen (B. A. Tozer), 1389
Electron Bombardment : Effects of, upon Bromides of Cadmium and Silver (Sho Suzuki), 1755
Electron Content (Ionospheric) : Deduction of, from the Faraday Fading of Signals from Artificial Earth Satellites (W. T. Blackband, B. Burgess, I. L. Jones and G. J. Lawson), 1172
Electron Donors : Ionization Potentials of (Dr. R. Foster), 1253
Electron Micrographs : The Possibility of Distinguishing between Substances shown on (Dr. Robin C. Valentine), 761
Electron Microscope : Chlorination of Proteins as a Method of Increasing their Opacity in the (Dr. M. M. Coombs and Prof. J. F. Danielli), 1257
  A New Method of Particle-counting on the (Dr. D. Gordon Sharp and Ivan Sorvall, Inc.), 1642
  Techniques and Applications of the (Cornell University Annual Summer Laboratory Course in), 1094
Electron Microscope Examination : Preparation and Sectioning of Tissues embedded in 'Araldite' for (J. M. Davis), 200
Electron Microscope Images of Crystal Lattices : Spacing Anomaly in (Dr. H. Hashimoto and Dr. H. Yotsumoto), 1001
Electron Microscope Observations of the Neurohypophysis of the Ferret (Dr. R. L. Holmes and F. G. W. Knowles), 1745
Electron Microscope Society of America : Annual Meeting (Symposium on Contribution of Electron Microscopy of Viruses and Cells to the Problem of Cancer), 1719
Electron Microscopic Observations on a Fibrous Component in Amyloid of Diverse Origins (Dr. Alan S. Cohen and Dr. Evan Calkins), 1202
Electron-Microscopic Study of Finback Whale Myoglobin Crystals (D. E. Bradley), 941
Electron Microscopy : A. or mμ in (Dr. John R. Baker), 416
  Improved Preservation of Tendon for, through Wet Freeze-drying (Dr. David B. Scott and Marie U. Nylen), 1205
  Observations by, on the Structure of an Acephaline Gregarine (*Apolocystis elongata*, Phillips and MacKinnon), (Dr. D. Lacy and H. B. Miles), 1456
  Preparation of Autoradiograms for (R. T. O'Brien and L. A. George, II), 1461
Electron Microscopy of Oleophobic Monolayers (Robert T. Mathieson), 1803
Electron Microscopy of Sodium Laurate (T. H. Shuttleworth and M. Camp), 535
Electron Microscopy of Synaptic Contacts on Dendrite Spines of the Cerebral Cortex (Dr. E. G. Gray), 1592
Electron Microscopy of Viruses and Cells : Contribution of, to the Problem of Cancer (Electron Microscope Society of American Symposium on), 1719
Electron Spin Resonance in Irradiated Deoxyribonucleic Acid (Dr. J. W. Boag and A. Müller), 831
Electron Spin Resonance Spectrum of Glycine : Changes in the, with Increasing Doses of Radiation (Dr. J. W. Boag and A. Müller), 831
Electron Spin Resonance Study of the State of Copper in Fungal Laccase (Dr. Bo G. Malmström, Dr. Rolf Mosbach and Dr. Tore Vänngård), 321
Electron Transport : Inhibition of, and the Swelling of Isolated Mitochondria (Dr. J. B. Chappell and Dr. G. D. Greville), 1525
Electron-dense Antibody Conjugate : Preparation of an (Prof. S. J. Singer), 1523
Electronic Computer Exhibition and Business Computer Symposium, 11
Electronic Computers in the Service of Business (W. L. C. Garrett), 11
Electronic Device Premium : New (Institution of Electronics), 1023
Electronic Digital Computer : The Preparation of Programs for an (Dr. Maurice V. Wilkes, Dr. David J. Wheeler and Dr. Stanley Gill), second edition, *review* by E. L. Albasiny, 969
Electronic Digital Computers and their Industrial Applications (Conference at the Birmingham College of Technology), 154
Electronic Engineering Premium of the Television Society awarded to Dr. J. C. Parr, 1161
Electronic Theories of Organic Chemistry (John William Baker), *review* by Dr. R. I. Reed, 777
  An Introduction to (G. I. Brown), *review* by Dr. R. I. Reed, 279
Electronic Theory : An Introduction to, *review* by Dr. R. I. Reed, 777
  Introductory, *review* by Dr. R. I. Reed, 279
Electronic Theory and Chemical Reactions (R. W. Stott), fourth edition, *review* by Dr. R. I. Reed, 968
Electronics : Solid State Physical (Prof. Aldert van der Ziel), *review* by Dr. G. T. Wright, 1356
Electronics Applications Premium (Institution of Electronics), 1023
Electronics Buyers' Guide, Who's Who and Reference Book : Communications and, 1958-59 edition (edited by C. C. Gee, with the assistance of D. W. Dwyer), *review* by Prof. D. G. Tucker, 354
Electronics Conference (United States National) : Fifteenth Annual, 582, 1094
  Election of Virgil H. Disney as president, 582
Electronics Exhibition and Convention : Fourteenth Annual (Northern Division of the Institution of Electronics), 1234
Electronics, Institution of : Award of Premiums, 1023
Electronics, Institution of (Northern Division) : Fourteenth Annual Electronics Exhibition and Convention, 1234
Electronics (Medical) : Second International Conference on, 1094
Electrons (Secondary) : Emission of Slow (Prof. J. M. Anderson), 241
Electrophoresis (Immuno-) : Study of Adenovirus Antigens by (Dr. H. G. Pereira, Dr. A. C. Allison and Dr. C. P. Farthing), 895
Electrophoresis (Starch-gel) : Demonstration of Small Components in Red Cell Haemolysates by (Dr. Phaedon Fessas and N. Mastrokalos), 1261
Electrophoresis (Zone) : Regeneration of Cellulose Acetate Membranes used for (Dr. S. Jacobs), 1326
Electrophoresis (Zone), of Rous Sarcoma Virus (Robert Cramer), 195
Electrophoresis Strips (Paper) : Detection of Antigens as Specific Precipitates on (S. Buttery), 686
Electrophoresis Studies (Starch Gel), on Abnormal Proteins in Myeloma and Macroglobulinaemia (Dr. J. M. Fine and Dr. R. Creyssels), 392
Electrophoretic Heterogeneity of Trypsin (J. C. Perrone, L. V. Disitzer and G. Domont), 605
Electrophoretic Mobility of the Precipitating Antibodies present in the Serum of Cattle recovering from Foot-and-Mouth Disease : Changes in Specificity and (F. Brown and J. H. Graves), 1688
Electrophoretic Pattern of Serum Albumin during Short-term Action of Pepsin at Room Temperature : Splitting of the (E. Annau), 190
Electrophoretic Patterns of Mealworm Proteins (D. S. Po-Chedley), 62
Electrophoretic Patterns of the Serum Proteins of Sheep infected with *Haemonchus contortus* (D. L. Mould and P. H. Silverman), 1735
Electrophoretic Separation (Paper), of the Proteins of some Leguminous Seeds (Dr. Esam M. Moustafa), 199
Electrotechnology in Australia, 1781
Elementary Zoology : Manual of (Borradaile's), thirteenth edition, revised by W. B. Yapp, *review* by Dr. V. Fretter, 1290
Elements : Radioactive, *review* by G. R. Hall, 962
  Trace—Proceedings of the Conference held at the Ohio Agricultural Experiment Station, 1957 (edited by C. A. Lamb, O. G. Bentley and J. M. Beattie), *review* by Dr. E. J. Hewitt, 1009
Elements of Groups IV*b* and V*b* : Infra-red and the Near Ultra-violet Absorption Spectra of Polyphenyl Derivatives of the (Dr. C. N. R. Rao, J. Ramachandran, M. S. C. Iah, S. Somasekhara and T. V. Rajakumar), 1475
Elements (Genetic) : Structure and Function of (Twelfth Brookhaven Symposium in Biology), 1094
Elements (Nuclear Fuel) : Commercial Manufacture of, 1232
Elevated Temperature : Rapid Quantitative Horizontal Paper Chromatography at an—Determination of Aspartic and Glutamic Acids (Henry R. Roberts and Michael G. Kolor), 460
Elevated Temperature and Carbon Monoxide Pressure : Behaviour of Dicobalt Octacarbonyl at (Sol Metlin, Irving Wender and Heinz W. Sternberg), 457
Eleven-Your-Olds Grow Up (John S. Macpherson), *review* by Jean Floud, 493

Elimination of Digoxigenin in the Guinea Pig : Effect of the Rate of, on the Determination of its Lethal Dose (M. Rand and Anne Stafford), 688
Ellenby, Dr. C., and Gilbert, A. B. : Parasitology (Mechanisms which enable Free-living Stages to Locate their Hosts), 1506
Elliot, Dr. H., and Quenby, J. J. : The Samoan Artificial Auroro, 810
Elliott, Dr. A., and others : Optical Rotation and Configuration of Poly-L-tyrosine, 110
  α-Helices and a New Polypeptide Fold in Poly-*β*-Benzyl-L-Aspartate, 1736
Elliott, J. P. : Problems of Collective Motion in Physics, 867
Elliott, Robert D. : Grant of 90,500 dollars from the National Science Foundation, for an investigation of precipitation processes and efficiency of Pacific Coast storms, 1371
Elliott, Dr. W. H. : Amino-Acetone, its Isolation and Role in Metabolism, 1051
Elliott, W. S. : Appointed managing director of IBM World Trade Laboratories (Great Britain), Ltd., 438
Ellis, G. R. (Duncan, R.A., and) : Simultaneous Occurrence of Sub-Visual Aurorae and Radio Noise Bursts on 4·6 kc./s., 1618
Ellis, Richard A. (edited by Montagna, William, and) : The Biology of Hair Growth, *review* by Dr. F. W. Dry, 851
Ellison, R. R., and others : Incorporation of 5-Iodouracil labelled with Iodine-131 into the Deoxyribonucleic Acid of Human Leukaemic Leucocytes following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131, 1686
Ellison, Dr. T. H. : Turbidity Currents, 658
Ellwood, Eric L., and Ecklund, Barton A. : Bacterial Action in Pond-stored Logs, 1206
Elmes, P. C., and others : Mucoprotein of Bronchial Mucus Gel, 1810
Elongation of Rat-Tail Tendon on Hydration (Dr. Harry R. Elden), 1681
Elsasser, Prof. Walter M. : The Physical Foundation of Biology, *review* by Dr. W. Grey Walter, 955
  Awarded the William Bowie Medal, 1502
Eluant : Milk as an, of Polycyclic Aromatic Hydrocarbons added to Wax (Dr. Hans L. Falk, Dr. Paul Kotin and Adele Miller), 1184
Elusive Particle : The, *review* by Prof. H. W. B. Skinner, 1421
Emanueli, Luigi : Awarded the Faraday Medal of the Institution of Electrical Engineers, 507
Embassies (American) : Appointment by the United States Department of State of Science Officers for, 15
Embassies (British) Overseas : Scientific Attachés on the staffs of, 16
Embassy (British) in Moscow : Appointment of D. A. Senior as scientific attaché, 1018
Embryo (Chick) : Oxidative Phosphorylation in the (Prof. Wiktor W. Nowinski and William C. Mahaffey), 45
Embryological Conference : Fourth International (Editorial Board of the *Journal of Embryology and Experimental Morphology*), 1164
Embryology and Experimental Morphology, Journal of (Editorial Board of): Fourth International Embryological Conference, 1164
Embryonic Haemoglobin Fraction : Co-existence of the Third Normal, with Erythroblastosis in the Blood of Two Full-term New-born Babies with Multiple Malformations (Prof. I. Halbrecht, Ch. Klibanski and F. Bar Ilan), 327
Embryos (Chick) : Sodium, Potassium, Calcium and Chloride Ion Contents and Protein Fractions in the Fluids of (Dr. Aleksandra Smoczkiewiczowa), 1260
Embryos (Chicken) : Effect of Amniotic Fluid on Inhibition of Growth by Cortisone in (Dr. P. de Franciscis and Prof. W. Landauer), 617
Embryos (Diapause), of *Acheta commodus* W. : A Rapid Method for examining (T. W. Hogan), 269
Emeléus, Prof. H. J. : Presidential Address to the Chemical Society, 1785
Emergence of the Modern Mind (edited by Prof. Frederick C. Gruber), *review* by T. H. B. Hollins, 953
Emerging Programme of Secondary School Mathematics (Prof. Max Beberman), 1366
Emerson, Dr. W. W. : Stability of Soil Crumbs, 538
Emery, V. J. : Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
Emetic (Tartar) : Effect of, on the Growth of Ammonium Dihydrogen Phosphate Crystals (Yutak Kunisaki), 105
E.M.I. Premium of the Television Society awarded to Dr. R. Theile, 1161
Emission of Slow Secondary Electrons (Prof. J. M. Anderson), 241
Emission (Hollow-Cathode), of the AlO Spectrum (V. Wilson Goodlett and K. Keith Innes), 243
Emission (Smoke), of Coal : Alicyclicity and (B. K. Mazumdar, S. S. Choudhury and A. Lahiri), 1613
Emission (Smoke), of Low-Temperature Chars (W. N. Adams, A. F. Gaines, D. H. Gregory and G. J. Pitt), 33 ; (Prof. Morris W. Travers), 1321
Emission (Suppressed Light), of the Reaction Zone in Detonation (Prof. C. H. Johansson and L. Sternhoff), 247
Emissivity of the Earth's Surface (J. T. Houghton), 367
Emmons, Patricia, and McLennan, Prof. H. : Failure of Acetylcholine Release in Tick Paralysis, 474
Employee's Point of View, 371
Employment of Scientists and Technologists in the United States, 1028
'Emralon' (Acheson Colloid, Ltd.), 1501
Emschwiller, G. : Co-ordination Chemistry (Kinetics of the Dissociation of Complex Cyanides and of Ethylene–Diamine Nickel Complexes), 1784
Enations (Leaf-) in *Dahlia variabilis* Desf. induced by Tomato Spotted Wilt Virus (A. A. Brunt), 627
Encephalartos barteri Carruth. : Mitosis in the Microspore of (Dr. Geoffrey K. Berrie), 834
Encephalitis Virus (Impure Murray Valley) : Yield of Infective 'Ribonucleic Acid' from, after Different Treatments (G. L. Ada and S. G. Anderson), 799
Enclathrated Compounds : Molecular Motion of, as studied by Nuclear Magnetic Resonance (Dr. D. F. R. Gilson and Prof. C. A. McDowell), 1183
Encouragement : Original Research and its, 563
Encyclopedia : Instrument (compiled by Edward W. Battey), *review* by Dr. C. A. Taylor, 1768
Enderby, J. A., and others: Polynomial Representation of Steam Tables, 598
Endocarp (Bean) : Effects of Auxins on Membrane Permeability and Pectic Substances in (J. A. Sacher and K. T. Glasziou), 757
Endogenous Metabolism of Freshly Harvested Cells of a Brewer's Yeast (V. E. Chester), 902
Endogenous Pyrogen in Serum : Demonstration of, during Systemic Tuberculin Reaction in Rabbits (Dr. J. Johanovsky), 693
Endoparasites of Rabbits : Effect of Infection with Myxomatosis Virus on the (Dr. R. Mykytowycz), 555
Endospores (Bacterial) : Dependence of the Heat Resistance of, on their Dipicolinic Acid Content (Brooks D. Church and Harlyn Halvorson), 124
Endothermic Nature of the Initial Stage of Reaction : Gas Phase Oxidation of Hydrocarbons—(Dr. K. C. Salooja), 602
Endotoxin : Sparing Effect of Serum from Mice treated with, upon certain Murine Virus Diseases (A. W. Gledhill), 185
Enemy : Smoke is Your (Ministry of Housing and Local Government and the Central Office of Information), 1163
Energetic Coupling in the Respiratory Chain (Dr. Poul E. Glahn and Dr. Sigurd O. Nielsen), 1578
l'Energie utilisable : Le Thermodynamique et le Théorème de (R. Marchal), *review* by R. W. Haywood, 353
Energies (Bond), of some Alkali Fluorides (Dr. F. M. Page and Dr. T. M. Sugden), 1672
Energies (Resonance) : Interpretation of, in the Photoproduction and Scattering of Pions from Hydrogen (Dr. K. M. Guggenheimer), 1758
Energy (Available), in Thermodynamics, *review* by R. W. Haywood, 353
Energy Compensation in the Crabtree Effect with Ehrlich Ascites Carcinoma Cells (K. H. Ibsen, E. L. Coe and Dr. R. W. McKee), 1471
Energy Density (Cohesive), of Polystyrene (Dr. J. H. S. Green), 818
Energy Values (True) : Use of Approximate Wave Functions for Extrapolation to (P. G. Dickens, Dr. J. W. Linnett and D. Schofield), 175
Energy (High-) Radiation : Estimation of Chain Fracture during the Cross-linking of Rubber Hydrocarbons by (Dr. L. Mullins and Dr. D. T. Turner), 1547
Engineer (Electrical) ; Physics for the, *review* by Dr. D. A. Bell, 707
Engineering : Training and Opportunities for Women in (Women's Engineering Society), 161
Engineering Laboratory, National : New name of the Mechanical Engineering Research Laboratory at East Kilbride, 1162
Engineering Materials : The Fracture of (Eastern New York Chapter of the American Society for Metals Conference on), 1368
Engineering Monographs : Nuclear, *review* by R. Vaux, 1149
Engineering Practice : Chemical (edited by Herbert W. Cremer and Trefor Davies), Vol. 5, Fluid Systems I, *review* by Prof. J. M. Coulson, 492
Engineering Production at Birmingham, 791
Engineering Research and Development (Scientific and), in British Manufacturing Industry (1955) : Estimates of Resources devoted to (Department of Scientific and Industrial Research), 847
Engineering Society, Women's : Training and Opportunities for Women in Engineering, 161
Engineering (Biochemical) : Postgraduate Course in (University College, London), 933
Engineering (Chemical), at Cambridge, 719
Engineering (Chemical) : Fluid Systems in, *review* by Prof. J. M. Coulson, 492
Engineering (Electrical), at Saskatchewan, 1302
Engineering (Electrical) : Measurement and Control in (Dr. A. H. M. Arnold), 89
  Physical Basis for (Prof. Thomas L. Martin, Jr.), *review* by Dr. D. A. Bell, 707
Engineering (Mechanical), at Belfast, 1779
Engineering (Mechanical) Research Laboratory at East Kilbride to be known in future as the National Engineering Laboratory, 1162
Engineering (Missile) Design, *review*, 210
Engineering (Missile) Handbook (C. W. Besserer), *review*, 210
Engineering (Television), in Science, Industry and Broadcasting (British Institution of Radio Engineers Convention on), 1234
Engineers (Chemical), Institution of, and others : Joint Symposium on Instrumentation and Computation in Process Development and Plant Design, 652
Engineers (Control) : Education of Instrument Technologists and (J. F. Coales), 1433
Engineers (Corrosion), British Association of : Formation of, 1779
Engineers (Electrical), American Institute of, and others : Twelfth Annual Conference on Electrical Techniques in Medicine and Biology, 1434
Engineers (Electrical), American Institute of (Bell Telephone Laboratories and the) : Establishment of the Kelly Award, 510
Engineers (Electrical), Institution of : Organization and Division of the Activities of the, 89
  Chairman's Address to the Measurement and Control Section (J. K. Webb), 89
  Presidential Address, Development of Electric Cables (S. E. Goodall), 226
  Election of Charles W. Spiers to honorary membership, 507
  Faraday Medal awarded to Luigi Emanueli, 507
  International Convention on Transistors and Associated Semiconductor Devices, 652
  Convention on Stereophonic Sound Recording, Reproduction and Broadcasting, 1720
Engineers (Electrical), Institution of (Radio and Telecommunication Section): Convention on Long-Distance Transmission by Wave-Guide, 727
Engineers (Mechanical), American Society of, and Purdue University Thermophysical Properties Research Center : Symposium on the Thermal Properties of Gases, Liquids and Solids, 294
Engineers (Mechanical), Institution of : 1959 James Watt International Medal awarded to (the late) Sir Claude Gibb, 224
  James Clayton Prize for 1958 awarded jointly to William Munger Heynes and Sir F. Ewart Smith, 865
Engineers (Mining), Institution of : Election of R. G. Baker as president for 1960–61, 1716
Engineers (Radio), British Institution of : Election of Eric K. Cole as an honorary member, 582
  Convention on Television Engineering in Science, Industry and Broadcasting, 1234
Engineers (Radio), Institute of, and others : Twelfth Annual Conference on Electrical Techniques in Medicine and Biology, 1434

England, Dr. T. S. : Promoted to Deputy Chief Scientific Officer and appointed head of the Airborne Radar Department at the Royal Radar Establishment, Malvern, 294, 647 ; work of, 647
England : Precambrian Coelenterata from Australia, Africa and (Dr. M. F. Glaessner), 1472
England (north of) : Geological Research in Scotland and the (Clough Memorial Research Fund of the Edinburgh *Geological Society Grants* for), 582
England (Seventeenth-Century) : Science and Religion in (Prof. Richard S. Westfall), *review by Dr. H. D. Anthony*, 964
England (South-East) : 'Ring Angels' over (E. Eastwood, J. D. Bell and N. R. Phelp), 1759
England and Wales : *An Account of the Fishing Gear of* (the late F. M. Davis), revised edition, 1023
  Commentary Volume on the Statistical Review of, for 1956 (Registrar General), 1093
  Public Libraries in, 1437
  The Structure of the Public Library Service in (Ministry of Education), 1289, 1437
Engler, Reto, and Schramm, Prof. Gerhard : Infectious Ribonucleic Acid as Precursor of Tobacco Mosaic Virus, 1277
English Adult Education : Trends in (edited by Prof. S. G. Raybould), *review* by T. H. Hawkins, 1419
English Dictionary (Oxford) : Books required for the, 1434
English Electric Valve Co., Ltd. : Exhibition of Modern Valve Design Technique, 224
English Rural Life, Museum of (Reading) : *Exhibition of Old-time Bee-keeping*, 1782
Engström, Prof. Arne, and Finean, Dr. J. B. : Biological Ultrastructure, *review* by Dr. H. E. Huxley, 956
Engström, Prof. Arne, and others : Bone and Radiostrontium, *review* by J. Vennart, 965
Enhancement of *Radiation-induced Cross-linking of Polyvinyl Chloride* (Dr. S. H. Pinner), 1108
Ennor, Prof. A. H., and others : Biochemistry of Lombricine—Occurrence of D-*Serpine in Lombricine*, 591
Enrichment (Bacteriophage), in a Liquid Two-Phase System with Subsequent Treatment with 'Freon' 113 (Dr. G. Frick and Dr. P. Å. Albertsson), 1070
Entamoeba histolytica : Casease in (Prof. Mitsuru Nakamura and Philip R. Edwards, Jun.), 397
Enterotoxicity of Bacteria-free Culture-filtrate of Vibrio cholerae (Prof. S. N. De), 1533
Entfaltung der Wissenschaft : Die—zum Gedenken an Joachim Jungius (1587-1657), (Vorträge gehalten auf der Tagung der Joachim Jungius-Gesellschaft der Wissenschaften, Hamburg, 1957, aus Anlass der 300 Wiederkehr des Todestages von Joachim Jungius), 1435
Entralgo, Prof. Pedro Lain : Elected a member of the History of Science and Medicine Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Entropy and Synovial Pathology (D. P. Page Thomas and J. T. Dingle), 543
Entry of Spermatozoa into the Fallopian-Tube Mucosa (Dr. C. R. Austin), 908
Enucleation : Action on Auxins on *Acetabularia* and the Effect of (Prof. Kenneth V. Thimann and Dr. Kurt Beth), 946
Environmental Temperature and the Reptilian *Nervous System* (B. B. Boycott and Dr. R. W. Guillery), 62
Enzymatic Basis for the Acceleration of Ciliary Activity by Negative Air Ions (Prof. A. P. Krueger *and Richard F. Smith*), 1332
Enzymatic N-Methylation of Histamine (Dr. Donald D. Brown, Dr. Julius Axelrod and Dr. Robert Tomchick), 680
Enzyme (Lytic) : Effect of, *from Bacillus circulans* and Chitinase from *Streptomyces* sp. on *Aspergillus oryzae* (Koki Horikoshi and Dr. Shigeji Iida), 186
Enzyme (Malachite Green-reducing), *in Mycobacteria* (Iván Tárnok and Pál Czanik), 549
Enzyme (Receptor-destroying) (Bacterial Neuraminidase) : Purification of (*G. L. Ada and* E. L. *French*), 1740
D-Enzyme (Potato) : Synthesis of Amylose by (Dr. Gwen J. Walker and Dr. W. J. Whelan), 46
Enzyme Activity : Metals and (Biochemical Society Symposium No. 15, Leeds, 1956), (organized and edited by E. M. Crook), *review* by Dr. O. T. G. Jones, 968
Enzyme Activity in the 'Isolated' Colon (Dr. B. F. Martin), 1464
Enzyme-Levels (Tissue) : Gene Action in Erythrocyte Deficiency of Glucose-6-phosphate Dehydrogenase—(*Prof. Paul A. Marks, Dr. Ruth* T. Gross and Dr. Ruth E. Hurwitz), 1266
Enzymes : Effect of, on Mechanical Properties of Tissues (Margaret L. R. Harkness and R. D. Harkness), 1821
  Haematin (International Union of Biochemistry Symposium on), 1571
Enzymes (*Sulphydryl*) : *Selenite* as a *Relatively Weak Inhibitor of some* (Dr. Cho Ching Tsen and Prof. H. Bruce Collier), 1327
Enzymes (Transphosphorylating), and Muscle Relaxation (J. Molnar and Dr. L. Lorand), 1032
Enzymic Hydrolysis of Fucoidin by *Pseudomonas atlantica* and *Pseudomonas carrageenovora* (Dr. W. Yaphe and Dr. K. Morgan), 761
Enzymic Mechanism (*Possible*), *for the Development of Resistance* against Fluorouracil in Ascites Tumours (Dr. Peter Reichard and Ola Sköld, and Prof. George Klein), 939
Enzymic Nature *of the Serum Globulin Permeability* Factor (E. L. Becker, D. L. Wilhelm and Prof. A. A. Miles), 1264
Enzymology : Further Advances in, review by Dr. Edwin C. Webb, 961
  Clinical (*edited by Dr. Gustav J. Martin*), *review* by Prof. F. G. Young, 1151
Enzymology and related Subjects of Biochemistry : Advances in (edited by F. F. *Nord*), *Vol.* 20, *review* by Dr. Edwin C. Webb, 961
Ephemeris : The Astronomical, 1960 (D. H. Sadler), 1705
Epidermal Cells in Petioles of Strawberry : Effect of Gibberellic Acid on *Length and Number of* (C. G. Guttridge and P. A. Thompson), 197
Epinephrine Inhibition of Liver Tyrosine Oxidation : Reversal of (Prof. Gerald Litwack and Valentina Wojciechowski), 1675
Epiphyseal Cartilage during Rickets : Histochemical Changes in the (Prof. J. T. Irving), 1734
Epiphytic Algal Species and their Macrophytic Hosts : Relationship between (G. A. Prowse), 1204
Epithelium (*Human* Bronchial) : Chemical Changes *in*, and *their relation to* Bronchial Cancer (J. Chayen, Prof. G. J. Cunningham and D. P. Winstanley), 1743
Epithelium (Rabbit) : *Induction of Arginase in, by the Shope Rabbit* Papilloma Virus (Prof. Stanfield Rogers), 1815
Equation for the Flow of Blood, Plasma and Serum through Glass Capillaries (*Dr. G. W. Scott Blair*), 613
Equations (Difference) : Introduction to, with Illustrative Examples from Economics, Psychology and Sociology (Prof. Samuel Goldberg), *review* by Dr. L. S. Goddard, 970
Equations (Differential) : Boundary Problems in (Mathematics Research Center, United States Army, Symposium on, at the University of Wisconsin), 224
Equator : Changes in the Inclination of Satellite Orbits to the (R. H. Merson, D. G. King-Hele and R. N. A. Plimmer), 239
Equator (Cosmic-Ray) : Difference between, and the Geomagnetic Dip Equator (Takashi Oguchi and Masahiro Kodama), 103
Equator (Geomagnetic Dip) : Difference between Cosmic-Ray Equator and the (Takashi Oguchi and Masahiro Kodama), 103
Equation (Clapeyron's) : Validity of, for Phase Equilibria involving Clathrates (Prof. J. H. van der Waals and Dr. J. C. *Platteeuw*), 462 ; (Prof. R. M. Barrer), 463
Equatorial Countercurrent (Pacific) : Measurements of the (John A. Knauss and Robert Pepin), 380
Equilibration of *iso*Cyanates and *iso*Thiocyanates (Prof. L. C. Case), 675
Equilibration of Labelled Magnesium between Sheep Plasma and Red Cells (A. D. Care, D. C. *McDonald* and B. *Nolan*), 1265
Equilibria (Phase), involving Clathrates : Validity of Clapeyron's Equation for (Dr. J. H. van der Waals and Dr. J. C. Platteeuw), 462 ; (Prof. R. M. Barrer), 463
Equilibrium (Oxygen), of Human Haemoglobin in Strong Salt Solutions (Prof. A. Rossi-Fanelli, E. Antonini and A. Caputo), 827
Equilibrium (Stable), at a Sex-linked Locus (S. P. H. Mandel), 1347
Equipment for Data Processing : Digitizers and other (Hilger and Watts, Ltd.), 651
Equitable Life Assurance Society of the United States : Gift of 1,000,000 dollars to the United States National Academy of Sciences, for the erection of a Hall of the Life Sciences, 1574
Equivocation (Antigenic) : Radiosensitivity as a Function of (Dr. L. Cohen and Dr. A. Cohen), 692
Era of the Renaissance : Paracelsus, an Introduction to Philosophical Medicine in the (Dr. Walter Pagel), *review* by Prof. Erwin H. Ackerknecht, 1147
Erdös, T., and Ullmann, Agnes : Effect of Streptomycin on the Incorporation of Amino-Acids labelled with Carbon-14 into Ribonucleic Acid and Protein in a Cell-free System of a *Mycobacterium*, 618
Erg : Hausaland (A. T. Grove), 1642
Ergonomics, its Place in Industry (Ergonomics Research Society Symposium on), 368
Ergonomics Research Society : *Symposium on Ergonomics, its Place in* Industry, 368
Ergun, S., and Tiensuu, V. H. : Alicyclic Structures in Coals, 1668
Ermans, A. M., and Bastenie, Prof. P. A. : Rate of Exchange of Phosphate in Red Blood Cells—Effect of Thyroid Hormones, 679
Ernst, Prof. Eugen : Die Muskeltätigkeit, *review* by Dr. D. R. Wilkie, 1008
Erosion in Space : Calculation of, from the Cosmic-Ray *Exposure* Ages of Meteorites (Dr. F. L. Whipple and Dr. E. L. Fireman), 1315
Errant Polychaetes : Role of the Supraoesophageal Ganglion during the Early Stages of Caudal Regeneration in some (Dr. R. B. Clark and M. E. Clark), 1834
Erreger : Die Infektionskrankheiten des Menschen und ihre (herausgegeben von *Prof. Dr.* A. Grumbach und Prof. Dr. Kikuth), *review* by Prof. P. C. C. Garnham, 352
Error in Microbiological Assays: A *Source of, attributable to a* Bacterial Inhibitor in Distilled Water (S. A. Price and L. Gare), 838
Errors caused by Partial Drying of Hardened Portland Cement during Testing (Dr. K. M. Alexander), 885
Ershov, Dr. A. P. : The Mechanization of Thought Processes (Automatic Programming), 226 ; (Mechanical Language Translation), 226
Erythroblastosis : Co-existence of the Embryonic (*Third Normal*) Haemoglobin Fraction with, in the Blood of Two Full-term New-Born Babies with Multiple Malformations (Prof. I. Halbrecht, Ch. Klibanski and F. Bar Ilan), 327
Erythrocyte Receptor Substances : New Inhibitor and, for certain Asian Strains of Influenza Virus (Gy. Takátsy and K. Barb), 52
Erythrocyte-Complement ($EAC'_{1}, {}_{4}, {}_{2}$) : *Comparison of the Formation of* the Complex, Sensitized, in Haemolytic Systems differing in their Haemolysin and Complement-fixing Activities (Dr. Harold S. Goodman), 331
Erythrocyte Deficiency of Glucose-6-phosphate Dehydrogenase : Gene Action in—Tissue Enzyme-Levels (Prof. Paul A. Marks, Dr. Ruth T. *Gross and Dr. Ruth E. Hurwitz*), 1266
Erythrocytes : Electrical Conductance and Dielectric Constant of the Interior of (H. Pauly), 333
Erythrocytes (Rat and Mouse), *in* the Rat–Mouse Chimera : Life-Span of (Dr. Joan W. Goodman and Dr. L. H. Smith), 1833
Erythrocytic Defect associated with Drug-Sensitivity among Oriental Subjects : Incidence of the (Dr. Ernest Beutler, Mary K. Y. Yeh and Thomas Necheles), 684
Escherichia coli : A Possible Negative Feedback Phenomenon controlling Formation of Alkaline Phosphomonoesterase in (T. Horiuchi, S. Horiuchi and D. Mizuno), 1529
  Selective Inhibition of Formation of Deoxyribonucleic Acid in, by Mitomycin C (S. Shiba, A. Terawaki, T. Taguchi and Prof. J. Kawamata), 1056
Escherichia coli B : Biochemical Heterogeneity of the Ribonucleic Acid synthesized by, after Irradiation with Ultra-Violet Light (Kenshi Suzuki and Jóji Ono), 395
  T2 Phage Infection of 'Protoplasts' obtained by Penicillin Treatment of (Dr. G. Dénes and L. Polgár), 696
  Reduction in the Lethal Effects of Radiations on, by Treatment with Chloramphenicol (Dr. N. E. *Gillies* and *Tikvah Alper*), 237
Escherichia coli Protoplasts : Phagocytosis of (Józef Lisowski, Zbigniew Wieczorek and Mirosław Kańtoch), 1828
Escherichia coli Strains : Detection of *Sialic Acid in various, and in other* Species of Bacteria (Prof. Guy T. Barry), 117

Escherichia coli in Septicaemia : An Unusual Strain of, as an example of the Transformative Effect of Symbiosis (Dr. R. Reitler, M. Teicher and Dr. A. Valero), 339
Escherichia coli (Phage-infected) : Synthesis of Deoxyribonucleic Acid by, in the Presence of Mitomycin C (Dr. Matsuo Sekiguchi and Dr. Yasuyuki Takagi), 1134
Esculetin : Conversion of Caffeic Acid to, during Paper Chromatography (Warren L. Butler and H. W. Siegelman), 1813
Eser, S., and others : Action of Nicotinamide on Acetoacetate Metabolism of Liver Homogenates of Normal and Alloxanized Rats, 184
Eskimo and Indian Populations of Alaska : Urinary Excretion of β-Amino-*iso*butyric Acid in (Dr. A. C. Allison, Dr. B. S. Blumberg and Dr. S. M. Gartler), 118
Esnouf, Dr. M. P. (Born, Dr. G. V. R., and) : Appearance of a Phosphorus Compound in Platelet-rich Plasma on Clotting, 478
ESP and Personality Patterns (Dr. Gertrude Raffel Schmeidler and Dr. R. A. McConnell), *review* by Dr. R. H. Thouless, 964
'Espinasse, Prof. Paul G. (Stewart, D. Stenhouse, and) : Regeneration of the Lens of the Eye in the Rabbit, 1815
Essays on 'The Welfare State' (Prof. Richard M. Titmuss), *review* by M. P. Hall, 1147
Essen, Dr. L. : Presented with the Wolfe Award of the Department of Scientific and Industrial Research, 930 ; work of, 930
  Awarded the A. S. Popov Gold Medal of the Academy of Sciences of the U.S.S.R., 1502
Ester (Nitrophenyl) Method : Synthesis of Oxytocin by the (Dr. Miklos Bodanszky and Prof. Vincent du Vigneaud), 1324
Ester Hydrolysis : Role of Lysine in catalysing (William R. Chesbro and Prof. Leslie R. Hedrick), 994 ; (Alexander Gero), 994
Ester Sulphate Pattern of Rabbit Bile (Dr. Harry Boström and Anders Vestermark), 1593
Ester (Phosphate) Spots on Paper : Ultra-violet Fluorescence of Quinine Sulphate for Detection of (Dr. Edward S. Rorem), 1739
'Ester-like' Linkages in Collagen : Occurrence of (Paul M. Gallop, Prof. Sam Siefter and Edward Meilman), 1659
Esterase (Arginine) Activity of 'Blood Thromboplastin' (Phyllis M. Arscott, J. L. Koppel and John H. Olwin), 753
Esters (Amino-Acid) : Inhibitory Action of, on the Production of Extracellular Amylase by *Penicillium chrysogenum* (Dr. L. Horváth, S. Bajusz and A. Szentirmai), 477
Esters (L-Tryptophan) : Biological Activity of (Dr. Giulio C. Perri, Louis Kaplan and C. Chester Stock), 116
Estimating Serum Calcium : A Rapid Micro-quantitative Method for (T. A. Harper), 232
Estimation of Benzenoid Compounds by Chromatography : Detection and (P. Moss and A. J. Thomas), 1611
Estimation of Chain Fracture during the Cross-linking of Rubber Hydrocarbons by High-Energy Radiation (Dr. L. Mullins and Dr. D. T. Turner), 1547
Estimation of the Size of Antigens by Gel Diffusion Methods (Dr. A. C. Allison and Dr. J. H. Humphrey), 1590
Estimation of Strontium in Animal Bone using X-Ray Fluorescence Analysis (W. M. B. Roberts), 887
Estimation (Quantitative), of Amineoxidase (Dr. George C. Cotzias and Dr. James J. Greenough), 1732
Estimation (Quantitative), of Purines by the Visual Scanning of Photographs of Paper Chromatograms (B. M. Johnstone and G. P. Briner), 681
Estuary of the River Conway : Feeding of the Oystercatcher (*Haematopus ostralegus*) on the Edible Mussel (*Mutilus edulis*) in the (R. E. Drinnan), 153
Estuary (Sierra Leone River) : Seasonal and Tidal Fluctuations in the Trawl Catches from the (J. C. D. Watts), 1748
Etch Behaviour of Jacobsite with Different Cell Dimensions : Variation in (Dr. Supriya Roy), 1256
Etch Pits on Calcite Cleavage Faces (Dr. H. Watts), 314; (R. C. Stanley), 1548
Ethanol (80 per cent) : Effect of Boron Supply on the Sugars Soluble in, in Flax Seedlings (T. F. Neales), 483
Ethanol Extracts of *Acetobacter xylinum* : Synthesis of Cellulose in (Dr. J. Ross Colvin), 1135
Ether (Dimethyl) : Stable Configuration of Methyl Groups in (Katsumi Kimura and Masaji Kubo), 533
Ethiopian Coffees : Preliminary Information on the Genetics of (Dr. Alcides Carvalho), 906
Ethnographic Film Committee of Great Britain and Ireland : Presentation of three films at the National Film Theatre, 650
Ethoxide Ion : Interaction of 1,3,5-Trinitrobenzene with (Dr. R. Foster), 1042
Ethyl Flavone-7-Oxyacetate and other Compounds : Inhibition of Sensitiveness to Nicotine of Rabbit Aorta by Reserpine, Hexamethonium, (Dr. I. Setnikar and M. Ravasi), 898
2-Ethylamino-1,3,4-thiadiazole : Excessive Uric Acid Production in the Human induced by (Dr. J. E. Seegmiller, Arthur I. Grayzel and Lois Liddle), 1463
Ethylenediamine : Condensation Products of, with Adrenaline (Dr. Kunio Yagi and Dr. Toshiharu Nagatsu), 822
Ethylenediamine Tetraacetate and the Intestinal Absorption of Vitamin B_{12} (Dr. J. Abels, M. G. Woldring, H. O. Nieweg, J. G. Faber and J. A. de Vries), 1395
Euphausiid Crustacean Eye : Electrical Response to Illumination of the (Elizabeth M. Kampa, Brian P. Boden and Bernard C. Abbott), 1820
Euratom : Appointment of D. H. Hill as resident nuclear energy attaché to the United Kingdom Government's representative in Brussels, 1640
Europaea (Flora) : The Presentation of Taxonomic Information—a Short Guide for Contributors to (Dr. V. H. Heywood), 721
Europe : Scientific Man-power in (Edward McCrensky), 489
Europe, Council for : Competition for a thesis on Consequences of the Use of Nuclear Energy for the European Mode of Life, 509
Europe (Western) : Aviation Psychology in, and a Report on Studies of Pilot Proficiency Measurement (Western-European Association for Aviation Psychology), 1092
European Agricultural Aviation Centre : *Agricultural Aviation*, Vol. I, No. I, 720
European Chemists, American Society of : Neuberg Medal awarded to Dr. H. Albert Barker, 1304
European Conference for Industrial Management on Industrial Prospects in Nuclear Energy (European Nuclear Energy Agency of the Organization for European Economic Co-operation), 652, 1094
European Economic Co-operation, Organization for (European Nuclear Energy Agency) : Third International Project for the Development of Nuclear Power for Peaceful Purposes on a European Basis, 507
  European Conference for Industrial Management (Industrial Prospects in Nuclear Energy), 652, 1094
  Conference on Industrial Prospects in Nuclear Energy, 652, 1094
  International Courses on Nuclear Energy, 1163
European Economic Co-operation, Organization for (European Nuclear Energy Agency), and the Danish Atomic Energy Commission : Symposium on the Scientific and Technical Aspects of Health Physics in Atomic Installations, 934
European Mode of Life : Consequences of the Use of Nuclear Energy for the (Council of Europe Competition for a thesis on), 509
European Nuclear Energy Agency of the Organization for European Economic Co-operation : Third International Project for the Development of Nuclear Power for Peaceful Purposes on a European Basis, 507
  European Conference for Industrial Management (Industrial Prospects in Nuclear Energy), 652, 1094
  Conference on Industrial Prospects in Nuclear Energy, 652, 1094
  International Courses on Nuclear Energy, 1163
European Nuclear Energy Agency of the Organization for European Economic Co-operation, and the Danish Atomic Energy Commission : Symposium on the Scientific and Technical Aspects of Health Physics in Atomic Installations, 934
European Nuclear Energy Project : New, 507
European Organization for Nuclear Research : Annual Report for 1957, 21
European Research : Advanced (Council of Europe Competition in), 509
Evaluating Optical Radiation : Modern Systems for Detecting and (International Commission for Optics Symposium on), 1571
Evans, Alfred S., and others (edited by) : Symposium on Latency and Masking in Virus and Rickettsial Infections—the Proceedings of a Conference held at the University of Wisconsin Medical School, 1957, *review* by Dr. Kenneth M. Smith, 71
Evans, B. L., and Yoffe, A. D. : Absorption Spectra and Associated Photoconductivity of Pure and Decomposed Crystals of Thallous Azide, 1241
Evans, G. : Awarded a John Murray Travelling Studentship in Oceanography and Limnology for 1959 by the Royal Society, 1365
Evans, H. E. : Appointed director of the National Agricultural Advisory Service in Wales, 1160 ; work of, 1160
Evans, Dr. T. : Interfacial Phenomena (Deformation of Evaporated Layers on Substrates), 1098
Evans Electroselenium, Ltd. : Series of Leaflets on Instruments in Industry, 933
Eve, D. J. : Appointed lecturer in inorganic and physical chemistry at the University College of Rhodesia and Nyasaland, 438
Everyday Meteorology (Prof. A. Austin Miller and M. Parry), *review* by James A. Taylor, 3
Everyday Needs : Professional Meteorology and, *review* by James A. Taylor, 3
Evidence for the Conversion of Quinic Acid to Shikimic Acid in Roses (L. H. Weinstein, C. A. Porter and H. J. Laurencot, jun.), 326
Evidence on Growth-rates obtained from Two Marked Humpback Whales (W. H. Dawbin), 1749
Evidence for a Variable Long-Range Order in nearly Anhydrous Gamma Alumina (Prof. G. W. Brindley and Dr. M. Nakahira), 1620
Evison, F. F., and others : Thickness of the Earth's Crust in Antarctica, 306
Evolution (Theory of), by Charles Darwin and Alfred Russel Wallace and the Bicentenary of the publication of the tenth edition of the 'Systema Naturae' by Linnaeus : Centenary of the formulation of the (Congress in Singapore to celebrate the), 723
Evolution of Genetic Systems (Prof. C. D. Darlington), second edition, *review* by Prof. Curt Stern, 1553
Evolution of Living Organisms (Royal Society of Victoria Symposium on), 86
Evolutionary Systems—Animal and Human (Prof. C. H. Waddington), 1634
Ewer, Prof. D. W. : A Toad (*Xenopus laevis*) without Haemoglobin, 271
Ewing, Dr. V. C. : Appointed lecturer in chemistry at University College of North Staffordshire, 1783
Examination of Particulate Matter on Filter Membranes (D. Anson, W. J. Grant and R. M. Jones), 1000
Examination (Bacteriological, Chemical and Biological), of the London Waters for the Years 1955-56 : Thirty-seventh Report on the Results of the (E. Windle Taylor), 798
Examination (Direct), of the Degradation of High Polymers by Gas Chromatography (Dr. R. S. Lehrle and Prof. J. C. Robb), 1671
Examination (Electron Microscope) : Preparation and Sectioning of Tissues embedded in 'Araldite' for (J. M. Davis), 200
Examining Diapause Embryos of *Acheta commodus* W. : A Rapid Method for (T. W. Hogan), 269
Example of the Kell Blood Group Phenotype K–, k–, Kp(a–b–) : A Further (Hiroko Kaita, Marion Lewis, Dr. Bruce Chown and Eileen Gard), 1586
Excavations in North and South Palestine : From Dan to Beesheba—*review* by Peter J. Parr, 951
Excessive Uric Acid Production in the Human induced by 2-Ethylamino-1,3,4-thiadiazole (Dr. J. E. Seegmiller, Arthur I. Grayzel and Lois Liddle), 1463
Exchange of Personnel between the Post Office and Industry, 16
Exchange of Phosphate in Red Blood Cells : Rate of—Effect of Thyroid Hormones (A. M. Ermans and Prof. P. A. Bastenie), 679
Exchange of Students for Technical Experience, International Association for the : Eleventh Annual Report, 85
  Report for 1957-58, 650
Exchange (Phosphate) : Prolonged Muscular Activity without (Prof. Jacob Sacks), 825
Exchange Reaction induced by Radiation between Diethyl Sulphate and Labelled Sulphuric Acid—a Possibly Ionic Reaction (Dr. Paul Y. Feng and Ahren Jacobson), 251
Excised Tomato Roots : Respiration of (D. R. Morgan and H. E. Street), 1023
Excitable Cortex in Conscious Man (Dr. Wilder Penfield), *review* by Dr. P. B. Bradley, 781
Excitation : Recording Inhibition and, in the Cat's Retinal Ganglion Cells with Intracellular Electrodes (Dr. Torsten N. Wiesel), 264
Excitation by d.c. Fields near Breakdown : Light Emission from Insulating Liquids due to (M. Darveniza), 743

Excitation of the Squid Axon Membrane in Isosmotic Potassium Chloride (Dr. John W. Moore), 265
Excitation (Chemical), of Spinal Neurones (Dr. D. R. Curtis, J. W. Phillis and Dr. J. C. Watkins), 611
Excitation–Contraction Coupling in Heart Muscle (Prof. H. Reichel and A. Bleichert), 826
Excretion of Catechol in Human Urine (Prof. U. S. von Euler and F. Lishajko), 1123
Excretion of Free Serine in Urine from Irradiated Humans : An Alteration in the (Dr. Arthur L. Kretchmar), 1809
Excretion (Salt), in Marine Birds (Dr. L. Harrison Matthews), 202
Excretion (Urinary), of β-Amino-*iso*butyric Acid in Eskimo and Indian Populations of Alaska (Dr. A. C. Allison, Dr. B. S. Blumberg and Dr. S. M. Gartler), 118
Exell, A. W. : Flora of West Africa, *review*, 6
Exhaust Fumes : Control of, 1092
Exhibition : Electronic Computer, and Business Computer Symposium, 11
  Industrial Photographic and Television (R. J. Hercock), 1721
  National Education and Careers (National Union of Teachers), 794
Exhibition to commemorate the centenary of the death of Isambard Kingdom Brunel (Engineering Laboratory, Cambridge), 1164
Exhibition of German Precision Measuring Equipment (Degenhardt and Co., Ltd.), 1163
Exhibition of Modern Valve Design Technique (English Electric Valve Co., Ltd.), 224
Exhibition of the Oil and Colour Chemists' Association : Eleventh Technical, 438
Exhibition of Old-time Beekeeping (Museum of English Rural Life, Reading), 1782
Exhibition of Photometric Instruments and Microscopes (Degenhardt and Co., Ltd.), 1164
Exhibition of Polish Scientific Books at Oxford, Cambridge and Glasgow, 582
Exhibition (Jubilee Commemorative), of Photoelasticity, held in University College, London, 1495
Exhibition and Convention : Fourteenth Annual Electronics (Northern Division of the Institution of Electronics), 1234
Exhibition and Convention Premium (Institution of Electronics), 1023
Existence of Two Liquid Phases in the System Cobalt Chloride–Water–Acetone (Dr. J. N. Murrell, Dr. L. I. Katzin and B. L. Davies), 459
Expansion of Marine Research in the United States, 1005
Expansion of Scientific and Technical Education, 1763
Expedition (Tanganyika) : University of Oxford (B. E. Juniper), 726
Expeditions (The Nuffield—Witwatersrand University), to Kalahari Bushmen, 1958-59 (Prof. P. V. Tobias), 1011
Expenditure (Public), on Education, 16
Experimental Approaches to the Problems of Growth and Form in Plants (Experimental Morphology Group of the Linnean Society Symposium on), 584
Experimental Atherosclerosis : Disturbance in the Pattern of Serum Proteins in, and its Prevention (Prof. M. C. Nath, A. Saikia and B. I. Uppin), 894
Experimental Biology : International Symposium on, in commemoration of Lazzaro Spallanzani, 582
Experimental Biology, Society for : Symposia No. 12, The Biological Replication of Macromolecules (edited by F. K. Sanders), *review* by Dr. Roy Markham, 1292
Experimental Cancer Research : Clinical and, *review* by Dr. L. Foulds, 955
Experimental Colloid Goitre produced by Thiouracil (Dr. R. H. Folllis, jun.), 1817
Experimental Leukaemia and Ascitic Tumours : Activity of 10-Hydroxydecenoic Acid from Royal Jelly against (Prof. Gordon F. Townsend, Dr. Joseph F. Morgan and Dr. Barbara Hazlett), 1270
Experimental Method for Diffusion and Extraction Studies across the Liquid–Liquid Interface (Dr. Thomas W. Martin), 312
Experimental Mouse Hepatitis : Effect of Dietary Protein on the Severity of (Dr. Boris Ruebner and James L. Bramhall), 609
Experimental Studies of Perception, *review* by Prof. R. W. Pickford, 1625
Experimental Studies (Systematic and), on Protozoal Blood Parasites of Egyptian Birds (Dr. A. H. Helmy Mohammed), *review* by Dr. Elizabeth U. Canning), 1081
Experimental Test (A Possible), of Einstein's Second Postulate (Prof. Herbert Dingle), 1761
Experimental Traumatic Shock in Rats : 5-Hydroxytryptamine in Blood during (M. Medaković and I. Spuzić), 1685
Experimentelle Alternsforschung—Symposium der Europäischen Abteilung des Biologischen und Medizinischen Forschungskomitees der Internationalen Gerontologischen Gesellschaft, Basel, 1956 (herausgegeben von F. Verzár), *review* by Prof. P. L. Krohn, 777
Experiments : Argus High-Altitude Geophysical (Dr. Alan T. Waterman and Dr. Detlev W. Bronk), 1019
  Planning of (Dr. D. R. Cox), *review* by Dr. D. J. Finney, 1766
Experiments with an Electrodeless Discharge : Some (J. K. Wright, W. T. Eeles and J. D. Herbert), 1665
Experiments (Tracer), in the Rat : Synthesis of Dextran Sulphate labelled wiht Carbon-14 and (Dr. H. Weigel and Dr. K. Walton), 981
Explanation (A Position-Effect), of Gene Conversion (Prof. J. A. Serra), 700
Exploded Wires : Electrically (Thermal Radiation Laboratory of the Geophysics Research Directorate of the United States Air Force Cambridge Research Center Conference on), 224
Exploration of the Sea, International Council for the, and others : International Conference on Fishery Statistics, 1783
Exploration (Extra-Terrestrial) : Contamination by, 925
Exploration (Physical and Chemical), of the Cell, *review* by Dr. R. Barer, 1355
Exploratory Physico-chemical Studies on the Sense of Taste (Dr. Aetius R. Lawrence and Lloyd N. Fergusson), 1469
Explorer I, together with its *Jupiter-C* Carrier Rocket : A Replica of, presented by W. M. Bruckner to the Smithsonian Institution, 510
Explosion of Transition Metal Co-ordination Compounds (Seward E. Beacom), 38
Explosions (High-Altitude) : Geophysical Effects associated with (Dr. P. J. Kellogg, Prof. E. P. Ney and Prof. J. R. Winckler), 358
Explosions (High-Altitude Nuclear) : Geophysical Effects of (T. Obayashi, S. C. Coroniti and E. T. Pierce), 1476
Explosive : Advance Detonation in a Tubular Charge of (Dr. D. W. Woodhead), 1756
Exponential Dilution Series for the Study of Antibiotic Combinations : Application of Logarithms to the Base 2 in the Use of (H. J. Oskam and A. Koelman), 840
Exposure to Low Temperatures : Deoxyribonucleic Acid Content of the Cell-Nuclei in the Adrenal Medulla after (L. Leeman), 1188
Exposure Ages (Cosmic-Ray), of Meteorites : Calculation of Erosion in Space from the (Dr. F. L. Whipple and Dr. E. L. Fireman), 1315
Exposure (Oxygen), and Brain Damage (Lars Gyllenstein), 1068
Exsheathing Fluid : Antigenic Stimulus of, in Self-Cure of Sheep infected with *Haemonchus contortus* (E. J. L. Soulsby, R. I. Sommerville and D. F. Stewart), 553
Extensive Air Showers (Dr. William Galbraith), *review* by Dr. R. M. Tennent, 1555
Extracellular Amylase : Inhibitory Action of Amino-Acid Esters on the Production of, by *Penicillium chrysogenum* (Dr. L. Horváth, S. Bajusz and A. Szentirmai), 477
Extracellular to Intracellular Potential Records : Relation of, from Single Cardiac Muscle Fibres (Dr. E. M. Vaughan Williams, 1341
Extract (Yeast) : An Effect of, on the Growth of *Chlorella* (P. J. Casselton), 1404
Extraction Studies (Diffusion and), across the Liquid–Liquid Interface : An Experimental Method for (Dr. Thomas W. Martin), 312
Extracts (Plant) : Separation of Anthocyanins from (Dr. B. V. Chandler and Dr. T. Swain), 989
Extrapolation to True Energy Values : Use of Approximate Wave Functions for (P. G. Dickens, Dr. J. W. Linnett and D. Schofield), 175
Extra-Sensory Perception and Personality Patterns (Dr. Gertrude Raffel Schmeidler and Dr. R. A. McConnell), *review* by Dr. R. H. Thouless, 964
Extra-Terrestrial Exploration : Contamination by, 925
Extra-Terrestrial Radio Waves in the Ionosphere : Refraction of (M. M. Komesaroff and C. A. Shain), 1584
Eye of a Lemur : Crystals of Riboflavin making up the Tapetum Lucidum in the (Antoinette Pirie), 985
Eye in the Rabbit : Regeneration of the Lens of the (D. Stenhouse Stewart and Prof. Paul G. 'Espinasse), 1815
Eye (Euphausiid Crustacean) : Electrical Response to Illumination of the (Elizabeth M. Kampa, Brian P. Boden and Bernard C. Abbott), 1820
Eye (Pineal) Sensory Cells : Ultrastructure of (Dr. W. Steyn), 764
Eye (Rabbit's) : Differential Distribution of Radioactive Strontium and Yttrium in the Tissues of the (R. H. Mole, Antoinette Pirie and Janet M. Vaughan), 802
Eyles, Joan M. : Scientific Centenaries of 1959, 12
Eysenck, Prof. H. J. : Figural After-Effects, 1027

F_2 Region : Effect of Magnetic Activity on Drifts of the (Prof. B. Ramachandra Rao, E. Bhagiratha Rao and Y. V. Ramana Murty), 667
Faber, J. G., and others : Ethylenediamine Tetraacetate and the Intestinal Absorption of Vitamin B_{12}, 1395
Fabian Society : Fabian Research Series No. 205, Training for Skill (Lady Gertrude Williams), 1780
Fabric of Farming (Prof. A. N. Duckham), *review* by Harwood Long, 280
Fabrics (Weakened) : Museum Treatment of (E. R. Beecher), 1501
Facial Eczema Diseases in Sheep : A Hepatotoxin from *Sporidesmium bakeri* capable of producing (Dr. R. H. Thornton and J. C. Percival), 63
Fact : Surmise and, on the Nature of Cancer (Dr. Peyton Rous), 1357
Fact and Value in the Social Sciences, *review* by Prof. T. S. Simey, 4
Factor Determining the Duration of Antibody Formation by Transferred Cells : Presence of Antigen—a (Dr. J. Sterzl), 547
Factor (Serum Globulin Permeability) : Enzymic Nature of the (E. L. Becker, D. L. Wilhelm and Prof. A. A. Miles), 1264
Factories, Chief Inspector of : Annual Report on Industrial Health for the Year 1957, 867
Factors Affecting the Rate of Bilirubin Conjugation *in vitro* (Dr. E. Talafant and J. Továrek), 111
Factors Inhibiting and Stimulating Growth of *Mycobacteria* in the Blood and Serum of Non-immunized and Immunized Animals (J. Hubáček and I. Málek), 187
Factors (Density-Dependent), in Ecology (Dr. H. G. Andrewartha), 200 ; (Prof. G. C. Varley), 911 ; (A. J. Nicholson), 911
Factors (Soil) : Population Differentiation within Plant Species in Response to (A. D. Bradshaw and R. W. Snaydon), 129, *erratum*, 368
Factory System (Early) : The Strutts and the Arkwrights, 1758-1830—a Study of the (R. S. Fitton and A. P. Wadsworth), *review* by Prof. W. H. G. Armytage, 635
Facultative Parasitism and Dietary Change in *Harmolita hyalipenne* Walker (R. Bailey), 341
Fading (Faraday), of Signals from Artificial Earth Satellites : Deduction of Ionospheric Electron Content from the (W. T. Blackband, B. Burgess, I. L. Jones and G. J. Lawson), 1172
Faecal Absorption of Radioactive Ferric Chloride : Effect of Dietary Phytate on (Dr. Henry Foy, Athena Kondi and W. H. Austin), 691
Failure of Acetylcholine Release in Tick Paralysis (Patricia Emmons and Prof. H. McLennan), 474
Failure of Ribonucleoprotein to transfer Antibody Formation (Dr. B. D. Janković, Dr. K. Isaković and J. Horvat), 1400
Fairy Fly, *Prestwichia aquatica* (C. I. Ison), 1782
Falck, Bengt, and others : A New Type of Chromaffin Cells, probably storing Dopamine, 267
Falconer, R. : Antarctic Meteorology, 1504
Falk, Dr. Hans L., and others : Milk as an Eluant of Polycyclic Aromatic Hydrocarbons added to Wax, 1184
Falkland Islands Dependencies Survey : Scientific Reports No. 17, The Pygoscelid Penguins, 1, Methods of Study ; 2, The Adélie Penguin, *Pygoscelis adeliae* (Hombron and Jacquinot), (Dr. William W. J. Sladen), 23
Fall-out : Plants and (F. R. Fosberg), 1448
  Radioactive (Dr. C. Auerbach), 1773
Fall-out of Strontium-90 : Uptake of Strontium by Pasture Plants and its Possible Significance in relation to the (Dr. P. B. Vose and Dr. H. V. Koontz), 1447 ; (Dr. R. Scott Russell and Dr. R. V. Garner), 1806
Fallopian Tube : Fate of Spermatozoa penetrating into the Tissues of the (Dr. R. G. Edwards and J. L. Sirlin), 1744

Fallopian-Tube Mucosa : Entry of Spermatozoa into the (Dr. C. R. Austin), 908
Family Background and Educational Progress in Scotland : Intelligence, review by Jean Floud, 493
Fanska, R., and others : Metabolism of Sulphobromophthalein, 469
Fantes, K. H., and others : Presence of Griseofulvin in Hair of Guinea Pigs after Oral Administration, 256
Fantola, A. L., and others : Labelled Keto-Acids in Duck Blood incubated *in vitro* with NaH^{14}CO$_3$, 1328
Faraday Fading of Signals from Artificial Earth Satellites : Deduction of Ionospheric Electron Content from the (W. F. Blackband, B. Burgess, I. L. Jones and G. J. Lawson), 1172
Faraday Medal of the Institution of Electrical Engineers awarded to Luigi Emanueli, 507
Faraday Society : Discussion on Relaxation Processes, 583
Faraday Society (Colloid and Biophysics Committee) : Discussion on Electrical Double Layer in Colloid Science, 78
Fardy, Dr. A. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Farm Animals : Glycosidases in some (J. Conchie, June Findlay and Dr. G. A. Levvy), 615
Farmer, T. H. (Bedson, H. S., and) : Detection of Meprobamate on Paper Chromatograms, 43
Farmer, V. C., and others : Effect of Substitution in the Side-Chain on β-Oxidation of Aryloxy-alkylcarboxylic Acids by *Nocardia opaca*, 748
Farming : The Fabric of (Prof. A. N. Duckham), *review* by Harwood Long, 280
Farming Weather (L. P. Smith), *review* by James A. Taylor, 3
Farming (Hill) Research Organization : First Report (1954-58), 727
Farrell, P. G., and Mason, Dr. S. F. : Kinetic Isotope Effect in the Bromination of Dimethylaniline, 250
Farrar, D. J. : Awarded the British Silver Medal for Aeronautics of the Royal Aeronautical Society, 1648
Farren, Sir William S. : Honoraty Fellowship of the Royal Aeronautical Society conferred on, 1648
Farrington, Prof. Benjamin : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1235
Farthing, Dr. C. P., and others : Study of Adenovirus Antigens by Immunoelectrophoresis, 895
Fast and Slow Muscles in Mammals (Dr. A. J. Buller, Dr. A. C. Dornhorst, Dr. R. Edwards, Dr. D. Kerr and Dr. R. F. Whelan), 1516
Fat (Milk) : Depression in Percentage of, by Parenteral Glucose Infusion and Glycerol Feeding (W. S. Vallance and Prof. G. L. McClymont), 466
Fat Antioxidants : Basic Substances as Synergists for (H. S. Olcott and E. J. Kuta), 1812
Fat Body of the Desert Locust : Histochemical Demonstration of Lipase and Alkaline Phosphatase Activity in the (J. C. George and J. Eapen), 268
Fate of Spermatozoa penetrating into the Tissues of the Fallopian Tube (Dr. R. G. Edwards and J. L. Sirlin), 1744
Father of Chemistry, *review* by Dr. R. E. W. Maddison, 850
Fatigue (Metal) : Committee on, set up by the Department of Scientific and Industrial Research, 1568
Fatigue Properties of Ternary Aluminium–Zinc–Magnesium Alloys (J. J. Polmear), 1388
Fatigue Strength of Notched Specimens : Improvement of the, by Artificially Induced Residual Stresses (T. R. Gurney), 883
Fats : Liquid/Solid Content of (D. Chapman, R. E. Richards and R. W. Yorke), 44
Fatty Acid Mixtures : Effect of, on the Rice Stylet Nematode (*Tylenchorhynchus martini* Fielding, 1956), (Dr. Titus M. Johnston), 1392
Fatty Acids in Cardiolipin : Position of the (Dr. Marjorie G. Macfarlane and L. W. Wheeldon), 1808
Fatty Acids (C_{18} and C_{19} *Cyclo*propane) : Structure of Malvalic Acid and some related (Dr. B. Craven and Prof. G. A. Jeffrey), 676
Fatty Acids (Long-Chain) : Synthesis of, from 2-^{14}C–Acetate and ^{14}C-Glucose in *Trichoderma viride* (Dr. W. Mary Crombie and P. E. Ballance), 1195
Fauconnier, B., and Barua, D. : Increase of Viral Haemagglutinability of Red Cells of the Mouse after Treatment with Formalin, 629
Faulkner, E. A. : Nuclear Magnetic Resonance in Rolled Copper Sheet, 1043
Faults in the Ocean Floor : Measurement of Horizontal Displacement along (Dr. Victor Vacquier), 452
Fauna (British) : A Monogenetic Trematode New to the (Z. Kabata), 481
Fauna (British Marine Bottom) : New Members of the (G. M. Spooner), 1695
Fauvel, Prof. Pierre : *Obituary* by Dr. Norman Tebble, 1016
Feature of the Acute Radiation Syndrome in the Plaice : Leucocytosis in Response to Bacteraemia as a (A. Preston), 832
Feature (Diagnostic), of *T. vavilovi* : An Induced Mutant in *Triticum carthlicum* with the (Z. Barabás, jun.), 1349
Feder, William A., and Duddington, Dr. C. L. : Freeze-drying of *Harposporium anguillulae* Lohde in its Nematode Host, 767
Federations de l'Industrie Chimique : Centre Européen des, 1368
Fedida, S. : Awarded a Premium by the Radio Industry Council, 1023
Fee, W. W., and West, B. O.: Co-ordination Chemistry (Exchange Reaction of Quadridentate Complexes, particularly of Nickel (II)), 1784
Feedback Control Systems (Prof. Otto J. M. Smith), *review* by M. J. Somerville, 73
Feedback Control of Purine Biosynthesis by Purine Ribonucleotides (Dr. James B. Wyngaarden and Doris M. Ashton), 747
Feedback Phenomenon (A Possible Negative), controlling Formation of Alkaline Phosphomonoesterase in *Escherichia coli* (T. Horiuchi, S. Horiuchi and D. Mizuno), 1529
Feedback Theory and its Application (P. H. Hammond), *review* by R. L. Grimsdale, 280
Feedback Theory of Hydrogen Overvoltage (J. F. Chittum), 589
Feeding of the Oystercatcher (*Haematopus ostralegus*) on the Edible Mussel (*Mytilus edulis*) in the Estuary of the River Conway (R. E. Drinnan), 153
Feeding (Glycerol) : Depression in Percentage of Milk Fat by Parenteral Glucose Infusion and (W. S. Vallance and Prof. G. L. McClymont), 466
Feeding-Stuffs (Protein) : Quality of (Sir Solly Zuckerman), 1303
Feilden, G. B. R. : Elected a Fellow of the Royal Society, 860
Feinberg, Dr. J. G., and Grayson, H. : Immunological Aspects of Allergic Disorders (A New Look at the Antibodies to so-called 'Common' Antigens of Grass Pollens), 296
    A Critical Test of Antigenic Relationships, 987
Feinberg, Dr. R. : Rise and Decay of Intensity of Luminescence of Short-Persistence Phosphors, 1546
Feldmann, W. L. (Pearson, G. L., and) : Powder Patterns of Ferroelectric Domains, 367
Felix, Prof. Willi : Elected a member of the Surgery Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Fell, Dr. Honor B. : Appointed to the Advisory Board of the Beit Memorial Trust, 1569
Fellowships (Jajasan Siswa Lokantara), 1304
    Beit Memorial, 1569
    Ciba (Awards for 1959-1960), 1161
    Graduate and Postdoctoral (National Science Foundation), 1233
    Mond Nickel, 367
    Research (Mr. and Mrs. John Jaffé Donation), awarded by the Royal Society to Dr. G. Hoyle and to Dr. J. Owen, 1365
    Studentships and (NATO), 793
Fellowships in 1959 : André Mayer (Food and Agriculture Organization of the United Nations), 1368
Fellowships for Advanced Students of Chemistry : Ramsay Memorial, 367
Fellowships for Foreign Students (Rockefeller Institute, New York), 1365
Fellowship and Grants : Research (Leverhulme Trust), 1499
Fellowships (Grants, Scholarships and), for Research on Diseases of the Blood (Lady Tata Memorial Trust), 581
Fellowships (Harkness), of the Commonwealth Fund (Awards for 1959), 1093
Fellowships (Studentships and), in Agricultural Research (Agricultural Research Council), 722
Fels, Dr. I. Gordon, and Kaufman, Marty : Free Radicals from Chlorpromazine, 1392
Felsenfeld, Dr. G. : Awarded a grant of 23,000 dollars by the National Science Foundation, to initiate research on the active site in some copper-carrying proteins, 86
Female Adults (Male and), of *Trogoderma granarium* Everts : Differential Response of, towards Sterilizing Doses of Gamma-radiation (G. C. Carney), 338
Feng, Dr. Paul Y., and Jacobson, Ahren : Exchange Reaction induced by Radiation between Diethyl Sulphate and Labelled Sulphuric Acid—a Possibly Ionic Reaction, 251
Fenner, Prof. Frank, and others : Reactivation of Heat-inactivated Poxviruses—a General Phenomenon which includes the Fibroma–Myxoma Virus Transformation of Berry and Dedrick, 1340
Fens : The Black (A. K. Astbury), *review* by Dr. M. A. Morgan, 965
Fenton, W. D. D. : Elected a Fellow of the Royal Society of Edinburgh, 719
Feo, F., and others : Oxygen Consumption of Different Forms of Stable L *Proteus* P 18 growing in Hypertonic Liquid Medium, 194
Ferguson, jun., Dr. Albert B. (Laing, Dr. P. G., and) : Iodine-131 Clearance-rates as an Indication of the Blood Supply of Bone, 1595
Ferguson, Lloyd N. (Lawrence, Dr. Aetius R., and) : Exploratory Physicochemical Studies on the Sense of Taste, 1469
Ferguson, Dr. T. P., and Weaving, Dr. A. S. : Rutin in Tobacco grown in a Greenhouse, 64
Ferguson, W. A. : Appointed secretary of the British Museum (Natural History), 18, 154
Fergusson, J. E., and Nyholm, Prof. R. S. : New Oxidation States of Technetium, 1039
Fermentation of Cassava : A Two-stage (Prof. Patrick Collard and Simon Levi), 620
Fermentation (Aerobic), of Whey by a Nitrogen-fixing Strain of *Aerobacter aerogenes* (Prof. D. B. Johnstone and M. Pfeffer), 992
Fermentation (Penicillin) : Synthesis of Penicillin—6-Aminopenicillanic Acid in (F. R. Batchelor, F. P. Doyle, J. H. C. Nayler and Dr. G. N. Rolinson), 257
Fermentation Industries : British (J. M. Whitmarsh), *review*, 967
Fermented by the Amylo Process : Unfermentable Sugars in Barley Mash (Hideo Ono and Michio Dazai), 1055
Fernandez, Martha A., and others : Distribution of Alkaline Phosphatase in the Arteries of several Species, 1262
Ferns (Characteristic Wealden), in the Jabalpur Series : Occurrence of Two (Dr. M. N. Bose and Sukh Dev), 130
Ferodo Research Laboratories : New (Dr. R. C. Parker), 297
Ferranti 5/71 *CM* Micro-Spot Cathode-Ray Tube, 1642
Ferrari, G. (Rindi, Dr. G., and) : The γ-Aminobutyric Acid and Glutamic Acid Content of Brains of Rats treated with Toxopyrimidine, 608
Ferrari, Prof. Rodolfo, and others : Antiviral Activity of Lysozyme, 548
Ferret : Electron Microscope Observations on the Neurohypophysis of the (Dr. R. L. Holmes and F. G. W. Knowles), 1745
    Seasonal Variations in the Pituitary Gland of the (Dr. R. L. Holmes), 1521
Ferric Chloride (Radioactive) : Effect of Dietary Phytate on Faecal Absorption of (Dr. Henry Foy, Athena Kondi and W. H. Austin), 691
Ferric Complexes (Ferrous and), with Pyridine 2-Aldoxime (Dr. G. I. H. Hanania and Dr. D. H. Irvine), 40
Ferric Hydrate : Binding of Water in (Prof. O. Glemser), 1476
Ferroelectric Domains : Powder Patterns of (G. L. Pearson and W. L. Feldmann), 367
Ferroni, E., and Orioli, P. : Co-ordination Chemistry (X-Ray Determination of the Structure of a Complex formed by Azobenzene and Arsenic Trichloride), 1784
Ferrous and Ferric Complexes with Pyridine 2-Aldoxime (Dr. G. I. H. Hanania and Dr. D. H. Irvine), 40
Ferry, Prof. John D. : Elected a member of the United States National Academy of Sciences, 1575
Fessas, Dr. Phaedon, and Mastrokalos, N. : Demonstration of Small Components in Red Cell Haemolysates by Starch-gel Electrophoresis, 1261
Fessas, Dr. Phaedon, and others : New Variant of Human Foetal Haemoglobin, 30
Feulgen Reaction in the Fucales (Dr. M. Naylor), 627
Feulgen–Naphthoic Acid Hydrazide Reaction applied to Blood Smears (Dr. R. K. Archer), 820
Fever (Yellow), and related Arthropod-borne Viruses : Plaque Production with (J. S. Porterfield), 1069

Fiala, Anna E. (Fiala, Dr. Silvio, and) : Prevention of Adaptive Formation of Tryptophan Peroxidase by a Carcinogenic Azo Dye, 1532
Fiala, Dr. Silvio, and Fiala, Anna E. : Prevention of Adaptive Formation of Tryptophan Peroxidase by a Carcinogenic Azo Dye, 1532
Fibres in the Optic Nerve : Number of, and the Number of Ganglion Cells in the Retina of Anurans (Dr. H. R. Maturana), 1406
Fibres (Biological) : Clay Minerals and (X-Ray Analysis Group of the Institute of Physics Conference on), 1024
Fibres (Cardiac Muscle) : *Relation of Extracellular to Intracellular Potential* Records from Single (Dr. E. M. Vaughan Williams), 1341
Fibres (Glycerol-treated Muscle) : Relaxation of, by Acetone (Dr. Setsuro Ebashi and Dr. Fumiko Ebashi), 687
Fibres (Polysaccharide), in Mammalian Connective Tissue (A. J. Cruise and J. W. Jeffery), 677
Fibres (Wool) : Discoloration of, by a Fungus (A. P. Mulcock), 1281
Fibrin Surfaces : *Anticoagulant Action of*, on Mammalian Blood (Dr. A. L. Copley, D. Steichele, M. Spradau and R. S. Thorley), 1683
Fibrinolytic Activity : Salt Concentration and (Dr. Monamy Buckell and Margaret Truscott), 1268
Fibroblasts (L-strain) : Variability of Content of Deoxyribonucleic Acid in (Rolla B. Hill, jun., Klaus G. Bensch, Stanley Simbonis and Prof. Donald W. King), 1818
Fibroma (Transplantable), of the Skin in the Newt *Triturus taeniatus* : Inhibitory Effect of Colchicine upon the (Prof. A. Stolk), 555
Fibroma–Myxoma Virus Transformation of Berry and Dedrick : Reactivation of Heat-inactivated Poxviruses—a General Phenomenon which includes the (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340
Fibrous Component *in Amyloid of Diverse Origins* : Electron Microscopic Observations on a (Dr. Alan S. Cohen and Dr. Evan Calkins), 1202
Field, Alexander C. : Balance Trials with Magnesium-28 in Sheep, 983
Field Biology : A Guide to (John Sankey), *review* by W. H. Dowdeswell, 1081
Field Guide to Reptiles and Amphibians of the United States and Canada East of the 100th Meridian (Roger Conant), *review* by A. G. C. Grandison, 958
Field Studies : Directory of Natural History and other (British Association for the Advancement of Science), 1723
Field Studies Council: To open a Field Centre at Slapton, South Devon, 1570
  Annual Report for 1957-58, 1570
Field (High-) Conduction Current in n-Hexane : Electric Strength and (A. M. Sletten), 311
Field (Homogeneous) Spark Gap in Air : Effect of Humidity on the Breakdown of a 1-cm. (Dr. K. Phillips, K. R. Allen and A. Refsum), 532
Field and Sphere Gaps (Homogeneous) : Effect of Radiation on the Breakdown of (K. R. Allen and Dr. K. Phillips), 233
Fiene, Marilyn, and others : Co-ordination Chemistry (Substitution Reactions of Nickel Carbonyl–Phosphine Complexes), 1785
Figgis, B., and *others : Co-ordination Chemistry* (Variation of the Magnetic Susceptibility of Vanadium (III) Complexes with Temperature), 1784
Figural After-Effects (Dr. Peter McEwen), 1027
Figurovskij, Prof. N. A. : *Elected a member of the History of Science* and Medicine Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Film Association (Scientific) : Appointment of Edmund J. *Cooper* as *general secretary*, 18
Films : Ethnographic, 650
  Optically Active Fluorite (Niels O. Young and Jakym Kowal), 104
  Thin Magnetic (R. S. Webley), 999
Films (Aluminium Oxide Anodic) : Sealing of (Dr. R. M. Hinde, E. A. Kellett and P. H. Harris), 39
Films (Technical), *used at the Geneva Conference on the Peaceful Uses* of Atomic Energy (United States Atomic Energy Commission), 721
Filon, Prof. L. N. G. (Coker, Prof. E. G., and) : A Treatise on Photo-Elasticity, second edition, *revised by H. T. Jessop, review* by E. K. Frankl, 1010
Filter Membranes : Examination of Particulate Matter on (D. Anson, W. J. Grant and R. M. Jones), 1000
Filtrates of *Marasmius perniciosus* Stahel (Witch Broom Disease of Cacao) : Absence of Gibberellin-like Substances in (W. F. Dudman and R. Nichols), 899
Filtration : *Gel—a Method for Desalting* and *Group Separation* (Dr. Jerker Porath and Dr. Per Flodin), 1657
Finance of Scientific Research in Britain, 156
Finback Whale Myoglobin *Crystals* : *Electron-Microscopic Study of* (D. E. Bradley), 941
Finch, J. T., and Klug, Dr. A. : Structure of Poliomyelitis Virus, 1709
Finding : Looking and (Geoffrey Grigson), *review* by T. H. Hawkins, 1557
Findlay, *June, and others* : Glycosidases in some Farm Animals, 615
Fine, Dr. Albert (Person, Dr. Philip, and) : Oxidative Metabolism of Cartilage, 610
Fine, Dr. J. M., and Creyssel, Dr. R. : *Starch Gel Electrophoresis Studies* on Abnormal Proteins in Myeloma and Macroglobulinaemia, 392
Fine Iron Filaments Magnets (F. P. Levi), 1251
Finean, Dr. J. B. : Appointed to a *senior lectureship in medical biochemistry* and pharmacology in the University of Birmingham, 1571
Finean, Dr. J. B. (Engström, Prof. Arne, and) : Biological Ultrastructure, *review* by Dr. H. E. Huxley, 956
'*Fingerprinting*' : Comparison of Normal Adult Human Haemoglobin with Haemoglobin I by (Constituents of Human Haemoglobin), (Makio Murayama and Dr. V. M. Ingram), 1798
Finite *Elastic Waves in Rubber* : *Propagation of* (P. Mason), 812
Finkelstein, Harold, and others : A Correlation between Iodine Permeability and the Gram Characteristic of Cells, 123
Finland, Maxwell *(and 93 other authors)* : *Basic and Clinical Research of* the New Antibiotic, Kanamycin, 1570
Finney, Dr. D. J. : The Theory of Practice, *review*, 1766
Finnock from the Aberdeenshire Dee : *Vibrio* spp. in (Isabel W. Smith), 1409
Fire Research Laboratory : New Canadian (R. F. Legget), 653
Fired Ceramic Materials : Adsorption and Desorption of Moisture in (F. Vaughan and A. Dinsdale), 600
Fireman, Dr. E. L. (Whipple, Dr. F. L., and) : Calculation of Erosion in Space from the Cosmic-Ray Exposure Ages of Meteorites, 1315
First Ionization Coefficient (Townsend's), in Pure Nitrogen (Dr. A. E. D. Heylen), 1545
Firth, Prof. Raymond W. : Awarded a Viking Fund Medal and Award of *1,000 dollars by the Wenner-Gren Foundation for Anthropological* Research, 1434
Fischer, Dr. E. O. : Co-ordination Chemistry (Experimental Work on *Compounds involving 'Sandwich' Bonding*), 1785
Fischer, Prof. Roland, and Zeman, Prof. Wolfgang : Neuronal Dye-Sorption as a Histochemical Indicator of Nervous Activity, 1337
Fish : Influence of Temperature on the Number of Vertebrae in (Dr. Yasuo Itazawa), 1408
Fish Culture Research Station, Malacca (Dr. C. F. Hickling), 287
Fish and Meat Curing Brines : The Microbiology of—Proceedings of the *Second International Symposium on Food Microbiology* (Cambridge, 1957), (edited by Dr. B. P. Eddy), *review* by Dr. Magnus Pyke, 351
Fisher, C. A. : Appointed to the chair of geography in the University of Sheffield, *1091* ; work of, *1091*
Fisher, David E. (Schaeffer, Oliver A., and): Cosmogenic Noble Gases in the Washington County Meteorite, 660
Fisher, Edward W., and Dalton, Rodger G. : Cardiac Output in Cattle, 829
Fisher, Prof. Harry L. : Chemistry of Natural and Synthetic Rubbers, *review* by Dr. W. J. S. Naunton, 779
Fisher, Dr. Myron W. : Measurement of a Staphylococcal Antibody in *Human Serum by a Mouse Protection* Test, 1692
Fisher, Dr. R. B. : Appointed to the chair of chemistry in relation to medicine in the University of Edinburgh, 1567 ; work of, 1567
Fisheries : *Shorewards Upslope of the Layer of Minimum Oxygen Off* Bombay—its Influence on Marine Biology, especially (Dr. J. N. Carruthers, S. S. Gogate, T. R. Naidu and T. Laevastu), 1084
Fisheries (North West Atlantic), International Commission for the, and others : International Conference on Fishery Statistics, 1783
Fisheries Research, 1567
Fishery (Hake) : Relationship between the, and a Southerly Sub-surface *Return Flow below the* Peru Current off the Chilean Coast (Dr. Wilhelm Brandhorst), 1832
Fishery Research : Postgraduate Training Grants in (Development Commissioners, *in association with the Ministry of Agriculture*, Fisheries and Food, and the Scottish Home Department), 1094
Fishery Statistics (Food and Agriculture Organization of the United Nations, the International Commission for the North West Atlantic Fisheries and the International Council for the Exploration of the Sea International Conference on), 1783
Fishes : British Marine, *review* by Dr. D. P. Wilson, 140
Fishes (Sea) : The Observer's Book of (A. Laurence Wells), *review* by Dr. D. P. Wilson, 140
Fishing Gear of England and Wales : An Account of the (the late F. M. Davis), *revised edition*, 1023
Fishman, Marvin : Antibody Formation in Tissue Culture, 1200
Fisica, Società Italiana di : Summer Courses of the International School of Physics, 1368
Fisk, Dr. James B. : Elected president of the Bell Telephone Laboratories, 220 ; work of, 220
Fitton, R. S., and Wadsworth, A. P. : The Strutts and the Arkwrights, 1758-1830—a Study of the Early Factory System, *review* by Prof. W. H. G. Armytage, 635
Fitz-James, Prof. Philip C. (Young, Dr. I. Elizabeth, and) : Pattern of Synthesis of *Deoxyribonucleic Acid in Bacillus cereus growing* synchronously out of Spores, 372
Fitzpatrick, Margaret M., and others : Distribution of Kappa-Casein in Skim Milk, 616
Fitzpatrick, Dr. R. J. : Appointed senior lecturer in veterinary pharmacology at the University of Bristol, 1024
Fitzpatrick, T. B., and others : *Ultra-violet Carcinogenesis in Albino and Pigmented Mice receiving* Furocoumarins—Psoralen and 8-Methoxypsoralen, 728
Five-Year Defence Plan : Progress of the (White Paper on), 1483
Fixation (*Complement*), *with Tissue Culture and Liver Antigens* of Mouse Hepatitis (Dr. Theodore J. Starr and Dr. Morris Pollard), 1690
Fixation (Dark), of Carbon Dioxide in *Kalanchoe blossfeldiana* in relation to Photoperiodism (Dr. G. Zabka, Prof. F. G. *Gregory* and Dr. J. Edelman), 1375
Fixation (Symbiotic Nitrogen) : Temperature and (D. R. Meyer and A. J. Anderson), 61
Fixation (Visual) : Barbiturate Nystagmus and the Mechanisms of (C. Rashbass), 897
Fixed Ammonium from the Soil : Release of, by Ball Milling (P. M. McDonnell, *Prof. F. J. Stevenson* and Dr. J. M. *Bremner*), 1414
Fizika Tverdogo Tela (Soviet Physics—Solid State), No. 1 (Academy of Sciences of the U.S.S.R.), 1717
Fjord (Hardanger), Western Norway: *Pogonophora in the* (Prof. Hans Brattström), 1458
Flanagan, Dr. T. B., and others : Electrode Potentials and Compound Formation in the Palladium–Platinum–Hydrogen System, 39, 510
Flare *in Human Skin* : Weal and, produced by Histamine and other Substances (Dr. A. Herxheimer and Dr. M. Schachter), 1510
Flares (Strong Solar) : Observations of Intense Ionization of Long Duration below 50 km. *Altitude after some* (Dr. Bengt Hultqvist and Johannes Ortner), 1179
Flash Illumination of Absorbing Bodies : Initiation of Thermal Reactions by the (*Dr. J. L. Lundberg* and *Dr. L. S. Nelson*), 1560
Flattening (Earth's) : A New Value for the, derived from Measurements of Satellite Orbits (D. G. King-Hele and R. H. Merson), 881
Flavan-3,4-diols and Leuco-anthocyanidins of *Guibourtia* spp. (Dr. D. G. Roux), 890
Flavone Glucosiduronic Acids from *Scutellaria* sp.—a Correction (C. A. Marsh), 1824
Flavor Research and *Food Acceptance—a Survey of the Scope of Flavor* and Associated Research compiled from papers presented in a series of Symposia given in 1956-57, *review* by Dr. Magnus Pyke, 351
Flax Seedlings : *Effect of Boron Supply on the Sugars, Soluble in 80 per cent* Ethanol, in (T. F. Neales), 483
Flear, C. T. G. : Elected to a Junior Fellowship by the Beit Memorial Trust, 1569
Fleck, Sir Alexander : *Speaking on the motion* 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1235
  Honorary membership of the Institution of Mining and Metallurgy conferred on, 1499

Fletcher, Prof. B. A. : The Role of the Scholar in Society, 1772
Fletcher, K. (Cameron, Christina, and) : An Iodine Compound associated with Albumin in the Plasma of Thyrotoxic Patients, 116
Fletcher, P. C. (Brennan, Dr. D., and) : Heterogeneous Atomization of Hydrogen and Oxygen, 249
Flies (House), *Musca domestica* : Metabolism of Benzene Hexachloride by Resistant (Dr. F. R. Bradbury and H. Standen), 983
Flies (Primitive) : Origin of Indirect Flight Muscles in (Dr. H. E. Hinton), 557
Flight by Birds and by Man-Power : The Work Output of Animals—(Dr. D. R. Wilkie), 1515
Flight (Space) : Biological Effects of, 651
Flight Muscles (Indirect), in Primitive Flies : Origin of (Dr. H. E. Hinton), 557
Flocculation of Suspensions : Measurement of the (Dr. R. L. Whitmore), 313 ; (E. R. Braithwaite), 740
Flodin, Dr. Per (Porath, Dr. Jerker, and) : Gel Filtration—a Method for Desalting and Group Separation, 1657
Floor (Ocean) : Measurement of Horizontal Displacement along Faults in the (Dr. Victor Vacquier), 452
Floor (Sea-) 160 Metres Deep : Occurrence of *Pyrosoma* on the (Dr. D. E. Hurley and D. G. McKnight), 554
Flora of Manitoba (H. J. Scoggan), *review* by N. Y. Sandwith, 966
Flora of West Africa, *review* by A. W. Exell, 6
Flora of West Tropical Africa (Dr. J. Hutchinson and Dr. J. M. Dalziel), second edition revised by H. W. J. Keay, *review* by A. W. Exell, 6
Flora (The British), during 1958 (J. E. Lousley), 869
Flora Europaea : The Presentation of Taxonomic Information—a Short Guide for Contributors to (Dr. V. H. Heywood), 721
Florida State Museum : Annual Report for 1957-58, 1433
Florkin, Prof. M., and others : Utilization of the Carboxyl Group of Glycine for the Synthesis of the Amino-Acids of Silk by *Bombyx mori*, *erratum*, 294
Floud, Jean : Intelligence, Family Background and Educational Progress in Scotland, *review*, 493
Flow : Hypersonic (Royal Aeronautical Society Discussion on), 1095
Flow of Blood, Plasma and Serum through Glass Capillaries : An Equation for the (Dr. G. W. Scott Blair), 613
Flow (River), in Great Britain, 1955-56 (Prof. David L. Linton), 714
Flow (Turbulent) : Variations in the Value of Reynolds Number at the Transition from Streamline to (Dr. P. J. Isaac, I. B. Williams and Dr. W. M. Jones), 531
Flowering (Second), in *Oryza sativa* (var. *indica*), (Subodh Kumar Roy), 1458
Flowers, Prof. B. H. : Concepts of Nuclear Physics, *review*, 492
  Proceedings of the Rehovoth Conference on Nuclear Structure (1957), *review*, 709
Flowers, E. : Antarctic Meteorology, 1503
Flowers (Western Australian Wild-) : How to Know (Dr. William E. Blackall and Dr. Brian J. Grieve) Part 2, A Key to the Flora of the Temperate Regions of Western Australia, *review* by V. S. Summerhayes, 1628
Floyd, Don E. : Polyamide Resins, *review* by Dr. S. H. Pinner, 851
Floyd, Dr. W. F., and Roberts, Dr. D. F. : Anatomical, Physiological and Anthropometric Principles in the Design of Office Chairs and Tables, 1022
Fluctuation in Mosquito Numbers : Influence of Larval Population Density on (Gordon Surtees), 269
Fluctuations (Geomagnetic), having a 6-Sec. Period : Possible Causes of (H. J. Duffus, J. A. Shand and Sir Charles Wright), 1479, *erratum*, 1783
Fluctuations (Seasonal and Tidal), in the Trawl Catches from the Sierra Leone River Estuary (J. C. D. Watts), 1748
Fluctuations (Spontaneous), in Generator Potential in a Receptor Membrane (Properties of a Receptor Membrane), (Nobusada Ishiko and Prof. Werner R. Loewenstein), 1725
Fluid (Exsheathing) : Antigenic Stimulus of, in Self-Cure of Sheep infected with *Haemonchus contortus* (E. J. L. Soulsby, R. I. Sommerville and D. F. Stewart), 553
Fluid Dynamics : An Introduction to (Dr. F. J. Bayley), *review* by J. L. Stollery, 421
  An Introduction to (Prof. G. Temple), *review* by J. L. Stollery, 421
Fluid Mechanics : Proceedings of the Fifth Midwestern Conference on (Michigan, 1957), (edited by Prof. A. M. Kuethe), *review* by J. L. Stollery, 421
Fluid Systems in Chemical Engineering, *review* by Prof. J. M. Coulson, 492
Fluids : An Automatically Operating, Coulometric Titration Method for continually Measuring Small Amounts of Water in (E. Barendrecht), 1181
Fluids of Chick Embryos : Sodium, Potassium, Calcium and Chloride Ion Contents and Protein Fractions in the (Dr. Aleksandra Smoczkiewiczowa), 1260
Fluids containing Protein : A Simple Method for the Concentration of (Dr. J. Kohn), 1055
Fluids (Biological) : Direct Determination of Drug Concentrations in, by Polarography (Dr. P. O. Kane), 1674
Fluids (Body) : Rapid Specific Method for Determination of Aldosaccharides in (Dr. Eric Hultman), 108
Fluorescence : Atmospheric Dust and (Dr. K. Przibram), 1048
Fluorescence of Tissue Culture Cells stained with Acridine Orange (U. N. Joshi and Dr. K. S. Korgaonkar), 400
Fluorescence of Uranium in Fused Sodium Fluoride : Nature of (Haydée le Roux), 1180
Fluorescence (Green), of Guanidinium Compounds with Ninhydrin (Dr. Rex B. Conn, jun., and Dr. Richard B. Davis), 1053
Fluorescence (Ultra-violet), of Quinine Sulphate for Detection of Phosphate Ester Spots on Paper (Dr. Edward S. Rorem), 1739
Fluorescence Analysis (X-Ray) : Estimation of Strontium in Animal Bone using (W. M. B. Roberts), 887
Fluorescence Effects from Corals irradiated with Ultra-Violet Rays (Dr. R. Catala-Stucki), 949
Fluoride (Fused Sodium) : Nature of Fluorescence of Uranium in (Haydée le Roux), 1180
Fluoride (Solid Lithium), containing varying Proportions of Lithium Isotopes : Infra-red Dispersion Wavelengths for (Prof. D. J. Montgomery and R. H. Misho), 103
Fluorides (Alkali) : Bond Energies of some (Dr. F. M. Page and Dr. T. M. Sugden), 1672
Fluorides (Lithium-6- and Lithium-7-rich) : Refractivity and Lattice Constant Ratios of (Dr. R. W. H. Stevenson and P. T. Nettley), 1000
Fluorinated *Cyclo*hexadienes (Highly) : Thermal Reactions of (B. Gething, Dr. C. R. Patrick and Prof. J. C. Tatlow, and Dr. R. E. Banks, Dr. A. K. Barbour and A. E. Tipping), 586
Fluorine : Broadening of the X-Ray Diffraction Lines in Teeth affected by (E. A. Scott and Dr. F. H. Scott), 479
Fluorine Chemistry (Chemical Society Symposium on), 1304
  Organic, *review* by Prof. R. N. Haszeldine, 139
Fluorine Compounds : Aliphatic (A. M. Lovelace, Douglas A. Rausch and William Postelnek), *review* by Prof. R. N. Haszeldine, 139
Fluorite Films : Optically Active (Niels O. Young and Jakym Kowal), 104
Fluoroborate Ions (Monofluorosulphonate, Difluorophosphate and) : Effect of, on the Iodine Uptake of the Thyroid Gland (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Fluorocarbon : Purification of the Mouse Mammary Carcinoma Agent by means of a (Robert S. Stone and Prof. Dan H. Moore), 1275
Fluorocarbons (Merritt Allen Rudner), *review* by Dr. S. H. Pinner, 851
Fluorocarbons (Aromatic) : A New General Route to (B. Gething, Dr. C. R. Patrick, Prof. M. Stacey and Prof. J. C. Tatlow), 588
Fluorouracil in Ascites Tumours : Possible Enzymic Mechanism for the Development of Resistance against (Dr. Peter Reichard and Ola Sköld, and Prof. George Klein), 939
Fluors (Solid Crystalline) : Radioassay of Aqueous Solutions mixed with (Dr. Daniel Steinberg), 1253
Flute, P. (Archer, Dr. R. K., and) : Heparin and Thromboplastin Generation in the Horse, 235
Flux (High-) Reactor : Neutron Diffraction at a (Dr. G. E. Bacon and R. F. Dyer), 35
Flux (Sodium), in Human Red Cells : Effect of Ouabain on (Thomas J. Gill and Prof. A. K. Solomon), 1127
Fly (Fairy), *Prestwichia aquatica* (C. I. Ison), 1782
Fly Ash : Forest Seedlings and Mycorrhiza Development on (A. Sobotka and J. Materna), 1066
Flying Locusts and Atmospheric Turbulence (Dr. R. C. Rainey), 1367
Foetal Haemoglobin (Human) : New Variant of (Dr. Phaedon Fessas, N. Mastrokalos and G. Fostiropoulos), 30 ; (Dr. F. Vella, Dr. J. A. M. Ager and Dr. H. L. Lehmann), 31
Foetal Human Haemoglobins : Identity of the α-Chains of Adult and (J. A. Hunt), 1373
Foetal Lung : Amniotic Fluid and the (Bernard Towers), 1140
Foetal Membranes and Kidneys of Pigs : Glutaminase Activity of the (Ingeborg C. Radde and Prof. R. A. McCance), 115
Foetal Mortality (Early), in Cattle : β-Globulin Polymorphism and (Dr. G. C. Ashton), 404
Foetus : Bilirubin Metabolism in the (Dr. Rudi Schmid, Sue Buckingham, Gloria A. Mendilla and Lydia Hammaker), 1823
Fog Dispersal, 436
Fogel, Dr. Marian, and others : *In vitro* Analysis of a Mammalian Tumour Virus, 663
Földi, M., and others : Changes in Serum Transaminase Activity following Myocardial Damage due to Lymphatic Congestion, 1333
Folk, jun., Prof. G. Edgar (Zimmerman, Dr. George R., and) : Aortic Medial Calcification and Lowered Metabolism in Ground Squirrels, 754
Folklore : Avian, *review* by M. C. Burkitt, 1422
Folklore of Birds (Edward A. Armstrong), *review* by M. C. Burkitt, 1422
Follett, S. F. : Appointed deputy director (equipment) of the Royal Aircraft Establishment, 931 ; work of, 931
Follicle-stimulating Hormone : Supplies of (Endocrinology Study Section of the United States National Institutes of Health), 865
Follicles (Secondary), in Soay Sheep : Some Unusual Outgrowths from (Dr. M. L. Ryder), 1831
Follis, jun., Dr. R. H. : Experimental Colloid Goitre produced by Thiouracil, 1817
Foltz, Calvin M., and others : Ineffectiveness of Molybdenum, Osmium and Cobalt in Dietary Necrotic Liver Degeneration, 472
Fonctions Sphériques de Legendre et Fonctions Sphéroidales (Dr. Louis Robin), Tome 2, *review* by Prof. T. A. A. Broadbent, 1421
Fonctions Sphéroidales : Fonctions Sphériques de Legendre et (Dr. Louis Robin), Tome 2, *review* by Prof. T. A. A. Broadbent, 1421
Fontéchevade : La Grotte de (Archives de l'Institut de Paléontologie Humaine, Mémoire 29), Deuxième partie, Anthropologie (Henri-V. Vallois) ; Troisième partie, Géologie et Paléontologie (H. Alimen, C. Arambourg et A. Schreuder, avec la collaboration de G. Henri-Martin, J. Berlioz et J. Bouchud), 1369
Fontéchevade Skulls and the Origin of *Homo sapiens* (Dr. J. C. Trevor), 1369
Food : Bibliography of—a Select International Bibliography of Nutrition, Food and Beverage Technology and Distribution, 1936-56 (E. Alan Baker and D. J. Foskett), *review* by Dr. Magnus Pyke, 351, 582
  Research on, *review* by Dr. Magnus Pyke, 351, 582
Food Acceptance : Flavor Research and—a Survey of the Scope of Flavor and Associated Research compiled from papers presented in a series of Symposia given in 1956-57, *review* by Dr. Magnus Pyke, 351
Food Investigation 1957—the Report of the Food Investigation Board with the Reports of the Superintendents of the Torry Research Station, the Low Temperature Research Station, and the Ditton Laboratory (Department of Scientific and Industrial Research), 1239
Food Investigation Board : Report for 1957, with the Reports of the Superintendents of the Torry Research Station, the Low Temperature Research Station, and the Ditton Laboratory (Department of Scientific and Industrial Research), 1239
Food Microbiology : Proceedings of the Second International Symposium on (Cambridge, 1957), (The Microbiology of Fish and Meat Curing Brines, edited by Dr. B. P. Eddy), *review* by Dr. Magnus Puke, 351
Food Preservation : Government Research on, 862
Food Research : Advances in (edited by E. M. Mrak and G. F. Stewart), Vol. 8, *review* by Dr. Magnus Pyke, 351
Food Reserve Policies in Underdeveloped Countries : National (United Nations Food and Agriculture Organization, FAO Commodity Policy Studies No. 11), 635
Food Selection by Silkworm Larvae (Dr. Yasuji Hamamura), 1746
Food (Consumption of), Intake of Water and Weight of Body in Rats : Effect of Reduction of Stimulation on (Dr. Karl Weiss and Harry M. B. Hurwitz), 344

Food and Agriculture Organization (United Nations): Retirement of Marcel Leloup from the directorship of the Forestry Division, 291
  Appointment of Egon Glesinger as director of the Division of Forestry and Forest Products (the new title of the Forestry Division), 291
  Meeting of members of the Co-operative Research Project on Trace Elements, 1368
  Offer of André Mayer Fellowships in 1959, 1368
  FAO Commodity Policy Studies No. 11, National Food Reserve Policies in Underdeveloped Countries, 635
Food and Agriculture Organization (United Nations), and the Commission for Technical Co-operation in Africa South of the Sahara: Technical Meeting on Legumes in Agriculture and Human Nutrition, 439
Food and Agriculture Organization of the United Nations, and others: International Conference on Fishery Statistics, 1783
Food and Beverage Technology and Distribution, 1936-56: Bibliography of Food—a Select International Bibliography of Nutrition, (E. Alan Baker and D. J. Foskett), *review* by Dr. Magnus Pyke, 351, 582
Food-Plant: Insect and (Proceedings of a Symposium on, Wageningen, 1957, under the auspices of the Comité Européen de Zoologie Agricole and the Agricultural University, Wageningen), *review* by Dr. C. J. Banks, 1767
Foodstuffs: Processed Plant Protein (edited by Aaron M. Altschul), *review* by Dr. Magnus Pyke, 351
Foot-and-Mouth Disease: Changes in Specificity and Electrophoretic Mobility of the Precipitating Antibodies present in the Serum of Cattle recovering from (F. Brown and J. H. Graves), 1688
Forces (Latent Interparticle), in Clays (R. H. G. Parry), 538
Ford, Dr. C. E.: Human Diversity, *review*, 1354
Ford, Dr. C. E., and others: A Presumptive Human *XXY/XX* Mosaic, 1030
Ford, Dr. E. B.: Animal Ecology, *review*, 707
Ford Foundation: Grant of 58,300 dollars awarded by the Fund for Advancement of Education to Station *KETC-TV* and St. Louis University, to cover the academic costs for the production of a film series entitled 'Principles of Genetics', 649
Forest Seedlings and Mycorrhiza Development on Fly Ash (A. Sobotka and J. Materna), 1066
Forestry at Oxford, 578
Forestry in the United Kingdom (Sir Harry Champion), 1238
Forestry Commissioners: Thirty-eighth Annual Report (1956-57), 1100
Forestry (British): Progress in (Sir Harry Champion), 1100
Forgotten Genius: Joachim Junge (1587-1657), a (Dr. Douglas Guthrie), 1435
Form in Plants: Experimental Approaches to the Problems of Growth and (Experimental Morphology Group of the Linnean Society Symposium on), 584
Formaldehyde: Effect of Cross-linking by, on the Contraction–Relaxation of Rat Tail Tendon (Dr. H. R. Elden), 332
Formalin: Impairment of Viral Haemagglutination of Red Cells after Treatment with (F. E. Buckland), 1276
  Increase of Viral Haemagglutinability of Red Cells of the Mouse after Treatment with (B. Fauconnier and D. Barua), 629
Formation of Aberrant Cell Walls and of Spores by the Growing Yeast Protoplast (A. A. Eddy and D. H. Williamson), 1101
Formation of Alkaline Phosphomonoesterase in *Escherichia coli*: A Possible Negative Feedback Phenomenon controlling (T. Horiuchi, S. Horiuchi and D. Mizuno), 1529
Formation of Anthocyanidins from Leucoanthocyani(di)ns: Mechanism of (Dr. David G. Roux and M. C. Bill), 42
Formation of the Complex, Sensitized Erythrocyte-Complement ($EAC'_{1,4,2}$) in Haemolytic Systems differing in their Haemolysin and Complement-fixing Activities: Comparison of the (Dr. Harold S. Goodman), 331
Formation of Deoxyribonucleic Acid in *Escherichia coli*: Selective Inhibition of, by Mitomycin *C* (S. Shiba, A. Terawaki, T. Taguchi and Prof. J. Kawamata), 1056
Formation of Glycerate from Oxalate by *Pseudomonas oxalaticus* (OX1) grown in Oxalate (Biosynthesis of Cell Constituents from C_2-Compounds), (J. R. Quayle and Dr. D. B. Keech), 1794
Formation of Malate from Glycollate by *Pseudomonas ovalis* Chester (Biosynthesis of Cell Constituents from C_2-Compounds), (Dr. H. L. Kornberg and A. M. Gotto), 1791
Formation of Normal and Doubly Abnormal Haemoglobins by Recombination of Haemoglobin I with S and C (Constituents of Human Haemoglobin), (Dr. Harvey A. Itano and Elizabeth Robinson), 1799
Formation of 'Protoplasts' in Mutant Strains of *Salmonella* induced by Galactose (Toshio Fukasawa and Hiroshi Nikaido), 1131
Formation of Purple Pigment in *Spirogyra pratensis* Cultures (Dr. Ann Allen and Dr. R. E. Alston), 1064
Formation of Urea from Arginine in the Brain of the Living Rat (Michael B. Sporn, Wesley Dingman, Alfred Defalco and Robert K. Davies), 1520
Formation (Adaptive), of Tryptophan Peroxidase: Prevention of, by a Carcinogenic Azo Dye (Dr. Silvio Fiala and Anna E. Fiala), 1532
Formation (Anserine): Pathways and the Physiological Site of (Prof. Theodroe Winnick and R. E. Winnick), 1466
Formation (Antibody): Failure of Ribonucleoprotein to transfer (Dr. B. D. Janković, Dr. K. Isaković and J. Horvat), 1400
Formation (Antibody), by Isolated Spleen Cells transferred to Recipients in Absence of Homotransplantation Reaction (Dr. Z. Trnka and I. Riha), 546
Formation (Antibody), in Tissue Culture (Marvin Fishman), 1200
Formation (Antibody), by Transferred Cells: Presence of Antigen—a Factor determining the Duration of (Dr. J. Sterzl), 547
Formation (Bulbil), in *Sedum telephium* (Dr. E. C. Humphries and J. M. Thurston), 1343
Formation (Chlorophyll), in Albino Citrus Seedlings: Inducing (Dr. Faisal A. Minessy), 553
Formation (Compound): Electrode Potentials and, in the Palladium–Platinum–Hydrogen System (A. W. Carson, Dr. T. B. Flanagan and Dr. F. A. Lewis), 39, 510
Formation (Early), of Sperms in the ey^2 Mutant of *Drosophila* (H. H. Shatoury), 1696
Formation (Plaque), by Fowl Plague Virus: Effect of Neutral Red on (Dr. A. P. Waterson), 628
Formation (Puparium), in the Ebony Mutant of *Drosophila melanogaster*: Oxidative Metabolism and (Alexander Wolsky and Henrietta G. Kalicki), 1129
Forms (Conjugated), of Urobilinoid Pigments (I. L. Kahán and A. Kahán), 463
Forrest, Dr. H. S., and others: Characterization of a Second Yellow Compound from *Drosophila melanogaster*, 1269
Fortes, Prof. M.: Rudimentary Government, *review*, 1006
Fosberg, Dr. F. R.: Humid Tropics Vegetation (Classification of Humid Tropical Vegetation based on Plant Characteristics), 795
  Plants and Fall-out, 1448
Foshagite $(Ca_4Si_3O_9(OH)_2)$: Crystal Structure of (Dr. J. A. Gard and Dr. H. F. W. Taylor), 171
Foskett, D. J.: Information Service in Libraries, *review* by R. Brightman, 781
Foskett, D. J. (Baker, E. Alan, and): Bibliography of Food—a Select International Bibliography of Nutrition, Food and Beverage Technology and Distribution, 1936-56, *review* by Dr. Magnus Pyke, 351, 582
Fossil (A New), *Spriggina floundersi* (M. F. Glaessner), 1782
Fossil Amphibians and Reptiles (Dr. W. E. Swinton), second edition, *review*, 73
Fossil Birds (Dr. W. E. Swinton), *review*, 73
Fossil Gastropod Shells (Modern and): Manganese in (Dr. David Krinsley), 770
Fossil Micro-organisms: Pyrite Granules and (L. G. Lowe), 437
Fossil Reptiles from the Panchet Beds of India (L. B. Tarlo), 912; (Dr. Pamela Lamplugh Robinson), 913
Foster, Dr. A. B., and others: Identification of 10-Hydroxy-Δ^2-decenoic Acid in Royal Jelly, 996
Foster, Prof. Edwin M., and others: Dairy Microbiology, *review* by Dr. C. A. E. Briggs, 637
Foster, E. W.: *Obituary* of Sir Owen Richardson, 928
Foster, Dr. R.: Interaction of 1,3,5-Trinitrobenzene with Ethoxide Ion, 1042
  Ionization Potentials of Electron Donors, 1253
Fostiropoulos, G., and others: New Variant of Human Foetal Haemoglobin, 30
Foulds, Dr. L.: Clinical and Experimental Cancer Research, *review*, 955
Foundation for Instrumentation Education and Research: Grant of 5,100 dollars from the National Science Foundation, for a Conference on Instrumentation for Cloud and Weather Modification, 1372
Foundation (The Physical), of Biology (Prof. Walter M. Elsasser), *review* by Dr. W. Grey Walter, 955
Founder's Medal of the Royal Geographical Society awarded to Sir Raymond Priestley, 292
Four Modern Ghosts (Dr. Eric J. Dingwall and Trevor H. Hall), *review* by Dr. D. J. West, 351
Fourier Transforms and X-Ray Diffraction (Prof. H. Lipson and Dr. C. A. Taylor), *review* by Dame Kathleen Lonsdale, 969
Fourth Decade: Quantum Mechanics in its, *review* by Prof. N. Kemmer, 705
Fowden, Dr. L. (Pleshkov, Dr. B. P., and): Amino-Acid Composition of the Proteins of Barley Leaves in relation to the Mineral Nutrition and Age of Plants, 1445
Fowell, Elvin (Robinson, Trevor, and): A Chromatographic Analysis for Ricinine, 833
Fowl: Effect of Controlled Lighting on Production Characters in the (J. C. Bowman and J. D. H. Archibald), 1138
Fowl Plague Virus: Effect of Neutral Red on Plaque Formation by (Dr. A. P. Waterson), 628
Fowler, Dr. J. F., and others: Conductivity induced by Radiation in Polycrystalline Cadmium Sulphide and Polyethylene, 1112
Fox, Sir Cyril: Life and Death in the Bronze Age, *review* by M. C. Burkitt, 1486
Fox, M. R. Spivey (Agranoff, Dr. B. W., and): Antagonism of Choline and Inositol, 1259
Fox, P. G. (Dunning, W. J., and): Interfacial Phenomena (Influence of Imperfections in the Substrate upon the Mode of Epitaxial Growth), 1097
Fox, Prof. T. R. C.: Retirement from the Shell chair of chemical engineering in the University of Cambridge, 719; work of, 719
Foy, Dr. Henry, and others: Effect of Dietary Phytate on Faecal Absorption of Radioactive Ferric Chloride, 691
Fractionation of Brain Extracts for Acid Phosphatase-elevating Activity (Dr. V. Schreiber, Prof. J. Charvát, V. Kmentová and M. Rybák), 473
Fracture: Atomic Mechanisms of (U.S. National Academy of Sciences, the U.S. National Science Foundation, the Office of Naval Research and the Air Force Office of Scientific Research International Seminar on), 154
Fracture of Engineering Materials (Eastern New York Chapter of the American Society for Metals Conference on), 1368
Fracture (Chain): Estimation of, during the Cross-linking of Rubber Hydrocarbons by High-Energy Radiation (Dr. L. Mullins and Dr. D. T. Turner), 1547
Fracture (Ductile Cleavage), of Molybdenum (A. A. Johnson and B. J. Shaw), 1542
France: *Balanus tulipiformis* Ellis on the Atlantic Coast of (B. S. Kisch), 341
Francis, Prof. A. J.: *Obituary* of A. G. M. Michell, 1714
Frank, Prof. F. C.: Interfacial Phenomena (Kinematics of Deposition and Dissolution Profiles of Crystals), 1098
Frank, Louis A. (Van Allen, Prof. James A., and): Radiation around the Earth to a Radial Distance of 107,400 km., 430
Frankl, E. K.: A Treatise on Photo-Elasticity, *review*, 1010
Frankland, A. W.: Immunological Aspects of Allergic Disorders, 296
Franklin, Proj. K. J.: Sir Charles Sherrington, *review*, 209
  Harvey on Movement in Animals, *review*, 1486
Franklin, Dr. N. L. (Stewart, J. C. C., and): Nuclear Fuel Cycles (The Operational Problem associated with Fuel Cycling), 1648
Franks, F., and Ives, Dr. D. J. G.: Effect of Low Concentrations of Alcohols on the Interfacial Tension between Water and Hydrocarbons, 316
Fraser, Dr. F. C., and Purves, P. E.: The Ear under Water (Anatomy and Function of the Cetacean Ear), 1788
Fraser, H. H., and Somerset, O. E. A.: Awarded jointly the Consolidated Gold Fields of South Africa, Ltd. Premium for 1957-58 of the Institution of Mining and Metallurgy, 1499
Fraser, Malcolm J.: A Source of Natural Tin Whiskers, 670
Fraser, Dr. M. J., and Holdsworth, Dr. E. S.: Vitamin B_{12} and Protein Biosynthesis—Vitamin B_{12} and Biosynthesis in Chick Liver, 519
Fraser, Dr. R. D. B., and Macrae, T. P.: Possible Role of Water in Collagen Structure, 179
Fraser, Dr. R. D. B., and others: Structure of α-Keratin, 592

Frazer, R. A. : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1236
Frecheville (William) Student's Prize of the Institution of Mining and Metallurgy awarded to I. R. M. Chaston, 1499
Free Atoms and Molecules : Radiofrequency Spectroscopy of (Radiofrequency Spectroscopy Group Autumn Meeting on), 1502
Free Methylene Radical : Spectrum and Structure of the (Dr. G. Herzberg and J. Shoosmith), 1801
Free Radicals : Radiation Protection and (Dr. Bernard Smaller and Dr. Eugene C. Avery), 539
Free Radicals from Chlorpromazine (Dr. I. Gordon Fels and Marty Kaufman), 1392
Free Serine in Urine from Irradiated Humans : An Alteration in the Excretion of (Dr. Arthur L. Kretchmar), 1809
Freedom (Academic), and the Universities of South Africa, 1551
Freeman, T., and others : Albumin labelled with Iodine-131 in an Analbuminaemic Subject, 606
Freeze-drying of *Harposporium anguillulae* Lohde in its Nematode Host (William A. Feder and Dr. C. L. Duddington), 767
Freeze-drying (Wet) : Improved Preservation of Tendon for Electron Microscopy through (Dr. David B. Scott and Marie U. Nylen), 1205
Freezing Damage to Living Cells : Prevention of, by Dimethyl Sulphoxide (Dr. J. E. Lovelock and Dr. M. W. H. Bishop), 1394
Fremlin, Dr. J. H. : Volcanoes on the Moon, 239
  Sub-surface Temperatures on the Moon, 1317
French, E. L. (Ada, G. L., and) : Purification of Bacterial Neuraminidase (Receptor-destroying Enzyme), 1740
French, P. R. J., and Lowthian, C. S. : Nuclear Fuel Cycles (A Once-through Equilibrium Fuel Cycle), 1647
French Atomic Energy Commission : The Nuclear Research Centre, Grenoble, 858
Frendo, Julian, and others : Taurine in Human Blood Platelets, 685
'Freon' 113 : Bacteriophage Enrichment in a Liquid Two-Phase System with Subsequent Treatment with (Dr. G. Frick and Dr. P. Å. Albertsson), 1070
Frequencies (Metal–Oxygen Stretching), in the Metal Chelate Compounds of β-Diketones (Kazuo Nakamoto, Paul J. McCarthy and Arthur E. Martell), 459
Frequency : Canadian Caesium-Beam Standard of (S. N. Kalra, R. Bailey and H. Daams), 575
Frequency of Hurricanes: Poisson's Law and the (Dr. Charles H. Smiley), 814
Frequency of Meteorite Falls throughout the Ages (Prof. Hans Pettersson), 1114 ; (Dr. J. F. Lovering), 1664
Freshly Harvested Cells of a Brewer's Yeast : Endogenous Metabolism of (V. E. Chester), 902
Fretter, Dr. V. : Text-Books of Zoology, *review*, 1290
Freudenberg, Prof. Karl : Biosynthesis and Constitution of Lignin, 1152
  Chemistry of Condensed Tannins (The Term Leucoanthocyani(di)n), 1169
Freund, Ernest H., and Domovs, Kelvin : Methanol-soluble Carbohydrate Complexes, 1526
Freundlich, Dr. Martin (Maruzzella, Dr. Jasper C., and) : Antimicrobial Substances from Resistant and Non-resistant Seeds, 972
Frey, Dr. H. M. : Analysis of Hydrocarbons, 743
Frick, Dr. G., and Albertsson, Dr. P. Å. : Bacteriophage Enrichment in a Liquid Two-Phase System with Subsequent Treatment with 'Freon' 113, 1070
Fricke (Sophie) Research Fellowships in the Rockefeller Institute, New York, 1365
Friedrichs, Prof. Kurt O. : Elected a member of the United States National Academy of Sciences, 1575
Friends House, London : Memorial Meeting for Prof. F. Joliot-Curie, 1020
Fries, Lisbeth : *Goniotrichum elegans*, a Marine Red Alga requiring Vitamin B_{12}, 558
Fringilla coelebs Linn. : Singing Pattern of the Common Chaffinch (D. R. Barber), 129
Fritz, A. : Co-ordination Chemistry (Infra-red Spectrum of Chromium Dibenzene), 1785
Frog (Common) : An Albino Specimen of the (G. E. Williams), 1408
Frogs : Serotonin and Change of Colour in (Dr. K. G. Davey), 1271
Fröhlich, Prof. H. : Problems of Collective Motion in Physics (Plasma Problems in the Electron Theory of Metals), 866 ; (Liquid Helium and Superconductivity), 866
Fröhlich, Margaret M., and others : Changes produced in Serum Lipoproteins of Dogs by Cellulose containing Methyl Groups, 1119
Frost, D. V., and others : Palaeomagnetism of certain Rocks from Newfoundland, 596
Frost-Smith, Dr. E. H. : The Theory and Design of Magnetic Amplifiers, *review* by J. G. Henderson, 1627
Frozen Storage : Aggregation of Cod Myosin during (J. J. Connell), 664
Fruit Research : Horticultural and (Dr. John Grainger), 1507
Fruit (Citrus) : Isolation of *l*-Quinic Acid in (Dr. S. V. Ting and Dr. E. J. Deszyck), 1404
Fruit and Cider Institute (National), Long Ashton, Bristol : Annual Report for 1957, with Index 1953-57, 1507
Fruits (Dry) : Phenolic Acids as Growth and Germination Inhibitors in (M. Varga and E. Köves), 401
Fruton, Prof. Joseph S., and Simmonds, Prof. Sofia : General Biochemistry, second edition, *review* by D. H. Northcote, 968
Fry, Prof. D. B. : The Mechanization of Thought Processes (Speech Recognition), 226
Fry, D. W. : Appointed director of the Atomic Energy Research Establishment, Winfrith, 861
Fryer, Dr. G. : Development in a Mutelid Lamellibranch, 1342
Fucales : Feulgen Reaction in the (Dr. M. Naylor), 627
Fucoidin : Enzymic Hydrolysis of, by *Pseudomonas atlantica* and *Pseudomonas carrageenovora* (Dr. W. Yaphe and Dr. K. Morgan), 761
Fuel, Institute of : Second Conference on Liquid Fuels, 652
Fuel Cycles : Nuclear (Institute of Physics, in collaboration with the British Nuclear Energy Conference Symposium on), 1646
Fuel Elements (Nuclear) : Commercial Manufacture of, 1232
Fuel Research (Prof. R. J. Sarjant), 797
Fuel Research 1957—Report of the Fuel Research Board with the Report of the Director of Fuel Research for 1957 (Department of Scientific and Industrial Research), 797
Fuel Research Board : Report of the, with the Report of the Director of Fuel Research for 1957 (Department of Scientific and Industrial Research), 797
Fuel Research Institute (Central), India : Symposium on the Nature of Coal, 86, 1438
Fuel and Power in Britain (Debate in the House of Lords on), 511
  Research on, 507
Fuel and Power in British Industry (A. M. Wandless), 154
Fuels : Liquid (Institute of Fuel second Conference on), 652
Fujita, Junnosuke, and others : Polarography of Pentacyanocobaltate (III) Complexes, 458
Fukami, Isao, and others : Does Rhodopsin contain a Trace Metal ?, 28
Fukasawa, Toshio, and Nikaido, Hiroshi : Formation of 'Protoplasts' in Mutant Strains of *Salmonella* induced by Galactose, 1131
Fullmer, Dr. Harold M. : Differences in Mechanism in Staining Reactions for Mast Cells, 1274
Fulmer Research Institute : Open Day, 1502
Fulton, Prof. A. R. : *Obituary* by Prof. J. Dick, 505
Fulton, J. S. : Appointed vice-chancellor of the University College of Sussex, 582
Fumes in Industry : The Control of Dust and (British Occupational Hygiene Society Conference on), 865
Fumes (Exhaust) : Control of, 1092
Function of Antigenic Equivocation : Radiosensitivity as a (Dr. L. Cohen and Dr. A. Cohen), 692
Function of Genetic Elements : Structure and (Twelfth Brookhaven Symposium in Biology), 1094
Function of certain Prothoracic Hair Receptors in the Desert Locust (Hair Receptors in Locusts), (Dr. P. T. Haskell), 1107
Function of the Rumen (Nutrition Society Symposium on), 1644
Function (Adrenal Cortical), in the Pregnant Sheep (Kathleen W. Robinson), 690
Functional Changes in the Vacuole-containing Bodies of the Gastric Parietal Cell (A. D. Hally), 408
Functions : Legendre, *review* by Prof. T. A. A. Broadbent, 1421
Functions of the Research Associations : Position and, 275
Functions (Approximate Wave) : Use of, for Extrapolation to True Energy Values (P. G. Dickens, Dr. J. W. Linnett and D. Schofield), 175
Fundamental Problems of Physics : Information Theory and its Applications to (Prof. L. Brillouin), 501
Fundamentals : Control, *review* by P. H. Hammond, 1556
Fundamentals of Optics (Prof. Francis A. Jenkins and Prof. Harvey E. White), third edition, *review* by G. R. Noakes, 969
Funds for Commonwealth Students in Britain, 793
Fungal Laccase : An Electron Spin Resonance Study of the State of Copper in (Dr. Bo G. Malmström, Dr. Rolf Mosbach and Dr. Tore Vänngård), 321
Fungi (Non-Keratinolytic) : Hair as a Substrate for (Dr. D. M. Griffin), 1281
Fungi (Saprophytic and Parasitic Soil-inhabiting) : Differential Reaction of, to Indoleacetic Acid (E. W. B. Ward and Prof. A. W. Henry), 1064
Fungi (Stalk-rotting) : An Antifungal Substance in the Corn Plant and its Effect on Growth of Two (N. J. Whitney and C. G. Mortimore), 341
Fungicidal Activity : A Bacterium with (W. E. Crawley and D. C. Dodd), 63
Fungicidal Effect (Differential) : 'Karathane'—the Value of its, in relation to Mildew and Yellow Rust of Wheat (D. A. Doling and Shirley Hepple), 622
Fungicides (Organo-Mercurial) : Inactivation of, in Groundwood Pulp made from Logs stored in Salt Water, and the Possible Role of Sulphur Compounds (B. H. Browning, P. Russell, Dr. S. W. Klingsnorth and R. J. Peerless), 1346
Fungus : Discoloration of Wool Fibres by a (A. P. Mulcock), 1281
Fungus (Root-infecting) : Strain Differentiation in a (Dr. Ida Levisohn), 1065
Furley, D. D. : Part-Time Work for Women Graduates, 1790
Furocoumarins—Psoralen and 8-Methoxypsoralen : Ultra-violet Carcinogenesis in Albino and Pigmented Mice receiving (M. A. Pathak, Prof. F. Daniels, jun., C. E. Hopkins and T. B. Fitzpatrick), 728
Further Education, Southern Regional Council for : Eleventh Annual Report (1957-58), 1021
Furze (Common) : Carotene Content of *Ulex europaeus* (Dr. D. G. O'Donovan, U. O'Leary and Prof. J. Reilly), 1680
Fusarium oxysporum f. *cubense* : Vascular Wilt Disease of Bananas caused by (R. H. Stover), 1782
Fused Sodium Fluoride : Nature of Fluorescence of Uranium in (Haydée le Roux), 1180
Fusion of Heavy Hydrogen (Dr. T. E. Allibone), 569
Fusion (Nuclear), and Non-Fusion in *Theobroma cacao* L. (M. C. Bennett and F. W. Cope), 1540
Fusion Curve of Iron to 96,000 Atmospheres—Temperature of the Earth's Core (Dr. H. M. Strong), 1381
Fussell, G. E. : Marl, an Ancient Manure, 214
Future : Our Debt to the—Symposium presented on the Seventy-fifth Anniversary, 1957 (Royal Society of Canada, 'Studia Varia' Series, Vol. 2, edited by E. G. D. Murray), *review* by R. Brightman, 1702
Future of Television in Britain, 222
Future Rulers : The Education of our, should be primarily in the Sciences rather than the Humanities (London Section of the Royal Institute of Chemistry, the London Branch of the Classical Association and the Haldane Society Debate on the Motion that), 510, 1235

GABITES, J. F. : Antarctic Meteorology (Synoptic Influences on Lower Latitudes), 1503
Gabr, Dr. Yousry, and Aly, Raga H. : Slow Contraction of Smooth Muscle produced by Human Plasma, 897
Gabrielsen, Gunnar : A Marine Transgression of Boreal Age in the Southernmost Part of Norway, 1616
Gadda, F. (Cerral, E., and) : Separation of Mono-*n*-butyl Phosphate and Di-*n*-butyl Phosphate by means of Ion Exclusion, 1528
Gadus (Genus) : Serological Relationships in the (Prof. Fergus J. O'Rourke), 1192

Gaede, Karl (Jaffé, Dr. Werner G., and) : Purification of a Toxic Phytohaemagglutinin from Black Beans (*Phaseolus vulgaris*), 1329
Gahan, P. B. (Pelc, Dr. S. R., and) : Incorporation of Labelled Thymidine in the Seminal Vesicle of the Mouse, 335
Gaines, A. F., and others : Smoke Emission of Low-Temperature Chars, 33
Gaines, jun., George L. : Adhesion and Ion-Exchange between Mica Surfaces, 1109
  Material Transfer in Monomolecular Layers of a Boundary Lubricant, 1110
Galactic System as a Spiral Nebula (Dr. R. H. Garstang), 1308
Galactosaemia (Hereditary) : Detection of Carriers in (Dr. Herman M. Kalckar), 1266
Galactose : Formation of 'Protoplasts' in Mutant Strains of *Salmonella* induced by (Toshio Fukasawa and Hiroshi Nikaido), 1131
Galactosediethylmercaptal and 3,6 Anhydrogalactosediethylmercaptal : Determination of, with the Anthrone and Seliwanoff Reagents (W. Yaphe), 44
Galaxies : A High-Resolution Survey of the Coma Cluster of, at 408 Mc./s. (Dr. M. I. Large, D. S. Mathewson and C. G. T. Haslam), 1663
Galbraith, Dr. William : Extensive Air Showers, *review* by Dr. R. M. Tennent, 1555
Galeal Structure in Adult Mosquitoes (Gordon Surtees), 971
Gall (Crown-) Tumour-inducing Principle : *In vitro* Synthesis of the (Alan J. Thomas and Richard M. Klein), 113
Gallagher, Dr. C. H., and Koch, Dr. J. H. : Action of Pyrrolizidine Alkaloids on the Neuro-Muscular Junction, 1124
Gallango de Rodríguez, Dr. M. L., and Arends, Dr. Tulio : Distribution of Haptoglobins in Native Venezuelans, 1465
Gallaway, Dr. William S. (Strickler, Allen, and) : A New Method of Integration Recording, 1110
Gallop, Paul M., and others : Occurrence of 'Ester-like' Linkages in Collagen, 1659
Galston, Prof. A. W. : Gibberellins and Nodulation, 545
Gambia Land Use Map ; Sheet 12/1, Janneh Kunda ; Sheet 14/11, Mansa Konko (Directorate of Overseas Surveys), 20
Gambling : Preferences for Different Combinations of Chance and Skill in (Prof. John Cohen and C. E. M. Hansel), 841
  A Priori Probabilities in (C. H. A. Dale), 842
γ-Alumina (Anhydrous) : Evidence for a Variable Long-range Order in nearly (Prof. G. W. Brindley and Dr. M. Nakahira), 1620
γ-Aluminium Oxide/Platinum : Structure and Mode of Action of the Contact (Prof. Alfons Krause), 1615
γ-Aminobutyric Acid and Glutamic Acid Content of Brains of Rats treated with Toxopyrimidine (Dr. G. Rindi and G. Ferrari), 608
γ-Butyrobetaine: Pharmacological Actions of (Dr. E. A. Hosein and Prof. H. McLennan), 328
γ-Globulin: Serum Antibody and, in Baby Rabbits after Transfer of Ribonucleoprotein from Adult Rabbits (Dr. Miroslava Hrubešova, Dr. Brigitte A. Askonas and Dr. J. H. Humphrey), 97
γ-Radiation : Differential Response of Male and Female Adults of *Trogodermagranarium* Everts towards Sterilizing Doses of (G. C. Carney), 338
  Effect of, on Weeds (H. J. M. Bowen and S. R. Smith), 907
  Effects of, on some Carbohydrates, Hydroxyacids and Aminoacids in Aqueous Solutions (Dr. S. A. Barker, Dr. P. M. Grant, Prof. M. Stacey and Dr. R. B. Ward), 376
  Inactivation of Spores of *Bacillus anthracis* by (T. Horne, G. C. Turner and A. T. Willis), 475
  Increase in Background, and its Correlation with Iodine-131 in Milk (Measurements at Leeds following the Windscale Reactor Accident), (Prof. F. W. Spiers), 517
γ- and δ-Tocopherols (Pure α-, β-,), in the Growing Chick : Relative Rates of Liver Storage of (T. W. Griffiths), 1061
Ganapathi, Dr. K. (Irani, Roshan J., and) : Carbohydrate Constituents of the Mycelium of *Penicillium chrysogenum* grown in Media with Different Sources of Carbon, 758
Ganglion : The Inferior Mesenteric, in Man (J. A. Southam), 697
Ganglion (Supra-oesophageal) : Role of the, during the Early Stages of Caudal Regeneration in some Errant Polychaetes (Dr. R. B. Clark and M. E. Clark), 1834
Ganglion Cells in the Retina of Anurans : Number of Fibres in the Optic Nerve and the Number of (Dr. H. R. Maturana), 1406
Ganglion Cells (Cat's Retinal) : Recording Inhibition and Excitation in the, with Intracellular Electrodes (Dr. Torsten N. Wiesel), 264
Ganglionic Block and Monoamine Oxidase Inhibitors (Dr. Sheldon B. Gertner), 750
Ganglioside (Brain) : Effect of, on the Heart of the Clam (Dr. Samuel Bogoch and Elenore S. Bogoch), 53
Gannets (New Zealand) : Migration and Dispersal of (Kazimierz Wodzicki and Peter Stein), 1790
Gaps (Homogeneous Field and Sphere) : Effect of Radiation on the Breakdown of (K. R. Allen and Dr. K. Phillips), 233
Garattini, S., and others : Reserpine Derivatives with Specific Hypotensive or Sedative Activity, 1273
Garber, Dr. S. : Structure of Scale on Plain Carbon Steels, 1387
Gard, Eileen, and others : A Further Example of the Kell Blood Group Phenotype K–, k–, Kp(a–b–), 1586
Gard, Dr. J. A., and Taylor, Dr. H. F. W. : Crystal Structure of Foshagite $(Ca_4Si_3O_9(OH)_2)$, 171
Gardner, Dr. G. W. H. : Hypersonic Flow, 1095
Gardner, H. J. : Polarography of Aromatic Hydrocarbons, 320
Gardner, Dr. J. B. (Smith, K. C., and) : Hydrogen Liquefaction and Associated Techniques (Storing Liquid Hydrogen), 1505
Gare, L. (Price, S. A., and) : A Source of Error in Microbiological Assays attributable to a Bacterial Inhibitor in Distilled Water, 838
Garlick, Prof. G. F. J. : Solid State Physics, *review*, 1007
Garner, Prof. F. H. : Appointed by the Department of Scientific and Industrial Research as a 'visitor' to the Water Research Association, 1500
Garner, Dr. R. J. : The Grafter's Handbook, revised edition, *review* by S. A. Pearce, 958
Garner, Dr. R. J. (Russell, Dr. R. Scott, and) : Uptake of Strontium by Pasture Plants and its Possible Significance in relation to the Fall-out of Strontium-90, 1806
Garnham, Prof. P. C. C. : Infectious Diseases, *review*, 352
Garnier, Prof. B. J. : The Climate of New Zealand, *review* by Prof. Gordon Manley, 421
Garrett, P. A. (Dineley, D. L., and) : Whale Remains in Glacier Ice, 272
Garrett, W. L. C. : Electronic Computers in the Service of Business, 11
Garrison, Dr. Warren M. (Bennett, Dr. Winifred, and) : Production of Amide Groups and Ammonia in the Radiolysis of Aqueous Solutions of Protein, 889
Garstang, Dr. R. H. : The Galactic System as a Spiral Nebula, 1308
Gartler, Dr. S. M., and others: Urinary Excretion of β-Amino-*iso*butyric Acid in Eskimo and Indian Populations of Alaska, 118
Garton, Dr. G. A. : Function of the Rumen (Lipids in relation to Rumen Function), 1644
Garvie, Ellen I. : Reclassification of *Leuconostoc mesenteroides P*.60 as a *Pediococcus*, 1411
Gas from Coal : Chemicals, Oil and (Ministry of Power to set up a Committee on), 1162
Gas (Carrier) : Effect of, on Katharometer Response (W. A. Wiseman), 1321
  Effect of the, on the Sensitivity of a Thermal-conductivity Detector in Gas Chromatography (L. J. Schmauch and R. A. Dinerstein), 673 ; (Dr. N. H. Ray), 674
  Effect of the, on the Sensitivity of Thermal Conductivity Detectors in Gas Chromatography (Dr. B. A. Scott and Dr. A. G. Williamson), 1322
Gas (Inflammable) : Effects of Arc Stage of Electrical Discharge on Ignition of (I. Berz), 669 ; (W. Nethercot and H. G. Riddlestone), 669
Gas (Non-respiratory), released from Seeds during Moistening (Alan H. Haber and Nancy Brassington), 619
Gas Chromatograph : Circular (Dr. Roger S. Porter and Dr. Julian F. Johnson), 391
Gas–Chromatographic Observation of the Reduction of Carbon Dioxide to Methane during Anaerobic Digestion (J. Chmielowski and Peter C. G. Isaac), 1120
Gas Chromatography (Formation of a Special Group under the auspices o the Analytical Chemistry Section of the International Union of Pure and Applied Chemistry, to make recommendations for a standard terminology in), 722
Gas Chromatography : Analysis by, of a 'Pure' Sample with an 'Impure' Carrier (V. Willis), 1754
  Direct Examination of the Degradation of High Polymers by (Dr. R. S. Lehrle and Prof. J. C. Robb), 1671
  Effect of the Carrier Gas on the Sensitivity of a Thermal-conductivity Detector in (L. J. Schmauch and R. A. Dinerstein), 673 ; (Dr. N. H Ray), 674
  Effect of the Carrier Gas on the Sensitivity of Thermal Conductivity Detectors in (Dr. B. A. Scott and Dr. A. G. Williamson), 1322
  Peak Dimensions in (C. H. Bosanquet), 252
  Separation of *m*-Xylene and *p*-Xylene by (D. H. Desty, A. Goldup and W. T. Swanton), 107
  Use of Katharometers in (Murray Eden, Arthur Karmen and John L. Stephenson), 1322
Gas Discharge : Alfvén Waves in a (D. F. Jephcott), 1652
Gas Discharges (Physical Society Conference on), 91
Gas Industries (Coal, Electricity and) : Investment in the, 1650
Gas–Liquid Chromatography : Nylon Capillary Columns for use in (R. P. W. Scott), 1753
Gas Mixtures (Hydrocarbon) : Analysis of Light (Dr. J. A. Barnard and Dr. H. W. D. Hughes), 250
Gas Phase Oxidation of Hydrocarbons—Endothermic Nature of the Initial Stage of Reaction (Dr. K. C. Salooja), 602
Gas Secretion in Coregonids (Dr. G. Sundnes), 986
Gas-cooled Reactor Power Stations : Advanced, 508
Gascoigne, Dr. J. A., and Jones, Patricia : Biosynthesis of Rubber, 819
Gases : Ionization Phenomena in (University of Uppsala in collaboration with the Swedish National Committee for Physics Fourth International Conference on), 1164
Gases (Cosmogenic Noble), in the Washington County Meteorite (Oliver A. Schaeffer and David E. Fisher), 660
Gases, Liquids and Solids : Thermal Properties of (American Society of Mechanical Engineers and Purdue University Thermo-physical Properties Research Center Symposium on), 294
Gaskell, Dr. T. F. : Characteristics of the Antarctic Ice-Sheet, 1575
Gaston, Evelyn O., and others : Long-term Survival of Irradiated Mice treated with Homologous Tissue Suspensions, 556
Gastric Parietal Cell: Functional Changes in the Vacuole-containing Bodies of the (A. D. Hally), 408
Gastropod Shells : Manganese in Modern and Fossil (Dr. David Krinsley). 770
Gatenby, Prof. J. Brontë : Appointed to a new research chair in cytology in Trinity College, Dublin, 1716 ; work of, 1716
Gates, S. B. : Honorary Fellowship of the Royal Aeronautical Society conferred on, 1648
Gaul, Dr. H. : Wheat Genetics, 26
Gavosto, Dr. F., and others : Incorporation of Thymidine labelled with Tritium by Circulating Cells of Infectious Mononucleosis, 1691
Gaydon, Dr. A. G. : Relaxation Processes (Relaxation Times in Energy Transfer in Gases), 584
Gaydon, Dr. A. G., and Learner, R. C. M. : Simulation of Lunar Craters—a Blow-hole Theory, 37
Gaydon, Dr. A. G. (Learner, R. C. M., and) : Changes in Transition Probability due to the Interaction of Rotation and Vibration in Diatomic Band Spectra, 242
Gaze, Dr. R. (Zukowski, R., and) : Tensile Strength of Asbestos, 35
Geach, P. T. : Appointed to a senior lectureship in philosophy in the University of Birmingham, 1571
Gee, C. C. (edited by, with the assistance of Dwyer, D. W.): Communications and Electronics Buyers' Guide, Who's Who and Reference Book, 1958-59 edition, *review* by Prof. D. G. Tucker, 354
Gee, E. P. : Status today of Four Rare Indian Animals, 367
Gee, Prof. G. : Relaxation Processes, 583
Geiger Counter Telescope (Multiple) Measurements of the Directions of Air Shower Particles (Dr. H. D. Rathgeber), 386
Gel Diffusion Methods : Estimation of the Size of Antigens by (Dr. A. C. Allison and Dr. J. H. Humphrey), 1590
Gel Filtration—a Method for Desalting and Group Separation (Dr. Jerker Porath and Dr. Per Flodin), 1657
Gel (Bronchial Mucus) : Mucoprotein of (J. C. White, P. C. Elmes and W. Whitley), 1810

Gel (Starch) Electrophoresis : Demonstration of Small Components in Red Cell Haemolysates by (Dr. Phaedon Fessas and N. Mastrokalos), 1261
Gel (Starch) Electrophoresis Studies on Abnormal Proteins in Myeloma and Macroglobulinaemia (Dr. J. M. Fine and Dr. R. Creyssels), 392
Gelatin as a Photo-elastic Material (H. G. Bayley), 1757
Gelatine and Glue Research (A. G. Ward), 440
Gelatine and Glue Research Association, British : Sixteenth meeting of the Research Panel, 440
Gels (Pectate) : An Improved Method for preparing (Dr. A. M. Paton), 1812
Gem Testing (B. W. Anderson), sixth edition, *review* by Dr. W. Campbell Smith, 781
Genal Caeca of Agnostids (A. A. Öpik), 1750
Gene Action in Erythrocyte Deficiency of Glucose-6-phosphate Dehydrogenase—Tissue Enzyme-Levels (Prof. Paul A. Marks, Dr. Ruth T. Gross and Dr. Ruth E. Hurwitz), 1266
Gene Conversion : A Position-Effect Explanation of (Prof. J. A. Serra), 700
S Gene Mutation : Homozygosity and (Dr. J. L. Brewbaker and N. Shapiro), 1209
General Zoology (Mary J. Guthrie and Prof. John M. Anderson), *review* by Dr. V. Fretter, 1290
General Zoology (Claude A. Villee, Warren F. Walker, Jr., and Frederick E. Smith), *review* by Dr. V. Fretter, 1290
Generation (Heparin and Thromboplastin), in the Horse (Dr. R. K. Archer and P. Flute), 235
Generations (Successive), of Mice : Congenital Transmission of Toxoplasmosis through (Dr. J. K. A. Beverley), 1348
Generator, *SNAP III* : The American Miniature Nuclear (W. S. Eastwood, L. B. Mullett and J. L. Putman), 643
Generator Potential in a Receptor Membrane : Spontaneous Fluctuations in (Properties of a Receptor Membrane), (Nobusada Ishiko and Prof. Werner R. Loewenstein), 1725
Generic Nomenclature of the Intermediate Hosts of *Schistosoma mansoni* (Dr. C. A. Wright), 906
Genes and Antigens : Viruses, *review* by Prof. F. C. Bawden, 636
Genetic Assimilation of Acquired Characters : Canalization of Development and (Prof. C. H. Waddington), 1654
Genetic Concept for the Origin of Cancer : Papers presented at the Conference on the (Annals of the New York Academy of Sciences, Vol. 71), 1234
Genetic Control of Chromosome Pairing in Intergeneric Hybrids with Wheat (Dr. Ralph Riley, Victor Chapman and Gordon Kimber), 1244
Genetic Control of Human Haptoglobin Synthesis (Dr. A. C. Allison), 1312
Genetic Control of Industrial Melanism in the Lepidoptera : New Aspects of the (Dr. H. B. D. Kettlewell), 918
Genetic Correlation between Two Traits in the House Mouse (*Mus musculus*) : Selection for Relationships Opposite to those predicted by the (F. Cockrem), 342
Genetic Elements : Structure and Function of (Twelfth Brookhaven Symposium in Biology), 1094
Genetic Independence of Four Mutants in the Syrian Hamster (Roy Robinson), 125
Genetic Systems : Evolution of (Prof. C. D. Darlington), second edition, *review* by Prof. Curt Stern, 1553
Genetics : Wheat (Dr. Ralph Riley), 25
Genetics of Dieldrin Resistance in *Lucilia cuprina* Wied. (G. J. Shanahan), 1540
Genetics of Ethiopian Coffees : Preliminary Information on the (Dr. Alcides Carvalho), 906
Genetics and Plant Breeding, Indian Society of : Election of Officers for 1959, 722
Genetics and 20th-Century Mendelism (Twenty-fourth Cold Spring Harbor Symposium on Quantitative Biology), 934
Geneva Conference on the Peaceful Uses af Atomic Energy : Technical Films used at the (United States Atomic Energy Commission), 721
Genius: Joachim Junge (1587-1657), a Forgotten (Dr. Douglas Guthrie), 1435
Gentiobiose and Sophorose in Cultures of certain Micro-organisms growing in Defined Glucose-containing Media : Detection of (A. W. Khan, D. N. Pellegrino and Prof. T. K. Walker), 682
Gentles, J. C., and others : Presence of Griseofulvin in Hair of Guinea Pigs after Oral Administration, 256
Gentles, J. C. (Dawson, Christine O., and) : Perfect Stage of *Keratinomyces ajelloi*, 1345
Geochemical Society of the United States : *Geochemistry*, No. 1 (a translation of the journal of the Academy of Sciences of the U.S.S.R.), 152
Geochemistry, No. 1 (a translation of the journal of the Academy of Sciences of the U.S.S.R.), (Geochemical Society of the United States), 152
Geochemistry (Commission of Geochemistry of the International Union of Pure and Applied Chemistry Symposium on), 1719
Geographical Climatology, *review* by Prof. Gordon Manley, 421
Geographical Society, American : Expedition to Chile, 17
Geographical Society, Royal : Patron's Medal awarded to Comdr. W. R. Anderson, 292
  Founder's Medal awarded to Sir Raymond Priestley, 292
  Victoria Medal awarded to Gerald Seligman, 292
  Murchison Grant awarded to Prof. S. P. Chatterjee, 292
  Back Grant awarded to David Stratton, 292
  Cuthbert Peek Grant awarded to W. George Lowe, 292
  Gill Memorial awarded to G. S. Holland, 292
  Mrs. Patrick Ness Award awarded jointly to J. H. Miller and Dr. George W. Marsh, 292
Geography at Sheffield, 1091
Geography (Agricultural) : Ecology and Economics of, *review* by Prof. A. N. Duckham, 423
Geological Research in Scotland and the north of England (Clough Memorial Research Fund of the Edinburgh Geological Society Grants for), 582
Geological Society of London : Wollaston Medal awarded to Prof. Pierre Pruvost, 364
  Murchison Medal awarded to Prof. S. E. Hollingworth, 364
  Lyell Medal awarded to Prof. D. Williams, 364
  Bigsby Medal awarded to Prof. B. C. King, 364
  Wollaston Fund awarded to Dr. M. H. P. Bott, 364
  Murchison Fund awarded to Dr. D. T. Donovan, 364
  Lyell Fund (a moiety of the) awarded to C. O. Harvey, 364
  Lyell Fund (a moiety of the) awarded to Dr. W. H. C. Ramsbottom, 364
  Daniel Pidgeon Fund for 1959 awarded (in moieties) to Dr. M. K. Howarth and to Dr. M. J. S. Rudwick, 1434
  Election of Officers, 1502
Geological Surveys, Overseas : Quarterly Bulletin (*Colonial Geology and Mineral Resources*) renamed *Overseas Geology and Mineral Resources*, 581
  Retirement of Dr. Frank Dixey from the directorship, 1230
  Appointment of Dr. S. H. Shaw as director, 1230
Geological Time : The Succession of Life through (Dr. Kenneth P. Oakley and Helen M. Muir-Wood), third edition, *review*, 73
Geological Time-Scale (Dr. K. I. Mayne and Dr. R. St. J. Lambert and D. York), 212
Geological Treatise (1667) : The Earliest (Nicolaus Steno), (Niels Stensen), translated from 'Canis Carchariae Dissectum Caput' with introduction and notes by Dr. Axel Garboe, *review* by Prof. L. Hawkes, 1487
Geology at Exeter, 1432
Geology at Leicester, 1230
Geology : Bibliographies on, 932
Geology and Palaeontology in Malaya—Pre-Tertiary Stratigraphic Succession in Malaya (J. B. Alexander), 230 ; Jurassic/Cretaceous Sediments in Malaya (J. R. Paton), 231 ; Graptolites recorded from Malaya (C. R. Jones), 231
Geomagnetic Dip Equator : Difference between Cosmic-Ray Equator and the (Takashi Oguchi and Masahiro Kodama), 103
Geomagnetic Dynamos (A. Herzenberg), 937
Geomagnetic Field (Late Tertiary), in Northwestern Canada (P. M. Du Bois), 1617
Geomagnetic Fluctuations having a 6-Sec. Period : Possible Causes of (H. J. Duffus, J. A. Shand and Sir Charles Wright), 1479, *erratum*, 1783
Geomagnetic Micropulsations (Prof. J. A. Jacobs), 381
Geometrical Approach to the Structure of Liquids (Prof. J. D. Bernal), 141
Geophysical Data : Automatic Reduction of (Royal Astronomical Society Geophysical Discussion on), 1166
Geophysical Effects associated with High-Altitude Explosions (Dr. P. J. Kellogg, Prof. E. P. Ney and Prof. J. R. Winckler), 358
Geophysical Effects of High-Altitude Nuclear Explosions (T. Obayashi, S. C. Coroniti and E. T. Pierce), 1476
Geophysical Experiments : Argus High-Altitude (Dr. Alan T. Waterman and Dr. Detlev W. Bronk), 1019
Geophysical Union, American : Grant of 25,000 dollars from the National Science Foundation, for a Conference on Mechanisms of Precipitation Formation, 1372
Geophysical Year (International) : Photography in the (Scientific and Technical Group of the Royal Photographic Society Symposium on), 1368
  Russian Contributions to the (Dr. N. A. Routledge), 1087
  United Kingdom Antarctic Report to the fifth meeting of the Special Committee for the, 1718
George, J. C., and Eapen, J. : Histochemical Demonstration of Lipase and Alkaline Phosphatase Activity in the Fat Body of the Desert Locust, 268
George, II., L. A. (O'Brien, R. T., and) : Preparation of Autoradiograms for Electron Microscopy, 1461
George, R. G. : Magnetic Viscosity displayed on Hysteresis Loop Traces, 245
Geotropic and Morphological Alterations in Rice Seedlings caused by Plant Growth Regulators (E. H. Roberts), 1197
Geriatrics : A Classified Bibliography of Gerontology and, Supplement 1, 1949-1955 (Dr. Nathan W. Shock), *review* by Prof. P. L. Krohn, 777
Germ (Wheat) : Peroxidases from (Kunio Tagawa, Masateru Shin and Prof. Kazuo Okunuki), 111
German Cereal Research Station : Annual International Starch Convention, 510
German Precision Measuring Equipment : Exhibition of (Degenhardt and Co., Ltd.), 1163
Germanic Acid : Interaction between Organic Hydroxy Acids and, in Aqueous Solution (E. R. Clark), 536
Germany (Western) : The Council for Science and Technology of (Dr. J. Horne), 512
Germinal Vesicle of the Primary Oocyte in the Rabbit : Content of Deoxyribonucleic Acid of the (D. Van de Kerckhove), 329
Germinating Green Gram : Glucose-*cyclo*-Acetoacetate as a Precursor of Ascorbic Acid in (Prof. M. C. Nath and M. L. Belkhode), 1258
Germinating Pea Seedlings : Utilization of Alcohol in (E. A. Cossins and Dr. E. R. Turner), 1599
Germination (Oospore), in *Albugo candida* (T. C. Vanterpool), 1718
Germination (Spore), in *Agaricus campestris* L. ex Fr. (Dr. D. M. McTeague, Dr. S. A. Hutchinson and Dr. R. I. Reed), 1736
Germination and Growth of Rice Seedlings : Effect of Coumarin on the (Dr. G. Misra and S. N. Patnaik), 989
Germination Inhibitor and Root-Growth Retarder in Chou Moellier (*Brassica oleracea* var.), (A. G. Campbell), 1263
Germination Inhibitors (Growth and) : Phenolic Acids as, in Dry Fruits (M. Varga and E. Köves), 401
Gero, Alexander : Role of Lysine in catalysing Ester Hydrolysis, 994
Gerolt, P. : 'Vapour Toxicity' of Solid Insecticides, 1121
Gerontologischen Gesellschaft, Internationalen (Europäischen Abteilung des Biologischen und Medizinischen Forschungskomitees der) : Symposium on Experimentelle Alternsforschung, Basel, 1956 (herausgegeben von F. Verzár), *review* by Prof. P. L. Krohn, 777
Gerontology : Trends in (Dr. Nathan W. Shock), second edition, *review* by Prof. P. L. Krohn, 777
Gerontology and Geriatrics : A Classified Bibliography of, Supplement 1, 1949-1955 (Dr. Nathan W. Shock), *review* by Prof. P. L. Krohn, 777
Gersch, Prof. Manfred : Elected a member of the Zoology Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Gershon, S. (Trautner, E. M., and) : Use of 'Tremorine' for Screening Anti-Parkinsonian Drugs, 1462
Gertner, Dr. Sheldon B. : Ganglionic Block and Monoamine Oxidase Inhibitors, 750
Gertsch, Willis J. (Chamberlin, Prof. Ralph V., and) : The Spider Family Dictynidae in America North of Mexico, 1170
Gestation Period and Parturition in the Marsupial *Trichosurus vulpecula* : Œstrous Cycle, (Dr. A. G. Lyne, Phyllis E. Pilton and G. B. Sharman), 622
Gething, B., and others : Thermal Reactions of Highly Fluorinated *Cyclo*-hexadienes, 586
  A New General Route to Aromatic Fluorocarbons, 588
Gevantman, Lewis H. (Shelberg, Wesley E., and) : X-Ray Diffraction Measurement of Radiation Damage in Stretched Rubber, 456

Ghiretti, Dr. F. : Cephalotoxin, the Crab-paralysing Agent of the Posterior Salivary Glands of Cephalopods, 1192
Ghosh, Sir J. C. : *Obituary* by Prof. N. R. Dhar, 645
Ghosts : Four Modern (Dr. Eric J. Dingwall and Trevor H. Hall), *review* by Dr. D. J. West, 351
'Ghosts' (Red Cell) : Preparation and the Haemoglobin Content of (Helen M. Anderson and Dr. Joseph C. Turner), 112
Giacometti, Dr. G., and others : Tetra-co-ordination of Nickel (II)—some Complexes with *Cyclo*hexylphosphine, 601
Giacometti, Dr. G. (Turco, A., and) : Co-ordination Chemistry (Properties of the Versatile Complexes of Nickel (II) with Substituted Phosphines), 1784
Giant Travelling Ionospheric Disturbances at Night : Occurrence of (L. H. Heisler), 383
Gibb, the late Sir Claude : Awarded the 1959 James Watt International Medal by the Institution of Mechanical Engineers, 224
  Obituary by Dr. T. W. F. Brown, 504
Gibberellic Acid : Effect of, on Development of Autumn Colour and Leaf-fall of Deciduous Woody Plants (Dr. P. W. Brian, J. H. P. Petty and P. T. Richmond), 58
  Effect of, on Length and Number of Epidermal Cells in Petioles of Strawberry (C. G. Guttridge and P. A. Thompson), 197
  Effects of, on Winter Pasture Production (Dr. G. Scurfield and E. F. Biddiscombe), 1196
Gibberellic Acid and certain Auxins : Effects of Kinetin, on the Development of Shoot Buds on the Protonema of *Pohlia nutans* (Dr. G. C. Mitra and Dr. A. Allsopp), 974
Gibberellic Acid and Growth Correlations (Prof. R. Dostál), 1338
Gibberellin : Effect of, on the Termination of Dormancy in some Seeds (Prof. Paavo Kallio and Pirkko Piiroinen), 1830
  Prolonging Dormancy in *Vitis vinifera* with (Robert J. Weaver), 1198
  Synergistic Effect of Zinc and (Dr. John Dancer), 901
Gibberellin Effects on Photoperiod-controlled Growth of *Weigela* (Prof. Martin J. Bukovac and Harold Davidson), 59
Gibberellin-like Substances : Absence of, in Filtrates of *Marasmius perniciosus* Stahel (Witch Broom Disease of Cacao), (W. F. Dudman and R. Nichols), 899
Gibberellins and Nodulation (Prof. A. W. Galston), 545
Gibbs, D. F. : Appointed senior lecturer in physics at the University of Bristol, 1024
Gibbs, W. J. : Antarctic Meteorology (Circulation Studies), 1503
Giblett, Dr. Eloise R. : Haptoglobin Types in American Negroes, 192
Giblett, Dr. E. R., and others : Serum Transferrins, 1589
Gibson, Dr. A. : Possibility of Ion Runaway in ZETA, 101
Gibson, Prof. A. H. : *Obituary* by Prof. Jack Allen, 859
Giffen, Prof. E. : Appointed to the Board of the College of Technologists, 1500
Gilbert, A. B. : Micro Determination of Calcium, 888, 1754
Gilbert, A. B. (Ellenby, Dr. C., and) : Parasitology (Mechanisms which enable Free-living Stages to Locate their Hosts), 1506
Gill, E. W., and Morgan, E. D. : Intramolecular Hydrogen Bonding in Heterocyclic Systems, 248
Gill, Dr. Stanley, and others : The Preparation of Programs for an Electronic Digital Computer, second edition, *review* by E. L. Albasiny, 969
Gill, Thomas J., and Solomon, Prof. A. K. : Effect of Ouabain on Sodium Flux in Human Red Cells, 1127
Gill Memorial of the Royal Geographical Society awarded to G. S. Holland, 292
Gillespie, J. M. : Reaction of Sodium Borohydride with Wool, 322
Gillet, Prof. A., and Colson, P. : The Nature of Coal (Petroleum and Anthracite from Cellulose), 1438
Gillette, James R., and others : Cotinine, an Oxidation Product of Nicotine formed by Rabbit Liver, 47
Gillies, Dr. N. E., and Alper, Tikvah : Reduction in the Lethal Effects of Radiations on *Escherichia coli B* by Treatment with Chloramphenicol, 237
Gilliland, Prof. H. B. : Humid Tropics Vegetation (Evaluating and Classifying Secondary Forests in Singapore), 795
Gillman, Prof. Theodore, and Hathorn, Michael : Sex Incidence of Vascular Lesions in Ageing Rats in relation to Previous Pregnancies, 1139
Gills of Teleosts : 'Chloride-Secretary' Cells in the (Gwyneth Parry, F. G. T. Holliday and J. H. S. Blaxter), 1248
Gilson, Dr. D. F. R., and McDowell, Prof. C. A. : Molecular Motion of Enclathrated Compounds as studied by Nuclear Magnetic Resonance, 1183
Gilvarry, John J. : Verification of General Relativity by means of Artificial Planets, 666
Gimeno, Alvaro L., and others : Distribution of Alkaline Phosphatase in the Arteries of several Species, 1262
Ginsberg, Prof. Morris : Darwinism and the Study of Society (Social Evolution), 1563
Giordmaine, J. A., and others : Maser Observations in Radio Astronomy, 223
Gisiger, Dr. L. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Giustina, G., and others : Labelled Keto-Acids in Duck Blood incubated *in vitro* with NaH^{14}CO$_3$, 1328
Glaciation in the Jammu Hills (Prof. R. C. Mehdiratta), 255
Glacier Ice : Whale Remains in (D. L. Dineley and P. A. Garrett), 272
Glaciological Society, British (Royal Astronomical Society and the) : Geophysical Discussion on Characteristics of the Antarctic Ice-Sheet, 1575
Glaessner, Dr. M. F. : Precambrian Coelenterata from Australia, Africa and England, 1472
  A New Fossil, *Spriggina floundersi*, 1782
Glahn, Dr. Poul E., and Nielsen, Dr. Sigurd O. : Energetic Coupling in the Respiratory Chain, 1578
Gland (Adrenal), of Young Calves : Changes in the Secretion of 20α-Hydroxypregn-4-en-3-one by the (Dr. W. E. Balfour, Dr. R. S. Comline and R. V. Short), 467
Gland (Mammary), of the Rat : Effect of Insulin and Phenazine Methosulphate on Pathways of Glucose Catabolism in the (P. McLean), 182
Gland (Pituitary), of the Ferret : Seasonal Variations in the (Dr. R. L. Holmes), 1521
Gland (Thyroid) : Effect of Monofluorosulphonate, Difluorophosphate and Fluoroborate Ions on the Iodine Uptake of the (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Glands (Posterior Salivary), of Cephalopods : Cephalotoxin, the Crab-paralysing Agent of the (Dr. F. Ghiretti), 1192
Glands (Sheep Anterior Pituitary) : Bioassay of (Dr. D. R. Lamond, H. M. Radford and A. L. Wallace), 1597
Glands (Silk), of the Spider *Nephila maculata* Fabr., 1763 : Amounts of Deoxyribonucleic Acid in the (Prof. N. B. Inamdar and U. V. Wagh), 1541
Glass, Prof. Hiram B. : Elected a member of the United States National Academy of Sciences, 1575
Glass : Structure of (Prof. I. Náray-Szabó), 886
Glass in Nuclear Research, 292
Glass (Plate) : New Process of making (Pilkington Brothers, Ltd.), 293
Glass (Silica-) : Origin of Libyan Desert (Dr. Alvin J. Cohen), 1548
Glass Capillaries : An Equation for the Flow of Blood, Plasma and Serum through (Dr. G. W. Scott Blair), 613
Glasses : Hydrated (E. D. Lacy), 178
  Radiation-absorbing (Chance-Pilkington Optical Works), 292
Glasshouse Crops Research Institute, Littlehampton : Open Day, 1164
Glasziou, K. T. (Sacher, J. A., and) : Effects of Auxins on Membrane Permeability and Pectic Substances in Bean Endocarp, 757
Gledhill, A. W. : Sparing Effect of Serum from Mice treated with Endotoxin upon certain Murine Virus Diseases, 185
Glemser, Prof. O. : Structure of some Hydroxides and Hydrous Oxides—Binding of Water in some Hydroxides and Hydrous Oxides, 943
  Binding of Water in Ferric Hydrate, 1476
Glesinger, Egon : Appointed director of the Division of Forestry and Forest Products of the Food and Agriculture Organization of the United Nations, 291 ; work of, 291
Glick, Prof. David (edited by) : Methods of Biochemical Analysis, *review* by Dr. I. D. P. Wootton, 779
Globin (Human) : Separation of the Peptide Chains of (Constituents of Human Haemoglobin), (Dr. V. M. Ingram), 1795
γ-Globulin : Serum Antibody and, in Baby Rabbits after Transfer of Ribonucleoprotein from Adult Rabbits (Dr. Miroslava Hrubešova, Dr. Brigitte A. Askonas and Dr. J. H. Humphrey), 97
α-Globulin Fraction in Human Serum : Prealbumin as a Complex in the (Dr. J. R. Tata), 877
β-Globulin Polymorphism and Early Foetal Mortality in Cattle (Dr. G. C. Ashton), 404
Globulin (Serum) Permeability Factor : Enzymic Nature of the (E. L. Becker, D. L. Wilhelm and Prof. A. A. Miles), 1264
Glomerulosa (Adrenal) : Stress Activation of (Dr. M. Hill, K. Dvořák and M. Pospíšil), 1819
Glossop, A., and Pashley, D. W. : Interfacial Phenomena (Reflexion Electron Diffraction Techniques to study the Deposition of Copper on Silver), 1097
Glucose : Influence of Ions on the Uptake of, and on the Effect of Insulin on it by Rat Diaphragm (Dr. Gangagobinda Bhattacharya), 324
Glucose (*In vitro* Effects of Insulin and), on Leucine-2-^{14}C Incorporation into Protein of Diaphragms of Hypophysectomized Rats (Dr. J. L. Kostyo), 1518
^{14}C-Glucose in *Trichoderma viride* : Synthesis of Long-Chain Fatty Acids from 2-^{14}C-Acetate and (Dr. W. Mary Crombie and P. E. Ballance), 1195
Glucose or Amino-Acid Transport : An Effect of Insulin on Peptide Synthesis independent of (Prof. Ira G. Wool and Dr. M. E. Krahl), 1399
Glucose Antimetabolite (2-deoxy-D-glucose) : Inhibition of Influenza Virus Multiplication with a (Prof. Edwin D. Kilbourne), 271
Glucose Catabolism in the Mammary Gland of the Rat : Effect of Insulin and Phenazine Methosulphate on Pathways of (P. McLean), 182
Glucose Infusion (Parenteral), and Glycerol Feeding : Depression in Percentage of Milk Fat by (W. S. Vallance and Prof. G. L. McClymont), 466
Glucose-*cyclo*-Acetoacetate as a Precursor of Ascorbic Acid in Germinating Green Gram (Prof. M. C. Nath and M. L. Belkhode), 1258
Glucose-6-phosphate Dehydrogenase : Gene Action in Erythrocyte Deficiency of—Tissue Enzyme-Levels (Prof. Paul A. Marks, Dr. Ruth T. Gross and Dr. Ruth E. Hurwitz), 1266
Glucose-containing Media (Defined) : Detection of Gentiobiose and Sophorose in Cultures of certain Micro-organisms growing in (A. W. Khan, D. N. Pellegrino and Prof. T. K. Walker), 682
Glucuronide and Sulphate Conjugation *in vivo* and *in vitro* (K. H. Harper and G. Calcutt), 463
Glue Research : Gelatine and (A. G. Ward), 440
Glume Colour in Nigerian Cultivated Sorghums : A Chemical Basis for the Classification of (W. R. Stanton, T. B. Miller and D. L. Curtis), 807
Glutamic Acid Content of Brains of Rats treated with Toxopyrimidine : γ-Aminobutyric Acid and (Dr. G. Rindi and G. Ferrari), 608
Glutamic Acids (Aspartic and) : Rapid Quantitative Horizontal Paper Chromatography at an Elevated Temperature—Determination of (Henry R. Roberts and Michael G. Kolor), 460
Glutamic–Aspartic Transaminase of Pig Heart Muscle (B. E. C. Banks, K. G. Oldham, E. M. Thain and C. A. Vernon), 1187
Glutamic-decarboxylase and Glutamic-oxalacetic Transaminase of Rat Brain: Effect of Toxopyrimidine on (Dr. G. Rindi, V. Perri and U. Ventura), 1126
Glutaminase Activity of the Foetal Membranes and Kidneys of Pigs (Ingeborg C. Radde and Prof. R. A. McCance), 115
Glutamine Metabolism of Normal and Maligant Cells cultivated in Synthetic Media (Arthur E. Pasieka and Dr. Joseph F. Morgan), 1201
Glycerate from Oxalate : Formation of, by *Pseudomonas oxalaticus* (OXI) grown in Oxalate (Biosynthesis of Cell Constituents from C$_2$-Compounds), (J. R. Quayle and Dr. D. B. Keech), 1794
Glycerol Feeding : Depression in Percentage of Milk Fat by Parenteral Glucose Infusion and (W. S. Vallance and Prof. G. L. McClymont), 466
Glycerol-treated Muscle Fibres : Relaxation of, by Acetone (Dr. Setsuro Ebashi and Dr. Fumiko Ebashi), 687
α-Glycerophosphate Dehydrogenase : Anion Inhibition of (Dr. Otto Z. Sellinger and Dr. O. Neal Miller), 889
Glycine : Changes in the Electron Spin Resonance Spectrum of, with Increasing Doses of Radiation (Dr. J. W. Boag and A. Müller), 831
  Metabolism of, by a Peudomonad (Biosynthesis of Cell Constituents from C$_2$-Compounds), (A. G. Callely and Dr. S. Dagley), 1793
  Utilization of the Carboxyl Group of, for the Synthesis of the Amino-Acids of Silk by *Bombyx mori* (Dr. S. Bricteux-Grégoire, W. G. Verly and Prof. M. Florkin), *erratum*, 294

β-Glycine : Crystal Structure of (Dr. Yoichi Iitaka), 390
Glycogen Storage Disease of the Liver (von Gierke's Disease) : Detection of Heterozygous Carriers in (Dr. David Yi-Yung Hsia and Eva Gawronska Kot), 1331
Glycollate : Formation of Malate from, by *Pseudomonas ovalis* Chester (Biosynthesis of Cell Constituents from C_2-Compounds), (Dr. H. L. Kornberg and A. M. Gotto), 1791
Glycosidases in some Farm Animals (J. Conchie, June Findlay and Dr. G. A. Levvy), 615
Glyn, Sir Francis : Elected a Trustee and honorary treasurer of the Beit Memorial Trust, 1569
Gm System, Anti-Gm : A New Haemagglutinating Substance in the (Dr. Morten Harboe), 1468
Goddard, Dr. L. S. : An Introduction to Combinatorial Analysis, *review*, 970
    Introduction to Difference Equations with Illustrative Examples from Economics, Psychology and Sociology, *review*, 970
    Studies in the Mathematical Theory of Inventory and Production, *review*, 1557
Gogate, S. S., and others: Shorewards Upslope of the Layer of Minimum Oxygen off Bombay—its Influence on Marine Biology, especially Fisheries, 1084
Goitre (Experimental Colloid), produced by Thiouracil (Dr. R. H. Follis, jun.), 1817
Golarz, M. Nelly (Bourne, Prof. Geoffrey H., and) : Human Muscular Dystrophy as an Aberration of the Connective Tissue, 1741
Gold, Dr. E. R., and others : Changes in the Group *A* Antigen in a Case of Leukaemia, 892
Gold, Prof. T. : Origin of the Radiation near the Earth discovered by means of Satellites, 355
    Space Research (Study of the Moon and the nearer Planets), 362
Gold, Dr. V. (Blackie, Dr. M. S., and) : Magnetometric Titration—a New Method of Chemical Analysis, 1804
Gold Medal for 1958 of the Institution of Mining and Metallurgy awarded to Dr. A. J. Orenstein, 1499
Gold Medal of the Royal Aeronautical Society awarded to Marcel Dassault, 794
Gold Medal of the Royal Astronomical Society awarded to Dr. R. A. Lyttleton, 151
Gold Medal (British) for Aeronautics of the Royal Aeronautical Society awarded to R. S. Stafford, 1648
Gold Medals of the Institut Français des Combustibles et de l'Energie presented to Dr. D. T. A. Townend, Prof. W. H. McAdams, G. Darrieus, Prof. G. Ribaud, Dr. F. Münzinger and F. Squassi, 151
Goldberg, Prof. Samuel : Introduction to Difference Equations with Illustrative Examples from Economics, Psychology and Sociology, *review* by Dr. L. S. Goddard, 970
Goldie, N., and others : Upper Air Temperature over the World (Meteorological Office, Geophysical Memoir No. 101), 864
Goldin, Abraham, and others : Effect of Azaserine (*o*-Diazoacetyl-L-serine) on the Pyridine Nucleotide Levels of Mouse Liver, 1674
Goldschmidt, Prof. S. : Synthesis of Peptides (Peptide Bond Formation based on Amino-group Activation), 152
Goldstine, Dr. Herman H. : Appointed resident manager of the Lamb Estate Research Center of the International Business Machines Corporation, Cortlandt, New York, 1502
Goldstone, G. T., (Dowden, R. L., and) : 'Whistler Mode' Echoes remote from the Conjugate Point, 385
Goldup, A., and others : Separation of *m*-Xylene and *p*-Xylene by Gas Chromatography, 107
Golla, Prof. F. L. : Retirement from the directorship of the Burden Neurological Institute, Bristol, 220 ; work of, 220
Gollancz, Victor : The Devil's Repertoire or Nuclear Bombing and the Life of Man, *review* by R. Brightman, 952
Goniotrichum elegans, a Marine Red Alga requiring Vitamin B_{12} (Lisbeth Fries), 558
Gonville and Caius College, Cambridge : Election of Prof. N. F. Mott as Master, 438
Goodall, S. E. : Development of Electric Cables (Presidential Address to the Institution of Electrical Engineers), 226
Goodlett, V. Wilson, and Innes, K. Keith : Hollow-Cathode Emission of the AlO Spectrum, 243
Goodman, Harold O., and others : Variables related to Human Breast Cancer, *review* by Dr. L. Foulds, 955
Goodman, Dr. Harold S. : Comparison of the Formation of the Complex, Sensitized Erythrocyte-Complement ($EAC'_{1,4,2}$) in Haemolytic Systems differing in their Haemolysin and Complement-fixing Activities, 331
Goodman, Dr. Joan W., and Smith, Dr. L. H. : Life-Span of Rat and Mouse Erythrocytes in the Rat–Mouse Chimera, 1833
Goodman, Dr. L. J. : Hair Receptors in Locusts—Hair Plates on the First Cervical Sclerites of the Orthoptera, 1106
Goodwin, A. J. H. : Elected president of the Royal Society of South Africa, 1502
Goody, Dr. Jack (edited by) : The Developmental Cycle in Domestic Groups, *review* by Dr. Rodney Needham, 1625
Goose Complex (Blue–Snow) : Assortative Mating and Reciprocal Difference in the (Dr. F. G. Cooch and Dr. J. A. Beardmore), 1833
Gordon, C., and others : Gas Discharges (Spark, High-frequency and Glow Discharges), 93
Gordon, Dr. Cecil : Scientific Applications of Science, *review*, 424
Gordon, Dr. Hirsch L. (edited by) : The New Chemotherapy in Mental Illness, *review* by Dr. Marthe Vogt, 1007
Gordon Research Conferences for 1959, 1304
Gorham, Paul R. : Elected president of the Canadian Society of Plant Physiologists, 933
Gorini, Pasquale, and others : Method for Testing the Influence of Drugs and Physical Agents upon Mitosis, 190
Gotto, A. M. (Kornberg, Dr. H. L., and) : Biosynthesis of Cell Constituents from C_2-Compounds—Formation of Malate from Glycollate by *Pseudomonas ovalis* Chester, 1791
Goubeau, Prof. Josef Anton : Elected a member of the Chemistry Section of the Deutsche Akadamie der Naturforscher Leopoldina, 652
Goulden, C. H. : *Obituary* of Dr. Kenneth W. Neatby, 82
Government : Education for (N. Lindop), 1235
    Rudimentary, *review* by Prof. M. Fortes, 1006
Government Aid to Science in Britain (House of Commons Debate on), 156
Government Chemist's Department : To be placed in charge of the Council for Scientific and Industrial Research, 1367
Government Research on Food Preservation, 862
Government Services : Recruitment in, and Security Regulations, 1483
Government Support for Research in Water Supply, 1500
Goya, Harry (Zeitlin, Prof. Harry, and) : Polymorphic Conversion of Mercuric Iodide on Alumina, 1041
Grabbe, Eugene M., and others (edited by) : Handbook of Automation, Computation and Control, Vol. 1, Control Fundamentals, *review* by P. H. Hammond, 1556
Grabowska, Maria : Collagen Content of Normal Connective Tissue, of Tissue surrounding a Tumour and of Growing Rat Sarcoma, 1186
Graddon, Dr. D. P. : 5-Co-ordination of Divalent Copper, 1610
Graduate Students and Research Workers : Notes on D.S.I.R. Grants for (Department of Scientific and Industrial Research), 650
Graduate and Postdoctoral Fellowships (National Science Foundation), 1233
Graduates in British Industry (Department of Scientific and Industrial Research), 864
Graduates (Science) : An Invitation to (Ministry of Supply and Central Office of Information), 651
Graduates (Women) : Part-Time Work for (D. D. Furley), 1790
Gräff, Dr. G. : Chemistry and Quantum Chemistry, 159
Graft Co-polymers (Block and) : Stereospecific Polymers and (Bradford Institute of Technology Course on), 224
Grafter's Handbook (R. J. Garner), revised edition, *review* by S. A. Pearce, 958
Grafting : The Art of, *review* by S. A. Pearce, 958
Graham, Dr. J. D. P. : Pressor Amines and Neuroblastoma, 1733
Graham, Dr. John W., and Cooper, Susan C. : Biological Origin of Manganese-rich Deposits of the Sea Floor, 1050
Graham, Dr. John W., and others : Magnetostriction and Palaeomagnetism of Igneous Rocks, 1318
Grahame, Prof. D. C. : *Obituary* by Dr. R. Parsons, 290
Grain (*Paspalum scrobiculatum*) : Pharmacology of a Tranquillizing Principle in (Dr. N. K. Bhide and R. A. Aimen), 1735
Grain Boundary Reaction of Aluminium–Zinc Alloys : Crystallographic Orientation of Nodules formed by the (Dr. Ryoji Watanabe and Dr. Shigeyasu Koda), 1667
Grainer, L. : Uranium and Thorium, *review* by G. R. Hall, 962
Grainger, Dr. John : Horticultural and Fruit Research, 1507
Grainger, Dr. J. N. R. : Appointed to the chair of zoology and comparative anatomy in Trinity College, Dublin, 1716 ; work of, 1716
Grainger, L. : Appointed head of the Metallurgy Division of the United Kingdom Atomic Energy Authority's Research Group at Harwell, 84 ; work of, 84
Gram Characteristic of Cells : A Correlation between Iodine Permeability and the (Prof. J. W. Bartholomew, Thomas Cromwell and Harold Finkelstein), 123
Gram-negative Sporing Bacterium from the Rumen (Dr. P. N. Hobson and M. R. Purdom), 904
Gram (Green) : Glucose-*cyclo*-Acetoacetate as a Precursor of Ascorbic Acid in Germinating (Prof. M. C. Nath and M. L. Belkhode), 1258
Gramicidin : Crystallization of (P. E. Olesen and L. Szabo), 749
Granada Lectures of the British Association for the Advancement of Science (Communication in the Modern World), 293
Grandison, A. G. C. : Harmonious Herpetology, *review*, 958
Granger, C. W. J. : Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
Grant, Miss M. W. : Food Investigations, 1239
Grant, Dr. P. J., and others : Nuclear Fuel Cycles (Choice of Fuel Cycle for Nuclear Power Stations), 1647
Grant, Dr. P. M., and others : Effects of Gamma-Radiation on some Carbohydrates, Hydroxy-acids and Amino-acids in Aqueous Solutions, 376
Grant, W. J., and others : Examination of Particulate Matter on Filter Membranes, 1000
Grants : Research Fellowships and (Leverhulme Trust), 1499
Grants for Geological Research in Scotland and the north of England (Clough Memorial Research Fund of the Edinburgh Geological Society), 582
Grants for Graduate Students and Research Workers : Notes on D.S.I.R. (Department of Scientific and Industrial Research), 650
Grants for Laboratory Research, Field Experiments and Conferences on Meteorological Methods directed toward Modification of Weather (National Science Foundation), 1371
Grants for Research in Marine Biology or Oceanography (Challenger Society), 1368
Grants to Students in Britain (National Union of Students Memorandum on), 864
Grants for Study Overseas, 650
Grants for Training Courses (United States Atomic Energy Commission), 437
Grants for Training in Radioisotope Technology (United States Atomic Energy Commission), 1641
Grants, Scholarships and Fellowships for Research on Diseases of the Blood (Lady Tata Memorial Trust), 581
Grants (Increased), for Universities in Britain, 507
Grants (Longer-term), for Special Researches (Department of Scientific and Industrial Research), 438
Grants (Postgraduate Training), in Fishery Research (Development Commissioners, in association with the Ministry of Agriculture, Fisheries and Food, and the Scottish Home Department), 1094
Granulation (Photospheric) : 'Turbulence' and the (R. E. Loughhead and R. J. Bray), 240
Granules (Pyrite), and Fossil Micro-organisms (L. G. Lowe), 437
Granulocyte Precipitins of Human Tissues and Activated Sera (Dr. Leonhard Korngold, Gerda Van Leeuwen and Daniel G. Miller), 330
Graphite : Metallic Conduction in the Crystal Compounds of (Prof. A. R. Ubbelohde, Dr. L. C. F. Black and J. F. Mathews), 454
    A Micrographic Study of Wear of (Dr. Robert H. Savage), 315
Graphite Surface : Wear of, by Punching and Planing (Dr. Robert H. Savage), 454
Graphites : Structure of Kish and other (Eitaro Matuyama), 670
Graptolites recorded from Malaya (Geology and Palaeontology in Malaya), (C. R. Jones), 231

Grass : Chemical Aspects of the Production and Use of (Dublin and District Section and the Agriculture Group of the Society of Chemical Industry Symposium on), 1783
Grass Plants with Separation of Seminal and Adventitious Roots : A Method of Growing (R. Dorrington Williams), 415
Grassland Congress : Eighth International, 223
Graticule' (The 'Interstitial) Process (A. J. C. Hall and J. C. Hayes), 223
Graticules : Permanent, 223
Graves, J. H. (Brown, F., and) : Changes in Specificity and Electrophoretic Mobility of the Precipitating Antibodies present in the Serum of Cattle recovering from Foot-and-Mouth Disease, 1688
Gravimeter (Worden) : Gravity Survey on the Kuttyaro Caldera by means of a (Prof. Izumi Yokoyama and Hirokazu Tajima), 739
Gravity Survey on the Kuttyaro Caldera by means of a Worden Gravimeter (Prof. Izumi Yokoyama and Hirokazu Tajima), 739
Gray, Dr. E. G. : Electron Microscopy of Synaptic Contacts on Dendrite Spines of the Cerebral Cortex, 1592
Gray, H. J. (compiled and edited by) : Dictionary of Physics, *review* by Prof. H. Lipson, 1768
Gray, Sir James : Retirement from the chair of zoology in the University of Cambridge, 506 ; work of, 506
Gray, Dr. J. A. B. : Title of professor of physiology in the University of London (at University College) conferred on, 368
Gray, jun., T. I. : Antarctic Meteorology, 1504
Grayson, H. (Feinberg, Dr. J. G., and) : Immunological Aspects of Allergic Disorders (A New Look at the Antibodies to so-called 'Common' Antigens of Grass Pollens), 296
  A Critical Test of Antigenic Relationships, 987
Grayzel, Arthur I., and others : Excessive Uric Acid Production in the Human induced by 2-Ethylamino-1,3,4-thiadiazole, 1463
Great Britain : The Length of Working Life of Males in (Ministry of Labour and National Service), 1780
  River Flow in, 1955-56 (Prof. David L. Linton), 714
  Scientific and Learned Societies of, 59th edition, *review*, 1151
  See also under Britain
Great Thinking, *review* by Prof. W. H. McCrea, 1218
Greaverson, Dr. : Relaxation Processes (Measurements on Mechanical Relaxation in Polyethylene), 584
Green, Estill I. : Appointed executive vice-president of the Bell Telephone Laboratories, 220 ; work of, 221
Green, Gustavus : Made an honorary companion of the Royal Aeronautical Society, 154
Green, G. H. (Dempsey, Mary, and) : An Abnormality in the Skin of Sheep, 909
Green, J. : Carotenoid Pigment in *Spirobacillus cienkowskii* Metchnikoff, a Pathogen of Cladocera, 56
  Haemoglobin and the Habitat of the Harpacticoid Copepod *Elaphoidella gracilis* (Sars), 1834
Green, Dr. J. H. S. : Cohesive Energy Density of Polystyrene, 818
Green Flash and other Low Sun Phenomena (D. J. K. O'Connell), *review* by James Paton, 423
Green Fluorescence of Guanidinium Compounds with Ninhydrin (Dr. Rex B. Conn, jun., and Dr. Richard B. Davis), 1053
Green Gram (Germinating) : Glucose-*cyclo*-Acetoacetate as a Precursor of Ascorbic Acid in (Prof. M. C. Nath and M. L. Belkhode), 1258
Greenaway, F. : Appointed a deputy keeper in the Department of Chemistry in the Science Museum, London, 224
  The Biographical Approach to John Dalton, *review* by Prof. J. R. Partington, 1765
Greenberg, Dr. : Co-ordination Chemistry (*Trans* Effect in the Substitution Reactions of Platinum (II)), 1784
Greenberg, Dr. H. J. : Appointed manager of the Mathematics Theory Department of the Lamb Estate Research Center of the International Business Machines Corporation, Cortlandt, New York, 1502
Greenhouse : Rutin in Tobacco grown in a (Dr. T. P. Ferguson and Dr. A. S. Weaving), 64
Greenlees, Dr. G. W. : Appointed to a senior lectureship in physics in the University of Birmingham, 1571
Greenough, Dr. James J. (Cotzias, Dr. George C., and) : Quantitative Estimation of Amineoxidase, 1732
Greenstein, Dr. Jesse P. : *Obituary* by Dr. Douglas Hamer, 1776 ; *obituary* by Prof. Alex. Haddow, 1777
Greenwich Observatory, Royal (Dr. R. v. d. R. Woolley), 640
  Isaac Newton Telescope at the, 579
Greenwood, David C. : Solving the Scientist Shortage, 489
Greenwood, F. C., and others : Changes in Œstrogen Titre in Stored Urine, 189
Gregarine (Acephaline), *Apolocystis elongata*, Phillips and MacKinnon : Observations by Electron Microscopy on the Structure of an (Dr. D. Lacy and H. B. Miles), 1456
Gregor, L. V. (Rao, Dr. C. N. R., and) : Polymorphic Transitions in Anhydrous Sodium Sulphate, 1391
Gregory, C. C. L., and Kohsen, Anita : Introduction to Parapsychology, 229
Gregory, D. H., and others : Smoke Emission of Low-Temperature Chars, 33
Gregory, Prof. F. G., and Purvis, Dr. Olive N. : Experimental Approaches to the Problems of Growth and Form in Plants (Effect of Very Long Days on the Flowering of Winter Rye), 585
Gregory, Prof. F. G., and others : Dark Fixation of Carbon Dioxide in *Kalanchoe blossfeldiana* in relation to Photoperiodism, 1375
Gregory, R. L., and Donaldson, P. E. K. : A 'Solid-Image' Microscope, 246
Greig, Prof. James : Development of Electric Cables, 226
Greiner, Hugo : *Spirifer disjunctus*, its Evolution and Paleoecology in the Catskill Delta, *review* by Dr. H. M. Muir-Wood, 959
Greville, Dr. G. D. (Chappell, Dr. J. B., and) : Inhibition of Electron Transport and the Swelling of Isolated Mitochondria, 1525
  Effects of 2:4-Dinitrophenol and other Agents on the Swelling of Isolated Mitochondria, 1737
Grieve, Dr. Brian J. (Blackall, Dr. William E., and) : How to Know Western Australian Wildflowers, Part 2, A Key to the Flora of the Temperate Regions of Western Australia, *review* by V. S. Summerhayes, 1628
Griffen, L. J. : Awarded the Pye Premium of the Television Society, 1161
Griffin, Dr. D. M. : Hair as a Substrate for Non-Keratinolytic Fungi, 1281
Griffin, Prof. Donald R. : Listening in the Dark, the Acoustic Orientation of Bats and Men, *review* by Prof. R. J. Pumphrey, 1554
Griffin, Sir Herbert : *Obituary* of the Rev. H. H. Symonds, 930
Griffin, L. R. : Gas Discharges (Relative Excitation Cross-sections in Helium), 93
Griffin and George (Research and Development), Ltd. : Formation of, 368
  Appointment of Dr. A. J. P. Martin as research director, 368
Griffith, Dr. A. A. : Appointed to the Board of the College of Technologists, 1500
Griffith, W. P., and others : Lowest Oxidation States of Technetium and Rhenium, 1755
Griffiths, Dr. Ivor (Dawes, Dr. Ben, and) : Relationship between *Dictyocotyle* and *Calicotyle*, 835
Griffiths, J. F. : World Variation in Annual Rainfall, 132
Griffiths, L. B. (Pfeil, P. C. L., and) : Effect of Cathode Inclusions on Electrical Discharges, 1481
Griffiths, T. W. : Relative Rates of Liver Storage of Pure α, β-, γ- and δ-Tocopherols in the Growing Chick, 1061
Grigson, Geoffrey : Looking and Finding, *review* by T. H. Hawkins, 1557
Grimmett, R. E. R. : Records of Nodulation in *Coriaria*, 223
Grimminger, Dr. George : Density of the Upper Atmosphere, 811
Grimsdale, R. L. : Feedback Theory and its Application, *review*, 280
  Technology of Instrumentation, *review*, 970
Grinding at Super-Critical Speeds in 'Ball' Mills (Dr. H. E. Rose and M. D. Trbojević), 813
Griseofulvin in Hair of Guinea Pigs after Oral Administration : Presence of (J. C. Gentles, M. J. Barnes and K. H. Fantes), 256
Grist, D. H. (Tempany, Sir Harold, and) : An Introduction to Tropical Agriculture, *review* by Prof. J. W. Purseglove, 966
Grodsky, G. M., and others : Metabolism of Sulphobromophthalein, 469
Groetzinger, Dr. G. K. : *Obituary*, 1778
Grosch, Prof. Daniel S., and Plumb, Mary Ellen : A Sex Difference in Radioactivity of *Artemia* cultured in Sea Water containing Phosphorus-32, 122
Gross, Dr. Ruth T., and others : Gene Action in Erythrocyte Deficiency of Glucose-6-phosphate Dehydrogenase—Tissue Enzyme-Levels, 1266
Grotte de Fontéchevade (Archives de l'Institut de Paléontologie Humaine, Mémoire 29), Deuxième partie, Anthropologie (Henri-V. Vallois) ; Troisième partie, Géologie et Paléontologie (H. Alimen, C. Arambourg et A. Schreuder, avec la collaboration de G. Henri-Martin, J. Berloiz et J. Bouchud), 1369
Ground Squirrels : Aortic Medial Calcification and Lowered Metabolism in (Dr. George R. Zimmerman and Prof. G. Edgar Folk, jun.), 754
Groundwood Pulp made from Logs stored in Salt Water : Inactivation of Organo-Mercurial Fungicides in, and the Possible Role of Sulphur Compounds (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Group *A* Antigen : Changes in the, in a Case of Leukaemia (Dr. E. R. Gold, Dr. Geoffrey H. Tovey, W. E. Benney and F. J. W. Lewis), 892
Group Separation : Gel Filtration—a Method for Desalting and (Dr. Jerker Porath and Dr. Per Flodin), 1657
Grove, A. T. : Hausaland Erg, 1642
Groves, G. V. : Atmospheric Tides and Earth Satellite Observations, 1047
Grow Up : Eleven-Year-Olds (John S. Macpherson), *review* by Jean Floud, 493
Growing Chick : Relative Rates of Liver Storage of Pure α-, β-, γ- and δ-Tocopherols in the (T. W. Griffiths), 1061
Growing Grass Plants with Separation of Seminal and Adventitious Roots : A Method of (R. Dorrington Williams), 415
Growing Rat Sarcoma : Collagen Content of Normal Connective Tissue; of Tissue surrounding a Tumour and of (Maria Grabowska), 1186
Growing Yeast Protoplast : Formation of Aberrant Cell Walls and of Spores by the (A. A. Eddy and D. H. Williamson), 1101
Growth of Ammonium Dihydrogen Phosphate Crystals : Effect of Tartar Emetic on the (Yutaka Kunisaki), 105
Growth of *Chlorella* : An Effect of Yeast Extract on the (P. J. Casselton), 1404
Growth of *Chlorella vulgaris* : Effect of Heavy Water on the (Janet R. Walker and P. J. Syrett), 1193
Growth of Hair : Effect of Chloral Hydrate on (Prof. J. Randolph Murray), 984
Growth of Hair in the House Mouse (*Mus musculus*) : Effect of a Sympathomimetic Agent (Methoxamine Hydrochloride) on (F. Cockrem), 614
Growth in Media lacking Sodium Chloride : Adaptation of Marine Bacteria to (Prof. D. B. Pratt and G. Waddell), 1208
Growth of *Mycobacteria* : Factors Inhibiting and Stimulating, in the Blood and Serum of Non-immunized and Immunized Animals (J. Hubáček and I. Màlek), 187
Growth of Rice Seedlings : Effect of Coumarin on the Germination and (Dr. G. Misra and S. N. Patnaik), 989
Growth of Two Stalk-rotting Fungi : An Antifungal Substance in the Corn Plant and its Effect on (N. J. Whitney and C. G. Mortimore), 341
Growth of the White Rat : Effect of Norleucine and related Compounds on (M. Rechcigl, jun., H. H. Williams and J. K. Loosli), 1519
Growth (Cell), and the Development of Tumours (Anna Kane Laird and A. D. Barton), 1655
Growth (Hair) : The Biology of (edited by William Montagna and Richard A. Ellis), *review* by Dr. F. W. Dry, 851
Growth (Inhibition of), by Cortisone in Chicken Embryos : Effect of Amniotic Fluid on (Dr. P. de Franciscis and Prof. W. Landauer), 617
Growth (Marginal), of Leaves (Dr. Noboru Hara), 1409
Growth (Photoperiod-controlled), of *Weigela* : Gibberellin Effects on (Prof. Martin J. Bukovac and Harold Davidson), 59
Growth Adjuvants in Culture : Morphogenetic Response of *Citrus* Ovules to (N. S. Ranga Swamy), 735
Growth Correlations : Gibberellic Acid and (Prof. R. Dostál), 1338
Growth Factor for *Mycobacterium butyricum* : Replacement of Thiamine as a (Dr. D. E. Wright), 262
Growth-rates : Evidence on, obtained from Two Marked Humpback Whales (W. H. Dawbin), 1749
Growth-regulating (Yeast) Substance from *Tetragonia expansa* : Tetragonin a (Anna P. Schiffer and András Kovács), 988
Growth Regulators (Plant) : Geotropic and Morphological Alterations in Rice Seedlings caused by (E. H. Roberts), 1197
Growth Substances (Plant-) : Metal-Chelating Properties of (W. L. F. Armarego, M. J. Canny and S. F. Cox), 1176 ; (Prof. O. V. S. Heath and J. E. Clark), 1177
Growth and Form in Plants : Experimental Approach to the Problems of (Experimental Morphology Group of the Linnean Society Symposium on), 584

Growth and Germination Inhibitors in Dry Fruits : Phenolic Acids as (M. Varga and E. Köves), 401
Growth and Respiration : Inhibition of, of *Ophiobolus graminis* var. *avenae* and *Aspergillus niger* by Cystine (Elizabeth M. C. Turner), 1130
Gruber, Prof. Frederick C. (edited by) : The Emergence of the Modern Mind, *review* by T. H. B. Hollins, 953
Grumbach, Prof. Dr. A., and Kikuth, Prof. Dr. (herausgegeben von) : Die Infektionskrankheiten des Menschen und ihre Erreger, *review* by Prof. P. C. C. Garnham, 352
Guanidinium Compounds with Ninhydrin : Green Fluorescence of (Dr. Rex B. Conn, jun., and Dr. Richard B. Davis), 1053
Guanina–Cytosine Content : Dependence of the Density of Deoxyribonucleic Acids on (Heterogeneity in Deoxyribonucleic Acids, 2), (Dr. Noboru Sueoka, Dr. Julius Marmur and Prof. Paul Doty), 1429
Guanite (Struvite) : Crystal Symmetry of (J. A. Bland and S. J. Basinski), 1385
Guggenheimer, Dr. K. M. : Interpretation of Resonance Energies in the Photoproduction and Scattering of Pions from Hydrogen, 1758
Guha, Dr. B. C. : The Nature of Coal, 1438
Guibourtia sp. : Flavan-3,4-diols and Leuco-anthocyanidins of (Dr. D. G. Roux), 890
Guide to Field Biology (John Sankey), *review* by W. H. Dowdeswell, 1081
Guide (A Field), to Reptiles and Amphibians of the United States and Canada East of the 100th Meridian (Roger Conant), *review* by A. G. C. Grandison, 958
Guide (Underwater), to Marine Life (Carleton Ray and Elgin Ciampi), *review* by Dr. D. P. Wilson, 852
Guided Missiles—Operations, Design and Theory (sponsored by the United States Department of the Air Force), *review*, 210
Guile, Dr. A. E., and Secker, P. E. : Gas Discharges (Forward Continuous Motion of an Arc Cathode in a Transverse Magnetic Field in Air at Atmospheric Pressures), 92
Guillery, Dr. R. W. (Boycott, B. B., and) : Environmental Temperature and the Reptilian Nervous System, 62
Guinea (Portuguese) : Haemoglobin *N* in (Prof. Carlos Trincão, L. T. de Almeida Franco and A. R. Nogueira), 193
Guinea Pig : Effect of the Rate of Elimination of Digoxigenin in the, on the Determination of its Lethal Dose (M. Rand and Anne Stafford), 688
Guinea Pig Serum which may cause Antigens to show an Apparent Anti-complementary Effect : Normal Components of (M. M. H. Sewell), 1062
Guinea Pigs : Effect of β-Hydroxybutyrate Injections on the Pancreatic Activity of (Dr. H. D. Brahmachari and Mahendra Kumar), 51
  Presence of Griseofulvin in Hair of, after Oral Administration (J. C. Gentles, M. J. Barnes and K. H. Fantes), 256
Guinier, Prof. A. : Precipitation in Alloys (Structures of Age-hardened Alloys in the Pre-precipitation Stage), 796
Gun Tunnel (Hypersonic) : A Microwave Method of determining the Displacement and Velocity of a Piston in a (L. Pennelegion), 246
Gunn, Prof. J. C. : Elected a Fellow of the Royal Society of Edinburgh, 719
Gunther, Dr. Helge-Liane : Mode of Division of Pediococci, 903
Gurney, Prof. C. : Reinforced Plastics, 24
Gurney, Dr. Robert : Trees of Britain, *review* by Dr. F. N. Howes, 1627
Gurney, T. R. : Improvement of the Fatigue Strength of Notched Specimens by Artificially Induced Residual Stresses, 883
Gurpide, E. Gambetta, and others : Incorporation of 5-Iodouracil labelled with Iodine-131 into the Deoxyribonucleic Acid of Human Leukamic Leucotytes following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131, 1686
Gurr, Edward : Methods of Analytical Histology and Histo-Chemistry, *review* by S. Bradbury, 211
Gustav VI Adolf of Sweden, H.M. King : Elected a Fellow of the Royal Society under the special Statute, 1571
Gustavson, Prof. K. H. : *Obituary* of Prof. Erik Hägglund, 1228
Guthrie, Dr. Douglas : Joachim Junge (1587-1657), a Forgotten Genius, 1435
Guthrie, Mary J., and Anderson, Prof. John M.: General Zoology, *review* by Dr. V. Fretter, 1290
Gutowsky, H. S. (and seventeen other authors) : Nuclear Magnetic Resonance, *review* by R. E. Richards, 969
Guttmann, S., and others : Effect of Monofluorosulphonate, Difluorophosphate and Fluoroborate Ions on the Iodine Uptake of the Thyroid Gland, 1517
Guttridge, C. G., and Thompson, P.A. : Effect of Gibberellic Acid on Length and Number of Epidermal Cells in Petioles of Strawberry, 197
Gyllenstein, Lars : Oxygen Exposure and Brain Damage, 1068

HAAR, Dr. D. ter : Problems of Collective Motion in Physics, 867
Haber, Alan, H., and Brassington, Nancy : Non-respiratory Gas released from Seeds during Moistening, 619
Habitat of the Harpacticoid Copepod *Elaphoidella gracilis* (Sars) : Haemoglobin and the (J. Green), 1834
Habits (Smoking) : The Reliability of Statements about (G. F. Todd and J. T. Laws), (Tobacco Manufacturers Standing Committee Research Paper No. 2), 932
Haddow, Prof. Alex. : *Obituary* of Dr. Jesse P. Greenstein, 1776
Hadfield (Sir Robert) Medal for 1959 of the Iron and Steel Institute awarded to Albert Jackson, 930
Haemagglutinability (Viral), of Red Cells of the Mouse after Treatment with Formalin : Increase of (B. Fauconnier and D. Barua), 629
Haemagglutinating Substance (A New), in the Gm System, Anti-Gm (Dr. Morten Harboe), 1468
Haemagglutination (Viral), of Red Cells : Impairment of, after Treatment with Formalin (F. E. Buckland), 1276
Haematin *a* : Incorporation of Radioactive Iron into (Prof. R. Lemberg and A. Benson), 678
Haematin Enzymes (International Union of Biochemistry Symposium on), 1571
Haematology (Dr. A. A. Sharp), 1372
Haematology (Clinical), in Medical Practice (Dr. G. C. de Gruchy), *review* by Dr. R. Biggs, 1151
Haematobus ostralegus (Oystercatcher), Feeding of the, on the Edible Mussel (*Mytilus edulis*) in the Estuary of the River Conway (R. E. Drinnan), 153
Haemoglobin : A Toad (*Xenopus laevis*) without (Prof. D. W. Ewer), 271
Haemoglobin of New-born Infants in Indonesia (Dr. Lie-Injo Luan Eng), 1125
Haemoglobin C : The River Niger as a Barrier in the Spread Eastwards of—a Survey of Haemoglobins in the Ibo (Dr. H. Lehmann and Dr. C. Nwokolo), 1587
Haemoglobin *N* in Portuguese Guinea (Prof. Carlos Trincão, L. T. de Almeida Franco and A. R. Nogueira), 193
Haemoglobin (Human) : Constituents of—Separation of the Peptide Chains of Human Globin (Dr. V. M. Ingram), 1795 ; Comparison of Normal Adult Human Haemoglobin with Haemoglobin I by 'Fingerprinting' (Makio Murayama and Dr. V. M. Ingram), 1798 ; Formation of Normal and Doubly Abnormal Haemoglobins by Recombination of Haemoglobin I with S and C (Dr. Harvey A. Itano and Elizabeth Robinson), 1799
Haemoglobin (Human), in Strong Salt Solutions : Oxygen Equilibrium of (Prof. A. Rossi-Fanelli, E. Antonino and A. Caputo), 827
Haemoglobin (Human Foetal) : New Variant of (Dr. Phaedon Fessas, N. Mastrokalos and G. Fostiropoulos), 30 ; (Dr. F. Vella, Dr. J. A. M. Ager and Dr. H. Lehmann), 31
Haemoglobin (Normal Adult Human) : Comparison of, with Haemoglobin I by 'Fingerprinting' (Constituents of Human Haemoglobin), (Makio Murayama and Dr. V. M. Ingram), 1798
Haemoglobin Content of Red Cell 'Ghosts' : Preparation and the (Helen M. Anderson and Dr. Joseph C. Turner), 112
Haemoglobin Fraction : Co-existence of the Embryonic (Third Normal), with Erythroblastosis in the Blood of Two Full-term Newborn Babies with Multiple Malformations (Prof. I. Halbrecht, Ch. Klibanski and F. Bar Ilan), 327
Haemoglobin and 'Apparent Protein' in the Human Red Cell (Dr. Eric Ponder), 1330
Haemoglobin and the Habitat of the Harpacticoid Copepod *Elaphoidella gracilis* (Sars), (J. Green), 1834
Haemoglobin I : Comparison of Normal Adult Human Haemoglobin with, by 'Fingerprinting' (Constituents of Human Haemoglobin), (Makio Murayama and Dr. V. M. Ingram), 1798
Haemoglobin I with S and C : Formation of Normal and Doubly Abnormal Haemoglobins by Recombination of (Constituents of Human Haemoglobin), (Dr. Harvey A. Itano and Elizabeth Robinson), 1799
Haemoglobin and Myoglobin : The Iron–Protein Link in (Dr. J. E. O'Hagan), 393
Haemoglobins : Molecular Adaptation in—Nature of the Bohr Effect (Austen Riggs), 1037
Haemoglobins in the Ibo : The River Niger as a Barrier in the Spread Eastwards of Haemoglobin C—a Survey of (Dr. H. Lehmann and Dr. C. Nwokolo), 1587
Haemoglobins (Human) : Identity of the α-Chains of Adult and Foetal (J. A. Hunt), 1373
Haemoglobins (Normal and Doubly Abnormal) : Formation of, by Recombination of Haemoglobin I with S and C (Constituents of Human Haemoglobin), (Dr. Harvey A. Itano and Elizabeth Robinson), 1799
Haemolysates (Red Cell) : Demonstration of Small Components in, by Starch-gel Electrophoresis (Dr. Phaedon Fessas and N. Mastrokalos), 1261
Haemolysin and Complement-fixing Activities : Comparison of the Formation of the Complex, Sensitized Erythrocyte-Complement ($EAC'_{1,4,2}$) in Haemolytic Systems differing in their (Dr. Harold S. Goodman), 331
Haemolytic Systems differing in their Haemolysin and Complement-fixing Activities : Comparison of the Formation of the Complex, Sensitized Erythrocyte-Complement ($EAC'_{1,4,2}$) in (Dr. Harold S. Goodman), 331
Haemonchus contortus : Antigenic Stimulus of Exsheathing Fluid in Self-Cure of Sheep infected with (E. J. L. Soulsby, R. I. Sommerville and D. F. Stewart), 553
  Electrophoretic Patterns of the Serum Proteins of Sheep infected with (D. L. Mould and Dr. Paul H. Silverman), 1735
Haemonchus contortus and *Ostertagi* spp. : *In vitro* Cultivation of the Histotrophic Stages of (Dr. Paul H. Silverman), 197
Haffkine Institute, Bombay—Diamond Jubilee (Dr. W. R. Bett), 725
Hägglund, Prof. Erik : *Obituary* by Prof. K. H. Gustavson, 1228
Hagihara, Hitosi, and others : Use of Synthetic Quartz Crystals as a Support for Specimens in Powder Photographs, 1666
Hahn, E. L. (Das, T. P., and) : Nuclear Quadrupole Resonance Spectroscopy, *review* by Dr. R. H. Tredgold, 1078
Hahn, Dr. F. H. : Title of reader in mathematical economics in the University of Birmingham conferred on, 153
Haidar, H. E. Selim : The Role of the Scholar in Society, 1773
Haigh, Dr. A. L. : Appointed lecturer in physiology at the University of Birmingham, 438
Haigh, Dr. C. P. : Nuclear Fuel Cycles (On-load Refuelling), 1648
Hailsham, Lord : To open the new Warren Spring Laboratory at Stevenage of the Department of Scientific and Industrial Research, 722
Haining, C. G., and others : Neuromuscular Blocking Agents of Short Duration, 542
Hair : Effect of Chloral Hydrate on Growth of (Prof. J. Randolph Murray), 984
  Mammalian, *review* by Dr. F. W. Dry, 851
Hair of Guinea Pigs : Presence of Griseofulvin in, after Oral Administration (J. C. Gentles, M. J. Barnes and K. H. Fantes), 256
Hair in the House Mouse (*Mus musculus*): Effect of a Sympathomimetic Agent (Methoxamine Hydrochloride) on Growth of (F. Cockrem), 614
Hair as a Substrate for Non-Keratinolytic Fungi (Dr. D. M. Griffin), 1281
Hair Growth : The Biology of (edited by William Montagna and Richard A. Ellis), *review* by Dr. F. W. Dry, 851
Hair Plates on the First Cervical Sclerites of the Orthoptera (Hair Receptors in Locusts), (Dr. L. J. Goodman), 1106
Hair Receptors in Locusts—Hair Plates on the First Cervical Sclerites of the Orthoptera (Dr. L. J. Goodman), 1106 ; Function of certain Prothoracic Hair Receptors in the Desert Locust (Dr. P. T. Haskell), 1107
Hake Fishery : Relationship between the, and a Southerly Sub-Surface Return Flow below the Peru Current off the Chilean Coast (Dr. Wilhelm Brandhorst), 1832
Hakim, Prof. Anwar A. : Synthetic Activity of Polynucleotide Phosphorylase from Sperm, 334
Halbrecht, Prof. I., and others : Co-existence of the Embryonic (Third Normal) Haemoglobin Fraction with Erythroblastosis in the Blood of Two Full-term New-born Babies with Multiple Malformations, 327

Haldane, Prof. J. B. S. : The Theory of Natural Selection Today, 710
Haldane Society, and others : Debate on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than in the Humanities', 510, 1235
Hall, Sir Arnold : Appointed to the Board of the College of Technologists, 1500
Hall, A. J. C., and Hayes, J. C. : The 'Interstitial Graticule' Process, 223
Hall, Dr. A. R. : The Psychopathology of Science, *review*, 1419
Hall, Dr. A. R., and others (edited by) : A History of Technology, Vol. 4, The Industrial Revolution, *review* by G. B. L. Wilson, 70
Hall, Dr. G. G. : Chemistry and Quantum Chemistry, 158
Hall, G. R. : Radioactive Elements, *review*, 962
Hall, M. P. : Social Policies and Social Change, *review*, 1147
Hall, Trevor H. (Dingwall, Dr. Eric J., and) : Four Modern Ghosts, *review* by Dr. D. J. West, 351
Hall, W. B. : Reactor Heat Transfer, *review* by R. Vaux, 1149
Hall, Dr. W. J. : African Aphids, *review*, 208
    Obituary of Sir Guy Marshall, 1364
Hallett, Prof. H. F. : Benedict de Spinoza, the Elements of his Philosophy, *review* by Dr. Peter Nidditch, 964
Hally, A. D. : Functional Changes in the Vacuole-containing Bodies of the Gastric Parietal Cell, 408
Halpern, Dr. B. N., and Binaghi, R. : Selective Permeability of Living Tissues to Carbonic Acid, 1397
Halstead, Bruce W. : Appointed director of the World Life Research Institute, 793
Halvorson, Harlyn (Church, Brooks D., and) : Dependence of the Heat Resistance of Bacterial Endospores on their Dipicolinic Acid Content, 124
Ham, A. W., and others : A Cytopathogenic Agent from a Mammary Tumour in a *C3H* Mouse that produces Tumours in Swiss Mice and Hamsters, 1535
Hamamura, Dr. Yasuji : Food Selection by Silkworm Larvae, 1746
Hamburger, H. J. (1859-1924), 648

Hanson, K. : Antarctic Meteorology, 1503
Hanson, Robert P., and others (edited by) : Symposium on Latency and Masking in Viral and Rickettsial Infections—the Proceedings of a Conference held at the University of Wisconsin Medical School, 1957, *review* by Dr. Kenneth M. Smith, 71
Hanson, William : *Obituary* by N. B. Marshall, 1715
Hanström, Bertil : Zoological Papers in honour of his sixty-fifth Birthday (edited by Karl Georg Wingstrand), *review* by N. B. Marshall, 1767
Haptoglobin Synthesis (Human): Genetic Control of (Dr. A. C. Allison), 1312
Haptoglobin Types in American Negroes (Dr. Eloise R. Giblett), 192
Haptoglobins in Native Venezuelans : Distribution of (Dr. M. L. Gallango de Rodríguez and Dr. Tulio Arends), 1465
Hara, Dr. Noboru : Marginal Growth of Leaves, 1409
Harboe, Dr. Morten : A New Haemagglutinating Substance in the Gm System, Anti-Gm, 1468
Hardangerfjord, Western Norway : Pogonophora in the (Prof. Hans Brattström), 1458
Hardened Portland Cement during Testing : Errors caused by Partial Drying of (Dr. K. M. Alexander), 885
Harding, J. P. : The Genus *Daphnia*, 93
Hargreaves, G. B., and Peacock, R. D. : Co-ordination Chemistry (Complex Fluorides of Molybdenum and Tungsten and Rhenium), 1785
Harkness, Margaret L. R., and Harkness, R. D. : Effect of Enzymes on Mechanical Properties of Tissues, 1821
Harkness, R. D. (Harkness, Margaret L. R., and) : Effect of Enzymes on Mechanical Properties of Tissues, 1821
Harkness Fellowships of the Commonwealth Fund : Awards for 1959, 1093
Harley, Sir Stanley: Appointed to the Board of the College of Technologists, 1500
Harmolita hyalipenne Walker : Facultative Parasitism and Dietary Change in (R. Bailey), 341
Harmonious Herpetology, *review* by A. G. C. Grandison, 958
Harpacticoid Copepod *Elaphoidella gracilis* (Sars) : Haemoglobin and the Habitat of the (J. Green), 1834
Harper, Prof. A. A. : Elected a Fellow of the Royal Society of Edinburgh, 719
Harper, Francis (edited by) : The Travels of William Bartram, naturalist's edition, *review* by Dr. L. Harrison Matthews, 1006
Harper, K. H., and Calcutt, G. : Glucuronide and Sulphate Conjugation *in vivo* and *in vitro*, 463
Harper, T. A. : A Rapid Micro-quantitative Method for estimating Serum Calcium, 232
Harposporium anguillulae Lohde in its Nematode Host : Freeze-drying of (William A. Feder and Dr. C. L. Duddington), 767
Harrar, Dr. J. George : Elected vice-president of the Rockefeller Foundation, 1018 ; work of, 1018
Harrington, Dr. J. B. : Wheat Genetics, 26
Harris, Colin : Correlation of Sedimentation-Rates by Dimensionless Groups, 530
Harris, Elaine, and Kay, Dr. H. F. : Size Distribution of Tobacco Smoke Particles, 741
Harris, Dr. H., and Whittaker, Mary : Differential Response of Human Serum Cholinesterase Types to an Inhibitor in Potato, 1808
Harris, L. E. : *Obituary* by A. Stowers, 1639
Harris, P. H., and others : Sealing of Aluminium Oxide Anodic Films, 39
Harris, Prof. Robert S., and others (edited by) : Vitamins and Hormones—Advances in Research and Applications, Vol. 15, *review* by Prof. F. G. Young, 568 ; Vol. 16, *review* by Prof. F. G. Young, 778
Harris, Prof. Tom M. : Plant Ecology of Ancient Periods, 1370
Harris (South), Outer Hebrides : Niobium–Zirconium–Thorium–Uranium and Rare-Earth Minerals from the Pegmatities of (Dr. O. von Knorring and R. Dearnley), 255
Harrison, Prof. J. Heslop : Experimental Approaches to the Problems of Growth and Form in Plants (Action of Growth Substances in Flower Morphogenesis), 585
Harrison, J. R. : Nuclear Reactor Shielding, *review* by R. Vaux, 1149
Harrison, Dr. J. Heslop, and Woods, I. : Experimental Approaches to the Problems of Growth and Form in Plants (Temperature-induced Meristic and other variation in *Cannabis*), 585
Harrisson, Tom, and Medway, Lord : 'Bat Erosion' at Niah Great Caves, 971
Harrow, Prof. Benjamin, and Mazur, Prof. Abraham : Textbook of Biochemistry, seventh edition, *review* by Prof. F. G. Young, 967
Hartshorne, Dr. N. H. : Awarded a research grant by the Leverhulme Trust, 1499
Harvested Cells (Freshly), of a Brewer's Yeast : Endogenous Metabolism of (V. E. Chester), 902
Harvey, C. O. : Awarded a moiety of the Lyell Fund for 1959 of the Geological Society, 364
Harvey, William : De Motu Locali Animalium, 1627 (edited, translated and introduced by Dr. Gweneth Whitteridge), *review* by Prof. K. J. Franklin, 1486
Harvey on Movement in Animals, *review* by Prof. K. J. Franklin, 1496
Harwell Reactor School : Second Course on the Control and Instrumentation of Reactors, 153
    Course for Senior Technical Executives in Industry, 224
    Courses, 1643
Has Water a Specific Taste ? (Prof. Yngve Zotterman and Herman Diamant), 191
Hašek, Dr. Milan, and others : Acquired Immunological Tolerance of Heterografts, 1199
Hashimoto, Dr. H., and Yotsumoto, Dr. H. : Spacing Anomaly in Electron Microscope Images of Crystal Lattices, 1001
Haskell, Dr. P. T. : Hair Receptors in Locusts—Function of certain Prothoracic Hair Receptors in the Desert Locust, 1107
Haslam, C. G. T., and others : A High-resolution Survey of the Andromeda Nebula at 408 Mc./s., 1250
    A High-Resolution Survey of the Coma Cluster of Galaxies at 408 Mc./s., 1663
Haszeldine, Prof. R. N. : Organic Fluorine Chemistry, *review*, 139
Hatfield, Dolph, and others : Characterization of a Second Yellow Compound from *Drosophila melanogaster*, 1269
Hatfield, Dr. H. Stafford : *Obituary* of Dr. Eric Berkeley Higgins, 1565
Hathaway, B. J. : Co-ordination Chemistry (Properties of Copper Perchlorates), 1785
Hatherton, Dr. T., and Orr, R. H. : Microseisms at Scott Base, 1760
Hathorn, Michael (Gillman, Prof. Theodore, and) : Sex Incidence of Vascular Lesions in Ageing Rats in relation to Previous Pregnancies, 1139
Hathway, Dr. D. E. : Chemistry of Condensed Tannins (Oxidative Polymerization Mechanisms for Catechins), 1168
Hattori, Prof. S., and Komamine, Dr. A. : Stizolobic Acid, a New Amino-Acid in *Stizolobium hassjoo*, 1116
Hausaland Erg (A. T. Grove), 1642
Hawkes, Prof. L. : The Earliest Geological Treatise, *review*, 1487
Hawkins, T. H. : The Dawn of Life, *review*, 966
    Developments in Adult Education, *review*, 1419
    Looking and Finding, *review*, 1557
Haworth, Prof. R. D. : Chemistry of Condensed Tannins, 1168
Haydon, Dr. D. A. : Electrical Double Layer in Colloid Science (Interface between Petroleum Ether and Solutions of Sodium Dodecyl Sulphate and Dodecyl Trimethylammonium Bromide in Water), 78
Haydon, Dr. D. A. (Kitchener, Dr. J. A., and) : Electrical Double Layer in Colloid Science, 78
Hayes, Prof. F. R. : Appointed director of the Institute of Oceanography, Dalhousie University, Halifax, Nova Scotia, 1161 ; work of, 1161
    Appointed a member of the National Research Council of Canada, 1161
Hayes, J. C. (Hall, A. J. C., and) : The 'Interstitial Graticule' Process, 223
Hayes, J. Desmond : Varietal Resistance to Spray Damage in Barley, 551
Hayward, B., and others : Immunological Aspects of Allergic Disorders (Immunochemistry of *Cladosporium*), 297
Haywood, B. C., and others : Conductivity induced by Radiation in Polycrystalline Cadmium Sulphide and Polyethylene, 1112
Haywood, R. W. : Available Energy in Thermodynamics, *review*, 353
Hazlett, Dr. Barbara, and others : Activity of 10-Hydroxydecenoic Acid from Royal Jelly against Experimental Leukaemia and Ascitic Tumours, 1270
Hazor I, an Account of the First Season of Excavations, 1955 (Yigael Yadin, Yohanan Aharoni, Ruth Amiran, Trude Dothan, Immanuel Dunayevsky and Jean Perrot), (The James A. De Rothschild Expedition at Hazor), *review* by Peter J. Parr, 951
Head, Dr. M. J. : Bloat in Cattle, 757
    Function of the Rumen (Utilization of Protein by the Dairy Cow), 1644
Health, United States National Institutes of (Endocrinology Study Section) : Supplies of Follicle-stimulating Hormone, 865
Health, United States National Institutes of (New York Academy of Sciences and the) : Papers presented at the Conference on the Genetic Concept for the Origin of Cancer (Annals of the New York Academy of Sciences, Vol. 71), 1234
Health (Industrial) : Annual Report of the Chief Inspector of Factories on, for the Year 1957 (Ministry of Labour and National Service), 867
Health and Disease : Phenolics in Plants in (Plant Phenolics Group Symposium on), 510

Health Physics in Atomic Installations : The Scientific and Technical Aspects of (European Nuclear Energy Agency and the Danish Atomic Energy Commission Symposium on), 934
Hearnshaw, Prof. L. S. : Philosophical Psychology, *review*, 567
Heart of the Glam : Effect of Brain Ganglioside on the (Dr. Samuel Bogoch and Elenore S. Bogoch), 53
Heart Muscle : Excitation–Contraction Coupling in (Prof. H. Reichel and A. Bleichert), 826
Heart Muscle (Pig) : Glutamic-Aspartic Transaminase of (B. E. C. Banks, K. G. Oldham, E. M. Thain and C. A. Vernon), 1187
Heat-Flow Values from the South-Eastern Pacific (Dr. R. Von Herzen), 882
Heat Resistance of Bacterial Endospores : Dependence of the, on their Dipicolinic Acid Content (Brooks D. Church and Harlyn Halvorson), 124
Heat Transfer : Reactor (W. B. Hall), *review* by R. Vaux, 1149
Heat-inactivated Poxviruses : Reactivation of—a General Phenomenon which includes the Fibroma–Myxoma Virus Transformation of Berry and Dedrick (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340
Heat and Loss of Moisture : Effects of, on the Dormancy of Wheat, and some Interactions with 'Mergamma *D*' /(P. D. Hewett), 1600
Heath, Prof. O. V. S., and Clark, J. E. : Metal-Chelating Properties o Plant-Growth Substances, 1167
Heaviside Manuscripts, 578
Heavy Hydrogen : Fusion of (Dr. T. E. Allibone), 569
Heavy Minerals in certain Old Red Sandstone and Silurian Limestones of Monmouth (C. B. Crampton), 485
Heavy Water : Effect of, on the Growth of *Chorella vulgaris* (Janet R. Walker and P. J. Syrett), 1193
Hebrides (Outer) : Niobium–Zirconium–Thorium–Uranium and Rare-Earth Minerals from the Pegmatites of South Harris (Dr. O. von Knorring and R. Dearnley), 255
Hedberg, Prof. K. : Chemistry and Quantum Chemistry, 158
Hedrick, Prof. Leslie R. (Chesbro, William R., and) : Role of Lysine in catalysing Ester Hydrolysis, 994
Heifers (Dairy) : Effect of Clipping the Coat on the Thermoregulatory Reactions of (H. Berman and H. H. Kibler), 606
Heights between 200 km. and 400 km. : Density of the Atmosphere at, from Analysis of Artificial Satellite Orbits (D. G. King-Hele), 1224
Heise, E., and others : Influence of L-3', 5,3-Triiodothyronine on the Oxidative Phosphorylation of Tumour Mitochondria, 1534
Heisenberg, Prof. Werner : The Physicist's Conception of Nature, *review* by Prof. W. H. McCrea, 1218
Heisler, L. H. : Occurrence of Giant Travelling Ionosphere Disturbances at Night, 383
Heisler, L. H. (Munro, G. H., and) : Recording Radio Signals from Earth Satellites, 809
α-Helices and a New Polypeptide Fold in Poly-β-Benzyl-L-Aspartate (E. M. Bradbury, L. Brown, A. R. Downie, Dr. A. Elliott, W. E. Hanby and T. R. R. McDonald), 1736
Heliotrine in *Drosophila* : Mutagenic Activity of the Alkaloid (Dr. A. M. Clark), 731
Helium : The λ-Transition in (Dr. C. G. Kuper), 1544
Helium Films : Bose—Einstein Statistics and (A. D. Singh and R. K. Pathria), 668
Heller, Prof. J., and others : Activation of Amino-Acids in relation to the Synthesis of Silk Proteins, 397
Heller, Dr. John H., and Teixeira-Pinto, Dr. A. A. : A New Physical Method of Creating Chromosomal Aberrations, 905
Hellern, Bernhard : Elected a Fellow of the International Academy of Management, 1719
Helminthum : Systema (Prof. Satyu Yamaguti), Vol. I, The Digenetic Trematodes of Vertebrates, *review* by Dr. Ben Dawes, 957
Hemisphere (Northern) : Observations of the Lithium Lines in the Twilight Airglow in the (Prof. A. Vallance Jones), 1315
Hemophilia and Hemophilioid Diseases—International Symposium (edited by Prof. Kenneth M. Brinkhous), *review* by Prof. J. V. Dacie, 1221
Hemophilioid Diseases : Hemophilia and—International Symposium (edited by Prof. Kenneth M. Brinkhous), *review* by Prof. J. V. Dacie, 1221
Hen : Phosvitin in the Serum of the (Prof. R. H. Common and Chi-Ching Mok), 1811
Henbest, Prof. H. B. (Dart, M. C., and) : Effect of Alkali Salts on the Steric Course of Hydrogenation of a Cyclic Allylic Alcohol, 817
Henderson, Dr. D. W. W. : Elected a Fellow of the Royal Society, 860
Henderson, Dr. John : *Obituary* by Dr. J. Marwick, 1497
Henderson, J. G. : Magnetic Amplifiers, *review*, 1627
Henkel, D. J. (Bishop, Dr. Alan W., and) : The Measurement of Soil Properties in the Triaxial Test, *review* by Thomas Whitaker, 1151
Hennessey, Dennis : Appointed deputy managing director of the National Research Development Corporation, 862
Henningson, R. W. : Biochemical Differentiation of Group *A* and 'Human *C*' *Streptococci*, 182
Henriksson, H. O. (Lüning, Prof. K. G., and) : Recoverable Lethal Mutations in *Drosophila* Sperm, 1211
Henriques, Dr. Olga B., and others : Blood-clotting Activity of the Venom of *Bothrops jararaca*, 114
Henriques, Dr. S. B., and others : Blood-clotting Activity of the Venom of *Bothrops jararaca*, 114
Henry, Prof. A. W. (Ward, E. W. B., and) : Differential Reaction of Saprophytic and Parasitic Soil-inhabiting Fungi to Indoleacetic Acid, 1064
Henry, Dr. D. C. : Electrical Double Layer in Colloid Science (Measurements of Surface Conductivity), 79
Hensler, J. R. : Synthesis of Colour Centres in Silica and their Thermoluminescence, 672, *erratum*, 1434
Henstell, Dr. Henry H., and Kligerman, Miriam : Hyperglobulinaemic Thrombo-Haemorrhagic Diathesis, 978
Heparin and Thromboplastin Generation in the Horse (Dr. R. K. Archer and P. Flute), 235
Hepatic Damage due to Acute Biliary Obstruction : Determination of Transaminase Activity in Dogs' Serum and Lymph after (Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 48
Hepatitis (Experimental Mouse): Effect of Dietary Protein on the Severity of (Dr. Boris Ruebner and James L. Bramhall), 609
Hepatitis (Mouse) : Complement Fixation with the Tissue Culture and and Liver Antigens of (Dr. Theodore J. Star and Dr. Morris Pollard), 1690
Hepatotoxin from *Sporidesmium bakeri* capable of producing Facial Eczema Diseases in Sheep (Dr. R. H. Thornton and J. C. Percival), 63
Hepple, Shirley (Doling, D. A., and) : 'Karathane'—the Value of its Differential Fungicidal Effect in relation to Mildew and Yellow Rust of Wheat, 622
Herbert, E. Le Q. : Elected president of the Royal Institute of Chemistry, 1234
Herbert, J. D., and others : Some Experiments with an Electrodeless Discharge, 1665
Hercock, R. J. : Industrial Photographic and Television Exhibition, 1721
Herd of Pigs fed Standard Rations in the Tropics : A Possible Vitamin E Deficiency occurring in a (W. J. A. Payne), 828
Hereditary Galactosaemia : Detection of Carriers in (Dr. Herman M. Kalckar), 1266
Heredity : Variation and (Dr. H. Kalmus), *review* by Dr. C. E. Ford, 1354
Herefordshire : An 'Australopithecine' Scoop from (Prof. Raymond A. Dart), 844
Heremans, Dr. J. F., and others : Acid Mucopolysaccharides of Normal Urine, 1606
Heremans, M. Th., and others : Acid Mucopolysaccharides of Normal Urine, 1606
HERO (Hot Experimental Reactor of Zero Power) to be built at Windscale, 508
Herpetology : Harmonius, *review* by A. G. C. Grandison, 958
Herskovits, Prof. M. J. : Elected a member of the United States National Academy of Sciences, 1575
Herxheimer, Dr. A., and Schachter, Dr. M. : Weal and Flare in Human Skin produced by Histamine and other Substances, 1510
Herzberg, Dr. G., and Shoosmith, J. : Spectrum and Structure of the Free Methylene Radical, 1801
Herzenberg, A. : Geomagnetic Dynamos, 937
Herzog, S., and co-workers : Co-ordination Chemistry (Dipyridyl Complexes of Metals in Abnormally Low Valencies), 1785
Heselton, G. M. : Appointed secretary of the Operational Research Society, 794
Hess, Dr. R., and Pearse, Dr. A. G. E. : Labelling of Proteins with Cellulose-reactive Dyes, 260
Heterocyclic Systems : Intramolecular Hydrogen Bonding in (E. W. Gill and E. D. Morgan), 248
Heterodera rostochiensis Wollenweber : Chromosome Number of the Potato Root Eelworm (J. Cotten), 128
Heterodera schachtii Schmidt (Beet Eelworm) : Testing Populations of, for Resistance-breaking Biotypes, using the Wild Beet (*Beta patellaris* Moq.) as Indicator (Audrey M. Shepherd), 1141
Heterogeneity in Deoxyribonucleic Acids—1, Dependence on Composition of the Configurational Stability of Deoxyribonucleic Acids (Dr. Julius Marmur and Prof. Paul Doty), 1427 ; 2, Dependence on the Density of Deoxyribonucleic Acids on Guanine–Cytosine Content (Dr. Noboru Sueoka, Dr. Julius Marmur and Prof. Paul Doty), 1429
Heterogeneity (Biochemical), of the Ribonucleic Acid synthesized by *Escherichia coli B* after Irradiation with Ultra-violet Light (Kenshi Suzuki and Jóji Ono), 395
Heterogeneity (Electrophoretic), of Trypsin (J. C. Perrone, L. V. Disitzer and G. Domont), 605
Heterogeneous Atomization of Hydrogen and Oxygen (Dr. D. Brennan and P. C. Fletcher), 249
Heterografts : Acquired Immunological Tolerance of (Dr. Milan Hašek, Tomáš Hraba and Jan Hort), 1199
Heterozygous Carriers : Detection of, in Glycogen Storage Disease of the Liver (von Gierke's Disease), (Dr. David Yi-Yung Hsia and Eva Gawronska Kot), 1331
Hewett, P. D. : Effects of Heat and Loss of Moisture on the Dormancy of Wheat, and some Interactions with 'Mergamma *D*', 1600
Hewitt, Dr. E. J. : Inorganic Micronutrients in Physiology and Agriculture, *review*, 1009
Hewitt, Dr. E. J., and Afridi, M. M. R. K. : Adaptive Synthesis of Nitrate Reductase in Higher Plants, 57
Hewitt, Dr. H. B., and Wilson, C. W. : A Survival Curve for Mammalian Cells irradiated *in vivo*, 1060
Hexamethonium, Ethyl Flavone-7-Oxyacetate and other Compounds : Inhibition of sensitiveness to Nicotine of Rabbit Aorta by Reserpine, (Dr. I. Setnikar and M. Ravasi), 898
Hexane : Reduction of Menadione in, by Chlorophyll *a* under Ultra-Violet Irradiation (Rudolph J. Marcus and Lloyd K. Moss), 990
n-Hexane : Electric Strength and High-Field Conduction Current in (A. M. Sletten), 311
Hexokinase (Liver) Activity in Rats adapted to Intermittent Starvation (Dr. R. Petrásek), 329
Hexosamine : Influence of Vitamin D on Synthesis of, by Rachitic Rat Cartilage (P. K. Dikshit), 334
Hexosamine Sulphates : Chemical Synthesis of Hexose and (Dr. A. G. Lloyd), 109
Hexose and Hexosamine Sulphates : Chemical Synthesis of (Dr. A. G. Lloyd), 109
Hey, Dr. J. S. : Awarded the Eddington Medal of the Royal Astronomical Society, 151
Heyen, C. F. A. (van der Veen, Dr. J., and) : Lens Cells of the Calf in Continuous Culture, 1137
Heylen, Dr. A. E. D. : Townsend's First Ionization Coefficient in Pure Nitrogen, 1545
Heylen, Dr. A. E. D., and Lewis, Dr. T. J. : Gas Discharges (Theoretical Calculations of α for Argon, Helium and Neon), 93
Heynes, William Munger, and Smith, Sir F. Ewart : Awarded jointly the James Clayton Prize for 1958 of the Institution of Mechanical Engineers, 865
Heywood, Dr. V. H. : The Presentation of Taxonomic Information—a Short Guide for Contributors to Flora Europaea, 721
Hick, Dr. W. E. : Parapsychology, 229
Hickinbottom, Dr. W. J. : *Obituary* of Dr. H. D. K. Drew, 718
Hickling, Dr. C. F. : The Fish Culture Research Station, Malacca, 287
Hickman, C. G., and others : Serum Transferrins, 1589
Higbee, Prof. Edward : American Agriculture, *review* by Prof. A. N. Duckham, 423
Higgins, Dr. Eric Berkeley : *Obituary* by Dr. H. Stafford Hatfield, 1565
Higginson, Dr. G. S. : Appointed to a supernumerary lectureship in physics at Queen's University, Belfast, 86

High-Altitude Explosions : Geophysical Effects associated with (Dr. P. J. Kellogg, Prof. E. P. Ney and Prof. J. R. Winckler), 358
High-Altitude Geophysical Experiments : Argus (Dr. Alan T. Waterman and Dr. Detlev W. Bronk), 1019
High-Altitude Nuclear Explosions : Geophysical Effects of (T. Obayashi, S. C. Coroniti and E. T. Pierce), 1476
High Energy Accelerators and Instrumentation (C.E.R.N. International Conference on), 1783
High-Energy Radiation : Estimation of Chain Fracture during the Cross-linking of Rubber Hydrocarbons by (Dr. L. Mullins and Dr. D. T. Turner), 1547
High-Field Conduction Current in *n*-Hexane : Electric Strength and (A. M. Sletten), 311
High-Flux Reactor : Neutron Diffraction at a (Dr. G. E. Bacon and R. F. Dyer), 35
High Latitudes : Low-Energy Corpuscular Radiation at (K. D. Cole), 738
High Oxygen Pressure : Effect of, on the Protective Action of Cystamine and 5-Hydroxytryptamine in Irradiated Rats (H. A. S. van den Brenk and Ruth Moore), 1530
High Polymer Forum : Ninth Canadian (National Research Council of Canada, in co-operation with the Chemical Institute of Canada), 1643
High Polymers : Direct Examination of the Degradation of, by Gas Chromatography (Dr. R. S. Lehrle and Prof. J. C. Robb), 1671
  Physical Chemistry of (Dr. Maurice L. Huggins), *review* by Prof. C. E. H. Bawn, 637
High Polymers (Natural and Synthetic) : The Effects of Ionizing Radiation on (Dr. Frank A. Bovey), *review* by Prof. C. E. H. Bawn, 637
High-Resolution Survey of the Andromeda Nebula at 408 Mc./s. (Dr. M. I. Large, D. S. Mathewson and C. G. T. Haslam), 1250
High-Resolution Survey of the Coma Cluster of Galaxies at 408 Mc./s. (Dr. M. I. Large, D. S. Mathewson and C. G. T. Haslam), 1663
High-Temperature Oxidation of Zinc Sulphide (Gordon S. G. Beveridge and Prof. Kenneth G. Denbigh), 106
High Temperatures : Structure of Anhydrous Sodium Soaps at (A. Skoulios and Dr. V. Luzzati), 1310
High Vacua : Current Developments in the Production of (Institute of Physics Symposium on), 368
Higher Analysis : Approximate Methods of (L. V. Kantorovich and V. I. Krylov), translated from the Russian by Curtis D. Benster, *review* by Prof. T. A. A. Broadbent, 1766
Higher Education in Nigeria : International Commission on, 1231
Higher Plants : Adaptive Synthesis of Nitrate Reductase in (Dr. E. J. Hewitt and M. M. R. K. Afridi), 57
Highly Fluorinated *Cyclo*hexadienes : Thermal Reactions of (B. Gething, Dr. C. R. Patrick and Prof. J. C. Tatlow, and Dr. R. E. Banks, Dr. A. K. Barbour and A. E. Tipping), 586
Hildred, Sir William : Honorary Companionship of the Royal Aeronautical Society conferred on, 1648
Hilger and Watts, Ltd. : Digitizers and other Equipment for Data Processing, 651
Hill, D. H. : Appointed resident nuclear energy attaché to the United Kingdom Government's representative to the European Atomic Energy Community (Euratom) in Brussels, 1640
Hill, D. L., and others : Electrolytic Deposition of Beryllium, 816
Hill, J. E. : The Cherry Kearton Animal Book, *review*, 1628
Hill, Dr. M. : Re-utilization of Lymphocyte Remnants by Reticular Cells, 1059
Hill, Dr. M., and others : Stress Activation of Adrenal Glomerulosa, 1819
Hill, M. B., and Webb, J. E. : The Ecology of Lagos Lagoon, 2, The Topography and Physical Conditions of Lagos Harbour and Lagos Lagoon ; 4, On the Reactions of *Branchiostoma nigeriense* Webb to its Environment, 295
Hill, jun., Rolla B., and others : Phagocytosis and Cell Division, 476
  Variability of Content of Deoxyribonucleic Acid in *L*-strain Fibroblasts, 1818
Hill Farming Research Organization : First Report (1954-58), 727
Hillarp, Prof. Nils-Åke, and others : A New Type of Chromaffin Cells, probably Storing Dopamine, 267
Hillis, W. E. : Chemistry of Condensed Tannins (Formation of Condensed Tannins in Plants), 1169
Hills, Dr. G. J. : Electrical Double Layer in Colloid Science (Electrical Conductivity and Electro-osmotic Water Transport), 80
Hills (Biligirirangan), Mysore State, India : Trap-Shotten Rock from the (Prof. C. S. Pichamuthu), 483
Hills (Jammu) : Glaciation in the (Prof. R. C. Mehdiratta), 255
Hills (Shropshire) : Protection of the, 932
Himmelweit, Dr. Hilde T., and others : Television and the Child, *review*, 780
Hinde, B. J. (Iyer, Dr. H. M., and) : Microseismic Research at the National Institute of Oceanography, 1558
Hinde, Dr. R. A. : A Study of Blackbirds, *review*, 1767
Hinde, Dr. R. M., and others : Sealing of Aluminium Oxide Anodic Films, 39
Hinshelwood, Sir Cyril : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1235
Hinton, Dr. H. E. : Origin of Indirect Flight Muscles in Primitive Flies, 557
Hippopotamus : Aqueous Humour of the (C. P. Luck and P. G. Wright), 1595
Hirsch, Frederick G., and others (edited by) : Aviation Medicine—Selected Reviews, *review*, 1291
Hirsch, Dr. P. B. : Precipitation in Alloys (Formation of Tetrahedral Stacking Faults in Gold), 797
Hirsch, Dr. P. B., and Whelan, Dr. M. J. : Interfacial Phenomena (Low-Energy Interfaces associated with Deformation Twins), 1098
Histaminase in Rats sensitized by *Bordetella pertussis* : Reduced Activity of (Makoto Niwa, Yutaka Yamadeya, Toshitaka Matsui and Prof. Yoshio Kuwajima), 755 ; (Toshitaka Matsui, Masayoshi Kishigami and Prof. Yoshio Kuwajima), 756
Histamine : Enzymatic N-Methylation of (Dr. Donald D. Brown, Dr. Julius Axelrod and Dr. Robert Tomchick), 680
Histamine Liberator 48/80 and Methotrimeprazine : Action of Ultra-violet Light on Skin—Effect of the (Prof. S. Claesson, G. Wettermark and L. Juhlin), 1451
Histamine Stress : Effect of Tranquillizing Agents on the Resistance of Rats to (Dr. Arthur M. Sackler, Dr. A. S. Weltman and Dr. Raymond R. Sackler), 896
Histamine and other Substances : Weal and Flare in Human Skin produced by (Dr. A. Herxheimer and Dr. M. Schachter), 1510
Histidine : Lack of Effect of, on Rabbit Atheromatosis (Dr. G. G. Pinter and Dr. D. B. Zilversmit), 1272
Histidine—Cu (II) Complexes : Multiplicity of (R. Leberman and Dr. B. R. Rabin), 746
Histochemical Changes in the Epiphyseal Cartilage during Rickets (Prof. J. T. Irving), 1734
Histochemical Demonstration of A and B Antigens in Platelets (Dr. B. D. Jankovič and K. Arsenijevič), 695
Histochemical Demonstration of Lipase and Alkaline Phosphatase Activity in the Fat Body of the Desert Locust (J. C. George and J. Eapen), 268
Histochemical Indicator of Nervous Activity : Neuronal Dye-Sorption as a (Prof. Roland Fischer and Prof. Wolfgang Zeman), 1337
Histo-Chemistry : Methods of Analytical Histology and (Edward Gurr), *review* by S. Bradbury, 211
Histology (Analytical), and Histo-Chemistry : Methods of (Edward Gurr), *review* by S. Bradbury, 211
Histolytic Activity in Seasonal Hypertrophy of the Reproductive Organs of *Hyla aurea* (Prof. L. R. Richardson), 480
Historic Aircraft : Register of, 580
History of the Calendar (Y. G. Perel), 509
History of Man's Changing Vision of the Universe : The Sleepwalkers—a (Arthur Koestler), *review* by Dr. A. R. Hall, 1419
History of Science : An Indian, *review* by Dr. F. R. Allchin, 1353
History of Technology (edited by Charles Singer, E. J. Holmyard, A. R. Hall and Trevor I. Williams, assisted by Y. Peel, J. R. Petty and M. Reeve), Vol. 4, The Industrial Revolution, *c.* 1750 to *c.* 1850, *review* by G. B. L. Wilson, 70
Histotrophic Stages of *Haemonchus contortus* and *Ostertagia* spp. : *In vitro* Cultivation of the (Dr. Paul H. Silverman), 197
Hjalmars, Dr. I. : Chemistry and Quantum Chemistry, 158
Hobhouse, Sir John : Appointed chairman of the Regional Museum Council, 437
Hobson, Dr. P. N., and others : A Relationship between some Bacteria, Protozoa and Diet in Early Weaned Calves, 624
Hobson, Dr. P. N., and Purdom, M. R. : A Gram-negative Sporing Bacterium from the Rumen, 904
Hock, A. A., and others : Co-ordination Chemistry (Determinations of the Crystal Structure of some Organo-transition Metal Complexes), 1785
Hodgson (J. E.) Prize of the Royal Aeronautical Society awarded to J. E. Allen, 1649
Hodgson, N., and others : Identification of 10-Hydroxy-Δ^2-decenoic Acid in Royal Jelly, 996
Hoffman, R. A. : Chemistry and Quantum Chemistry, 158
Hofman, Dr. Ed. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Hogan, T. W. : A Rapid Method for examining Diapause Embryos of *Acheta commodus* W., 269
Hogben, Prof. Lancelot : Darwinism and the Study of Society (Darwinism and Human Society in Retrospect), 1564
Holder, Dr. D. W. : Hypersonic Flow (Methods of Studying Experimentally some Problems of Hypersonic Flows), 1096
Holdsworth, Dr. E. S. (Fraser, Dr. M. J., and) : Vitamin B_{12} and Protein Biosynthesis—Vitamin B_{12} and Biosynthesis in Chick Liver, 519
Holland, G. S. : Awarded the Gill Memorial of the Royal Geographical Society, 292
Holliday, F. G. T., and others : 'Chloride-Secretary' Cells in the Gills of Teleosts, 1248
Hollingsworth, Prof. August B., and Redlich, Prof. Frederick B. : Social Class and Mental Illness, *review* by Dr. Clifford Allen, 354
Hollingworth, Prof. S. E. : Awarded the Murchison Medal for 1959 of the Geological Society, 364
Hollins, T. H. B. : Modern Mind, *review*, 953
Hollow-Cathode Emission of the AlO Spectrum (V. Wilson Goodlett and K. Keith Innes), 243
Holm, R. H. (Cotton, F. A., and) : Co-ordination Chemistry (Physical Properties and Relative Stabilities of the various types of Cobalt (II) Complex in Solution), 1784
Holmberg, Bo, and Sörbo, Bo : Protective Effect of β-Aminoethylthiosulphuric Acid against Ionizing Radiation, 832
Holmes, Prof. A. : Elected to Fellowship of the Imperial College of Science and Technology, 1161
Holmes, I. H., and others : Reactivation of Heat-inactivated Poxviruses—a General Phenomenon which includes the Fibroma–Myxoma Virus Transformation of Berry and Dedrick, 1340
Holmes, Dr. R. L. : Seasonal Variations in the Pituitary Gland of the Ferret, 1521
Holmes, Dr. R. L., and Knowles, F. G. W. : Electron Microscope Observations on the Neurohypophysis of the Ferret, 1745
Holmström, Bertil, and others : Absorption Spectrum and Decay Kinetics of the Metastable State of Chlorophyll *b*, 661
Holmyard, Dr. E. J., and others (edited by) : A History of Technology, Vol. 4, The Industrial Revolution, *review* by G. B. L. Wilson, 70
Holøien, E. : Electron Affinity of Atomic Lithium, 173
Holttum, R. E. : Bamboos of Malaya, 1169
Home Universities Conference : Report of the Proceedings of the 1958 (Association of Universities of the British Commonwealth), 1764
Homes, Dr. M. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Homo sapiens : The Fontéchevade Skulls and the Origin of (Dr. J. C. Trevor), 1369
Homogenates (Liver), of Normal and Alloxanized Rats : Action of Nicotinamide on Acetoacetate Metabolism of (S. Eser, S. Tekman and A. Araz), 184
Homogeneous Field Spark Gap in Air : Effect of Humidity on the Breakdown of a 1-cm. (Dr. K. Phillips, K. R. Allen and A. Refsum), 532
Homogeneous Field and Sphere Gaps : Effect of Radiation on the Breakdown of (K. R. Allen and Dr. K. Phillips), 233
Homologous Species Neoplastic Antibodies (Dr. Hoy A. Cranston and Frederick O. Eggert), 1471
Homologous Tissue Suspensions : Long-term Survival of Irradiated Mice treated with (Eric L. Simmons, Leon O. Jacobson, Edna K. Marks and Evelyn O. Gaston), 556
Homotransplantation Reaction : Antibody Formation by Isolated Spleen Cells transferred to Recipients in Absence of (Dr. Z. Trnka and I. Říha), 546

Homozygosity and *S* Gene Mutation (Dr. J. L. Brewbaker and N. Shapiro), 1209
Honey : Isolation of Kojibiose from (Toshiyuki Watanabe and Kiyoshi Aso), 1740
Honeycombe, Prof. R. W. K. : Awarded the Rosenhain Medal of the Institute of Metals, 793
  Precipitation in Alloys (Precipitation Reactions in Steels), 797
Honours : New Year, 83
Honours List : H.M. The Queen's Birthday, 1715
Hook, Prof. Sidney : Education in the Age of Science, 1436
Hopf, Prof. Heinz : Elected a member of the Mathematics Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Hopkins, Dr. C. : Chemotherapy of Parasitic Diseases, 1030
Hopkins, C. A. : Parasitology (Ecological Studies in *Proteocephalus filicollis* in Sticklebacks), 1506
Hopkins, C. A., and others : Parasitology (The *in vitro* Culture of Strigeid Metacercariae to the Sexually Mature Adult Fluke), 1506
Hopkins, C. E., and others : Ultra-violet Carcinogenesis in Albino and Pigmented Mice receiving Furocoumarins—Psoralen and 8-Methoxypsoralen, 728
Hopkins and Williams, Ltd. (Baird and Tatlock (London), Ltd., and) : Appointment of Robert Douglas Baird as a director, 794
Hoppe, R., and co-workers : Co-ordination Chemistry (Zirconium, Tin and Manganese Complex Fluorides), 1785
Hopper, Dr. Grace : The Mechanization of Thought Processes (Automatic Programming), 226
Hopper, V. D. : Antarctic Meteorology, 1503
Horikoshi, Koki, and Iida, Dr. Shigeji : Effect of Lytic Enzyme from *Bacillus circulans* and Chitinase from *Streptomyces* sp. on *Aspergillus oryzae*, 186
Horiuchi, S., and others : A Possible Negative Feedback Phenomenon controlling Formation of Alkaline Phosphomonoesterase in *Escherichia coli*, 1529
Horiuchi, T., and others : A Possible Negative Feedback Phenomenon controlling Formation of Alkaline Phosphomonoesterase in *Escherichia coli*, 1529
Horizontal Displacement along Faults in the Ocean Floor : Measurement of (Dr. Victor Vacquier), 452
Horizontal Paper Chromatography (Rapid Quantitative), at an Elevated Temperature—Determination of Aspartic and Glutamic Acids (Henry R. Roberts and Michael G. Kolor), 460
Hormone (Follicle-stimulating) : Supplies of (Endocrinology Study Section of the United States National Institutes of Health), 865
Hormone (Juvenile), in Thymus, Human Placenta and other Mammalian Organs (Prof. Carroll M. Williams, Lynn V. Moorhead and Jean F. Pulis), 405
Hormone (Melanophore-aggregating), in the Pituitary of the Minnow : Distribution of (A. K. Kent), 544
Hormone Conference (Laurentian), 1957 : Recent Progress in Hormone Research, Vol. 14—Proceedings of the (edited by Gregory Pincus), *review* by Prof. F. G. Young, 1422
Hormone Research : Progress in Vitamin and, *reviews* by Prof. F. G. Young, 568, 778
  Recent Progress in, Vol. 14—Proceedings of the Laurentian Hormone Conference, 1957 (edited by Gregory Pincus), *review* by Prof. F. G. Young, 1422
Hormones : Research on, *review* by Prof. F. G. Young, 1422
  Terminology of (Dr. D. B. Carlisle and Dr. Penelope M. Jenkins), 336
  Vitamins and—Advances in Research and Applications, Vol. 15, (edited by Prof. Robert S. Harris, Prof. G. F. Marrian and Prof. Kenneth V. Thimann), *review* by Prof. F. G. Young, 568 ; Vol. 16 (edited by Prof. Robert S. Harris, Prof. G. F. Marrian and Prof. Kenneth V. Thimann), *review* by Prof. F. G. Young, 778
Hormones (Thyroid) : Rate of Exchange of Phosphate in Red Blood Cells—Effect of (A. M. Ermans and Prof. P. A. Bastenie), 679
Horn, P., and others : Crystal Structure of Calcium Thymidylate, 880
Horne, Dr. J. : The Council for Science and Technology of Western Germany, 512
Horne, T., and others : Inactivation of Spores of *Bacillus anthracis* by γ-Radiation, 475
Horological Society, Antiquarian : Annual General Meeting, 1094
Horowitz, J., and others (edited by) : Progress in Nuclear Energy, Series I, Physics and Mathematics, Vol. 2, *review* by Dr. J. Walker, 422
Horse : Heparin and Thromboplastin Generation in the (Dr. R. K. Archer and P. Flute), 235
Hort, Jan, and others : Acquired Immunological Tolerance of Heterografts, 1199
Horticultural Research Station, Agricultural and (the National Fruit and Cider Institute), Long Ashton, Bristol : Annual Report for 1957, with Index 1953-57, 1507
Horticultural and Fruit Research (Dr. John Grainger), 1507
Horton-Smith, C. (edited by) : Biological Aspects of the Transmission of Disease—Report of the Institute of Biology Symposium, *review* by Dr. C. W. Dixon, 1221
Horvat, J., and others : Failure of Ribonucleoprotein to transfer Antibody Formation, 1400
Horváth, Dr. I., and others : Determination of Transaminase Activity in Dogs' Serum and Lymph after Hepatic Damage due to Acute Biliary Obstruction, 48
  Changes in Serum Transaminase Activity following Myocardial Damage due to Lymphatic Congestion, 1333
Horváth, Prof. Leslie : Analysis of Mast Cells by means of Polarization Microscopy, 1067
Horváth, Prof. L., and others : Inhibitory Action of Amino-Acid Esters on the Production of Extracellular Amylase by *Penicillium chrysogenum*, 477
Horváth, T. (Vargha, L., and) : 1,6-Di-(2-Bromoethylamino)-1,6-Dideoxy-D-Mannitol Dihydrobromide, a New Cytostatic Agent, 394
Horridge, Dr. G. A. : Responses of Invertebrates, *review*, 4
Hosein, Dr. E. A., and McLennan, Prof. H. : Pharmacological Actions of γ-Butyrobetaine, 328
Host (Nematode) : Freeze-drying of *Harposporium anguillulae* Lohde in its (William A. Feder and Dr. C. L. Duddington), 767
Hosts (Intermediate), of *Schistosoma mansoni* : Generic Nomenclature of the (Dr. C. A. Wright), 906
Hosts (Macrophytic) : Relationship between Epiphytic Algal Species and their (G. A. Prowse), 1204
Houghton, J. T. : Emissivity of the Earth's Surface, 367
Hourani, Albert : The Role of the Scholar in Society, 1773
Hourani, Cecil : The Role of the Scholar in Society, 1773
House of Commons : Debate on Government Aid to Science in Britain, 156
  Debate on Safety and the Nuclear Power Industry, 292
  Second reading of the Colonial Development and Welfare Bill, 793
  Debate on the National Parks (Amendment) Bill, 917
  Second reading of the Transport (Borrowing Powers) Bill, 938
  Debate on Education, 1145
  Debate on Space Research, 1302
  Debate on Fuel and Power Policy, 1650
House of Lords : Debate on Fuel and Power in Britain, 511
  Second reading of the Electricity (Borrowing Powers) Bill, 794
  Debate on Inland Waterways in Britain, 1305
Houseflies *Musca domestica* : Metabolism of Benzene Hexachloride by Resistant (Dr. F. R. Bradbury and H. Standen), 983
House Mouse (*Mus musculus*) : Effect of a Sympathomimetic Agent /Methoxamine Hydrochloride) on Growth of Hair in the (F. Cockrem), 614
  Selection for Relationships Opposite to those predicted by the Genetic Correlation between Two Traits in the (F. Cockrem), 342
House Spraying (Residual) : Effect of, in the Plains on Anopheline Densities in Huts on the Pare Mountains (Dr. A. Smith), 198
Housing and Local Government, Ministry of, and the Central Office of Information : Pamphlet on Smoke is Your Enemy, 1163
Houston, Dr. William V. : Elected a member of the Council of the United States National Academy of Sciences, 1575
How to Know Western Australian Wildflowers (Dr. William E. Blackall and Dr. Brian J. Grieve), Part 2, A Key to the Flora of the Temperate Regions of Western Australia, *review* by V. S. Summerhayes, 1628
How Old is the Cambrian System ? (Prof. C. F. Davidson), 768 ; (Dr. K. I. Mayne, Dr. R. St. J. Lambert and D. York), 769
Howard, Dr. Alma : Bibliography on the Effects of Ionizing Radiations on Plants, 1896-1955, *review*, 639
Howard, Dr. B. H. : Function of the Rumen (Metabolism of Carbohydrates by Rumen Bacteria), 1644
Howard, Penny : Awarded a University scholarship for science by Pfizer, Ltd., 1719
Howarth, Dr. M. K. : Awarded a moiety of the Daniel Pidgeon Fund for 1959 of the Geological Society of London, 1434
Howatson, A. F., and others : A Cytopathogenic Agent from a Mammary Tumour in a *C3H* Mouse that produces Tumours in Swiss Mice and Hamsters, 1535
Howes, Dr. F. N. : Trees of Britain, *review*, 1627
Howes, V. R., and others : Interfacial Phenomena (Work of the J. Lucas Research Group on Electro-deposition), 1098
Howitt, Sir Harold : Opening Address at the Conference of the British Institute of Management, 655
Hoyle, Prof. F. : Space Research (Limitations to Terrestrial Astronomy occasioned by Absorption, Refraction and Scattering of Light in the Atmosphere), 363
Hoyle, Dr. G. : Awarded a Royal Society Research Fellowship (Mr. and Mrs. John Jaffé Donation), 1365
Hraba, Tomáš, and others : Acquired Immunological Tolerance of Heterografts, 1199
Hrubešova, Dr. Miroslava, and others : Serum Antibody and γ-Globulin in Baby Rabbits after Transfer of Ribonucleoprotein from Adult Rabbits, 97
Hsia, Dr. David Yi-Yung, and Kot, Eva Gawronska : Detection of Heterozygous Carriers in Glycogen Storage Disease of the Liver (von Gierke's Disease), 1331
Hubáček, J., and Málek, I. : Factors Inhibiting and Stimulating Growth of *Mycobacteria* in the Blood and Serum of Non-immunized and Immunized Animals, 187
Hubbard, Dr. Ruth, and others : Action of Light on Visual Pigments—Vertebrate Lumi- and Meta-Rhodopsins, 442 ; Lumi- and Meta-Rhodopsins of Squid and Octopus, 446
Hubbard, Dr. Ruth, and Kropf, Dr. Allen : Action of Light on Visual Pigments—Chicken Lumi- and Meta-Iodopsin, 448
Hübel, W., and Braye, E. H. : Co-ordination Chemistry (New Compounds from Iron Dodecacarbonyl and Acetylenes), 1785
Hübel, W. (Weiss, E., and) : Co-ordination Chemistry (Reactions of Cyclopentadienones with Metal Carbonyls), 1785
Hückel, Prof. Walter : Theoretical Principles of Organic Chemistry, Vol. 2 (translated from the corrected seventh German edition by Prof. F. H. Rathmann), *review* by Dr. P. B. D. de la Mare, 852
Hucker, Howard B., and others: Cotinine, an Oxidation Product of Nicotine formed by Rabbit Liver, 47
Huehns, E. R. : Elected to a Junior Fellowship by the Beit Memorial Trust, 1569
Huggins, Dr. Maurice L. : Physical Chemistry of High Polymers, *review* by Prof. C. E. H. Bawn, 637
Hugh-Jones, E. M. : Appointed professor of economics at University College of North Staffordshire, 1783
Hughes, Dr. A. P. : Experimental Approaches to the Problems of Growth and Form in Plants (Effects of Environment on Leaf Development in *Impatiens parviflora*), 585
Hughes, C. J. (Morris, D. W., and) : Phase Characteristics of Radio Signals received via the Ionosphere. 310
Hughes, Dr. Donald J. : On Nuclear Energy—its Potential for Peacetime Uses, *review* by Prof. G. O. Jones, 1077
Hughes, Dr. Donald J., and others (edited by) : Progress in Nuclear Energy, Series I, Physics and Mathematics, Vol. 2, *review* by Dr. J. Walker, 422
Hughes, H. : A New Silicide in a 12 per cent Chromium Steel, 1543
Hughes, Dr. H. W. D. (Barnard, Dr. J. A., and) : Analysis of Light Hydrocarbon Gas Mixtures, 250
  Analysis of Hydrocarbons, 744
Hughes, Dr. Robert (Whitaker, Dr. John A., and) : A Rapid Method for determining the Concentration of Ammonium Sulphate Solutions, 603
Hughes, T. P., and Kaufman, Dr. S. : New Investigations with SCEPTRE III—Axial Positive Ion Velocities in SCEPTRE III, 7
Hultman, Dr. Eric : Rapid Specific Method for Determination of Aldosaccharides in Body Fluids, 108
Hultqvist, Dr. Bengt : Auroral Isochasms, 1478
Hultqvist, Dr. Bengt, and Ortner, Johannes : Observations of Intense Ionization of Long Duration below 50 km. Altitude after some Strong Solar Flares, 1179

Human : Excessive Uric Acid Production in the, induced by 2-Ethylamino-1, 3,4-thiadiazole (Dr. J. E. Seegmiller, Arthur I. Grayzel and Lois Liddle), 1463
Human Albumin labelled with Iodine-131 : Chromatographic Behaviour of (Dr. S. Cohen), 393
Human Biology, Society for the Study of : Symposium on Natural Selection in Man, 159
Human Blood Platelets : Taurine in (Julian Frendo, Aleksander Koj and Jan M. Zgliczyński), 685
Human Blood Sample belonging to Group AB : A Rare Variant of B in a (Dr. J. Moullec and Dr. P. Le Chevrel), 1733
Human Breast Cancer : Variables related to (A. Elving Anderson, Harold O. Goodman and Sheldon C. Reed), *review* by Dr. L. Foulds, 955
Human Bronchial Epithelium : Chemical Changes in, and their relation to Bronchial Cancer (J. Chayen, Prof. G. J. Cunningham and D. P. Winstanley), 1743
Human Cartilage : Ageing of (David Kaplan and Dr. Karl Meyer), 1267
Human Diversity, *review* by Dr. C. E. Ford, 1354
Human Foetal Haemoglobin : New Variant of (Dr. Phaedon Fessas, N. Mastrokalos and G. Fostiropoulos), 30 ; (Dr. F. Vella, Dr. J. A. M. Ager and Dr. H. Lehmann), 31
Human Globin : Separation of the Peptide Chains of (Constituents of Human Haemoglobin), (Dr. V. M. Ingram), 1795
Human Haemoglobin : Constituents of—Separation of the Peptide Chains of Human Globin (Dr. V. M. Ingram), 1795 ; Comparison of Normal Adult Human Haemoglobin with Haemoglobin I by 'Fingerprinting' (Makio Murayama and Dr. V. M. Ingram), 1798 ; Formation of Normal and Doubly Abnormal Haemoglobins by Recombination of Haemoglobin I with S and C (Dr. Harvey A. Itano and Elizabeth Robinson), 1799
Human Haemoglobin in Strong Salt Solutions : Oxygen Equilibrium of (Prof. A. Rossi-Fanelli, E. Antonini and A. Caputo), 827
Human Haemoglobin (Normal Adult) : Comparison of, with Haemoglobin I by 'Fingerprinting' (Constituents of Human Haemoglobin), (Makio Murayama and Dr. V. M. Ingram), 1798
Human Haemoglobins : Identity of the α-Chains of Adult and Foetal (J. A. Hunt), 1373
Human Haptoglobin Synthesis : Genetic Control of (Dr. A. C. Allison), 1312
Human Intersexuality : A Case of, having a possible *XXY* Sex-determining Mechanism (Patricia A. Jacobs and Dr. J. A. Strong), 302
Human Knowledge : Atomic Physics and (Dr. Niels Bohr), *review* by Prof. W. H. McCrea, 1218
Human Labour : Recovery of Injected Progesterone and its relation to the Onset of (Prof. Lars Ph. Bengtsson), 405
Human Leukaemic Leucoytes : Incorporation of 5-Iodouracil labelled with Iodine-131 into the Deoxyribonucleic Acid of, following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131 (Dr. M. L. Eidinoff, L. Cheong, E. Gambetta Gurpide, R. S. Benua and R. R. Ellison), 1686
Human XXY/XX Mosaic : A Presumptive (Dr. C. E. Ford, and Dr. P. E. Polani, J. H. Briggs and Dr. P. M. F. Bishop), 1030
Human Muscular Dystrophy as an Abberration of the Connective Tissue (Prof. Geoffrey H. Bourne and M. Nelly Golarz), 1741
Human Nutrition : Legumes in Agriculture and (Food and Agriculture Organization of the United Nations and the Commission for Technical Co-operation in Africa South of the Sahara Technical Meeting on), 439
Human Placenta and other Mammalian Organs : Juvenile Hormone in Thymus, (Prof. Carroll M. Williams, Lynn V. Moorhead and Jean F. Pulis), 405
Human Plasma : Preparation of Caeruloplasmin from the G2 Fraction of (Dr. G. Curzon and L. Vallet), 751
  Slow Contraction of Smooth Muscle produced by (Dr. Yousry Gabr and Raga H. Aly), 897
Human Red Cell : Haemoglobin and 'Apparent Protein' in the (Dr. Eric Ponder), 1330
Human Red Cells : Effect of Oubain on Sodium Flux in (Thomas J. Gill and Prof. A. K. Solomon), 1127
Human Relations in Industry : Final Report of the Joint Committee on (1954-57), and Report of the Joint Committee on Individual Efficiency in Industry, 1953-57 (Department of Scientific and Industrial Research), 301
Human Serum : Discrepancy between the Distributions of Iodine in, when estimated by Iodine-131 and Iodine-127 (Dr. Sidney C. Werner and Dr. Richard J. Block), 406, *erratum*, 722
  Measurement of a Staphylococcal Antibody in, by a Mouse Protection Test (Dr. Myron W. Fisher), 1692
  Prealbumin as a Complex in the α-Globulin Fraction in (Dr. J. R. Tata), 877
Human Serum Cholinesterase Types : Differential Response of, to an Inhibitor in Potato (Dr. H. Harris and Mary Whittaker), 1808
Human Skin : Weal and Flare in, produced by Histamine and other Substances (Dr. A. Herxheimer and Dr. M. Schachter), 1510
Human Thyroids : Iodine-131 in, and Iodine-131 and Caesium-137 in Milk (Measurements at Leeds following the Windscale Reactor Accident), (Dr. P. R. J. Burch), 515
Human Tissues and Activated Sera : Granulocyte Precipitins of (Dr. Leonhard Korngold, Gerda Van Leeuwen and Daniel G. Miller), 330
Human Tumours : Ploidy of Primary and Metastatic (Dr. Giancarlo Rabotti), 1276
Human Urinary Œstrogens : A Simplified Physico-chemical Method for Determination of (Dr. Tawfik El-Attar), 1607
Human Urine : Excretion of Catechol in (Prof. U. S. von Euler and F. Lishajko), 1123
Humanities : The Education of our Future Rulers should be primarily in the Sciences rather than the (London Section of the Royal Institute of Chemistry, the London Branch of the Classical Association and the Haldane Society Debate on the Motion that), 1235
Humans (Irradiated) : An Alteration in the Excretion of Free Serine in Urine from (Dr. Arthur L. Kretchmar), 1809
Humic Acid (Plant Phenolics Group International Symposium on), 1719
Humid Air : Secondary Ionization in (Prof. J. M. Meek), 1805
Humid Tropics : Vegetation of the (Dr. E. J. H. Corner), 795
Humid Tropics Vegetation (Unesco and the Council for Sciences of Indonesia Symposium on), 795
Humidity : Effect of, on the Breakdown of a 1-cm. Homogeneous Field Spark Gap in Air (Dr. K. Phillips, K. R. Allen and A. Refsum), 532
  Effect of, on the Spark Breakdown Voltage (K. R. Allen and Dr. K. Phillips), 174
Humour (Aqueous), of the Hippopotamus (C. P. Luck and P. G. Wright), 1595
Humpback Whales : Evidence on Growth-rates obtained from Two Marked (W. H. Dawbin), 1749
Humphrey, Dr. J. H., and others : Serum Antibody and γ-Globulin in Baby Rabbits after Transfer of Ribonucleoprotein from Adult Rabbits, 97
Humphrey, Dr. J. H. (Allison, Dr. A. C., and) : Estimation of the Size of Antigens by Gel Diffusion Methods, 1590
Humphries, Dr. E. C., and Thurston, J. M. : Bulbil Formation in *Sedum telephium*, 1343
Hungarian Atomic Reactor : First, 1162
Hunt, J. A. : Identity of the α-Chains of Adult and Foetal Human Haemoglobins, 1373
Hunt, Dr. J. H., and others : Resolution of Chlorpheniramine and the Pharmacological Properties of its Isomers, 734
  A New Short-acting Thiobarbiturate, 1443, *erratum*, 1571
Hunt, Dr. R. W. G. : Mixed Pigments in Colour Vision, 1601
Hunten, Dr. D. M., and others : Rotational Structure of the 3914 A. N_2^+ Band in Sunlit Aurorae, 453
Hunter, Dr. Herbert : *Obituary* by Dr. G. D. H. Bell, 1016
Hunter, J. R. : Photographic Recording of Agar Diffusion Plates, 1283
Hunter, S. C. : Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
Hunter, W. (Parkin, Dr. D. W., and) : Cosmic Dust in the Atmosphere, 732
Hurley, Dr. D. E., and McKnight, D. G. : Occurrence of *Pyrosoma* on the Sea-Floor 160 Metres Deep, 554
Hurricanes : Poisson's Law and the Frequency of (Dr. Charles H. Smiley), 814
Hurwitz, Harry M. B. (Weiss, Dr. Karl, and) : Effect of Reduction of Stimulation on Consumption of Food, Intake of Water and Weight of Body in Rats, 344
Hurwitz, Dr. Ruth E., and others : Gene Action in Erythrocyte Deficiency of Glucose-6-phosphate Dehydrogenase—Tissue Enzyme-Levels, 1266
Husbandry (Animal), at the Royal Veterinary College, 365
Hutasoit, -. : Humid Tropics Vegetation, 795
Hutchinson, Dr. J., and Dalziel, Dr. J. M. : Flora of West Tropical Africa, second edition revised by R. W. J. Keay, *review* by A. W. Exell, 6
Hutchinson, Dr. S. A., and others : Spore Germination in *Agaricus campestris* L. ex Fr., 1736
Huts on the Pare Mountains : Effect of Residual House Spraying in the Plains on Anopheline Densities in (Dr. A. Smith), 198
Hutten, Dr. E. H. : Rational Discussion, *review*, 1078
Huxley, Dr. H. E. : Biological Ultrastructure, *review*, 956
Hyaluronidase : Bacterial and Testicular (Prof. Ernest Báráany, Lennart Berggren and Lennart Juhlin), 265
Hyaluronidase *in vivo* : α-Tocopherol and (Elizabeth A. Irving), 398
Hybrids : *Salmonella–Escherichia* (T. Miyake and Dr. M. Demerec), 1586
Hybrids (Intergeneric), with Wheat : Genetic Control of Chromosome Pairing in (Dr. Ralph Riley, Victor Chapman and Gordon Kimber), 1241
Hyde, H. A. : Atmospheric Pollen in relation to Land Use, 1694
Hydrate (Chloral) : Effect of, on Growth of Hair (Prof. J. Randolph Murray), 984
Hydrate (Ferric) : Binding of Water in (Prof. O. Glemser), 1476
Hydrate (Indanetrione) : Determination of Nitrogen in Proteins by means of (Dr. S. Jacobs), 262
Hydrated Glasses (E. D. Lacy), 178
Hydration : Elongation of Rat-Tail Tendon on (Dr. Harry R. Elden), 1681
Hydrocarbon Gas Mixtures : Analysis of Light (Dr. J. A. Barnard and Dr. H. W. D. Hughes), 250
Hydrocarbons : Analysis of (Dr. H. M. Frey), 743 ; (Dr. J. A. Barnard and Dr. H. W. D. Hughes), 744
  Effect of Low Concentrations of Alcohols on the Interfacial Tension between Water and (F. Franks and Dr. D. J. G. Ives), 316
  Gas Phase Oxidation of—Endothermic Nature of the Initial Stage of Reaction (Dr. K. C. Salooja), 602
Hydrocarbons (Aromatic) : Polarography of (H. J. Gardner), 320
Hydrocarbons (Polycyclic Aromatic), added to Wax : Milk as an Eluant of (Dr. Hans L. Falk, Dr. Paul Kotin and Adele Miller), 1184
Hydrocarbons (Rubber) : Estimation of Chain Fracture during the Cross-linking of, by High-Energy Radiation (Dr. L. Mullins and Dr. D. T. Turner), 1547
Hydrocarbons and Sulphur Compounds boiling below 200° C. : Physical and Azeotropic Data—(G. Claxton), *review* by Dr. B. A. Rose, 709
Hydrogen : Interpretation of Resonance Energies in the Photoproduction and Scattering of Pions from (Dr. K. M. Guggenheimer), 1758
Hydrogen and Oxygen : Heterogeneous Atomization of (Dr. D. Brennan and P. C. Fletcher), 249
Hydrogen (Heavy) : Fusion of (Dr. T. E. Allibone), 569
Hydrogen Bonding (Intracellular), in Heterocyclic Systems (E. W. Gill and E. D. Morgan), 248
Hydrogen Liquefaction and Associated Techniques (Low Temperature Group of the Physical Society Symposium on), 1504
Hydrogen Overvoltage : Feedback Theory of (J. F. Chittum), 589
Hydrogen Peroxide (Molecular), in the Radiolysis of Water labelled with Oxygen-18 ; Determination of the Yields of (Dr. J. B. Backhurst, Dr. G. R. A. Johnson, Dr. G. Scholes and Prof. J. Weiss), 176
Hydrogenation of a Cyclic Allylic Alcohol : Effect of Alkali Salts on the Steric Course of (M. C. Dart and Prof. H. B. Henbest), 817
Hydrology (Scientific), International Association of : Symposium on Water and Woodlands, 438
  Symposium on Lysimeters, 438
Hydrolysis of Lecithin and Lysolecithin by Rumen Micro-organisms of the Sheep (Dr. R. M. C. Dawson), 1822
Hydrolysis by Papain : Effect of, on the Combining Sites of an Antibody (Dr. A. Nisonoff and D. L. Woernley), 1325
Hydrolysis (Asymmetric), of Diethyl Acetamidomalonate by Chymotrypsin (Prof. Saul G. Cohen and Lucille Altschul), 1678
Hydrolysis (Enzymic), of Fucoidin by *Pseudomonas atlantica* and *Pseudomonas carrageenovora* (Dr. W. Yaphe and Dr. K. Morgan), 761
Hydrolysis (Ester) : Role of Lysine in catalysing (William R. Chesbro and Prof. Leslie R. Hedrick), 994 ; (Alexander Gero), 994

Hydrophilidae (Family) : British Water Beetles of the, *review* by Dorothy J. Jackson, 1420
Hydrous Oxides : Binding of Water in some Hydroxides and (Structure of some Hydroxides and Hydrous Oxides), (C. Glemser), 943
  Structure of some Hydroxides and—Binding of Water in some Hydroxides and Hydrous Oxides (Prof. O. Glemser), 943 ; Positions of Protons in Aluminium Hydroxides derived from Proton Magnetic Resonance (D. J. Kroon and C. v. d. Stolpe), 944
Hydroxides (Aluminium), derived from Proton Magnetic Resonance : Positions of Protons in (Structure of some Hydroxides and Hydrous Oxides), (D. J. Kroon and C. v. d. Stolpe), 944
Hydroxides and Hydrous Oxides : Binding of Water in some (Structure of some Hydroxides and Hydrous Oxides), (Prof. O. Glemser), 943
  Structure of some—Binding of Water in some Hydroxides and Hydrous Oxides (Prof. O. Glemser), 943 ; Positions of Protons in Aluminium Hydroxides derived from Proton Magnetic Resonance (D. J. Kroon and C. v. d. Stolpe), 944
Hydroxyacids and Amino-acids in Aqueous Solutions : Effects of Gamma-Radiation on some Carbohydrates (Dr. S. A. Barker, Dr. P. M. Grant, Prof. M. Stacey and Dr. R. B. Ward), 376
Hydroxy Acids (Organic), and Germanic Acid : Interaction between, in Aqueous Solution (E. R. Clark), 536
β-Hydroxybutyrate Injections : Effect of, on the Pancreatic Activity of Guinea Pigs (Dr. H. D. Brahmachari and Mahendra Kumar), 51
17-Hydroxycorticosteroid Secretion (Adrenal), in the Dog : Effect of Morphine upon the (Prof. Tatuzi Suzuki, Kazukuni Yamashita, Seiichi Zinnouchi and Takaaki Mitamura), 825
10-Hydroxydecenoic Acid from Royal Jelly : Activity of, against Experimental Leukaemia and Ascitic Tumours (Prof. Gordon F. Townsend, Dr. Joseph F. Morgan and Dr. Barbara Hazlett), 1270
10-Hydroxy-Δ^2-decenoic Acid : Identification of, in Royal Jelly (S. A. Barker, Dr. A. B. Foster, D. C. Lamb and N. Hodgson), 996
Hydroxyl Groups in Porphyrins and Chlorins : Detection of (J. Barrett), 1185
20α-Hydroxypregn-4-en-3-one : Changes in the Secretion of, by the Adrenal Gland of Young Calves (Dr. W. E. Balfour, Dr. R. S. Comline and R. V. Short), 467
5-Hydroxytryptamine in Blood during Experimental Traumatic Shock in Rats (M. Medakovič and I. Spuzic), 1685
5-Hydroxytryptamine in Irradiated Rats : Effect of High Oxygen Pressure on the Protective Action of Cystamine and (H. A. S. van den Brenk and Ruth Moore), 1530
5-Hydroxytryptamine in Scorpion Venoms : Distribution of (Dr. K. R. Adam and Dr. C. Weiss), 1398
Hygiene and Toxicology : Industrial (edited by Frank A. Patty), Vol. I, General Principles, second edition, *review* by Dr. A. I. G. McLaughlin, 1148
Hyla aurea : Histolytic Activity in Seasonal Hypertrophy of the Reproductive Organs of (Prof. L. R. Richardson), 480
Hyperglobulinaemic Thrombo-Haemorrhagic Diathesis (Dr. Henry H. Henstell and Miriam Kligerman), 978
Hyperia galba : The Amphipod, an Ectoparasite of the Jelly-fish, *Cyanea capillata* (Prof. Erik Dahl), 1749
Hypersonic Flow (Royal Aeronautical Society Discussion on), 1095
Hypersonic Gun Tunnel : A Microwave Method of determining the Displacement and Velocity of a Piston in a (L. Pennelegion), 246
Hypertonic Liquid Medium : Oxygen Consumption of Different Forms of Stable L *Proteus* P 18 growing in (Prof. P. Mandel, T. Terranova, M. Sensenbrenner and F. Feo), 194
Hypertrophy (Seasonal), of the Reproductive Organs of *Hyla aurea* ; Histolytic Activity in (Prof. L. R. Richardson), 480
Hypocupraemia : Iron Content in the Serum of Cows with (Dr. Rajmund Rys), 1596
Hypophysectomized Rats : *In vitro* Effects of Insulin and Glucose on Leucine-2-^{14}C Incorporation into Protein of Diaphragms of (Dr. J. L. Kostyo), 1518
Hypotensive or Sedative Activity : Reserpine Derivatives with Specific (S. Garattini, A. Mortari, A. Valsecchi and L. Valzelli), 1273
Hysteresis Loop Traces : Magnetic Viscosity displayed on (R. G. George), 245

IAH, M. S. C., and others : Infra-red and the Near Ultra-violet Absorption Spectra of Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b*, 1475
IBM (United Kingdom), Ltd. : Braille Translation by Computer, 1233
IBM World Trade Laboratories (Great Britain), Ltd. : Appointment of W. S. Elliott as managing director, 438
Ibo : The River Niger as a Barrier in the Spread Eastwards of Haemoglobin C—a Survey of Haemoglobins in the (Dr. H. Lehmann and Dr. C. Nwokolo), 1587
Ibsen, K. H., and others : Energy Compensation in the Crabtree Effect with Ehrlich Ascites Carcinoma Cells, 1471
Ice (Glacier) : Whale Remains in (D. L. Dineley and P. A. Garrett), 272
Ice Nuclei (Atmospheric) : Volcanoes as a Source of (K. Isono, M. Komabayasi and A. Ono), 317
Ice-Sheet (Antarctic) : Characteristics of the (Royal Astronomical Society and the British Glaciological Society Geophysical Discussion on), 1575
Identification of Barbiturates (Dr. A. S. Curry), 1052
Identification of 10-Hydroxy-Δ^2-decenoic Acid in Royal Jelly (S. A. Barker, Dr. A. B. Foster, D. C. Lamb and N. Hodgson), 996
Identification of *Proteus* : The Phenylalanine Test on Kligler's Iron Agar for the (D. J. Stewart), 1537
Identification of Sharks : Red Muscle as a Possible Character for the (Olaf R. Braekkan), 556
Identity of the Abscission-accelerating Substance in Senescent Leaves (Daphne J. Osborne), 1593
Identity of the α-Chains of Adult and Foetal Human Haemoglobins (J. A. Hunt), 1373
Idle, Dr. D. B. : Appointed lecturer in botany at the University of Birmingham, 153
Igneous Rocks : Magnetostriction and Palaeomagnetism of (P. M. Scott and Dr. F. D. Stacey), 384 ; (Dr. John W. Graham, A. F. Buddington and J. R. Balsley), 1318
Ignition of Inflammable Gas : Effects of Arc Stage of Electrical Discharge on (I. Berz), 669 ; (W. Nethercot and H. G. Riddlestone), 669
Iida, Dr. Shigeji (Horikoshi, Koki, and) : Effect of Lytic Enzyme from *Bacillus circulans* and Chitinase from *Streptomyces* sp. on *Aspergillus oryzae*, 186
Iitaka, Dr. Yoichi : Crystal Structure of β-Glycine, 390
Ilan, F. Bar, and others : Co-existence of the Embryonic (Third Normal) Haemoglobin Fraction with Erythroblastosis in the Blood of Two Full-term New-born Babies with Multiple Malformations, 327
Illinois Natural History Survey: Bulletin, Vol. 27, A Century of Biological Research, 1233
Illness (Mental) : The New Chemotherapy in (edited by Dr. Hirsch L. Gordon), *review* by Dr. Marthe Vogt, 1007
  Social Class and (Prof. August B. Hollingsworth and Prof. Frederick C. Redlich), *review* by Dr. Clifford Allen, 354
Illumination of the Euphausiid Crustacean Eye : Electrical Response to (Elizabeth M. Kampa, Brian P. Boden and Bernard C. Abbott), 1820
Illumination (Flash), of Absorbing Bodies : Initiation of Thermal Reactions by the (Dr. J. L. Lundberg and Dr. L. S. Nelson), 1560
Ilmenites (Lake Allard) : Remanent Magnetism of the (Charles M. Carmichael), 1239
Image (Solid-) Microscope (R. L. Gregory and P. E. K. Donaldson), 246
  The Three-Dimensional or (W. D. Jackson), 1048
Images (Electron Microscope), of Crystal Lattices : Spacing Anomaly in (Dr. H. Hashimoto and Dr. H. Yotsumoto), 1001
Images (Mental), Institute for the Study of : Communications of the, Vol. I, Part I, and Vol. I, Parts 2 and 3, Introduction to Parapsychology (C. C. L. Gregory and Anita Kohsen), 229
Imbert, B. : Characteristics of the Antarctic Ice-Sheet, 1576
Immunized Animals (Non-immunized and) : Factors Inhibiting and Stimulating Growth of *Mycobacteria* in the Blood and Serum of (J. Hubaček and I. Málek), 187
Immunizing Properties of Insoluble Cell Material derived from *Brucella* (J. Markenson, D. Sulitzeanu and Prof. A. L. Olitzki), 1693
Immunochemically Active Cross-linked Polystyrene (L. H. Kent and J. H. R. Slade), 325
Immuno-Diffusion : Cellulose Acetate as a Medium for (R. Consden and J. Kohn), 1512
Immunoelectrophoresis : Study of Adenovirus Antigens by (Dr. H. G. Pereira, Dr. A. C. Allison and Dr. C. P. Farthing), 895
Immunological Activity of Precolostral Calf Serum (J. L. Turk), 838
Immunological Aspects of Allergic Disorders (British Society for Immunology and the British Association of Allergists Symposium on), 296
Immunological Tolerance : Drug-induced (Dr. Robert Schwartz and Dr. William Dameshek), 1682
Immunological Tolerance (Acquired), of Heterografts (Dr. Milan Hašek, Tomáš Hraba and Jan Hort), 1199
Immunology, British Society for, and the British Association of Allergists : Symposium on the Immunological Aspects of Allergic Disorders, 296
Impact (Industrial) : The Bulge—its (John Wellens), 1500
Impairment of Viral Haemagglutination of Red Cells after Treatment with Formalin (F. E. Buckland), 1276
Imperial Chemical Industries, Ltd. : Bulk Production of Silicon, 932
  Retirement of Sir Ewart Smith from the Board, 1090
Imperial College of Science and Technology : Appointment of Dr. Helen K. Porter to the chair of plant physiology, 220
  Fifty-first Annual Report of the Governing Body (1957-58), 651
  Appointment of Dr. A. R. Boothroyd to the University of London readership in electronics, 794
  Appointment of Dr. B. J. Mason as visiting professor of meteorology by the University of California, 794
  Nuclear Technology at the, 1091
  Elections to Fellowship of the College, 1161
  Appointment of Dr. F. G. H. Blyth as reader in engineering geology, 1571
  Appointment of Dr. E. H. Brown as reader in structural analysis, 1571
  Appointment of Dr. J. Edelman as reader in enzymology, 1571
  Appointment of Dr. S. Eilon as reader in production engineering, 1571
Implications (Social), of Mendelism versus Michurinism (A. Quintanilha), 1222
Improved Method for preparing Pectate Gels (Dr. A. M. Paton), 1812
Improved Preservation of Tendon for Electron Microscopy through Wet Freeze-drying (Dr. David B. Scott and Marie U. Nylen), 1205
Improvement of the Fatigue Strength of Notched Specimens by Artificially Induced Residual Stresses (T. R. Gurney), 883
Improvement in the Magnetic Detecting Power of Iron-cored Search Coils (D. F. Walker), 173
'Impure' Carrier : Analysis by Gas Chromatography of a 'Pure' Sample with an (V. Willis), 1754
Impure Murray Valley Encephalitis Virus : Yield of Infective 'Ribonucleic Acid' from, after Different Treatments (G. L. Ada and S. G. Anderson), 799
Inactivation of Isoniazid by Peroxidase (Dr. M. O. Tirunarayanan and Dr. W. A. Vischer), 681
Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in Salt Water, and the Possible Role of Sulphur Compounds (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Inactivation of Spores of *Bacillus anthracis* by γ-Radiation (T. Horne, G. C. Turner and A. T. Willis), 475
Inamdar, Prof. N. B., and Wagh, U. V. : Amounts of Deoxyribonucleic Acid in the Silk Glands of the Spider *Nephila maculata*, Fabr., 1763, 1541
Incidence of the Erythrocytic Defect associated with Drug-Sensitivity among Oriental Subjects (Dr. Ernest Beutler, Mary K. Y. Yeh and Thomas Necheles), 684
Inclination of Satellite Orbits to the Equator : Changes in the (R. H. Merson, D. G. King-Hele and R. N. A. Plimmer), 239
Inclusions (Cathode) : Effect of, on Electrical Discharges (P. C. L. Pfeil and L. B. Griffiths), 1481
Incorporation of Amino-Acids labelled with Carbon-14 into Ribonucleic Acid and Protein in a Cell-free System of a *Mycobacterium* : Effect of Streptomycin on the (T. Erdös and Agnes Ullmann), 618
Incorporation of 5-Iodouracil labelled with Iodine-131 into the Deoxyribonucleic Acid of Human Leukaemic Leucocytes following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131 (Dr. M. L. Eidinoff, L. Cheong, E. Gambetta Gurpide, R. S. Benua and R. R. Ellison), 1686

Incorporation of Labelled Thymidine in the Seminal Vesicle of the Mouse (Dr. S. R. Pelc and P. B. Gahan), 335
Incorporation of Phosphorus-32 into Isolated Nuclei of Rabbit Appendix: Effects of X- and Ultra-violet Irradiation on the (Yuong-Tchel Tchoe and Prof. A. Sibatani), 1334
Incorporation of Radioactive Iron into Haematin *a* (Prof. R. Lemberg and A. Benson), 678
Incorporation of Thymidine labelled with Tritium by Circulating Cells of Infectious Mononucleosis (Dr. F. Gavosto, A. Pileri and G. Maraini), 1691
Increase in Background Gamma-Radiation and its Correlation with Iodine-131 in Milk (Measurements at Leeds following the Windscale Reactor Accident), (Prof. F. W. Spiers), 517
Increase of Viral Haemagglutinability of Red Cells of the Mouse after Treatment with Formalin (B. Fauconnier and D. Barua), 629
Increase (Storm-Time), of Cosmic-Ray Intensity (Prof. Sekiko Yoshida and Masami Wada), 381
Increased Grants for Universities in Britain, 507
Increased Sensitivity to 'Aminopterin': Selection of Bacterial Mutants of (Dr. Charles A. Nichol), 550
Increasing their Opacity in the Electron Microscope: Chlorination of Proteins as a Method of (Dr. M. M. Coombs and Prof. J. F. Danielli), 1257
Increasing Doses of Radiation: Changes in the Electron Spin Resonance Spectrum of Glycine with (Dr. J. W. Boag and A. Müller), 831
Indanetrione Hydrate: Determination of Nitrogen in Proteins by means of (Dr. S. Jacobs), 262
Independence (Genetic), of Four Mutants in the Syrian Hamster (Roy Robinson), 125
Independent Variations in Stimulus and Response Probability: Effects of (P. M. A. Rabbitt), 1212
India: Fossil Reptiles from the Panchet Beds of (L. B. Tarlo), 912; (Dr. Pamela Lamplugh Robinson), 913
  Technological Education in, 85
  Trap-Shotten Rock from the Biligirirangan Hills, Mysore State (Prof. C. S. Pichamuthu), 483
India, Government of: Appointment of N. K. Bose as director of the Department of Anthropology, 719
Indian Agricultural Research Institute (Dr. B. P. Pal), 371
Indian Animals: Status to-day of Four Rare (E. P. Gee), 367
Indian Association for the Cultivation of Science: Annual Report for 1957-58, 1789
Indian History of Science, *review* by Dr. F. R. Allchin, 1353
Indian Institute of Science, Bangalore: Golden Jubilee (Dr. S. Bhagavantam), 644
Indian National Scientific Document Centre: Report for 1957-58, 721
Indian Populations (Eskimo and), of Alaska: Urinary Excretion of β-Amino-*iso*butyric Acid in (Dr. A. C. Allison, Dr. B. S. Blumberg and Dr. S. M. Gartler), 118
Indian Shellac: Microwave Dielectric Properties of, in the 8-mm. Range (Dr. S. S. Srivastava and Dr. D. D. Puri), 37
Indian Society of Genetics and Plant Breeding: Election of Officers for 1959, 722
Indian Society of Theoretical and Applied Mechanics: Fourth Congress on Theoretical and Applied Mechanics, 366
Indication of the Blood Supply of Bone: Iodine-131 Clearance-rates as an (Dr. P. G. Laing and Dr. Albert B. Ferguson, jun.), 1595
Indicator: Testing Populations of Beet Eelworm, *Heterodera schachtii* Schmidt, for Resistance-breaking Biotypes, using the Wild Beet (*Beta patellaris* Moq.) as (Audrey M. Shepherd), 1141
Indicator (Histochemical), of Nervous Activity: Neuronal Dye-Sorption as a (Prof. Roland Fischer and Prof. Wolfgang Zeman), 1337
Indicator (A New Sensitive), for Semi-Micro Chelometric Titrations (Prof. Robert H. Maier), 461
Indirect Flight Muscles in Primitive Flies: Origin of (Dr. H. E. Hinton), 557
Indium Mono-Telluride (H. C. Wright and J. C. Brice), 27
Individual: Industry and the (Institute of Personnel Management Conference on), 87
Individual and the Universe (Prof. A. C. B. Lovell), *review* by Dr. R. A. Lyttleton, 1624
Individual Efficiency in Industry, 1953-57: Final Report of the Joint Committee on Human Relations in Industry, 1954-57, and Report of the Joint Committee on (Department of Scientific and Industrial Research), 301
Individual Yeast Cells: Life Span of (Robert K. Mortimer and John R. Johnston), 1751
Individuals (Atherosclerotic): Composition of Lipids isolated from the Aorta, Coronary Arteries and Circulus Willisii of (Prof. C. J. F. Böttcher, F. P. Woodford, C. Ch. Ter Haar Romeny, E. Boelsma and C. M. Van Gent), 47
Indoleacetic Acid: Differential Reaction of Saprophytic and Parasitic Soil-inhabiting Fungi to (E. W. B. Ward and Prof. A. W. Henry), 1064
  Interaction between Kinetin and, in the Control of Bud Reactivation in *Splachnum ampullaceum* (L.) Hedw. (Prof. K. E. von Maltzahn), 60
Indonesia: Haemoglobin of New-born Infants in (Dr. Lie-Injo Luan Eng), 1125
  Studies in, 1304
Induced Mutant in *Triticum carthlicum* with the Diagnostic Feature of *T. vavilovi* (Z. Barabás, jun.), 1349
Inducing Chlorophyll Formation in Albino Citrus Seedlings (Dr. Faisal A. Minessy), 553
Induction of Arginase in Rabbit Epithelium by the Shope Rabbit Papilloma Virus (Prof. Stanfield Rogers), 1815
Induction of Lung Tumours by Radioactive Particles (Lewis A. Temple, D. H. Willard, S. Marks and W. J. Bair), 408
Induction of Structural Chromosome Changes by Visible Light (Dr. B. A. Kihlman), 976
Induction of Subcutaneous Nodules in Rabbits with the SE Polyoma Virus (Dr. Bernice E. Eddy, Sarah E. Stewart, Ruth L. Kirschstein and Ralph D. Young), 766
Induction (Oral), of Leukaemia in Mice (Bill P. Maduros, Wila A. Spurrier and Dr. Steven O. Schwartz), 1816
Industrial Applications: Electronic Digital Computers and their (Conference at the Birmingham College of Technology), 154
Industrial Chemistry, Salters' Institute of: Appointment of Prof. A. R. J. P. Ubbelohde as director, 1094
Industrial Health: Annual Report of the Chief Inspector of Factories on, for the Year 1957 (Ministry of Labour and National Service), 867
Industrial Hygiene and Toxicology (edited by Frank A. Patty), Vol. I, General Principles, second edition, *review* by Dr. A. I. G. McLaughlin, 1148
Industrial Impact: The Bulge—its (John Wellens), 1500
Industrial Management: European Conference for (Industrial Prospects in Nuclear Energy, organized by the European Nuclear Energy Agency of the Organization for European Economic Co-operation), 652, 1094
Industrial Melanism in the Lepidoptera: New Aspects of the Genetic Control of (Dr. H. B. D. Kettlewell), 918
Industrial Microbiological Research in Britain: Reorganization of, 1
Industrial Photographic and Television Exhibition (R. J. Hercock), 1721
Industrial Prospects in Nuclear Energy (European Nuclear Energy Agency of the Organization for European Economic Co-operation Conference on), 652, 1094
Industrial Psychology, National Institute of: Report 13, Comments on the Job (Dr. Isabel Blain), 372
Industrial Revolution: Technology of the, *review* by G. B. L. Wilson, 70
l'Industrie Chimique: Centre Européen des Federations de, 1368
Industries: British Fermentation (J. M. Whitmarsh), *review*, 967
Industries (Coal, Electricity and Gas): Investment in the, 1650
Industry: Changing (British Institute of Management Conference on), 655
  Clay Minerals and (Clay Minerals Group of the Mineralogical Society Meeting on), 1024
  The Clerk in, *review*, 494
  The Control of Dust and Fumes in (British Occupation Hygiene Society Conference on), 865
  Ergonomics, its Place in (Ergonomics Research Society Symposium on), 368
  Exchange of Personnel between the Post Office and, 16
  Final Report of the Joint Committee on Human Relations in (1954-57), and Report of the Joint Committee on Individual Efficiency in Industry, 1953-57 (Department of Scientific and Industrial Research), 301
  Instruments in (Evans Electroselenium, Ltd., series of leaflets on), 933
  Medicine in, *review* by Dr. A. I. G. McLaughlin, 1148
  Noise in, 580
  Problems of Progress in, 3, Management and Technology (Joan Woodward), 300
Industry and Broadcasting: Television Engineering in Science, (British Institution of Radio Engineers Convention on), 1234
Industry and the Individual (Institute of Personnel Management Conference on), 87
Industry (British): Fuel and Power in (A. M. Wandless), 154
  Graduates in (Department of Scientific and Industrial Research), 864
Industry (British Manufacturing), 1955: Estimates of Resources devoted to Scientific and Engineering Research and Development in (Department of Scientific and Industrial Research), 847
Industry (Nuclear Power): Safety and the (House of Commons Debate on), 292
Industry (Rubber), Institution of the: Establishment of a South African Section, 580
Industry (Steel): The Development of the (Political and Economic Planning, Broadsheet No. 428), 222
Ineffectiveness of Molybdenum, Osmium and Cobalt in Dietary Necrotic Liver Degeneration (Dr. Klaus Schwarz, Edward E. Roginski and Calvin M. Foltz), 472
Inertial Navigation (D. Chilton), 64
Infants (New-born), in Indonesia: Haemoglobin of (Dr. Lie-Injo Luan Eng), 1125
Infection with Myxomatosis Virus: Effect of, on the Endoparasites of Rabbits (Dr. R. Mykytowycz), 555
Infection (T2 Phage), of 'Protoplasts' obtained by Penicillin Treatment of *Escherichia coli B* (Dr. G. Dénes and L. Polgár), 696
Infections (Viral and Rickettsial): Symposium on Latency and Masking in—the Proceedings of a Conference held at the University of Wisconsin Medical School, 1957 (edited by Duard L. Walker, Robert P. Hanson and Alfred S. Evans), *review* by Dr. Kenneth M. Smith, 71
Infectious Diseases, *review* by Prof. P. C. C. Garnham, 352
Infectious Mononucleosis: Incorporation of Thymidine labelled with Tritium by Circulating Cells of (Dr. F. Gavosto, A. Pileri and G. Maraini), 1691
Infectious Ribonucleic Acid as Precursor of Tobacco Mosaic Virus (Reto Engler and Prof. Gerhard Schramm), 1277
Infective 'Ribonucleic Acid': Yield of, from Impure Murray Valley Encephalitis Virus after Different Treatments (G. L. Ada and S. G. Anderson), 799
Infektionskrankheiten des Menschen und ihre Erreger (herausgegeben von Prof. Dr. A. Grumbach und Prof. Dr. Kikuth), *review* by Prof. P. C. C. Garnham, 352
Inferior Mesenteric Ganglion in Man (J. A. Southam), 697
Inflammable Gas: Effects of Arc Stage of Electrical Discharge on Ignition of (I. Berz), 669; (W. Nethercot and H. G. Riddlestone), 669
Influence of the Anterior Pituitary on the Ageing Process in the Ovary (Dr. E. C. Jones and Prof. P. L. Krohn), 1155
Influence of Dietary Cod-liver Oil and some Fractions of Cod-liver Oil on Serum Cholesterol-level of Rats (A. P. de Groot and S. A. Reed), 1191
Influence of Drugs and Physical Agents upon Mitosis: Method for Testing the (Prof. Elio Guido Rondanelli, Pasquale Gorini and Domenico Pecorari), 190
Influence of Ions on the Uptake of Glucose and on the Effect of Insulin on it by Rat Diaphragm (Dr. Gangagobinda Bhattacharya), 324
Influence of Larval Population Density on Fluctuation in Mosquito Numbers (Gordon Surtees), 269
Influence on Marine Biology, especially Fisheries: Shorewards Upslope of the Layer of Minimum Oxygen off Bombay—its (Dr. J. N. Carruthers, S. S. Gogate, J. R. Naidu and T. Laevastu), 1084
Influence of Temperature on the Number of Vertebrae in Fish (Dr. Yasuo Itazawa), 1408
Influence of Temperature and Light on Reproduction in Male Rats (F. A. Soliman and A. S. Abd-El-Malek), 266
Influence of L-3',5,3-Triiodothyronine on the Oxidative Phosphorylation of Tumour Mitochondria (Prof. W. Lührs, E. Heise and G. Bacigalupo), 1534

Influence of Vitamin D on Synthesis of Hexosamine by Rachitic Rat Cartilage (P. K. Dikshit), 334
Influenza Virus : New Inhibitor and Erythrocyte Receptor Substances for certain Asian Strains of (Gy. Takátsy and K. Barb), 52
Influenza Virus Multiplication : Inhibition of, with a Glucose Metabolite (2-deoxy-D-glucose), (Prof. Edwin D. Kilbourne), 271
Information : Biological—Theory and Practice, *review* by Dr. Roy Markham, 1292
Information, Central Office of (Ministry of Housing and Local Government and the) : Pamphlet on Smoke is Your Enemy, 1163
Information, Central Office of (Ministry of Supply and) : An Invitation to Science Graduates, 651
Information (Preliminary), on the Genetics of Ethiopian Coffees (Dr. Alcides Carvalho), 906
Information (Scientific) : Availability of, 135
  International Conference on (U. S. National Academy of Sciences—National Research Council, the U.S. National Science Foundation and the American Documentation Institute), 147
Information (Taxonomic) : The Presentation of—a Short Guide for Contributors to Flora Europaea (Dr. V. H. Heywood), 721
Information Service in Libraries (D. J. Foskett), *review* by R. Brightman, 781
Information Services : Overseas, 1417
  Regional Technical, 1569
Information Services Overseas : British Books and, 1417
Information Theory and its Applications to Fundamental Problems in Physics (Prof. L. Brillouin), 501
Infra-red Dispersion Wave-lengths for Solid Lithium Fluoride containing varying Proportions of Lithium Isotopes (Prof. D. J. Montgomery and R. H. Misho), 103
Infra-red Spectral Changes occurring upon the Interaction of Polynucleotides : A Proposed Interpretation of (H. Todd Miles), 1814
Infra-red and the Near Ultra-Violet Absorption Spectra of Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b* (Dr. C. N. R. Rao, J. Ramachandran, M. S. C. Iah, S. Somasekhara and T. V. Rajakumar), 1475
Infusion (Parenteral Glucose), and Glycerol Feeding : Depression in Percentage of Milk Fat by (W. S. Vallance and Prof. G. L. McClymont), 466
Ingen-Housz, Arnold Hugo : Elected an Honorary Member of the Iron and Steel Institute, 931 ; work of, 931
Ingham, C. E., and others : Thickness of the Earth's Crust in Antarctica, 306
Ingles, Jean M. (Crowcroft, Peter, and) : Seasonal Changes in the Brain-case of the Common Shrew (*Sorex araneus* L.), 907
Inglis Lecture for 1958 (Prof. Max Beberman), 1366
Ingold, Sir Christopher : Elected to Fellowship of the Imperial College of Science and Technology, 1161
Ingram, Dr. V. M. : Constituents of Human Haemoglobin—Separation of the Peptide Chains of Human Globin, 1795
Ingram, Dr. V. M. (Murayama, Makio, and) : Constituents of Human Haemoglobin—Comparison of Normal Adult Human Haemoglobin with Haemoglobin I by 'Fingerprinting', 1798
Ingredients (British Compounding), for Rubber (compiled by Brian J. Wilson), *review* by Dr. W. J. S. Naunton, 779
Inheritance of Coat Color in Dogs (Dr. Clarence C. Little), *review* by Dr. Alex Comfort, 5
Inhibiting and Stimulating Growth (Factors), of *Mycobacteria* in the Blood and Serum of Non-immunized and Immunized Animals (J. Hubáček and I. Málek), 187
Inhibition of Electron Transport and the Swelling of Isolated Mitochondria (Dr. J. B. Chappell and Dr. G. D. Greville), 1525
Inhibition of Growth by Cortisone in Chicken Embryos : Effect of Amniotic Fluid on (Dr. P. de Franciscis and Prof. W. Landauer), 617
Inhibition of Growth and Respiration of *Ophiobolus graminis* var. *avenae* and *Aspergillus niger* by Cystine (Elizabeth M. C. Turner), 1130
Inhibition of Influenza Virus Multiplication with a Glucose Antimetabolite (2-deoxy-D-glucose), (Prof. Edwin D. Kilbourne), 271
Inhibition of Polynucleotide Phosphorylase by Degraded Ribonucleic Acid—its Reversal by various Agents (Dr. Roland F. Beers, jun.), 1335
Inhibition of Sensitiveness to Nicotine of Rabbit Aorta by Reserpine, Hexamethonium, Ethyl Flavone-7-Oxyacetate and other Compounds (Dr. I. Setnikar and M. Ravasi), 898
Inhibition and Excitation : Recording, in the Cat's Retinal Ganglion Cells with Intracellular Electrodes (Dr. Torsten N. Wiesel), 264
Inhibition (Anion), of α-Glycerophosphate Dehydrogenase (Dr. Otto Z. Sellinger and Dr. O. Neal Miller), 889
Inhibition (Epinephrine), of Liver Tyrosine Oxidation : Reversal of (Prof. Gerald Litwack and Valentina Wojciechowski), 1675
Inhibition (Local), by Lactation of chemically induced Breast Tumours in Mice of the *IF* Strain (June Marchant), 629
Inhibition (Recurrent), in Cerebral Cortex (Dr. Roger M. Morrell), 979
Inhibition (Selective), of Formation of Deoxyribonucleic Acid in *Escherichia coli* by Mitomycin C (S. Shiba, A. Terawaki, T. Taguchi and Prof. J. Kawamata), 1056
Inhibitor in Potato : Differential Response of Human Serum Cholinesterase Types to an (Dr. H. Harris and Mary Whittaker), 1808
Inhibitor (Bacterial), in Distilled Water : A Source of Error in Microbiological Assays attributable to a (S. A. Price and L. Gare), 838
Inhibitor (A Germination), and Root-Growth Retarder in Chou Moellier (*Brassica oleracea* var.), (A. G. Campbell), 1263
Inhibitor (New), and Erythrocyte Receptor Substances for certain Asian Strains of Influenza Virus (Gy. Takátsy and K. Barb), 52
Inhibitor (Relatively Weak), of some Sulphydryl Enzymes : Selenite as a (Dr. Cho Ching Tsen and Prof. H. Bruce Collier), 1327
Inhibitors (Growth and Germination) : Phenolic Acids as, in Dry Fruits (M. Varga and E. Köves), 401
Inhibitors (Monoamine Oxidase) : Ganglionic Block and (Dr. Sheldon B. Gertner), 750
Inhibitory Action of Amino-Acid Esters on the Production of Extracellular Amylase by *Penicillium chrysogenum* (Dr. L. Horváth, S. Bajusz and A. Szentirmai), 477
Inhibitory Effect of Colchicine upon the Transplantable Fibroma of the Skin in the Newt *Triturus taeniatus* (Prof. A. Stolk), 555
Initial Stage of Reaction : Gas Phase Oxidation of Hydrocarbons—Endothermic Nature of the (Dr. K. C. Salooja), 602
Initiation of Thermal Reactions by the Flash Illumination of Absorbing Bodies (Dr. J. L. Lundberg and Dr. L. S. Nelson), 1560
Injected Progesterone : Recovery of, and its relation to the Onset of Human Labour (Prof. Lars Ph. Bengtsson), 405
Injection of Adrenaline : Rumination in Sheep caused by (R. N. B. Kay), 552
Injections (β-Hydroxybutyrate) : Effect of, on the Pancreatic Activity of Guinea Pigs (Dr. H. D. Brahmachari and Mahendra Kumar), 51
Injury-feigning Behaviour of Wood-Pigeons (C. S. Payne), 1643
Inland Waterways in Britain (House of Lords Debate on), 1305
Innes, K. Keith (Goodlett, V. Wilson, and): Hollow-Cathode Emission of the AlO Spectrum, 243
Inorganic Micronutrients in Physiology and Agriculture, *review* by Dr. E. J. Hewitt, 1009
Inorganic Sulphate : Utilization of, by Baker's Yeast (Dr. A. Kleinzeller, A. Kotyk and L. Kováč), 1402
Inositol : Antagonism of Choline and (Dr. B. W. Agranoff and M. R. Spivey Fox), 1259
Insdoc : Report for 1957-58, 721
Insect, *Calliphora erythrocephala* Meig. : Neurosecretion and Intestinal Proteinase Activity in an (Ellen Thomsen and Ib Møller), 1401
Insect *Rhodnius* : Oxygen Deficiency and Radiation Damage in the (W. F. Baldwin and T. N. Salthouse), 974
Insect Nerve : Collagen in the Perilemma of (David S. Smith and Prof. V. B. Wigglesworth), 127
Insect Resistance to Insecticides (F. P. W. Wintringham), 1508
Insect Toxicologists' Information Service : Bulletin No. 1, 1093
Insect and Food-plant: Proceedings of a Symposium on (Wageningen, 1957, under the auspices of the Comité Européen de Zoologie Agricole and the Agricultural University, Wageningen), *review* by Dr. C. J. Banks, 1767
Insecticide Resistance in Arthropods (Dr. A. W. A. Brown), 1508
Insecticides : Insect Resistance to (F. P. W. Wintringham), 1508
Insecticides (Solid) : 'Vapour Toxicity' of (P. Gerolt), 1121
Insects : Chemicals and, *review* by Dr. W. A. L. David, 352
  Methods of Testing Chemicals on (edited by Harold H. Shepard), Vol. 1, *review* by Dr. W. A. L. David, 352
  The True Book about (John Clegg), *review* by B. D. Moreton, 709
Inshore Waters of Antarctica near Mawson, 1956: Marine Studies in the (Dr. J. S. Bunt), 1541
Insoluble Cell Material derived from *Brucella* : Immunizing Properties of (J. Markenson, D. Sulitzeanu and Prof. A. L. Olitzki), 1693
Institut Français des Combustibles et de l'Energie : Gold Medals presented to Dr. D. T. A. Townend, Prof. W. H. McAdams, G. Darrieus, Prof. G. Ribaud, Dr. F. Münzinger and F. Squassi, 151
Institut Océanographique, Monaco : Annales, Nouvelle Série, Tome 35. Fasc. 4, Résultats scientifiques des Campagnes du Bathyscaphe *F.N.R.S. III*, 1954-57, 1651
Institut de Paléontologie Humaine, Paris: Mémoire 29, La Grotte de Fontéchevade, Deuxième partie, Anthropologie (Henri-V. Vallois) ; Troisième partie, Géologie et Paléontologie (H. Alimen, C. Arambourg et A. Schreuder, avec la collaboration de G. Henri-Martin, J. Berlioz et J. Bouchud), 1369
Institut T.N.O. (Stress Analysis Group of the Institute of Physics and the) : Conference at the Technische Hogeschool, Delft, 438
Institution Premium (Institution of Electronics), 1023
Instrument Encyclopedia (compiled by Edward W. Battey), *review* by Dr. C. A. Taylor, 1768
Instrument (Electrical) Test Service (British Scientific Instrument Research Association), 436
Instrument Society of America, and others : Twelfth Annual Conference on Electrical Techniques in Medicine and Biology, 1434
Instrument Technologists and Control Engineers : Education of (J. F. Coales), 1433
Instrument Technology, Society of : Presidential Address, Education of Instrument Technologists and Control Engineers (J. F. Coales), 1433
Instrument Technology, Society of, and others : Joint Symposium on Instrumentation and Computation in Process Development and Plant Design, 652
Instrumentation : High Energy Accelerators and (C.E.R.N. International Conference on), 1783
  Nuclear Reactor Control and (J. H. Bowen and E. F. O. Masters), *review* by R. Vaux, 1149
  Technology of (Prof. Eric B. Pearson), *review* by R. L. Grimsdale, 970
Instrumentation of Reactors : Control and (Harwell Reactor School Second Course on), 153
Instrumentation and Computation in Process Development and Plant Design (Institution of Chemical Engineers, the Society of Instrument Technology and the British Computer Society Joint Symposium on), 652
Instrumentation Education and Research, Foundation for : Grant of 5,100 dollars from the National Science Foundation, for a Conference on Instrumentation for Cloud and Weather Modification, 1372
Instruments in Industry (Evans Electroselenium, Ltd., series of leaflets on), 933
Instruments and Microscopes (Photometric) : Exhibition of (Degenhardt and Co., Ltd.), 1165
Insulating liquids : Light Emission from, due to Excitation by d.c. Fields near Breakdown (M. Darveniza), 743
Insulators : Surface Charges produced on, by Short- and Long-time Ionization (Dr. Stanley I. Reynolds), 671
Insulin : An Effect of, on Peptide Synthesis independent of Glucose or Amino-Acid Transport (Prof. Ira G. Wool and Dr. M. E. Krahl), 1399
  Effect of, on Sulphydryl Groups in Muscle (Dr. G. Ungar and Dr. S. Kadis), 49
  Influence of Ions on the Uptake of Glucose and on the Effect of, on It by Rat Diaphragm (Dr. Gangagobinda Bhattacharya), 324
  Mechanism of Action of (A. Dunn, N. Altszuler, Prof. R. C. de Bodo, R. Steele, D. T. Armstrong and J. S. Bishop), 1123
Insulin Antiserum : Production of Acute Insulin Deficiency by Administration of (P. H. Wright), 829
Insulin Deficiency (Acute) : Production of, by Administration of Insulin Antiserum (P. H. Wright), 829
Insulin and Glucose (*In vitro* Effects of), on Leucine-2^{14}-C Incorporation into Protein of Diaphragms of Hypophysectomized Rats (Dr. J. L. Kostyo), 1518
Insulin and Phenazine Methosulphate : Effect of, on Pathways of Glucose Catabolism in the Mammary Gland of the Rat (P. McLean), 182
Intake of Water and Weight of Body in Rats : Effect of Reduction of Stimulation on Consumption of Food, (Dr. Karl Weiss and Harry M. B. Hurwitz), 344

Integration Recording : A New Method of (Allen Strickler and Dr. William S. Gallaway), 1110
Intelligence, Family Background and Educational Progress in Scotland, *review* by Jean Floud, 493
Intelligence Unit for Natural History, 1231
Intense Ionization : Observations of, of Long Duration below 50 km. Altitude after some Strong Solar Flares (Dr. Bengt Hultqvist and Johannes Ortner), 1179
Intensity of Luminescence of Short-Persistence Phosphors : Rise and Decay of (Dr. R. Feinberg), 1546
Intensity of the (111) Reflexion for Diamond : Absolute Measurement of the (Prof. R. Brill and H. Zandy), 1387
Intensity (Cosmic-Ray) : Storm-Time Increase of (Prof. Sekiko Yoshida and Masami Wada), 381
Interaction between Ants on a Scent Trail (J. H. Sudd), 1588
Interaction between Kinetin and Indoleacetic Acid in the Control of Bud Reactivation in *Splachnum ampullaceum* (L.) Hedw. (Prof. K. E. von Maltzahn), 60
Interaction of Magnesium and Adenosine Diphosphate in Photosynthetic Phosphorylation (J. B. Mudd), 900
Interaction between Organic Hydroxy Acids and Germanic Acid in Aqueous Solution (E. R. Clark), 536
Interaction of Polynucleotides : A Proposed Interpretation of Infra-red Spectral Changes occurring upon the (H. Todd Miles), 1814
Interaction of Rotation and Vibration in Diatomic Band Spectra : Changes in Transition Probability due to the (R. C. M. Learner and Dr. A. G. Gaydon), 242
Interaction of 1,3,5-Trinitrobenzene with Ethoxide Ion (Dr. R. Foster), 1042
Interactions with other Drugs : Quantitative Measurement of the Effect of Lysergic Acid Diethylamide on Mice and its (Dr. J. R. Smythies), 545
Interactions with 'Mergamma D' : Effects of Heat and Loss of Moisture on the Dormancy of Wheat, and some (P. D. Hewett), 1600
Interdisciplinary Conference on Self-Organizing Systems (Information Systems Branch of the Office of Naval Research and the Armour Research Foundation), 86
Interface (Liquid–Liquid) : An Experimental Method for Diffusion and Extraction Studies across the (Dr. Thomas W. Martin), 312
Interfacial Phenomena (Physical Society Biennial Conference on Solid State Physics), 1097
Interfacial Tension between Water and Hydrocarbons : Effect of Low Concentrations of Alcohols on the (F. Franks and Dr. D. J. G. Ives), 316
Interferometry : International Symposium on (National Physical Laboratory), 223
Intergeneric Hybrids with Wheat : Genetic Control of Chromosome Pairing in (Dr. Ralph Riley, Victor Chapman and Gordon Kimber), 1244
Interior of Erythrocytes : Electrical Conductance and Dieletric Constant of the (H. Pauly), 333
Interlamellar (β-Type) Sorption Complexes (F. Aragón, J. Cano Ruiz and Dr. D. M. C. MacEwan), 740
Intermediate Hosts of *Schistosoma mansoni* : Generic Nomenclature of the (Dr. C. A. Wright), 906
Intermittent Starvation : Liver Hexokinase Activity in Rats adapted to (Dr. R. Petrásek), 329
'Internal Clock' in *Arthrenus verbasci* (L.) (Col., Dermestidae): Control of Diapause by an (G. M. Blake), 126
International Academy of Management : Election of new Fellows, 1719
International Association for the Exchange of Students for Technical Experience : Eleventh Annual Report, 85
  Report for 1957-58, 650
International Association for Research on Phosphates : Congress in Biarritz (Phosphates and Organic Substances in Nitrogen Deficiency), 513
International Association of Scientific Hydrology : Symposium on Water and Woodlands, 438
  Symposium on Lysimeters, 438
International Astronautical Federation : Tenth Congress, 934
International Atomic Energy Agency: Pamphlet on Technical Assistance, 864
International Bibliography of Nutrition, Food and Beverage Technology and Distribution, 1936-56 : Bibliography of Food—a Select (E. Alan Baker and D. J. Foskett), *review* by Dr. Magnus Pyke, 351, 582
International Botanical Congress : Ninth (Canadian Department of Agriculture), 1502
International Business Machines Corporation, Cortlandt, New York : Appointment of Dr. Herman H. Goldstine as resident manager of the Lamb Estate Research Center, 1502
  Appointment of Dr. H. J. Greenberg as manager of the Mathematics Theory Department of the Lamb Estate Research Center, 1502
International Chemical Notation : A Proposed (prepared by the Commission on Codification, Ciphering and Punched Card Techniques of the International Union of Pure and Applied Chemistry), tentative version subject to revision, *review* by Dr. E. H. Rodd, 960
International Commission on Higher Education in Nigeria, 1231
International Commission for the North West Atlantic Fisheries, and others : International Conference on Fishery Statistics, 1783
International Commission for Optics : Symposium on Modern Systems for Detecting and Evaluating Optical Radiation, 1571
International Conference on Co-ordination Chemistry : Fourth (organized by the Chemical Society, sponsored by the International Union of Pure and Applied Chemistry), 1784
International Conference on Fishery Statistics (Food and Agriculture Organization of the United Nations, the International Commission for the North West Atlantic Fisheries and the International Council for the Exploration of the Sea), 1783
International Conference on High Energy Accelerators and Instrumentation (C.E.R.N.), 1783
International Conference on Ionization Phenomena in Gases : Fourth (University of Uppsala in collaboration with the Swedish National Committee for Physics), 1164
International Conference on Low Temperature Physics and Chemistry : Proceedings of the Fifth (Madison, 1957), (edited by Joseph R. Dillinger), *review* by Dr. K. Mendelssohn, 1150
International Conference on Medical Electronics : Second, 1094
International Conference on Nuclear Structure (Queen's University, Kingston, Ontario, and Atomic Energy of Canada, Ltd.), 1571
International Conference on Operational Research : Second (International Federation of Operational Research Societies), 934
International Conference on Scientific Information (U.S. National Academy of Sciences–National Research Council, the U.S. National Science Foundation and the American Documentation Institutute), 147
International Congress of Biochemistry : Fourth (Proceedings to be published by the Pergamon Press), 510
International Congress on Corrosion : Proposal that it be held in London in 1961, 1094
International Congress of Physiological Sciences : Twenty-first, 1304
International Congress of Pure and Applied Chemistry : Seventeenth, 1368
International Congress on Radiation Research : Publication of the Proceedings, 368
International Congress on Radiology, 1304
International Congress of Refrigeration : Tenth, 1719
International Convention on Transistors and Associated Semiconductor Devices (Institution of Electrical Engineers), 652
International Co-operation Administration : Technical Assistance Programmes of the, 1163
International Council for Building Research, Studies and Documentation : International Congress in Rotterdam, 1783
International Council for the Exploration of the Sea, and others : International Conference on Fishery Statistics, 1783
International Council of Scientific Unions : Second meeting of the Committee on Contamination by Extra-Terrestrial Exploration, 925
International Council of Scientific Unions, and others : International Oceanographic Congress, 1093, 1502
International Courses on Nuclear Energy (European Nuclear Energy Agency of the Organization for European Economic Co-operation), 1163
International Cultural Affairs, 1569
International Embryological Conference : Fourth (Editorial Board of the *Journal of Embryology and Experimental Morphology*), 1164
International Federation of Operational Research Societies : Creation of, 17
  Second International Conference on Operational Research, 934
International Federation of Societies of Cosmetic Chemists : Formation of an, 1366
International Geophysical Year : Photography in the (Scientific and Technical Group of the Royal Photographic Society Symposium on), 1368
  Russian Contributions to the (Dr. N. A. Routledge), 1087
  United Kingdom Antarctic Report to the fifth meeting of the Special Committee for the, 1718
International Grassland Congress : Eighth, 223
International Institute of Refrigeration (Commission I) : Conference in Copenhagen, 1719
International Journal of Radiation Biology, Vol. I, No. 1, 1020
International Meteorological Organization Prize of the World Meteorological Organization awarded to Prof. J. Bjerknes, 1567
International Nickel Co., Inc., New York : Transfer of Dr. W. Steven as superintendent of the Development and Research Department of the Mond Nickel Co., Ltd., Birmingham, as director of research in the Development and Research Division of the, 1432
International Oceanographic Congress (American Association for the Advancement of Science, in co-operation with Unesco and the International Council of Scientific Unions), 1093, 1502
International Salon de la Chimie : Fifth, 1434
International School of Physics of the Società Italiana di Fisica (Summer Courses of the), 1368
International Scientific Film Association : Thirteenth Congress of the (British Scientific Film Association), 1783
International Seminar on the Atomic Mechanisms of Fracture (U.S. National Academy of Sciences, the U.S. National Science Foundation, the Office of Naval Research and the Air Force Office of Scientific Research), 154
International Standards for Drinking Water (United Nations : World Health Organization), 867
International Starch Convention (German Cereal Research Station, Detmold), 510
International Symposium on Experimental Biology, in commemoration of Lazzaro Spallanzani, 582
International Symposium on Food Microbiology : Proceedings of the Second (Cambridge, 1957), (The Microbiology of Fish and Meat Curing Brines, edited by Dr. B. P. Eddy), *review* by Dr. Magnus Pyke, 351
International Symposium on Hemophilia and Hemophilioid Diseases (edited by Prof. Kenneth M. Brinkhous), *review* by Prof. J. V. Dacie, 1221
International Symposium on Humic Acid (Plant Phenolics Group), 1719
International Symposium on Interferometry (National Physical Laboratory), 223
International Symposium on Mammary Cancer : Proceedings of the Second, held at Perugia, 1957 (edited by Lucio Severi), *review* by Dr. L. Foulds, 955
International Symposium on Recent Progress in Organic Chemistry (Mexico), 294
International Symposium on the Synthesis of Peptides (Czechoslovak Academy of Science), 152
International Symposium on Vaccination against Tuberculosis with Non-living Vaccines (Centro per la Vaccinazione Antitubercolare of the Istituto d'Igiene dell'Università di Pisa), 154, 722
International Union of Biochemistry : Symposium on Haematin Enzymes, 1571
International Union of Pure and Applied Chemistry : Formation of a Special Group under the auspices of the Analytical Chemistry Section, to make recommendations for a Standard Terminology in Gas Chromatography, 722
  Nomenclature of Organic Chemistry, 1957, *review* by Dr. E. H. Rodd, 960
  A Proposed International Chemical Notation (prepared by the Commission on Codification, Ciphering and Punched Card Techniques), tentative version subject to revision, *review* by Dr. E. H. Rodd, 960
International Union of Pure and Applied Chemistry (Commission on Geochemistry) : Symposium on Geochemistry, 1719
International Union of Pure and Applied Chemistry (organized by the Chemical Society and sponsored by the) : Fourth International Conference on Co-ordination Chemistry, 1784
International Wheat Genetics Symposium, 25
Internationalen Gerontologischen Gesellschaft (Europäischen Abteilung des Biologischen und Medizinischen Forschungskomitees der) : Symposium on Experimentelle Alternsforschung, Basel, 1956 (herausgegeben von F. Verzár), *review* by Prof. P. L. Krohn, 777

Internode Length in *Pisum sativum* and *Tropaeolum majus* : Effects of Wavelength and Time of Irradiation on (P. J. M. Sale and Dr. D. Vince), 1174
Interparticle Forces (Latent), in Clays (R. H. G. Parry), 538
Interpretation : Observation and—Proceedings of the Ninth Symposium of the Colston Research Society held in the University of Bristol, 1957 (edited by Prof. S. Körner in collaboration with Prof. M. H. L. Pryce), *review* by Dr. E. F. Caldin, 1010
Interpretation of Resonance Energies in the Photoproduction and Scattering of Pions from Hydrogen (Dr. K. M. Guggenheimer), 1758
Interpretation (A Proposed), of Infra-red Spectral Changes occurring upon the Interaction of Polynucleotides (H. Todd Miles), 1814
Intersexuality (Human) : A Case of, having a possible *XXY* Sex-determining Mechanism (Patricia A. Jacobs and Dr. J. A. Strong), 302
'Interstitial Graticule' Process (A. J. C. Hall and J. C. Hayes), 223
Intestinal Absorption of Vitamin B_{12} : Ethylenediamine Tetraacetate and the (Dr. J. Abels, M. G. Woldring, H. O. Nieweg, J. G. Faber and J. A. de Vries), 1395
Intestinal Proteinase Activity : Neurosecretion and, in an Insect *Calliphora erythrocephala* Meig. (Ellen Thomsen and Ib Møller), 1401
Intoxication (Acute Alcoholic) : Triiodothyronine in (Dr. Henry Newman and Marion Edmonds Smith), 689
Intracellular Electrodes : Recording Inhibition and Excitation in the Cat's Retinal Ganglion Cells with (Dr. Torsten N. Wiesel), 264
Intracellular Hydrogen Bonding in Heterocyclic Systems (E. W. Gill and E. D. Morgan), 248
Intracellular Particulate Matter of Rat Liver : Partition of Selenium-75 in the (Dr. Kenneth P. McConnell, Dorothy M. Roth and R. Duncan Dallam), 183
Intracellular Potential Records : Relation of Extracellular to, from Single Cardiac Muscle Fibres (Dr. E. M. Vaughan Williams), 1341
Inventory and Production : Studies in the Mathematical Theory of (Kenneth J. Arrow, Samuel Karlin and Herbert Scarf), *review* by Dr. L. S. Goddard, 1557
Inversion (The Spinel–Olivine), in Mg_2GeO_4 (Frank Dachille and Prof. Rustum Roy), 1257
Invertebrates : An Introduction to the Behaviour of (Dr. J. D. Carthy), *review* by Dr. G. A. Horridge, 4
  Responses of, *review* by Dr. G. A. Horridge, 4
Investigation (Derivatographic), of the Anthracite of the Don (M. Weltner), 1254
Investigation (Spectrophotometric), on the Orcein Derivative of Elastin (V. Scarselli), 1739
Investigations (New), with SCEPTRE III—Axial Positive Ion Velocities in SCEPTRE III (T. P. Hughes and Dr. S. Kaufman), 7 ; The Positive Ion Heating Mechanism in SCEPTRE III (Dr. A. A. Ware), 8
Investment in the Coal, Electricity and Gas Industries, 1650
Invitation to Science Graduates (Ministry of Supply and Central Office of Information), 651
Iodide (Mercuric) : Polymorphic Conversion of, on Alumina (Prof. Harry Zeitlin and Harry Goya), 1041
Iodine : Solution of, in Phosphorus (III) *Iso*cyanate (Dr. Ervin Colton and Lewis St. Cyr), 1042
Iodine in Human Serum : Discrepancy between the Distributions of, when estimated by Iodine-131 and Iodine-127 (Dr. Sidney C. Werner and Dr. Richard J. Block), 406, *erratum*, 722
Iodine-127 : Discrepancy between the Distributions of Iodine in Human Serum when estimated by Iodine-131 and (Dr. Sidney C. Werner and Dr. Richard J. Block), 406, *erratum*, 722
Iodine-131 : Albumin labelled with, in an Analbuminaemic Subject (T. Freeman, C. M. E. Matthews, Dr. A. S. McFarlane, H. Bennhold and E. Kallee), 606
  Chromatographic Behaviour of Human Albumin labelled with (Dr. S. Cohen), 393
  Incorporation of 5-Iodouracil labelled with Iodine-131 into the Deoxyribonucleic Acid of Human Leukaemic Leucocytes following *in vivo* Administration of 5-Iododeoxyuridine labelled with (Dr. M. L. Eidinoff, L. Cheong, E. Gambetta Gurpide, R. S. Benua and R. R. Ellison), 1686
  Labelling of Radiographic Contrast Media with (J. Leibster, J. Kácl and A. Babicky), 1474
Iodine-131 Clearance-rates as an Indication of the Blood Supply of Bone (Dr. P. G. Laing and Dr. Albert B. Ferguson, jun.), 1595
Iodine-131 in Human Thyroids and Iodine-131 and Caesium-137 in Milk (Measurements at Leeds following the Windscale Reactor Accident), (Dr. P. R. J. Burch), 515
Iodine-131 in Milk : Increase in Background Gamma-Radiation and its Correlation with (Measurements at Leeds following the Windscale Reactor Accident), (Prof. F. W. Spiers), 517
Iodine-131 and Caesium-137 in Milk : Iodine-131. in Human Thyroids and (Measurements at Leeds following the Windscale Reactor Accident), (Dr. P. R. J. Burch), 515
Iodine-131 and Iodine-127 : Discrepancy between the Distributions of Iodine in Human Serum when estimated by (Dr. Sidney C. Werner and Dr. Richard J. Block), 406, *erratum*, 722
Iodine Compound, I_2OH^-: A New (Dr. J. Sigalla), 178
Iodine Compound associated with Albumin in the Plasma of Thyrotoxic Patients (Christina Cameron and K. Fletcher), 116
Iodine Permeability and the Gram Characteristic of Cells : A Correlation between (Prof. J. W. Bartholomew, Thomas Cromwell and Harold Finkelstein), 123
Iodine Uptake of the Thyroid Gland : Effect of Monofluorosulphonate, Difluorophosphate and Fluoroborate Ions on the (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Iodine and Copper Uptake by Soil Organic Matter (J. M. Northmore), 1309
5-Iododeoxyuridine labelled with Iodine-131 : Incorporation of 5-Iodouraciel labelled with Iodine-131 into the Deoxyribonucleic Acid of Human Leukaemic Leucocytes following *in vivo* Administration of (Dr. M. L. Eidinoff, L. Cheong, E. Gambetta Gurpide, R. S. Benua and R. R. Ellison), 1686
Iodopsin (Lumi- and Meta-) : Chicken (Action of Light on Visual Pigments), (Dr. Ruth Hubbard and Dr. Allen Knopf), 448
5-Iodouracil labelled with Iodine-131 : Incorporation of, into the Deoxyribonucleic Acid of Human Leukaemic Leucocytes following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131 (Dr. M. L. Eidinoff, L. Cheong, E. Gambetta Gurpide, R. S. Benua and R. R. Ellison), 1686
Ion (Ethoxide) : Interaction of 1,3,5-Trinitrobenzene with (Dr. R. Foster), 1042
Ion Contents (Sodium, Potassium, Calcium and Chloride), and Protein Fractions in the Fluids of Chick Embryos (Dr. Aleksandra Smoczkiewiczowa), 1260
Ion Exchange (Oak Ridge National Laboratory Conference on), 1719
Ion-Exchange between Mica Surfaces : Adhesion and (George L. Gaines, jun.), 1109
Ion-Exchange and Partition Techniques : A Two-Dimensional Paper Chromatographic Method combining (C. S. Knight), 165
Ion Exclusion : Separation of Mono-*n*-butyl Phosphate and Di-*n*-butyl Phosphate by means of (E. Cerrai and F. Gadda), 1528
Ion Runaway in ZETA : Possibility of (Dr. A. Gibson), 101
Ionic Reaction : Exchange Reaction induced by Radiation between Diethyl Sulphate and Labelled Sulphuric Acid—a Possibly (Dr. Paul Y. Feng and Ahren Jacobson), 251
Ionization (Intense) : Observations of, of Long Duration below 50 km. Altitude after some Strong Solar Flares (Dr. Bengt Hultqvist and Johannes Ortner), 1179
Ionization (Secondary), in Humid Air (Prof. J. M. Meek), 1805
Ionization (Short- and Long-time) : Surface Charges produced on Insulators by (Dr. Stanley I. Reynolds), 671
Ionization (Sporadic *E*-Region), 'Spread F', and the Twinkling of Radio Stars (Dr. D. F. Martyn), 1382
Ionization Coefficient (Townsend's First), in Pure Nitrogen (Dr. A. E. D. Heylen), 1545
Ionization Phenomena in Gases (University of Uppsala in collaboration with the Swedish National Committee for Physics Fourth International Conference on), 1164
Ionization Potentials of Electron Donors (Dr. R. Foster), 1253
Ionization Pumps : Dual Pumping Speeds of some (G. Carter), 1619
Ionized Plasmas : Propulsion by Ions and (Dr. A. von Engel), 573
Ionizing Radiation : The Effects of, on Natural and Synthetic High Polymers (Dr. Frank A. Bovey), *review* by Prof. C. E. H. Bawn, 637
  Protective Effect of β-Aminoethylthiosulphuric Acid against (Bo Holmberg and Bo Sörbo), 832
  Variation of Sensitivity to, with Age (M. L. Crosfill, Patricia J. Lindop and Prof. J. Rotblat), 1729
Ionizing Radiations : Bibliography on the Effects of, on Plants, 1896-1955 (Arnold H. Sparrow, John P. Binnington and Virginia Pond), *review* by Dr. Alma Howard, 639
Ionosphere : Phase Characteristics of Radio Signals received via the (D. W. Morris and C. J. Hughes), 310
  Refraction of Extra-Terrestrial Radio Waves in the (M. M. Komesaroff and C. A. Shain), 1584
Ionospheric Disturbances at Night : Occurrence of Giant Travelling (L. H. Heisler), 383
Ionospheric Electron Content : Deduction of, from the Faraday Fading of Signals from Artificial Earth Satellites (W. T. Blackband, B. Burgess, I. L. Jones and G. J. Lawson), 1172
Ionospheric Phenomenon : A New (H. J. A. Chivers and H. W. Wells), 1178
Ionospheric Studies in the Arctic : Meteorological and, *review* by James Paton, 279
Ions : Influence of, on the Uptake of Glucose and on the Effect of Insulin on it by Rat Diaphragm (Dr. Gangagobinda Bhattacharya), 324
  Relation between the Polarizability of, and other Significant Properties (Prof. K. Krishnamurti), 1043
Ions and Ionized Plasmas : Propulsion by (Dr. A. von Engel), 573
Ions (Bivalent Metal) : Reversal of Antibiotic Action of Cycloheximide (Actidione) by (M. Blumauerová and J. Stárka), 261
Ions (Monofluorosulphonate, Difluorophosphate and Fluoroborate) : Effect of, on the Iodine Uptake of the Thyroid Gland (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Ions (Negative Air) : An Enzymatic Basis for the Acceleration of Ciliary Activity by (Prof. A. P. Krueger and Richard F. Smith), 1332
Irani, Roshan J., and Ganapathi, D. K. : Carbohydrate Constituents of the Mycelium of *Penicillium chrysogenum* grown in Media with Different Sources of Carbon, 758
Ireland : Ancient, *review* by Joseph Raftery, 1704
  Early Christian (Máire and Liam de Paor), *review* by Joseph Raftery, 1704
Ireland (Northern) : Physiological Races of *Phytophthora infestans* Mont. (de Bary) in (K. G. Proudfoot), 626
Iron : Fusion Curve of, to 96,000 Atmospheres—Temperature of the Earth's Core (Dr. H. M. Strong), 1381
Iron (Radioactive) : Incorporation of, into Haematin *a* (Prof. R. Lemberg and A. Benson), 678
Iron Agar (Kligler's) : The Phenylalanine Test on, for the Identification of *Proteus* (D. J. Stewart), 1537
Iron Content in the Serum of Cows with Hypocupraemia (Dr. Rajmund Rys), 1596
Iron Filaments Magnets : Fine (F. P. Levi), 1251
Iron-*bis*-Indigo Complex : Model Oxygen-carrying Compounds and the (L. F. Larkworthy and Prof. R. S. Nyholm), 1377
Iron and Steel : Principles underlying the Manufacture of (Exhibition at the Science Museum, London), 293
Iron and Steel Institute : Bessemer Gold Medal for 1959 awarded to Prof. Bo Kalling, 930
  Sir Robert Hadfield Medal for 1959 awarded to Albert Jackson, 930
  Andrew Carnegie Silver Medal for 1958 awarded to Dr. P. Vasudeva, 930
  Williams Prize for 1958 awarded to H. C. Child, 930
  Election of Arnold Hugo Ingen-Housz as an Honorary Member, 931
  Election of new members to the Council, 1234
Iron and Steel Institute and the British Iron and Steel Research Association : Translation Service of the, 224
Iron and Steel Research Association, British (Iron and Steel Institute and the) : Translation Service of the, 224
Iron-cored Search Coils : Improvement in the Magnetic Detecting Power of (D. F. Walker), 173
Iron Ore in the Soviet Union (Prof. S. I. Tomkeieff), 1028
Iron Ore Deposits of the Kursk Magnetic Anomalies (P. Y. Antropov), 1028
Iron–Protein Link in Haemoglobin and Myoglobin (Dr. J. E. O'Hagan), 393
Irradiated *in vivo* : A Survival Curve for Mammalian Cells (Dr. H. B. Hewitt and C. W. Wilson), 1060
Irradiated Deoxyribonucleic Acid : Electron Spin Resonance in (Dr. J. W Boag and A. Müller), 831

Irradiated Humans : An Alteration in the Excretion of Free Serine in Urine from (Dr. Arthur L. Kretchmar), 1809
Irradiated Mice : Effect of Pyrimidine Deoxyribonucleotides on the Regeneration of Bone-Marrow in (Dr. Z. Karpfel, J. Soška and V. Drášil), 1600
Irradiated Mice treated with Homologous Tissue Suspensions : Long-term Survival of (Eric L. Simmons, Leon O. Jacobson, Edna K. Marks and Evelyn O. Gaston), 556
Irradiated Polyethylene : A Dose Test for (E. H. Cornish and D. M. Cutting), 1804
Irradiated Rats : Effect of High Oxygen Pressure on the Protective Action of Cystamine and 5-Hydroxytryptamine in (H. A. S. van den Brenk and Ruth Moore), 1530
Irradiated Solids : Thermal Decomposition of (Dr. E. G. Prout), 884
Irradiation : Effects of Wave-length and Time of, on Internode Length in *Pisum sativum* and *Tropaeolum majus* (P. J. M. Sale and Dr. D. Vince), 1174
Irradiation with Ultra-violet Light : Biochemical Heterogeneity of the Ribonucleic Acid synthesized by *Escherichia coli B* after (Kenshi Suzuki and Jöji Ono), 395
Irradiation (Thermal Neutron) : Effect of, on Oxide Catalysts for the Decomposition of Nitrous Oxide (Yasukazu Saito, Yukio Yoneda and Shoji Makishima), 388
Irradiation (Ultra-Violet) : Reduction of Menadione in Hexane by Chlorophyll *a* under (Rudolph J. Marcus and Lloyd J. Moss), 990
Irradiation (X- and Ultra-violet) : Effects of, on the Incorporation of Phosphorus-32 into Isolated Nuclei of Rabbit Appendix (Yuong-Tchel Tchoe and Prof. A. Sibatani), 1334
Irregularities in the Density of the Upper Atmosphere—Results from Satellites (D. G. King-Hele and D. M. C. Walker), 527
Irvine, Dr. D. H. (Hanania, Dr. G. I. H., and) : Ferrous and Ferric Complexes with Pyridine 2-Aldoxime, 40
Irving, Elizabeth A. : *α*-Tocopherol and Hyaluronidase *in vivo*, 398
Irving, Dr. H. M. N. H. : Co-ordination Chemistry (Stability of Metal Complexes in Solution), 1784
Irving, Prof. J. T. : Histochemical Changes in the Epiphyseal Cartilage during Rickets, 1734
Isaac, Peter C. G. (Chmielowski, J., and) : Gas–Chromatographic Observation of the Reduction of Carbon Dioxide to Methane during Anaerobic Digestion, 1120
Isaac, Dr. P. J., and others : Variations in the Value of Reynolds Number at the Transition from Streamline to Turbulent Flow, 531
Isaković, Dr. K., and others : Failure of Ribonucleoprotein to transfer Antibody Formation, 1400
Ishiko, Nobusada, and Loewenstein, Prof. Werner R. : Properties of a Receptor Membrane—Spontaneous Fluctuations in Generator Potential in a Receptor Membrane, 1725
Island (Skomer), as a Nature Reserve, 222
Isochasms : Auroral (Dr. Bengt Hultqvist), 1478
*Iso*cyanate (Phosphorus (III)) ; Solution of Iodine in (Dr. Ervin Colton and Lewis St. Cyr), 1042
*iso*Cyanates and *iso*Thiocyanates : Equilibration of (Prof. L. C. Case), 675
Isolated Chloroplasts : Photochemical Reduction of Blue Tetrazolium by (John J. Taylor and Prof. Meyer Chessin), 626
'Isolated' Colon : Enzyme Activity in the (Dr. B. F. Martin), 1464
Isolated Mitochondria : Effect of Reduced Diphosphopyridine Nucleotide on the Swelling of (Dr. G. Di Sabato), 997
  Effects of 2:4-Dinitrophenol and other Agents on the Swelling of (Dr. J. B. Chappell and Dr. G. D. Greville), 1737
  Inhibition of Electron Transport and the Swelling of (J. B. Chappell and Dr. G. D. Greville), 1525
Isolated Nuclei of Rabbit Appendix : Effects of X- and Ultra-violet Irradiation on the Incorporation of Phosphorus-32 into (Yuong-Tchel Tchoe and Prof. A. Sibatani), 1334
Isolated Spleen Cells transferred to Recipients in Absence of Homotransplantation Reaction : Antibody Formation by (Dr. Z. Trnka and I. Ríha), 546
Isolation of an Activator for Phospholipase *D* (Herbert Weiss, Herbert E. Spiegel and Elwood Titus), 1393
Isolation of Kojibiose from Honey (Toshiyuki Watanabe and Kiyoshi Aso), 1740
Isolation of a Lipopolysaccharide from *Vibrio fetus* (S. M. Dennis), 186
Isolation of *l*-Quinic Acid in Citrus Fruit (Dr. S. V. Ting and Dr. E. J. Deszyck), 1404
Isolation of Two Types of *Pasteurella haemolytica* from Sheep (Geoffrey R. Smith), 1132
Isolation and Role in Metabolism : Amino-Acetone, its (Dr. W. H. Elliott), 1051
Isomerism (*Cis-trans*), of Thioindigo Dyes in the Solid State (Dr. G. S. Egerton), 389
Isomerization of Poly-*cis*-carotens by Chlorophyll *in vivo* and *in vitro* (Dr. H. Claes and T. O. M. Nakayama), 1053
Isomers: Resolution of Chlorpheniramine and the Pharmacological Properties of its (R. T. Brittain, Dr. P. F. D'Arcy and Dr. J. H. Hunt), 734
Ison, C. I. : The Fairy Fly, *Prestwichia aquatica*, 1782
Isoniazid : Inactivation of, by Peroxidase (Dr. M. O. Tirunarayanan and Dr. W. A. Vischer), 681
Isono, K., and others : Volcanoes as a Source of Atmospheric Ice Nuclei, 317
Isosmotic Potassium Chloride : Excitation of the Squid Axon Membrane in (Dr. John W. Moore), 265
*iso*Thiocyanates : Equilibration of *iso*Cyanates and (Prof. L. C. Case), 675
Isotope (Radioaktive), in der Biochemie (Prof. Engelbert Broda), *review* by Dr. H. R. V. Arnstein, 1149
Isotope Effect (Kinetic), in the Bromination of Dimethylaniline (P. G. Farrell and Dr. S. F. Mason), 250
Isotopes (Lithium) : Infra-red Dispersion Wave-lengths for Solid Lithium Fluoride containing varying Proportions of (Prof. D. J. Montgomery and R. H. Misho), 103
Isotopes (Radioactive), in Biochemistry, *review* by Dr. H. R. V. Arnstein, 1149
Isotopes (Radioactive), in Britain : Production and Marketing of, 720
Isotopic Composition of Boron and its Atomic Weight (W. J. Lehmann and I. Shapiro), 1324
Isotopic Composition of Lead from British Mineral Deposits (S. Moorbath), 595
Italian National Committee for Nuclear Research : Congress on Nuclear Energy, 1094
Italian Nuclear Research Centre at Ispra, 1232
Italian Physical Society : Summer Courses of the International School of Physics, 1368
Itano, Dr. Harvey A., and Robinson, Elizabeth : Constituents of Human Haemoglobin—Formation of Normal and Doubly Abnormal Haemoglobins by Recombination of Haemoglobin I with S and C, 1799
Itazawa, Dr. Yasuo : Influence of Temperature on the Number of Vertebrae in Fish, 1408
Ives, Dr. D. J. G. (Franks, F., and) : Effect of Low Concentrations of Alcohols on the Interfacial Tension between Water and Hydrocarbons, 316
Ivin, Dr. K. J. : Awarded a research grant by the Leverhulme Trust, 1499
Iyengar, Dr. M. R. S. : Micro-volume Drop-plate Assay of Antibiotics, 684
Iyengar, M. S. : The Nature of Coal (High-sulphur Coals), 1438
Iyer, Dr. H. M. : Automatic Reduction of Geophysical Data (Lack of Interest in the Study of Microseisms), 1168
Iyer, Dr. H. M., and Hinde, B. J.: Microseismic Research at the National Institute of Oceanography, 1558

JABALPUR Series : Occurrence of Two Characteristic Wealden Ferns in the (Dr. M. N. Bose and Sukh Dev), 130
Jacchia, Dr. Luigi G. : Two Atmospheric Effects in the Orbital Acceleration of Artificial Satellites, 526
  Corpuscular Radiation and the Acceleration of Artificial Satellites, 1662
Jackson, Albert : Awarded the Sir Robert Hadfield Medal for 1959 of the Iron and Steel Institute, 930
Jackson, Dorothy J. : British Water Beetles of the Family Hydrophilidae, *review*, 1420
Jackson, Dr. E. H. : Ultrasonic Vibrations at 10,000 Megacycles, 1570
Jackson, Dr. John : *Obituary* by Sir Harold Spencer Jones, 81
Jackson, W. D. : The Three-Dimensional or Solid-Image Microscope, 1048
Jacobs, Prof. J. A. : Geomagnetic Micropulsations, 381
Jacobs, Patricia A., and Strong, Dr. J. A. : A Case of Human Intersexuality having a possible *XXY* Sex-determining Mechanism, 302
Jacobs, Dr. P. W. M. : Electrical Double Layer in Colloid Science (Electrical Conductivity and Electro-osmotic Water Transport), 80
Jacobs, Dr. S. : Determination of Nitrogen in Proteins by means of Indanetrione Hydrate, 262
  Regeneration of Cellulose Acetate Membranes used for Zone Electrophoresis, 1326
Jacobsite with Different Cell Dimensions : Variation in Etch Behaviour of (Dr. Supriya Roy), 1256
Jacobson, Ahren (Feng, Dr. Paul Y., and) : Exchange Reaction induced by Radiation between Diethyl Sulphate and Labelled Sulphuric Acid—a Possible Ionic Reaction, 251
Jacobson, Leon O., and others : Long-term Survival of Irradiated Mice treated with Homologous Tissue Suspensions, 556
Jaeger, Prof. J. C. : Sub-surface Temperatures on the Moon, 1316
Jaffé, Dr. Werner G., and Gaede, Karl : Purification of a Toxic Phytohaemagglutinin from Black Beans (*Phaseolus vulgaris*), 1329
Jajasan Siswa Lokantara : Fellowships, 1304
James, D. G. : Elected president of the Science Masters' Association, 299
James, Sir Eric : Life peerage conferred on, 294
James, F. W. : *Obituary* by P. O. Wolf, 646
Jammu Hills : Glaciation in the (Prof. R. C. Mehdiratta), 255
Jankovič, Dr. B. D., and Arsenijevič, K.: Histochemical Demonstration of A and B Antigens in Platelets, 695
Jankovič, Dr. B. D., and others : Failure of Ribonucleoprotein to transfer Antibody Formation, 1400
Janneh Kunda (Gambia Land Use Map, Sheet 12/1), (Directorate of Overseas Surveys), 20
Jansen, Dr. S. E. : Appointed keeper of the Department of Chemistry in the Science Museum, London, 224
Japan Atomic Power Company : Construction of a 150-MW. Atomic Power Station, 1019
Jarrett, Dr. A. H. : Appointed lecturer in applied mathematics at Queen's University, Belfast, 1024
Jeffares, Prof. A. Norman : Language, Literature and Science, 1366
Jeffery, J. W. (Cruise, A. J., and) : Polysaccharide Fibres in Mammalian Connective Tissue, 677
Jeffrey, Prof. G. A.: Awarded a grant of 38,415 dollars by the Air Force Office of Scientific Research, to initiate research on the structure of crystalline hydrates of organic molecules and ions, 86
Jeffrey, Prof. G. A. (Craven, Dr. B., and) : Structure of Malvalic Acid and some related C_{18} and C_{19} *Cyclo*propane Fatty Acids, 676
Jelly (Royal) : Activity of 10-Hydroxydecenoic Acid from, against Experimental Leukaemia and Ascitic Tumours (Prof. Gordon F. Townsend, Dr. Joseph F. Morgan and Dr. Barbara Hazlett), 1270
  Identification of 10-Hydroxy-Δ^2-decenoic Acid in (S. A. Barker, Dr. A. B. Foster, D. C. Lamb and N. Hodgson), 996
Jelly-fish, *Cyanea capillata* : The Amphipod, *Hyperia galba*, an Ectoparasite of the (Prof. Erik Dahl), 1749
Jenkin, Dr. Penelope M. (Carlisle, Dr. D. B., and) : Terminology of Hormones, 336
Jenkins, Dr. A. D., and others : The Kinetics of Vinyl Polymerization by Radical Mechanisms, *review* by Prof. C. E. H. Bawn, 637
Jenkins, Dr. B. C. : Wheat Genetics, 26
Jenkins, Prof. Francis A., and White, Prof. Harvey E. : Fundamentals of Optics, third edition, *review* by G. R. Noakes, 969
Jenkins, Dr. J. Travis : *Obituary* by Colin Matheson, 789
Jennings, F. W. : Parasitology (Immunity to *Dictyocaulus* Infection in Cattle), 1506
Jennings, Dr. Jesse D. : Awarded a Viking Fund Medal and Award of 1,000 dollars by the Wenner-Gren Foundation for Anthropological Research, 1434
Jennings, Dr. Robert B., and others : Anti-Thyroid Action of *β*-Aminoethyl*iso*thiouronium Dibromide in Rats, 470
Jensen, A., and Basolo, F. : Co-ordination Chemistry (Kinetics of the Substitution Reactions of *bis*cyclopentadienyl Titanium Dihalides), 1784
Jensen, H. L. : Allyl Alcohol as a Nutrient for Micro-organisms, 903
Jensen, Vagn : Production of Acid from Arabinose and Xylose by Strains of *Azotobacter*, 1536
Jephcott, D. F. : Alfvén Waves in a Gas Discharge, 1652

Jezowska-Trzebiatowska, B. : Co-ordination Chemistry (Magnetic Susceptibility of Rhenium Compounds), 1784
Jinks, J. L. : Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
Job : *Comments on the* (Dr. Isabel Blain), 372
Jobs for School Leavers, 1500
Jodrell Bank Radio Telescope : Cost of the, 862
Johanovsky, Dr. J. : Demonstration of Endogenous Pyrogen in Serum during Systemic Tuberculin Reaction in Rabbits, 693
Johansson, Prof. C. H., and Sternhoff, L. : Suppressed Light Emission of the Reaction Zone in Detonation, 247
John, Dr. B. : Appointed lecturer in cytology in the Department of Genetics in the University of Birmingham, 153
John, Prof. W. J. : *Obituary* of Prof. J. T. MacGregor-Morris, 1497
Johnson, A. A., and Shaw, B. J. : *Ductile Cleavage Fracture of Molybdenum*, 1542
Johnson, Dr. G. R. A., and others: Determination of the Yields of Molecular Hydrogen Peroxide in the Radiolysis of Water labelled with Oxygen-18, 176
Johnson, H. R., and Rohrlich, Dr. F. : Atomic Electron Affinities, 244
Johnson, Herbert W., and others : Responses of Seedlings to Extracts of Soybean Nodules bearing Selected Strains of *Rhizobium japonicum*, 308
Johnson, Dr. Julian F. (Porter, Dr. Roger S., and) : Circular Gas Chromatograph, 391
Johnston, John R. (Mortimer, Robert K., and) : *Life Span of Individual Yeast Cells*, 1751
Johnston, R. G., and others : Neuromuscular Blocking Agents of Short Duration, 542
Johnston, Dr. Titus M. : Effect of Fatty Acid Mixtures on the Rice Stylet Nematode (*Tylenchorhynchus martini* Fielding, 1956), 1392
Johnstone, B. M.: Micro-Electrode Penetration of Ascites Tumour Cells, 411
Johnstone, B. M., and Briner, G. P. : Quantitative Estimation of Purines by the Visual Scanning of Photographs of Paper Chromatograms, 681
Johnstone, Prof. D. B., and Pfeffer, M. : Aerobic Fermentation of Whey by a Nitrogen-fixing Strain of *Aerobacter aerogenes*, 992
Joklik, Dr. W. K., and others : Reactivation of Heat-inactivated Poxviruses —a General Phenomenon which includes the Fibroma–Myxoma Virus Transformation of Berry and Dedrick, 1340
Joliot-Curie, Prof. F. : Memorial Meeting for, at Friends House, London, 1020
Jones, A. D. (Deutsch, Dr. J. A., and): The Water–Salt Receptor and Preference in the Rat, 1472
Jones, A. S., and Woodhouse, D. L. : Bromination of Nucleic Acids and their Derivatives, 1603
Jones, Prof. A. Vallance : Observations of the Lithium Lines in the Twilight Airglow in the Northern Hemisphere, 1315
Jones, Prof. A. Vallance, and others : Rotational Structure of the 3914 A. N_2^+ Band in Sunlit Aurorae, 453
Jones, A. W. : Early Steamboats, *review*, 1626

Kikuth, Prof. Dr. (herausgegeben von Grumbach, Prof. Dr. A., und): Die Infektionskrankheiten des Menschen und ihre Erreger, *review* by Prof. P. C. C. Garnham, 352
Kilbourne, Prof. Edwin D. : Inhibition of Influenza Virus Multiplication with a Glucose Antimetabolite (2-deoxy-D-glucose), 271
Kilby, Dr. B. A. (Candy, D. J., and) : Site and Mode of Trehalose Biosynthesis in the Locust, 1594
Kilgore, Wendell W., and Starr, Prof. Mortimer P. : Uronate Oxidation by Phytopathogenic Pseudomonads, 1412
Killian, Dr. J. R. : Science and Public Policy, 1215
Killing of Micro-organisms : The, *review* by Dr. A. M. Cook, 277
Kimber, Gordon, and others : Genetic Control of Chromosome Pairing in Intergeneric Hybrids with Wheat, 1241
Kimura, Katsumi, and Kubo, Masaji : Stable Configuration of Methyl Groups in Dimethyl Ether, 533
Kinetic Isotope Effect in the Bromination of Dimethylaniline (P. G. Farrell and Dr. S. F. Mason), 250
Kinetics of Vinyl Polymerization by Radical Mechanisms (Dr. C. H. Bamford, Dr. W. G. Barb, Dr. A. D. Jenkins and Dr. P. F. Onyon), *review* by Prof. C. E. H. Bawn, 637
Kinetics (Decay), of the Metastable State of Chlorophyll *b* : Absorption Spectrum and (Prof. Stig Claesson, Lars Lindqvist and Bertil Holmström), 661
Kinetin, Gibberellic Acid and certain Auxins : Effects of, on the Development of Shoot Buds on the Protonema of *Pohlia nutans* (Dr. G. C. Mitra and Dr. A. Allsopp), 974
Kinetin and Indoleacetic Acid : Interaction between, in the Control of Bud Reactivation in *Splachnum ampullaceum* (L.) Hedw. (Prof. K. E. von Maltzahn), 60
King, Prof. B. C. : Awarded the Bigsby Medal for 1959 of the Geological Society, 365
King, Prof. Donald W., and others : Phagocytosis and Cell Division, 476
  Variability of Content of Deoxyribonucleic Acid in *L*-Strain Fibroblasts, 1818
King, L. A. : Gas Discharges (Jets observed in the High-current Electric Arc), 92
King, R. A. : Noise Theory, *review*, 353
King Gustaf VI Adolf of Sweden, H.M. : Elected a Fellow of the Royal Society under the special Statute, 1571
King's College, London : Title of reader in plant biochemistry in the University of London conferred on Dr. D. D. Davies, 86
King's College, Newcastle-upon-Tyne : Visit of Prof. E. Lederer, 438
  Retirement of Prof. W. W. Rogosinski from the chair of pure mathematics, 1365
  Appointment of F. F. Bonsall to the chair of pure mathematics, 1365
  Appointment of Prof. N. J. Petch to the chair of metallurgy, 1643
King-Hele, D. G. : Space Research (Results from Observations of the Orbits of *Sputniks* 2 and 3), 364
  Density of the Atmosphere at Heights between 200 km. and 400 km., from Analysis of Artificial Satellite Orbits, 1224
  Awarded the Bronze Medal of the Royal Aeronautical Society, 1648
King-Hele, D. G., and Merson, R. H. : A New Value for the Earth's Flattening, derived from Measurements of Satellite Orbits, 881
King-Hele, D. G., and Walker, D. M. C. : Irregularities in the Density of the Upper Atmosphere—Results from Satellites, 527
King-Hele, D. G., and others : Changes in the Inclination of Satellite Orbits to the Equator, 239
Kingsnorth, Dr. S. W., and others : Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in Salt Water and the Possible Role of Sulphur Compounds, 1346
Kingston Technical College (Department of Chemistry, Biology and Geology) : Postgraduate Lecture Course on Recent Advances in Protein Chemistry, 86
Kirby, F. A. (Myers, Clark, E., and) : Changing Industry, 657
Kirch, L., and Orchin, M. : Co-ordination Chemistry (Experimental Work on the Oxo-Reaction), 1785
Kirk, C. L. : Appointed lecturer in the Postgraduate Department of Applied Mechanics, University of Sheffield, 1024
Kirschstein, Ruth L., and others : Induction of Subcutaneous Nodules in Rabbits with the *SE* Polyoma Virus, 766
Kisch, B. S. : *Balanus tulipiformis* Ellis on the Atlantic Coast of France, 341
Kish and other Graphites : Structure of (Eitaro Matuyama), 670
Kishigami, Masayoshi, and others : Reduced Activity of Histaminase in Rats sensitized by *Bordotella pertussis*, 756
Kistiakowsky, Prof. G. B. : Appointed special assistant for science and technology to the President of the United States, 1639 ; work of, 1639
Kitchener, Dr. J. A., and Haydon, Dr. D. A. : Electrical Double Layer in Colloid Science, 78
Kitchener, Dr. J. A., and Schenkel, Dr. J. H. : Electrical Double Layer in Colloid Science (Electrophoretic Measurements), 79
Kitchenside, A. W. : Awarded the Pilcher Memorial Prize of the Royal Aeronautical Society, 1649
Kleczkowski, A. (Bawden, Prof. F. C., and) : Photoreactivation of Nucleic Acid from Tobacco Mosaic Virus, 503
Klein, Prof. George, and others : Possible Enzymic Mechanism for the Development of Resistance against Fluorouracil in Ascites Tumours, 939
Klein, Richard M. (Thomas, Alan J., and) : *In vitro* Synthesis of the Crown-Gall Tumour-inducing Principle, 113
Kleinzeller, Dr. A., and others : Utilization of Inorganic Sulphate by Baker's Yeast, 1402
Klibanski, Ch., and others : Co-existence of the Embryonic (Third Normal) Haemoglobin Fraction with Erythroblastosis in the Blood of Two Full-term New-born Babies with Multiple Malformations, 327
Kligerman, Miriam (Henstall, Dr. Henry H., and) : Hyperglobulinaemic Thrombo-Haemorrhagic Diathesis, 978
Kligler's Iron Agar : The Phenylalanine Test on, for the Identification of *Proteus* (D. J. Stewart), 1537
Kline, Dwight, B. : Grant of 68,900 dollars from the National Science Foundation, for a programme on synoptic observations and studies of freezing nuclei anomalies, 1371
Klinefelter's Syndrome : Colour-blindness in (Prof. Curt Stern), 1452
Klug, Dr. A. (Finch, J. T., and) : Structure of Poliomyelitis Virus, 1709
Kmentová, V., and others : Fractionation of Brain Extracts for Acid Phosphatase-elevating Activity, 473
Knauss, John A., and Pepin, Robert : Measurements of the Pacific Equatorial Countercurrent, 380
Knight, C. S. : A Two-Dimensional Paper Chromatographic Method combining Ion-Exchange and Partition Techniques, 165
Knight, Dr. Douglas M. : The American College and the Educated Life, 1769
Knight, R. H. : Appointed to a senior lectureship in physics in the University of Birmingham, 1571
Knott, Dr. D. R. : Wheat Genetics, 26

Know Western Australian Wildflowers : How to (Dr. William E. Blackall and Dr. Brian J. Grieve), Part 2, A Key to the Flora of the Temperate Regions of Western Australia, *review* by V. S. Summerhayes, 1628
Knowledge (Human) : Atomic Physics and (Dr. Niels Bohr), *review* by Prof. W. H. McCrea, 1218
Knowles, F. G. W. (Holmes, Dr. R. L., and) : Electron Microscope Observations on the Neurohypophysis of the Ferret, 1745
Knowles, K. G. J. C. : *Obituary* of Dr. F. A. Burchardt, 577
Known Age : Radiocarbon Measurements on Samples of (W. S. Broecker, Edwin A. Olson and Junius Bird), 1582
Koch, Dr. J. H. (Gallagher, Dr. C. H., and) : Action of Pyrrolizidine Alkaloids on the Neuro-Muscular Junction, 1124
Koda, Dr. Shigeyasu (Watanabe, Dr. Ryoji, and) : Crystallographic Orientation of Nodules formed by the Grain Boundary Reaction of Aluminium–Zinc Alloys, 1667
Kodama, Masahiro (Oguchi, Takashi, and) : Difference between Cosmic-Ray Equator and the Geomagnetic Dip Equator, 103
Koelle Technique : Selective Staining of Visceral Efferents in the Rat Brain Stem by a Modified (Dr. P. R. Lewis and Dr. C. C. D. Shute), 1743
Koelman, A. (Oskam, H. J., and) : Application of Logarithms to the Base 2 in the Use of Exponential Dilution Series for the Study of Antibiotic Combinations, 840
Koenig, H. J., and others : Rotational Structure of the 3914 A. N_2^+ Band in Sunlit Aurorae, 453

Kuta, E. J. (Olcott, H. S., and) : Basic Substances as Synergists for Fat Anti-oxidants, 1812
Kuttyaro Caldera : Gravity Survey on the, by means of a Worden Gravimeter (Prof. Izumi Yokoyama and Hirokazu Tajima), 739
Kuwajima, Prof. Yoshio, and others : Reduced Activity of Histaminase in Rats sensitized by *Bordetella pertussis*, 755, 756
Kvifte, Prof. G. : The Twilight Radiation at 6708 A., 1384

LA COUR, L. F., and Pelc, Dr. S. R. : Effect of Colchicine on the Utilization of Thymidine labelled with Tritium during Chromosomal Reproduction, 1455
Labelled Keto-Acids in Duck Blood incubated *in vitro* with $NaH^{14}CO_3$ (A. Breccia, A. L. Fantola, G. Giustina and E. Lazzarini), 1328
Labelled Magnesium : Equilibration of, between Sheep Plasma and Red Cells (A. D. Care, D. C. Macdonald and B. Nolan), 1265
Labelled Sulphuric Acid : Exchange Reaction induced by Radiation between Diethyl Sulphate and—a Possibly Ionic Reaction (Dr. Paul Y. Feng and Ahren Jacobson), 251
Labelled Thymidine : Incorporation of, in the Seminal Vesicle of the Mouse (Dr. S. R. Pelc and P. B. Gahan), 335
Labelling of Proteins with Cellulose-reactive Dyes (Dr. R. Hess and Dr. A. G. E. Pearse), 260
Labelling of Radiographic Contrast Media with Iodine-131 (J. Liebster, J. Kácl and A. Babicky), 1474
Laboratory Animals : Effect of 1,6-Di-(2-Bromoethylamino)-1,6-Dideoxy-D-Mannitol Dihydrobromide on Tumours of (Prof. J. Baló, G. Kendrey, J. Juhász and I. Besznyák), 395
Laboratory Animals Centre of the Medical Research Council Laboratories : Collected Papers, Vol. 7, 1642
Laboratory Course (Annual Summer), in Techniques and Applications of the Electron Microscope (Cornell University), 1094
Laboratory Equipment in American Schools, 1163
Labour (Human) : Recovery of Injected Progesterone and its relation to the Onset of (Prof. Lars Ph. Bengtsson), 405
Labour and National Service, Ministry of : Annual Report of the Chief Inspector of Factories on Industrial Health for the Year 1957, 867
  The Length of Working Life of Males in Great Britain, 1780
Laccase (Fungal) : An Electron Spin Resonance Study of the State of Copper in (Dr. Bo G. Malmström, Dr. Rolf Mosbach and Dr. Tore Vänngård), 321
Lacey, Dr. R. S. : Palaeoecology (Experiences when collecting in the Karoo Series of the Upper Zambezi in Southern Rhodesia), 1370
Lachish (Tell ed-Duweir) IV, The Bronze Age (Olga Tufnell), (The Wellcome–Marston Archaeological Research Expedition to the Near East), *review* by Peter J. Parr, 951
Lachmann, Dr. J., and Bergmann, Prof. F. : Dissociated Nystagmus in the Rabbit, 1065
Lack of Effect of Histidine on Rabbit Atheromatosis (Dr. G. G. Pinter and Dr. D. B. Zilversmit), 1272
Lactation : Local Inhibition by, of chemically induced Breast Tumours in Mice of the *IF* Strain (June Marchant), 629
Lactobacilli (Society for Applied Bacteriology Symposium on), 1234
Lacy, Dr. D., and Miles, H. B. : Observations by Electron Microscopy on the Structure of an Acephaline Gregarine (*Apolocystis elongata*, Phillips and MacKinnon), 1456
Lacy, E. D. : Hydrated Glasses, 178
Ladefoged, P. : The Mechanization of Thought Processes (Speech Perception), 226

Laevastu, T., and others : Shorewards Upslope of the Layer of Minimum Oxygen off Bombay—its Influence on Marine Biology, especially Fisheries, 1084
Lagasse, Dr. A., and others : Virus-like Particles in Chemically induced Carcinoma of the Uterine Cervix, 694
Lagoon (Lagos) : The Ecology of, 1, The Lagoons of the Guinea Coast (J. E. Webb) ; 2, The Topography and Physical Conditions of Lagos Harbour and Lagos Lagoon (M. B. Hill and J. E. Webb) ; 3, The Life History of *Branchiostoma nigeriense* Webb (J. E. Webb) ; 4, On the Reactions of *Branchiostoma nigeriense* to its Environment (M. B. Hill and J. E. Webb), 295
Lagos Lagoon : The Ecology of, 1, The Lagoons of the Guinea Coast (J. E. Webb) ; 2, The Topography and Physical Conditions of Lagos Harbour and Lagos Lagoon (M. B. Hill and J. E. Webb) ; 3, The Life History of *Branchiostoma nigeriense* Webb (J. E. Webb) ; 4, On the Reactions of *Branchiostoma nigeriense* Webb to its Environment (M. B. Hill and J. E. Webb), 295
Lahiri, Dr. A. : The Nature of Coal (Origin and Systematics of Coal), 1438
Lahiri, Dr. A. (Mukherjee, Dr. P. N., and) : The Nature of Coal (Constitution of Humic Acids), 1438
Lahiri, Dr. A., and others : The Nature of Coal (Disposition of Methyl Groups), 1439 ; (Pyrolysis and its relation to the Structural Parameters of Coal), 1439
  Alicyclicity and Smoke Emission of Coal, 1613
Laing, Dr. J. A. : Appointed to the Courtauld chair of animal husbandry at the Royal Veterinary College, 365 ; work of, 365
Laing, Dr. P. G., and Ferguson, jun., Dr. Albert B. : Iodine-131 Clearance-rates as an Indication of the Blood Supply of Bone, 1595
Laird, Anna Kane, and Barton, A. D. : Cell Growth and the Development of Tumours, 1655
Lake (Allard) Ilmenites : Remanent Magnetism of the (Charles M. Carmichael), 1239
Lakshminarayanaiah, Dr. N.: Electrical Double Layer in Colloid Science (Electrical Conductivity and Electro-osmotic Water Transport), 80
Lal, Prof. M. B. : A New Leech-infesting Cercaria from Duddingston Loch, Edinburgh, 697
Lamb, C. A., and others (edited by) : Trace Elements—Proceedings of the Conference held at the Ohio Agricultural Experiment Station, 1957, *review* by Dr. E. J. Hewitt, 1009
Lamb, D. C., and others : Identification of 10-Hydroxy-Δ^2-decenoic Acid in Royal Jelly, 996
Lambert, J. D. : Relaxation Processes (Measurements of Ultrasonics in Gases), 584
Lambert, Dr. R. St. J., and others : The Geological Time-Scale, 212
  How Old is the Cambrian System ?, 769
λ-Transition in Helium (Dr. C. G. Kuper), 1544
Lamellibranch (Mutelid) : Development in a (Dr. G. Fryer), 1342
Lamellibranch Molluscs : Contraction and Relaxation in Smooth Muscles of (Dr. J. Lowy and B. M. Millman), 1730
Lamond, Dr. D. R., and others : Bioassay of Sheep Anterior Pituitary Glands, 1597
Lampbrush Chromosomes : Some Effects of Colchicine on (A. P. Amarose), 975
Land Planning in the Tropics : Scientific Basis of (Prof. L. Dudley Stamp), 20
Land Use : Atmospheric Pollen in relation to (H. A. Hyde), 1694
Landau, L. D., and Lifshitz, E. M. : Quantum Mechanics—Non-Relativistic Theory (translated from the Russian by J. B. Sykes and J. S. Bell), *review* by Prof. N. Kemmer, 705
Landauer, Prof. W. (de Franciscis, Dr. P., and) : Effect of Amniotic Fluid on Inhibition of Growth by Cortisone in Chicken Embryos, 617
Landsberg, Dr. P. T. : From Conductors to Transistors, *review*, 138
Landtiere : Lebensgemeinschaften der (Dr. Johan Balogh), zweite Auflage, *review* by A. Macfadyen, 966
Lane, Dr. G. R., and Butler, R. D.: Experimental Approaches to the Problems of Growth and Form in Plants (Apical Development in relation to Etiolation), 585
  Effect of Light on Maturing Broad Bean Seeds, 1063
Lane-Petter, Dr. W., and others : Measuring Productivity in Breeding of Small Animals, 339
Langan, jun., Thomas A., and others : Effect of Azaserine (*o*-Diazoacetyl-L-serine) on the Pyridine Nucleotide Levels of Mouse Liver, 1674
Langford, J. : Antarctic Meteorology, 1504
Langford, W. J. : Queen and Servant of the Sciences, *review*, 1076
Langley Memorial Prize for 1959 (London School of Hygiene and Tropical Medicine), 1024
Langlo, K. : Antarctic Meteorology (Local Effects), 1503
Language, Literature and Science (Prof. A. Norman Jeffares), 1366
Lanterman, W. S. : Antarctic Meteorology, 1503
Lapis, a monthly journal of industrial opportunities, No. 1, 509
Lapse (Diurnal), of Signals from *Sputnik III* (G. H. Munro), 1549
Large, Dr. M. I., and others : A High-resolution Survey of the Andromeda Nebula at 408 Mc./s., 1250
  A High-Resolution Survey of the Coma Cluster of Galaxies at 408 Mc./s., 1663
Large Magellanic Cloud : Planetary Nebulae in the (E. M. Lindsay), 453
Large Pulses of Radiation : Modification of the Oxygen Effect when Bacteria are given (D. L. Dewey and Dr. J. W. Boag), 1450
Larkworthy, L. F., and Nyholm, Prof. R. S. : Model Oxygen-carrying Compounds and the Iron-*bis*-Indigo Complex, 1377
Larvae (Silkworm) : Food Selection by (Dr. Yasuji Hamamura), 1746
Larval Population Density : Influence of, on Fluctuation in Mosquito Numbers (Gordon Surtees), 269
Lasse, Dr. Niels A., and others : Effects of Pyridoxine Withdrawal on Cerebral Circulation and Metabolism in a Pyridoxine-dependent Child, 751
Late Tertiary Geomagnetic Field in Northwestern Canada (P. M. Du Bois), 1617
Latency and Masking in Viral and Rickettsial Infections : Symposium on—the Proceedings of a Conference held at the University of Wisconsin Medical School, 1957 (edited by Duard L. Walker, Robert P. Hanson and Alfred S. Evans), *review* by Dr. Kenneth M. Smith, 71
Latent Interparticle Forces in Clays (R. H. G. Parry), 538
Later Philosophy of Wittgenstein (Dr. David Pole), *review* by F. I. G. Rawlins, 494
Latimeria chalumnae : Anatomie de (J. Millot et J. Anthony), Tome I, Squellette, Muscles et Formations de Soutien, *review* by Dr. E. Trewavas, 566
Latin American Congress of Chemistry : Seventh, (Mexico), 294
Latitudes (High) : Low-Energy Corpuscular Radiation at (K. D. Cole), 738
Lattice Constant Ratios of Lithium-6- and Lithium-7-rich Fluorides : Refractivity and (Dr. R. W. H. Stevenson and P. T. Nettley), 1000
Lattices (Crystal) : Spacing Anomaly in Electron Microscope Images of (Dr. H. Hashimoto and Dr. H. Yotsumoto), 1001
Lauffer, Prof. Max A. : Awarded the 1958 Pittsburgh Award of the Pittsburgh Section of the American Chemical Society, 224
Lauffer, Prof. Max A. (Ansevin, Allen T., and) : Native Tobacco Mosaic Virus Protein of Molecular Weight 18,000, 1601
Lauffer, Prof. Max A. (edited by Smith, Dr. Kenneth M., and) : Advances in Virus Research, Vol. 5, *review* by Prof. F. C. Bawden, 636
Laughton, Dr. A. S. : Turbidity Currents, 657
Laurate (Sodium) : Electron Microscopy of (T. H. Shuttleworth and M. Camp), 535
Laurencot, jun., H. J., and others : Evidence for the Conversion of Quinic Acid to Shikimic Acid in Roses, 326
Laurentian Hormone Conference, 1957 : Recent Progress in Hormone Research, Vol. 14—Proceedings of the (edited by Gregory Pincus), *review* by Prof. F. G. Young, 1422
Laurie, M. V. : Appointed professor of forestry in the University of Oxford, 578 ; work of, 578
Law (Poisson's), and the Frequency of Hurricanes (Dr. Charles H. Smiley), 814
Lawless, J. D. : Interfacial Phenomena (Importance of the Substrate Orientation upon Kinetics of Film Growth), 1097
Lawrence, Dr. Aetius R., and Ferguson, Lloyd N. : Exploratory Physico-chemical Studies on the Sense of Taste, 1469
Lawrence, Dr. A. S. C. : Detergents, Textiles and Dyes, 1236
  The Mechanism of Detergence, 1491
Lawrence, J. M. (Muzik, Prof. T. J., and) : Separation of Specific and Non-Specific Effects of Chemicals on Plants, 482
Lawrie, Dr. N. R. : Colorimetry in Biochemistry, *review*, 207
Laws, E. Q., and Hancock, W. : Some Alkyl-Aryl Sodium Sulphonates as Standard Substances in Detergent Chemistry, 1473
Laws, J. T. (Todd, G. F., and) : The Reliability of Statements about Smoking Habits (Tobacco Manufacturers Standing Committee Research Paper No. 2), 932
Lawson, G. J., and others : Deduction of Ionospheric Electron Content from the Faraday Fading of Signals from Artificial Earth Satellites, 1172
Layer of Minimum Oxygen off Bombay : Shorewards Upslope of the—its Influence on Marine Biology, especially Fisheries (Dr. J. N. Carruthers, S. S. Gogate, J. R. Naidu and T. Laevastu), 1084
Layer (Electrical Double), in Colloid Science (Colloid and Biophysics Committee of the Faraday Society Discussion on), 78
Lazzarini, E., and others : Labelled Keto-Acids in Duck Blood incubated *in vitro* with $NaH^{14}CO_3$, 1328
le Bras, Dr. Jean : Rubber—Fundamentals of its Science and Technology (translated by Dr. Irene E. Berck), *review* by Dr. W. J. S. Naunton, 779
Le Chevrel, Dr. P. (Moullec, Dr. J., and) : A Rare Variant of B in a Human Blood Sample belonging to Group AB, 1733
Le Fevre, Prof. R. J. W. : Elected a Fellow of the Royal Society, 861
le Roux, Haydée : Nature of Fluorescence of Uranium in Fused Sodium Fluoride, 1180
Lea, Dr. F. M. : New Fire Research Laboratory of the National Research Council of Canada opened by, 653
Leach, A. A. : At the sixteenth meeting of the Research Panel of the British Gelatine and Glue Research Association (The Examination of Gelatine by Passage through Amberlite Resins of the 'I.R.C.50' (Carboxylic) Type), 440
Lead from British Mineral Deposits : Isotopic Composition of (S. Moorbath), 595
Leaf-Enations in *Dahlia variabilis* Desf. induced by Tomato Spotted Leaf Virus (A. A. Brunt), 627
Leaf-fall of Deciduous Woody Plants : Effect of Gibberellic Acid on Development of Autumn Colour and (Dr. P. W. Brian, J. H. P. Petty and P. T. Richmond), 58
Leaf Senescence : Control of, by Auxins (Daphne J. Osborne), 1459
Leaf Tissue (Dried) : Persistence of Tomato Aucuba Mosaic Virus in (Prof. John Caldwell), 1142
Leafe, E. L. : Spraying of Barley with 2,4-Dichlorophenoxyacetic Acid, 621
Leak, G. M. : Interfacial Phenomena (Properties of Grain Boundaries), 1098
Learned Societies (Scientific and), of Great Britain, 59th edition, *review*, 1151
Learner, R. C. M. (Gaydon, Dr. A. G., and) : Simulation of Lunar Craters —a Blowhole Theory, 37
Learner, R. C. M., and Gaydon, Dr. A. G. : Changes in Transition Probability due to the Interaction of Rotation and Vibration in Diatomic Band Spectra, 242
Leary, B. G. : Appointed lecturer in electrical engineering at Queen's University, Belfast, 1024
Leaves : Marginal Growth of (Dr. Noboru Hara), 1409
Leaves (Barley) : Amino-Acid Composition of the Proteins of, in relation to the Mineral Nutrition and Age of Plants (Dr. B. P. Pleshkov and Dr. L. Fowden), 1445
Leaves (Senescent) : Identity of the Abscission-accelerating Substance in (Daphne J. Osborne), 1593
Lebensgemeinschaften der Landtiere (Dr. Janos Balogh), zweite Auflage, *review* by A. Macfadyen, 966
Leberman, R., and Rabin, Dr. B. R. : Multiplicity of Histidine—Cu(II) Complexes, 746
Leberman, R., and others : Relationship between Proton and Metal Binding by some Peptides, Amino-Acid Amides and Amino-acids, 745
Lecithin and Lysolecithin : Hydrolysis of, by Rumen Micro-organisms of the Sheep (Dr. R. M. C. Dawson), 1822
Lecture Course (Postgraduate), on Recent Advances in Protein Chemistry (Department of Chemistry, Biology and Geology of the Kingston Technical College), 86
Lectures : Science (City Literary Institute, London), 18
Lectures for Sixth-form Children (Royal Institution), 294
Lecturing : The Art of (Dr. K. Kitson Clark and Comdr. E. Bidder Clark), enlarged edition, 1623
Lederer, Prof. E. : Visit to King's College, Newcastle-upon-Tyne, 438
Lederer, Prof. E., and others : Structure of Phthiocerol, 1117

Ledig, Marc, and others : Are Nucleoside Triphosphates Precursors of Mammalian Ribonucleic Acid *in vivo* ?, 1114
Lee, B. T. O., and Pateman, J. A. : Linkage of Polygenes controlling Size of Ascospore in *Neurospora crassa*, 698
Leech-infesting Cercaria (A New), from Duddingston Loch, Edinburgh (Prof. M. B. Lal), 697
Leeds : Measurements at, following the Windscale Reactor Accident—Iodine-131 in Human Thyroids and Iodine-131 and Caesium-137 in Milk (Dr. P. R. J. Burch), 515 ; Increase in Background Gamma-Radiation and its Correlation with Iodine-131 in Milk (Prof. F. W. Spiers), 517
Leeman, L. : Deoxyribonucleic Acid Content of the Cell-Nuclei in the Adrenal Medulla after Exposure to Low Temperatures, 1188
Lees, G. A. : Science and Education, 300
Lees, R. J. : Appointed head of the Instrument and Photographic Department of the Royal Aircraft Establishment, 931 ; work of, 931
Legendre : Fonctions Sphériques de, et Fonctions Sphéroidales (Dr. Louis Robin), Tome 2, *review* by Prof. T. A. A. Broadbent, 1421
Legendre Functions, *review* by Prof. T. A. A. Broadbent, 1421
Legget, R. F. : New Canadian Fire Research Laboratory, 653
Légion d'Honneur : Cross of Chevalier de la, awarded to Dr. G. E. W. Wolstenholme by the French Government, 1434
Legumes in African Agriculture (Dr. R. O. Whyte and T. R. G. Moir), 439
Legumes in Agriculture and Human Nutrition (Food and Agriculture Organization of the United Nations and the Commission for Technical Co-operation in Africa South of the Sahara Technical Meeting on), 439
Leguminous Seeds : Paper Electrophoretic Separation of the Proteins of some (Dr. Esam M. Moustafa), 199
Lehmann, Dr. H., and Nwokolo, Dr. C. : The River Niger as a Barrier in the Spread Eastwards of Haemoglobin C—a Survey of Haemoglobins in the Ibo, 1587
Lehmann, Dr. H., and others : New Variant of Human Foetal Haemoglobin, 31
Lehmann, W. J., and Shapiro, I. : Isotopic Composition of Boron and its Atomic Weight, 1324
Lehrle, Dr. R. W., and Robb, Prof. J. C. : Direct Examination of the Degradation of High Polymers by Gas Chromatography, 1671
Leibniz–Newton : La Disputa, sull'Analisi (translated into Italian by Dr. G. Cantelli), *review* by L. Roth, 1081
Leicester Museums and Art Gallery : Annual Report for 1957-58, 1021
Leigh, R. : Problems of Collective Motion in Physics (Plasma Problems in the Electron Theory of Metals), 866
Lein, Dr. Allen, and others : Passive Antibody Decay in Thyroidectomized Rabbits, 982
Leiper, Dr. J. : Chemotherapy of Parasitic Diseases, 1030
Leloup, Marcel : Retirement from the directorship of the Forestry Division of the Food and Agriculture Organization of the United Nations, 291 ; work of, 291
Lemberg, Prof. R., and Benson, A. : Incorporation of Radioactive Iron into Haematin *a*, 678
Lemon, G. G. : Awarded a research grant by the Leverhulme Trust, 1499
Lemur : Crystals of Riboflavin making up the Tapetum Lucidum in the Eye of a (Antoinette Pirie), 985
Length of Day : Response of Rice to Small Differences in (Dr. J. Dore), 413 ; (Dr. E. Njoku), 1598
Length of Working Life of Males in Great Britain (Ministry of Labour and National Service), 1780
Length and Number of Epidermal Cells in Petioles of Strawberry : Effect of Gibberellic Acid on (C. G. Guttridge and P. A. Thompson), 197
Lennon, G. W. : Automatic Reduction of Geophysical Data (Analysis of Earth Tide Records obtained using Milne–Shaw Pendulums), 1168
Lens of the Eye in the Rabbit : Regeneration of the (D. Stenhouse Stewart and Prof. Paul G. 'Espinasse), 1815
Lens Cells of the Calf in Continuous Culture (Dr. J. van der Veen and C. F. A. Heyen), 1137
Leon, Y. A., and others : Changes in Œstrogen Titre in Stored Urine, 189
Leopoldina German Academy of Sciences : Election of new Members, 652
Lepidoptera : New Aspects of the Genetic Control of Industrial Melanism in the (Dr. H. B. D. Kettlewell), 918
Leptotrichia spp. : Cell-Wall Composition of (Dr. G. H. G. Davis and A. C. Baird-Parker), 1206
Lepus capensis L. and *Ochotona roylei* Ogilby : Re-ingestion in (C. H. Tyndale-Biscoe), 471
Lerner, Dr. Aaron B., and others : Melatonin in Peripheral Nerve, 1821
Lerner, Prof. I. Michael : Elected a member of the United States National Academy of Sciences, 1575
Lesions (Vascular), in Ageing Rats : Sex Incidence of, in relation to Previous Pregnancies (Prof. Theodore Gillman and Michael Hathorn), 1139
Lethal Dose : Effect of the Rate of Elimination of Digoxigenin in the Guinea Pig on the Determination of its (M. Rand and Anne Stafford), 688
Lethal Effects of Radiations on *Escherichia coli B.* : Reduction in the, by Treatment with Chloramphenicol (Dr. N. E. Gillies and Tikvah Alper), 237
Lethal Mutations : Ratio of Visible to, produced in *Drosophila* by Phenylalanine Mustard (L. S. Altenburg and Edgar Altenburg), 699
Lethal Mutations (Recoverable), in *Drosophila* Sperm (Prof. K. G. Lüning and H. O. Henriksson), 1211
Leucine-2-^{14}C Incorporation into Protein of Diaphragms of Hypophysectomized Rats : *In vitro* Effects of Insulin and Glucose on (Dr. J. L. Kostyo), 1518
Leucine Aminopeptidase Activity in Mast Cells (Dr. O. Braun-Falco and Dr. K. Salfeld), 51
Leucoanthocyani(di)ns : Mechanism of Formation of Anthocyanidins from (Dr. David G. Roux and M. C. Bill), 42
Leuco-anthocyanidins of *Guibourtia* spp. : Flavan-3,4-diols and (Dr. David G. Roux), 890
Leucocytes (Human Leukaemic) : Incorporation of 5-Iodouracil labelled with Iodine-131 into the Deoxyribonucleic Acid of, following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131 (Dr. M. L. Eidinoff, L. Cheong, E. Gambetta Gurpide, R. S. Benua and R. R. Ellison), 1686
Leucocytosis in Response to Bacteraemia as a Feature of the Acute Radiation Syndrome in the Plaice (A. Preston), 832
*Leuconostoc mesenteroides P.*60 : Reclassification of, as a *Pediococcus* (Ellen I. Garvie), 1411
Leukaemia : Changes in the Group *A* Antigen in a Case of (Dr. E. R. Gold, Dr. Geoffrey H. Tovey, W. E. Benney and F. J. W. Lewis), 892
Leukaemia in Mice: Oral Induction of (Bill P. Maduros, Wilma A. Spurrier and Dr. Steven O. Schwartz), 1816
Leukaemia (Experimental), and Ascitic Tumours: Activity of 10-Hydroxydecenoic Acid from Royal Jelly against (Prof. Gordon F. Townsend, Dr. Joseph F. Morgan and Dr. Barbara Hazlett), 1270
Leukaemia (Murine) : Role of the Thymus in (J. F. A. P. Miller), 1069
Leukaemia (Radiation) : Dose–Response Relationship in—the Marking Probit (Dr. D. J. Mewissen), 401
Leukaemic Leucocytes (Human) : Incorporation of 5-Iodouracil labelled with Iodine-131 into the Deoxyribonucleic Acid of, following *in vivo* Administration of 5-Iododeoxyuridine labelled with Iodine-131 (Dr. M. L. Eidinoff, L. Cheong, E. Gambetta Gurpide, R. S. Benua and R. R. Ellison), 1686
Leverhulme Trust : Award of research fellowships and grants, 1499
Levi, F. P. : Fine Iron Filaments Magnets, 1251
Levi, Simon (Collard, Prof. Patrick, and) : A Two-stage Fermentation of Cassava, 620
Levin, Dr. Nyman : Appointed director of the Weapons Group of the United Kingdom Atomic Energy Authority, 582
Levinson, R. H.: Appointed assistant secretary of the Royal Meteorological Society, 368
Levisohn, Dr. Ida : Strain Differentiation in a Root-infecting Fungus, 1065
Levvy, Dr. G. A., and others : Glycosidases in some Farm Animals, 615
Lewbart, Marvin L., and Mattox, Vernon R.: Destruction of Cortisone and related Steroids by Traces of Copper during Purification Procedures, 820
Lewis, Dr. F. A., and others : Electrode Potentials and Compound Formation in the Palladium–Platinum–Hydrogen System, 39, 510
Lewis, F. J. W., and others : Changes in the Group *A* Antigen in a Case of Leukaemia, 892
Lewis, J., and others : Co-ordination Chemistry (Variation of the Magnetic Susceptibility of Vanadium (III) Complexes with Temperature), 1784
Lewis, Marion, and others : A Further Example of the Kell Blood Group Phenotype K–, k–, Kp(a–b–), 1586
Lewis, Dr. P. R., and Shute, Dr. C. C. D. : Selective Staining of Visceral Efferents in the Rat Brain Stem by a Modified Koelle Technique, 1743
Lewis, S. E. : Nuclear Fuel Cycles (Long-term Reactivity Changes), 1647
Lewis, Dr. T. J. (Heylen, Dr. A. E. D., and) : Gas Discharges (Theoretical Calculations of *a* Argon, Helium and Neon), 93
Lewitus, Z., and others: Effect of Monofluorosulphonate, Difluorophosphate and Fluoroborate Ions on the Iodine Uptake of the Thyroid Gland, 1517
Liberator 48/80 (Histamine), and Methotrimeprazine : Action of Ultraviolet Light on Skin—Effect of the (Prof. S. Claesson, G. Wettermark and L. Juhlin), 1451
Libraries : Information Service in (D. J. Foskett), *review* by R. Brightman, 781
Libraries (Public), in England and Wales, 1437
Library (National Lending), for Science and Technology, 16
Library Association : Pamphlet No. 19, The Anglo-American Library Associations (R. D. MacLeod), 1021
Library Associations : The Anglo-American (R. D. MacLeod), 1021
Library Service (Public), in England and Wales : The Structure of the (Ministry of Education), 1289, 1437
Library Services in Britain, 1287
Libus, W. (Minc, S., and) : Co-ordination Chemistry (Physical Properties and Relative Stabilities of the various types of Cobalt (II) Complex in Solution), 1784
Libyan Desert Silica-Glass : Origin of (Dr. Alvin J. Cohen), 1548
Liddle, Lois, and others : Excessive Uric Acid Production in the Human induced by 2-Ethylamino-1,3,4-thiadiazole, 1463
Lie-Injo Luan Eng., Dr.: Haemoglobin of New-born Infants in Indonesia, 1125
Liebster, J., and others : Labelling of Radiographic Contrast Media with Iodine-131, 1474
Life : American Marine, *review* by Dr. D. P. Wilson, 852
  Consequences of the Use of Nuclear Energy for the European Mode of (Council of Europe Competition for a thesis on), 509
  The Dawn of (Dr. J. H. Rush), *review* by T. H. Hawkins, 966
Life of Man : The Devil's Repertoire or Nuclear Bombing and the (Victor Gollancz), *review* by R. Brightman, 952
Life through Geological Time : The Succession of (Dr. Kenneth P. Oakley and Helen M. Muir-Wood), third edition, *review*, 73
Life and Death in the Bronze Age (Sir Cyril Fox), *review* by M. C. Burkitt, 1486
Life (Educated): The American College and the (Dr. Douglas M. Knight), 1769
Life (Marine) : The Underwater Guide to (Carleton Ray and Elgin Ciampi), *review* by Dr. D. P. Wilson, 852
Life (Rural): Agriculture and (British Agricultural History Society and the Economic History Society Joint Conference on), 582
Life (Working), of Males in Great Britain : The Length of (Ministry o Labour and National Service), 1780
Life Peerages (Baronies) conferred on Sir Eric James, Sir Edwin Plowden, Prof. Lionel Robbins and Sir Hartley Shawcross, 294
Life Research Institute, World : Appointment of Bruce W. Halstead as director, 793
Life Span of Individual Yeast Cells (Robert K. Mortimer and John R. Johnston), 1751
Life-Span of Rat and Mouse Erythrocytes in the Rat–Mouse Chimera (Dr. Joan W. Goodman and Dr. L. H. Smith), 1833
Lifshitz, E. M. (Landau, L. D., and) : Quantum Mechanics—Non-Relativistic Theory (translated from the Russian by J. B. Sykes and J. S. Bell), *review* by Prof. N. Kemmer, 705
Light, B. G., and others : Palaeomagnetism of certain Rocks from Newfoundland, 596
Light : Effect of, on Maturing Broad Bean Seeds (Dr. G. R. Lane and R. D. Butler), 1063
  Influence of Temperature and, on Reproduction in Male Rats (F. A. Soliman and A. S. Abd-El-Malek), 266
  A Proposed Method for the Measurement of the Velocity of Light (Dr. J. H. Sanders), 312
Light on Visual Pigments : Action of—Vertebrate Lumi- and Meta-Rhodopsins (Dr. Ruth Hubbard, Paul K. Brown and Dr. Allen Kropf), 442 ; Lumi- and Meta-Rhodopsins of Squid and Octopus (Dr. Allen Kropf, Paul K. Brown and Dr. Ruth Hubbard), 446 ; Chicken Lumi- and Meta-Iodopsin (Dr. Ruth Hubbard and Dr. Allen Kropf), 448

Light (New), on Old Darkness, *review* by Prof. R. J. Pumphrey, 1554
Light (Ultra-violet) : Action of, on Skin—Effect of the Histamine Liberator 48/80 and Methotrimeprazine (Prof. S. Claesson, G. Wettermark and L. Juhlin), 1451
  Biochemical Heterogeneity of the Ribonucleic Acid synthesized by *Escherichia coli B* after Irradiation with (Kenshi Suzuki and Joji Ono), 395
Light (Visible) : Induction of Structural Chromosome Changes by (Dr. B. A. Kihlman), 976
Light Emission from Insulating Liquids due to Excitation by d.c. Fields near Breakdown (M. Darveniza), 743
Light Emission (Suppressed), of the Reaction Zone in Detonation (Prof. C. H. Johansson and L. Sternhoff), 247
Light Hydrocarbon Gas Mixtures : Analysis of (Dr. J. A. Barnard and Dr. H. W. D. Hughes), 250
Lightfoot, N. M. H. : Chelsea College of Science and Technology—New Building, 1722
Lighthill, Prof. M. J. : Hypersonic Flow (Study of the Dynamics of Dissociating Oxygen), 1096
Lighting (Controlled) : Effect of, on Production Characters in the Fowl (J. C. Bowman and J. D. H. Archibald), 1138
Lignin : Biosynthesis and Constitution of (Prof. Karl Freudenberg), 1152
Liley, B. S. (Wesson, J. A., and) : Gas Discharges (Operation of SCEPTRE III in the Laboratories of Associated Electrical Industries), 92
Limb Formation (Accessory), in Urodeles : Delayed Denervation and (Dr. Laurens N. Ruben), 765
Limestones (Silurian), of Monmouth : Heavy Minerals in certain Old Red Sandstone and (C. B. Crampton), 485
Limperg, Theodore : Elected a Fellow of the International Academy of Management, 1719
Lindegren, Prof. Carl C., and others: Chromosome Maps of *Saccharomyces*, 800
Lindegren, Gertrude, and others : Chromosome Maps of *Saccharomyces*, 800
Lindner, H. R. : Androgens in the Bovine Testis and Spermatic Vein Blood, 1605
Lindop, N. : Education for Government, 1235
Lindop, Patricia J., and others: Variation of Sensitivity to Ionizing Radiation with Age, 1729
Lindqvist, Dr. I. : Chemistry and Quantum Chemistry, 158
  Co-ordination Chemistry (Structures of some Addition Compounds of Phosphorus Oxychloride and Selenium Oxychloride), 1784
Lindqvist, Lars, and others : Absorption Spectrum and Decay Kinetics of the Metastable State of Chlorophyll *b*, 661
Lindsay, E. M. : Planetary Nebulae in the Large Magellanic Cloud, 453
Linear Transfer of a Potentially Mutant State in Bacteria (Dr. F. Kaudewitz), 871
Lines, Dr. A. W. : Space Research (Practical Problems in connexion with Space Probes and Satellites), 363
Lines (New Bands and), in the Twilight Sky Spectrum (I. A. Khvostikov and T. G. Megrelishvili), 811
Lingafelter, Prof. E. C. : Tetrahedral Co-ordination in Ni(II), 1673
Linguists (Scientific), in the United States, 863
Link between the Annelids and the Arthropods ?, 1782
Link (The Iron–Protein), in Haemoglobin and Myoglobin (Dr. J. E. O'Hagan), 393
Linkage of Polygenes controlling Size of Ascospore in *Neurospora crassa* (B. T. O. Lee and J. A. Pateman), 698
Linkages ('Ester-like'), in Collagen: Occurrence of (Paul M. Gallop, Prof. Sam Seifter and Edward Meilman), 1659
Linnaeus Celebrations (Darwin, Wallace and), in Singapore (Prof. R. D. Purchon), 723
Linnean Society : Symposium on Palaeoecology, 1370
Linnean Society (Experimental Morphology Group): Symposium on Experimental Approaches to the Problems of Growth and Form in Plants, 584
Linnett, Dr. J. W., and others : Use of Approximate Wave Functions for Extrapolation to True Energy Values, 175
Linton, Prof. David L. : River Flow in Great Britain, 1955-56, 710
Lipase and Alkaline Phosphatase Activity : Histochemical Demonstration of, in the Fat Body of the Desert Locust (J. C. George and J. Eapen), 268
Lipid in Normal and Atheromatous Tissue : Liquid Crystals of (G. T. Stewart), 871
Lipid (Sudanophilic), in Sections of Mummified Tissue : Persistence of (Dr. A. T. Sandison), 196
Lipid-soluble Analogues of Acetylcholine : Distinction between Sodium and Potassium in Change in Permeability effected by (Dr. Wolf D. Dettbarn), 465
Lipids isolated from the Aorta, Coronary Arteries and Circulus Willisii of Atherosclerotic Individuals : Composition of (Prof. C. J. F. Böttcher, F. P. Woodford, C. Ch. Ter Haar Romeny, E. Boelsma and C. M. Van Gent), 47
Lipkin, Dr. H. J. : Proceedings of the Rehovoth Conference on Nuclear Structure, held at the Weizmann Institute of Science, Rehovoth, 1957, under the auspices of the International Union of Pure and Applied Physics, *review* by Prof. B. H. Flowers, 709
Lipogenesis and Ketogenesis *in vivo* : Absence of a Relation between (Dr. P. A. Mayes), 540
Lipopolysaccharide from *Vibrio fetus* : Isolation of a (S. M. Dennis), 186
Lipoproteins (Serum), of Dogs : Changes produced in, by Cellulose containing Methyl Groups (Margaret M. Fröhlich, V. Balázs, K. Kovács and A. Benkö), 1119
Lipson, Prof. H. : *Obituary* of Sir James Myers, 82
  Dictionary of Physics, *review*, 1768
Lipson, Prof. H., and Taylor, Dr. C. A. : Fourier Transforms and X-Ray Diffraction, *review* by Dame Kathleen Lonsdale, 969
Liquefaction (Hydrogen), and Associated Techniques (Low Temperature Group of the Physical Society Symposium on), 1504
Liquid Crystals of Lipid in Normal and Atheromatous Tissue (G. T. Stewart), 873
Liquid Fuels (Institute of Fuel second Conference on), 652
Liquid Medium (Hypertonic) : Oxygen Consumption of Different Forms of Stable L *Proteus* P 18 growing in (Prof. P. Mandel, T. Terranova, M. Sensenbrenner and F. Feo), 194
Liquid Phases (Two), in the System Cobalt Chloride–Water–Acetone : Existence of (Dr. J. N. Murrell, Dr. L. I. Katzin and B. L. Davies), 459
Liquid Two-Phase System : Bacteriophage Enrichment in a, with Subsequent Treatment with 'Freon' 113 (Dr. G. Frick and Dr. P. Å. Albertsson), 1070
Liquid–Liquid Interface : An Experimental Method for Diffusion and Extraction Studies across the (Dr. Thomas W. Martin), 312
Liquid/Solid Content of Fats (D. Chapman, R. E. Richards and R. W. Yorke), 44
Liquids : A Geometrical Approach to the Study of (Prof. J. D. Bernal), 141
Liquids (Insulating) : Light Emission from, due to Excitation by d.c. Fields near Breakdown (M. Darveniza), 743
Liquids and Solids : Thermal Properties of Gases, (American Society of Mechanical Engineers and Purdue University Thermo-physical Properties Research Center Symposium on), 294
Liquids (Solids and) : The Study of Molecular and Atomic Motions in, by Radio-frequency Methods (British Radio Frequency Spectroscopy Group and the Groupement AMPERE Joint Meeting on), 652
Lishajko, F. (von Euler, Prof. U. S., and) : Excretion of Catechol in Human Urine, 1123
Lisowski, Józef, and others : Phagocytosis of *Escherichia coli* Protoplasts, 1828
Listening in the Dark, the Acoustic Orientation of Bats and Men (Prof. Donald R. Griffin), *review* by Prof. R. J. Pumphrey, 1554
Lister, Dr. H. : Characteristics of the Antarctic Ice-Sheet, 1577
  Awarded the Dr. W. S. Bruce Memorial Prize for 1958, 1719
Lister, R. M. : Mechanical Transmission of Cassava Brown Streak Virus, 1588
Liszka, Ludwik: A Type of Variation of the Signal Strength from 1958 δ2 (*Sputnik* 3), 1383
Literature : Chinese Scientific (Lending Library Unit of the Department of Scientific and Industrial Research collection of), 932
Literature and Science : Language, (Prof. A. Norman Jeffares), 1366
Lithium in the Upper Atmosphere : Origin of Sodium and (Dr. T. M. Donahue), 1480
Lithium (Atomic) : Electron Affinity of (E. Holøien), 173
Lithium Atoms (Upper-Atmosphere), responsible for the New Twilight Airglow at 6708A. : Origin of (D. R. Barber), 384
Lithium Fluoride (Solid), containing varying Proportions of Lithium Isotopes : Infra-red Dispersion Wavelengths for (Prof. D. J. Montgomery and R. H. Misho), 103
Lithium Isotopes : Infra-red Dispersion Wave-lengths for Solid Lithium Fluoride containing varying Proportions of (Prof. D. J. Montgomery and R. H. Misho), 103
Lithium Lines in the Twilight Airglow in the Northern Hemisphere : Observations of the (Prof. A. Vallance Jones), 1315
Lithium Retention in Ascites Tumour Mice (Shirley E. Simon, E. M. Trautner and D. A. Coats), 1128
Lithium-6- and Lithium-7-rich Fluorides : Refractivity and Lattice Constant Ratios of (Dr. R. W. H. Stevenson and P. T. Nettley), 1000
Little, Dr. Clarence C. : The Inheritance of Coat Color in Dogs, *review* by Dr. Alex Comfort, 5
Little, Dr. Kenneth : Anthropological Studies, *review*, 70
Litwack, Prof. Gerald, and Wojciechowski, Valentina : Reversal of Epinephrine Inhibition of Liver Tyrosine Oxidation, 1675
Liver : Role of, in Metabolism of Chlorpromazine (Dr. R. L. Young, J. J. Ross, jun., and Dr. A. R. Maass), 1396
Liver (Chick) : Vitamin B_{12} and Biosynthesis in (Vitamin B_{12} and Protein Biosynthesis), (Dr. M. J. Fraser and Dr. E. S. Holdsworth), 519
Liver (Glycogen Storage Disease of the) (von Gierke's Disease): Detection of Heterozygous Carriers in (Dr. David Yi-Yung Hsia and Eva Gawronska Kot), 1331
Liver (Mouse) : Effect of Azaserine (*o*-Diazo-acetyl-L-serine) on the Pyridine Nucleotide Levels of (Stuart A. Narrod, Thomas A. Langan, jun., Prof. Nathan O. Kaplan and Abraham Goldin), 1674
Liver (Rabbit) : Cotinine, an Oxidation Product of Nicotine formed by (Howard B. Hucker, James R. Gillette and Bernard B. Brodie), 47
Liver (Rat) : Effect of Protein-free Diet on the Vitamin A Storage in the (M. Rechcigl, jun., S. Berger, J. K. Loosli and H. H. Williams), 1597
  Partition of Selenium-75 in the Intracellular Particulate Matter of (Dr Kenneth P. McConnell, Dorothy M. Roth and R. Duncan Dallam), 183
  Vitamin B_{12} and Biosynthesis in (Vitamin B_{12} and Protein Biosynthesis), (Dr. H. R. V. Arnstein and Dr. J. L. Simkin), 523
Liver Antigens of Mouse Hepatitis : Complement Fixation with Tissue Culture and (Dr. Theodore J. Starr and Dr. Morris Pollard), 1690
Liver Coenzyme *A* in Rats : Effects of Vanadium upon (E. Mascitelli-Coriandoli and C. Citterio), 1527
Liver Degeneration (Dietary Necrotic) : Ineffectiveness of Molybdenum, Osmium and Cobalt in (Dr. Klaus Schwarz, Edward E. Roginski and Calvin M. Foltz), 472
Liver Hexokinase Activity in Rats adapted to Intermittent Starvation (Dr. R. Petrásek), 329
Liver Homogenates of Normal and Alloxanized Rats : Action of Nicotinamide on Acetoacetate Metabolism of (S. Eser, S. Tekman and A. Araz), 184
Liver Microsomes : Activation of Thionophosphates by (Prof. R. D. O'Brien), 121
Liver Storage of Pure α-, β-, γ- and δ-Tocopherols in the Growing Chick : Relative Rates of (T. W. Griffiths), 1061
Liver Tyrosine Oxidation : Reversal of Epinephrine Inhibition of (Prof. Gerald Litwack and Valentina Wojciechowski), 1675
Liver Xanthine Dehydrogenase of Rats : Effect of Salicylate on Blood and (Emilio Mitideri and Ottilia R. Affonso), 471
Living (Tropical) : Design for (Report of the Symposium on, prepared by the National Building Research Institute of the South African Council for Scientific and Industrial Research), 1022
Living Cells : Prevention of Freezing Damage to, by Dimethyl Sulphoxide (Dr. J. E. Lovelock and Dr. M. W. H. Bishop), 1394
Living Mollusc : The, *review* by Prof. C. M. Yonge, 3
Living Organisms : The Evolution of (Royal Society of Victoria Symposium on), 86
Living Rat : Formation of Urea from Arginine in the Brain of the (Michael B. Sporn, Wesley Dingman, Alfred Defalco and Robert K. Davies), 1520
Living Systems : Self-regulation in (National Research Council of Canada Symposium on), 370
Living Tissues : Selective Permeability of, to Carbonic Acid (Dr. B. N. Halpern and R. Binaghi), 1397
Llewellyn, Dr. J. : Relationship between *Dictyocotyle* and *Calicotyle*, 835
  Parasitology (Morphology, Function and Taxonomic Status of the Adhesive Apparatus of Amphibdellatid Parasites of Electric Rays), 1506

Lleyn Peninsula : Nuclear Power Station on the, 222
Lloyd, Dr. A. G. : Chemical Synthesis of Hexose and Hexosamine Sulphates, 109
Local Inhibition by Lactation of chemically induced Breast Tumours in Mice of the *IF* Strain (June Marchant), 629
Lockwood, David : The Blackcoated Worker, *review*, 494
Lockwood, M. : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1236
Locus (Sex-linked) : Stable Equilibrium at a (S. P. H. Mandel), 1347
Locust : Site and Mode of Trehalose Biosynthesis in the (D. J. Candy and Dr. B. A. Kilby), 1594
Locust (Desert) : Histochemical Demonstration of Lipase and Alkaline Phosphatase Activity in the Fat Body of the (J. C. George and J. Eapen), 268
Locusts : Hair Receptors in—Hair Plates on the First Cervical Sclerites of the Orthoptera (Dr. L. J. Goodman), 1106 ; Function of certain Prothoracic Hair Receptors in the Desert Locust (Dr. P. T. Haskell), 1107
Locusts (Flying), and Atmospheric Turbulence (Dr. R. C. Rainey), 1367
Lodge, Dr. E. : Experimental Approaches to the Problems of Growth and Form in Plants (Growth and Form of Mosses), 585
Loewe, Dr. Lotte, and others: Oxidation of Ascorbic Acid and similar Reductones by Nitrous Acid, 163
Loewenstein, Prof. Werner R. : Properties of a Receptor Membrane—Spatial Summation of Electric Activity in a Non-myelinated Nerve Ending, 1724
Loewenstein, Prof. Werner R. (Ishiko, Nobusada, and) : Properties of a Receptor Membrane—Spontaneous Fluctuations in Generator Potential in a Receptor Membrane, 1725
Logan, N. (Addison, C. C., and) : Co-ordination Chemistry (Properties of Volatile Nitrato–Iron Complexes), 1785
Logarithms to the Base 2 : Application of, in the Use of Exponential Dilution Series for the Study of Antibiotic Combinations (H. J. Oskam and A. Koelman), 840
Logic of Scientific Discovery (Prof. Karl R. Popper), *review* by Dr. E. H. Hutten, 1078
Logs stored in Salt Water : Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from, and the Possible Role of Sulphur Compounds (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Logs (Pond-stored) : Bacterial Action in (Eric L. Ellwood and Barton A. Ecklund), 1206
Lombard, A. A. : Awarded the Herbert Ackroyd Stuart Memorial Prize of the Royal Aeronautical Society, 1649
Lombricine : Biochemistry of—Occurrence of D-Serine in Lombricine (Iva M. Beatty, Dr. D. I. Magrath and Prof. A. H. Ennor), 591 ; Synthesis of DL- and L-Lombricine (Iva M. Beatty and Dr. D. I. Magrath), 591
  Occurrence of D-Serine in (Biochemistry of Lombricine), (Iva M. Beatty, Dr. D. I. Magrath and Prof. A. H. Ennor), 591
DL- and L-Lombricine : Synthesis of (Biochemistry of Lombricine), (Iva M. Beatty and Dr. D. I. Magrath), 591
London School of Economics and Political Science : Scholarships in Mathematics for Courses in Statistics and Computational Methods, 85
London School of Hygiene and Tropical Medicine : Award of the Langley Memorial Prize for 1959, 1024
London Waters : Thirty-seventh Report of the Results of the Bacteriological, Chemical and Biological Examination of the, for the Years 1955-56 (E. Windle Taylor), 798
Long, Dr. D. A. : Appointed chief medical adviser and head of the Medical Research Department of the Wellcome Foundation, Ltd., 1234
Long, Harwood : The Fabric of Farming, *review*, 280
Long Ashton Research Station : Appointment of Margaret Randall as organic chemist, 581
Long-Chain Fatty Acids : Synthesis of, from 2-^{14}C-Acetate and ^{14}C-Glucose in *Trichoderma viride* (Dr. W. Mary Crombie and P. E. Ballance), 1195
Long-Distance Transmission by Wave-Guide (Radio and Telecommunication Section of the Institution of Electrical Engineers Convention on), 727
Long-range Order (Variable), in nearly Anhydrous Gamma Alumina : Evidence for a (Prof. G. W. Brindley and Dr. M. Nakahira), 1620
Long-term Survival of Irradiated Mice treated with Homologous Tissue Suspensions (Eric L. Simmons, Leon O. Jacobson, Edna K. Marks and Evelyn O. Gaston), 556
Long-time Ionization (Short- and) : Surface Charges produced on Insulators by (Dr. Stanley I. Reynolds), 671
Longbottom, J., and others : Immunological Aspects of Allergic Disorders (Immuno-chemistry of *Cladosporium*), 297
Longuet-Higgins, Prof. H. C. : Relaxation Processes (Ultrasonic Relaxation observed in Toluene), 584
Lonsdale, Dame Kathleen : Fourier Transforms and X-Ray Diffraction, *review*, 969
Looking and Finding (Geoffrey Grigson), *review* by T. H. Hawkins, 1557
Looms, J. S. T. : Gas Discharges (Electrostatic Precipitators), 93
Loosli, J. K., and others : Effect of Norleucine and related Compounds on Growth of the White Rat, 1519
  Effect of Protein-free Diet on the Vitamin A Storage in the Rat Liver, 1597
Lorand, Dr. L. (Molnar, J., and) : Transphosphorylating Enzymes and Muscle Relaxation, 1032
Lords, House of : Debate on Fuel and Power in Britain, 511
  Second Reading of the Electricity (Borrowing Powers) Bill, 794
  Debate on Inland Waterways in Britain, 1305
Loss of Moisture : Effects of Heat and, on the Dormancy of Wheat, and some Interactions with 'Mergamma *D*' (P. D. Hewett), 1600
Loughhead, R. E., and Bray, R. J. : 'Turbulence' and the Photospheric Granulation, 240
Lousley, J. E. : The British Flora during 1958, 869
Love, Dr. Robert, and Bharadwaj, Dr. T. P.: Two Types of Ribonucleoprotein in the Nucleolus of Mammalian Cells, 1453
Lovelace, A. M., and others : Aliphatic Fluorine Compounds, *review* by Prof. R. N. Haszeldine, 139
Lovelace, II., W. Randolph, and others (edited by) : Aviation Medicine—Selected Reviews, *review*, 1291
Loveless, M. : Immunological Aspects of Allergic Disorders (Reproducibility and Practical Value of the Conjunctival Test for Estimating the Degree of Hypersensitivity to Ragweed Pollen), 296
Lovell, Prof. A. C. B. : The Individual and the Universe, *review* by Dr. R. A. Lyttleton, 1624
Lovell, Prof. W. E. : Retirement as head of the Department of Electrical Engineering in the University of Saskatchewan, 1302 ; work of, 1302
Lovelock, Dr. J. E., and Bishop, Dr. M. W. H. : Prevention of Freezing Damage to Living Cells by Dimethyl Sulphoxide, 1394
Lovering, Dr. J. F. : Frequency of Meteorite Falls throughout the Ages, 1664
Lovering, Dr. J. F. (Stacey, Dr. F. D., and) : Natural Magnetic Moments of Two Chondritic Meteorites, 529
Löw, K., and Edvarson, K. : Caesium-137 in Swedish Milk and Soil, 1104
Low Air Temperature Record : World, 153
Low Alkali Concentration : Catalytic Action of Copper in the Alkaline Autoxidation of Cellulose at (R. I. C. Michie and Dr. S. M. Neale), 534
Low Concentrations of Alcohols : Effect of, on the Interfacial Tension between Water and Hydrocarbons (F. Franks and Dr. D. J. G. Ives), 316
Low-Energy Corpuscular Radiation at High Latitudes (K. D. Cole), 738
Low-flying Aircraft : Drift of Toxic Chemicals released from a (D. Yeo, N. B. Akesson and H. H. Coutts), 131
Low Sun Phenomena : The Green Flash and other (D. J. K. O'Connell), *review* by James Paton, 423
Low-Temperature Chars : Smoke Emission of (W. N. Adams, A. F. Gaines, D. H. Gregory and G. J. Pitt), 33 ; (Prof. Morris W. Travers), 1321
Low Temperature Physics and Chemistry—Proceedings of the Fifth International Conference on Low Temperature Physics and Chemistry, Madison, 1957 (edited by Joseph R. Dillinger), *review* by Dr. K. Mendelssohn, 1150
Low Temperature Research Station of the Department of Scientific and Industrial Research to be transferred to the Agricultural Research Council, 862
Low-Temperature Specific Heats of Body-centred Cubic Chromium-Iron and Chromium-Manganese Alloys (C. T. Wei, C. H. Cheng and Prof. P. A. Beck), 315
Low Temperatures, *review* by Dr. K. Mendelssohn, 1150
  Deoxyribonucleic Acid Content of the Cell-Nuclei in the Adrenal Medulla after Exposure to (L. Leeman), 1188
Löwdin, Dr. P. O. : Chemistry and Quantum Chemistry, 158
Lowe, L. G. : Pyrite Granules and Fossil Micro-organisms, 437
Lowe, W. George : Awarded the Cuthbert Peek Grant of the Royal Geographical Society, 292
Lowenstein, Prof. O. : The Ear under Water, 1787
Lowered Metabolism in Ground Squirrels : Aortic Medial Calcification and (Dr. George R. Zimmerman and Prof. G. Edgar Folk, jun.), 754
Lowery, Dr. H. : Of What Use is Acoustics to the Musician?, 1294
Lowest Oxidation States of Technetium and Rhenium (R. Colton, J. Dalziel, W. P. Griffith and Prof. G. Wilkinson), 1755
Lowthian, C. S. (French, P. R. J., and) : Nuclear Fuel Cycles (A Once-through Equilibrium Fuel Cycle), 1647
Lowy, Dr. J., and Millman, B. M. : Contraction and Relaxation in Smooth Muscles of Lamellibranch Molluscs, 1730
Lubricant (Boundary) : Material Transfer in Monomolecular Layers of a (George L. Gaines, jun.), 1110
Lucas, Ltd., Joseph : Gift of £100,000 to the University of Birmingham, for building a hall of residence for graduate students in engineering, 153
Lucilia cuprina Wied. : Genetics of Dieldrin Resistance in (G. J. Shanahan), 1540
Luck, C. P., and Wright, P. G.: Aqueous Humour of the Hippopotamus, 1595
Luck, J. Murray, and others (edited by) : Annual Review of Biochemistry, Vol. 27, *review* by Prof. F. G. Young, 961
Luckwell, Dr. L. C. : Experimental Approaches to the Problems of Growth and Form in Plants (Factors controlling the Growth and Forms of Fruits), 585
Lührs, Prof. W., and others : Influence of L-3',5,3-Triiodothyronine on the Oxidative Phosphorylation of Tumour Mitochondria, 1534
Lumi- and Meta-Iodopsin : Chicken (Action of Light on Visual Pigments), (Dr. Ruth Hubbard and Dr. Allen Knopf), 448
Lumi- and Meta-Rhodopsins : Vertebrate (Action of Light on Visual Pigments), (Dr. Ruth Hubbard, Paul K. Brown and Dr. Allen Kropf), 442
Lumi- and Meta-Rhodopsins of Squid and Octopus (Action of Light on Visual Pigments), (Dr. Allen Kropf, Paul K. Brown and Dr. Ruth Hubbard), 446
Luminescence of Short-Persistence Phosphors : Rise and Decay of Intensity of (Dr. R. Feinberg), 1546
Lumpy Skin Disease of Cattle in Kenya (M. L. Burdin and J. Prydie), 949
Lunar Craters : Simulation of—a Blowhole Theory (Dr. A. G. Gaydon and R. C. M. Learner), 37
Lunar Craters and Maria : Origin of the (Prof. Zdenek Kopal), 169, 737 ; (Dr. William G. van Dorn), 737
Lunar Radio Communication Link across the Atlantic, 1500
Lunardi, Vincenzo (1759-1806), 84
Lundberg, Dr. J. L., and Nelson, Dr. L. S. : Initiation of Thermal Reactions by the Flash Illumination of Absorbing Bodies, 1560
Lundqvist, Dr. S. : Chemistry and Quantum Chemistry, 158
Lung : Carcinoma of the (edited by J. R. Bignall), *review* by Dr. L. Foulds, 955
Lung (Foetal) : Amniotic Fluid and the (Bernard Towers), 1140
Lung Tumours : Induction of, by Radioactive Particles (Lewis A. Temple, D. H. Willard, S. Marks and W. J. Bair), 408
Lüning, Prof. K. G., and Henriksson, H. O. : Recoverable Lethal Mutations in *Drosophila* Sperm, 1211
Lunt, Dr. R. W. : Gas Discharges (Excitation of Hydrogen by Electron Swarms), 93
Lupins (*Lupinus luteus* L.) : Abscission-Accelerators in (R. F. M. Van Steveninck), 1246
Lupinus luteus L. : Abscission-Accelerators in Lupins (R. F. M. Van Steveninck), 1246
Lüscher, Prof. M. (Karlson, Dr. P., and) : 'Pheromones', a New Term for a Class of Biologically Active Substances, 55
  The Proposed Biological Term 'Pheromone', 1835
Luzzati, Dr. V., and others : Crystal Structure of Calcium Thymidylate, 880
Luzzati, Dr. V. (Skoulios, A., and) : Structure of Anhydrous Sodium Soaps at High Temperatures, 1310
Lwoff, Dr. A. : Characteristics of the Bartonellas, *review*, 207
Lyell Fund (a moiety of the) for 1959 of the Geological Society awarded to C. O. Harvey and to Dr. W. H. C. Ramsbottom, 364

Lyell Medal for 1959 of the Geological Society awarded to Prof. D. Williams, 364
Lymph (Dogs' Serum and): Determination of Transaminase Activity in, after Hepatic Damage due to Acute Biliary Obstruction (Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 48
Lymphatic Congestion: Changes in Serum Transaminase Activity following Myocardial Damage due to (M. Földi, Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 1333
Lymphocyte Problem (Prof. J. M. Yoffey), 76
Lymphocyte Remnants: Re-utilization of, by Reticular Cells (Dr. M. Hill), 1059
Lymphocytes during Antibody Production: Changes in (K. W. Keohane and W. K. Metcalf), 195
Lyne, Dr. A. G., and others: Œstrous Cycle, Gestation Period and Parturition in the Marsupial *Trichosurus vulpecula*, 622
Lysergic Acid Diethylamide: Quantitative Measurement of the Effect of, on Mice and its Interactions with other Drugs (Dr. J. R. Smythies), 545
Lysimeters (International Association of Scientific Hydrology Symposium on), 438
Lysine: Role of, in catalysing Ester Hydrolysis (William R. Chesbro and Prof. Leslie R. Hedrick), 994; (Alexander Gero), 994
Lysis (Osmotic): Spermine as a Protective Agent against (J. Mager), 1827
Lysolecithin: Hydrolysis of Lecithin and, by Rumen Micro-organisms of the Sheep (Dr. R. M. C. Dawson), 1822
Lysozyme: Antiviral Activity of (Prof. Rodolfo Ferrari, Dr. Carlo Callerio and Dr. Giuseppe Podio), 548
Lytic Enzyme: Effect of, from *Bacillus circulans* and Chitinase from *Streptomyces* sp. on *Aspergillus oryzae* (Koki Horikoshi and Dr. Shigeji Iida), 186
Lyttleton, Dr. R. A.: Awarded the Gold Medal of the Royal Astronomical Society, 151
    The Universe at the Beginning of the 'Space Age', 1019
    Man and the Universe, *review*, 1624

MAALØE, Prof. O., and others: Synthesis of Deoxyribonucleic Acid during the Division Cycle of Bacteria, 1207
Maass, Dr. A. R., and others: Role of Liver in Metabolism of Chlorpromazine, 1396
Mabbs, F. E., and others: Co-ordination Chemistry (Variation of the Magnetic Susceptibility of Vanadian(III) Complexes with Temperature), 1784
McAdams, Prof. W. H.: Presented with a Gold Medal of the Institut Français des Combustibles et de l'Energie, 151
Macan, Dr. T. T.: Water Pollution Research (1957), 161

Malachite Green-reducing Enzyme in *Mycobacteria* (Iván Tárnok and Pál Czanik), 549
Malate from Glycollate : Formation of, by *Pseudomonas ovalis* Chester (Biosynthesis of Cell Constituents from C_2-Compounds), (Dr. H. L. Kornberg and A. M. Gotto), 1791
Malatesta, L., and Sandroni, S. : Co-ordination Chemistry (Carbonyls of Iridium (III)), 1785
Malaya : Bamboos of (R. E. Holttum), 1169
  Geology and Palaeontology in—Pre-Tertiary Stratigraphic Succession in Malaya (J. B. Alexander), 230 ; Jurassic/Cretaceous Sediments in Malaya (J. R. Paton), 231 ; Graptolites recorded from Malaya (C. R. Jones), 231
  Graptolites recorded from (Geology and Palaeontology in Malaya), (C. R. Jones), 231
  Jurassic/Cretaceous Sediments in (Geology and Palaeontology in Malaya), (J. R. Paton), 231
  Pre-Tertiary Stratigraphic Succession in (Geology and Palaeontology in Malaya), (J. B. Alexander), 230
Malayan Myristicaceae : A Revision of the (J. Sinclair), 1169
Male Rats : Influence of Temperature and Light on Reproduction in (F. A. Soliman and A. S. Abd-El-Malek), 266
Male and Female Adults of *Trogoderma granarium* Everts : Differential Response of, towards Sterilizing Doses of Gamma-radiation (G. C. Carney), 338
Málek, I. (Hubáček, J., and) : Factors Inhibiting and Stimulating Growth of *Mycobacteria* in the Blood and Serum of Non-immunized and Immunized Animals, 187
Males in Great Britain : The Length of Working Life of (Ministry of Labour and National Service), 1780
Malformations (Multiple) : Co-existence of the Embryonic (Third Normal) Haemoglobin Fraction with Erythroblastosis in the Blood of Two Full-term New-born Babies with (Prof. I. Halbrecht, Ch. Klibanski and F. Bar Ilan), 327
Malherbe, Prof. E. G. : The Role of the Scholar in Society, 1772
Malic Dehydrogenase : A Microsomal (Kenneth H. Shull), 259
Malignant Cells (Normal and), cultivated in Synthetic Media : Glutamine Metabolism of (Arthur E. Pasieka and Dr. Joseph F. Morgan), 1201
Malinow, Dr. Manuel René, and others : Distribution of Alkaline Phosphatase in the Arteries of several Species, 1262
Malmström, Dr. Bo G., and others : An Electron Spin Resonance Study of the State of Copper in Fungal Laccase, 321
Malonate Metabolism by Plant Tissues (Prof. Leland M. Shannon, Roger H. Young and Carlton Dudley), 683
Malvalic Acid and some related C_{18} and C_{19} *Cyclo*propane Fatty Acids : Structure of (Dr. B. Craven and Prof. G. A. Jeffrey), 676
Mammalian Blood : Anticoagulant Action of Fibrin Surfaces on (Dr. A. L. Copley, D. Steichele, M. Spradau and R. S. Thorley), 1683
Mammalian Cells : Two Types of Ribonucleoprotein in the Nucleolus of (Dr. Robert Love and Dr. T. P. Bharadwaj), 1453
Mammalian Cells irradiated *in vivo* : A Survival Curve for (Dr. H. B. Hewitt and C. W. Wilson), 1060
Mammalian Connective Tissue : Polysaccharide Fibres in (A. J. Cruise and J. W. Jeffery), 677
Mammalian Hair, *review* by Dr. F. W. Dry, 851
Mammalian Organs : Juvenile Hormone in Thymus, Human Placenta and other (Prof. Carroll M. Williams, Lynn V. Moorhead and Jean F. Pulis), 405
Mammalian Ribonucleic Acid *in vivo* ? : Are Nucleoside Triphosphates Precursors of (Prof. Paul Mandel, Jacques-David Weill, Marc Ledig and Suzanne Busch), 1114
Mammalian Skeletal Muscle : Synthesis of Adenylosuccinic Acid in Preparations of (C. L. Davey), 995
Mammalian Tumour Virus : *In vitro* Analysis of a (Dr. Leo Sachs, Dr. Marian Fogel and Ernest Winocour), 663
Mammals : Fast and Slow Muscles in (Dr. A. J. Buller, Dr. A. C. Dornhorst, Dr. R. Edwards, Dr. D. Kerr and Dr. R. F. Whelan), 1516
Mammals of Canada : Birds and, 154
Mammary Cancer : Proceedings of the Second International Symposium on, held at Perugia, 1957 (edited by Lucio Severi), *review* by Dr. L. Foulds, 955
Mammary Carcinoma Agent (Mouse) : Purification of the, by means of a Fluorocarbon (Robert S. Stone and Prof. Dan H. Moore), 1275
Mammary Gland of the Rat : Effect of Insulin and Phenazine Methosulphate on Pathways of Glucose Catabolism in the (P. McLean), 182
Mammary Tumour in a *C3H* Mouse : A Cytopathogenic Agent from a, that produces Tumours in Swiss Mice and Hamsters (Dr. E. A. McCulloch, A. F. Howatson, L. Siminovitch, A. A. Axelrad and A. W. Ham), 1535
Man : The Age of the Earliest Remains of, 1433
  Arms and the, *review* by R. Brightman, 952
  Blood Groups in (Dr. R. R. Race and Dr. Ruth Sanger), third edition, *review* by Dr. F. Stratton, 280
  The Devil's Repertoire or Nuclear Bombing and the Life of (Victor Gollancz), *review* by R. Brightman, 952
  The Educated—Today and Tomorrow (Sir John Wolfenden), 1780
  The Inferior Mesenteric Ganglion in (J. A. Southam), 697
  Natural Selection in (Society for the Study of Human Biology Symposium on), 159
  Science Theory and (Prof. Erwin Schrödinger), *review* by Prof. W. H. McCrea, 1218
Man and the Universe, *review* by Dr. R. A. Lyttleton, 1624
Man's Changing Vision of the Universe : The Sleepwalkers—a History of (Arthur Koestler), *review* by Dr. A. R. Hall, 1419
Man (Conscious) : The Excitable Cortex in (Dr. Wilder Penfield), *review* by Dr. P. B. Bradley, 781
Man (Practical) : Plastics for the, *review* by Dr. S. H. Palmer, 851
Man (Psychological) : Behaviour and (Prof. Edward Chace Tolman), *review* by Prof. John Cohen, 781
Man-power : Scientific and Technological, 489
  The Work Output of Animals—Flight by Birds and by (Dr. D. R. Wilkie), 1515
Man-power (Scientific), in Europe (Edward McCrensky), 489
Man-power (Scientific), and Development in Britain, 67
Management : Art and Science of, 419
Management, British Institute of : Conference on Changing Industry, 655
Management, International Academy of : Election of new Fellows, 1719
Management a Profession ? : Is (Lyndall F. Urwick), 419
Management Studies : Urwick Medal for (Polytechnic Management Association), 1643
Management Theory, 300
Management (Industrial) : European Conference for (Industrial Prospects in Nuclear Energy, organized by the European Nuclear Energy Agency of the Organization for European Economic Co-operation,) 1094
Management and Technology (Problems of Progress in Industry, 3), (Joan Woodward), 300
Manchester, K. L. : Awarded a Royal Society Research Studentship (Mr. and Mrs. John Jaffé Donation), 1365
Manchester Literary and Philosophical Society : New Building of the, 1303
  Memoirs and Proceedings, Vol. 100, The Biographical Approach to John Dalton (Frank Greenaway), *review* by Prof. J. R. Partington, 1765
Manchester Museum : Annual Report for 1957-58 (Dr. D. E. Owen), 1718
Mandel, Prof. Paul, and others : Oxygen Consumption of Different Forms of Stable L *Proteus* P 18 growing in Hypertonic Liquid Medium, 194
  Are Nucleoside Triphosphates Precursors of Mammalian Ribonucleic Acid *in vivo* ?, 1114
Mandel, S. P. H. : Stable Equilibrium at a Sex-linked Locus, 1347
Mandelbaum, Dr. Fajga R., and others : Blood-clotting Activity of the Venom of *Bothrops jararaca*, 114
Mandl, Dr. F. : Quantum Mechanics, second edition, *review* by Prof. N. Kemmer, 705
Manganese in Modern and Fossil Gastropod Shells (Dr. David Krinsley), 770
Manganese-rich Deposits of the Sea Floor : Biological Origin of (John W. Graham and Susan C. Cooper), 1050
Mangler, Dr. K. W. : Hypersonic Flow (Special Aspects of Hypersonic Flow Fields), 1095
Manitoba : Flora of (H. J. Scoggan), *review* by N. Y. Sandwith, 966
Manley, Prof. Gordon : Geographical Climatology, *review*, 421
Mann, F. G., and Millar, I. T. : Co-ordination Chemistry (Determination of Grignard Reagents), 1785
Mann, S. O., and others : A Relationship between some Bacteria, Protozoa and Diet in Early Weaned Calves, 634
Mann, Dr. T. (Hammond, Dr. J., and) : *Obituary* of Dr. Arthur Walton, 1777
Mann, W. B., and Seliger, H. H. : Preparation, Maintenance and Application of Standards of Radioactivity, 1023
Mansa Konko (Gambia Land Use Map, Sheet 14/11), (Directorate of Overseas Surveys), 20
Mansfield, W. K. : Elementary Nuclear Physics, *review* by R. Vaux, 1149
Mantle (Earth's) : Drilling a Borehole to the (Prof. Hans Pettersson), 436
Manufacture of Iron and Steel : Principles underlying the (Exhibition at the Science Museum, London), 293
Manufacture of Polypropylene in Britain, 1162
Manufacture (Commercial), of Nuclear Fuel Elements, 1232
Manufacturing Industry, 1955 (British) : Estimates of Resources devoted to Scientific and Engineering Research and Development in (Department of Scientific and Industrial Research), 847
Manure : Marl, an Ancient (G. E. Fussell), 214
Manuscripts : The Heaviside, 578
Maps (Chromosome), of *Saccharomyces* (Prof. Carl C. Lindegren, Gertrude Lindegren, Ernest E. Shult and Sharon Desborough), 800
Maraini, G., and others : Incorporation of Thymidine labelled with Tritium by Circulating Cells of Infectious Mononucleosis, 1691

Marasmius perniciosus Stahel (Witch Broom Disease of Cacao) : Absence of Gibberellin-like Substances in Filtrates of (W. F. Dudman and R. Nichols), 899
Marchal, R. : La Thermodynamique et le Théorème de l'Energie utilisable, *review* by R. W. Haywood, 353
Marchant, June : Local Inhibition by Lactation of chemically induced Breast Tumours in Mice of the *IF* Strain, 629
Marcus, Rudolph J., and Moss, Lloyd K. : Reduction of Menadione in Hexane by Chlorophyll *a* under Ultra-Violet Irradiation, 990
Marggraf, Andreas Sigismund (1709-82), 578
Marginal Growth of Leaves (Dr. Noboru Hara), 1409
Maria : Origin of the Lunar Craters and (Prof. Zdenek Kopal), 169, 737 ; (Dr. William G. van Dorn), 737
Marine Bacteria : Adaptation of, to Growth in Media lacking Sodium Chloride (Prof. D. B. Pratt and G. Waddell), 1208
Marine Bed Alga requiring Vitamin B_{12} : *Goniotrichum elegans*, a (Lisbeth Fries), 558
Marine Biological Association of India : Election of Officers, 1783
Marine Biology, especially Fisheries : Shorewards Upslope of the Layer of Minimum Oxygen off Bombay—its Influence on (Dr. J. N. Carruthers, S. S. Gogate, J. R. Naidu and T. Laevastu), 1084
Marine Biology or Oceanography : Grants for research in (Challenger Society), 1368
Marine Birds : Salt Excretion in (Dr. L. Harrison Matthews), 202
Marine Bottom Fauna (British) : New Members of the (G. M. Spooner), 1695
Marine Ecology (Prof. Hilary B. Moore), *review* by Prof. C. M. Yonge, 420
Marine Fishes : British, *review* by Dr. D. P. Wilson, 140
Marine Life : American, *review* by Dr. D. P. Wilson, 852
  The Underwater Guide to (Carleton Ray and Elgin Ciampi), *review* by Dr. D. P. Wilson, 852
Marine Plants : Chlorophyll *a* in some Corals and (Dr. Paul R. Burkholder, Lilliam M. Burkholder and Juan A. Rivero), 1338
Marine Research in the United States : Expansion of, 1005
Marine Studies in the Inshore Waters of Antarctica near Mawson, 1956 (Dr. J. S. Bunt), 1541
Marine Transgression of Boreal Age in the Southernmost Part of Norway (Gunnar Gabrielsen), 1616
Maritime Museum, National : Exhibition of an Astrolabe made by Regiomontanus, 508
Markenson, J., and others : Immunizing Properties of Insoluble Cell Material derived from *Brucella*, 1693
Marketing of Radioactive Isotopes in Britain : Production and, 720
Markham, Dr. Roy : Biological Information—Theory and Practice, *review*, 1292
Marking Probit : Dose–Response Relationship in Radiation Leukaemia—the (Dr. D. J. Mewissen), 401
Marking *Tilapia* Spp. (Pisces : Cichlidae) : Methods of (Vernon D. van Someren and Peter J. Whitehead), 1746
Marks, Edna K., and others : Long-term Survival of Irradiated Mice treated with Homologous Tissue Suspensions, 556
Marks, Prof. Paul A., and others : Gene Action in Erythrocyte Deficiency of Glucose-6-phosphate Dehydrogenase—Tissue Enzyme-Levels, 1266
Marks, S., and others : Induction of Lung Tumours by Radioactive Particles, 408
Marl, an Ancient Manure (G. E. Fussell), 214
Marlins in British East African Waters (F. Williams), 762
Marmur, Dr. Julius, and Doty, Prof. Paul : Heterogeneity in Deoxyribonucleic Acids, 1, Dependence on Composition of the Configurational Stability of Deoxyribonucleic Acids, 1427
Marmur, Dr. Julius, and others : Heterogeneity in Deoxyribonucleic Acids, 2, Dependence of the Density of Deoxyribonucleic Acids on Guanine-Cytosine Content, 1429
Marrian, Prof. G. F. : Retirement from the chair of chemistry in relation to medicine in the University of Edinburgh, 1567 ; work of, 1567
Marrian, Prof. G. F., and others (edited by) : Vitamins and Hormones—Advances in Research and Applications, Vol. 15, *review* by Prof. F. G. Young, 568 ; Vol. 16, *review* by Prof. F. G. Young, 778
Marrow (Bone-), in Irradiated Mice : Effect of Pyrimidine Deoxyribonucleotides on the Regeneration of (Dr. Z. Karpfel, J. Soška and V. Drášil), 1600
Marsden, Sir Ernest : Radioactivity of Soils, Plant Ashes and Animal Bones, 924
Marsh, C. A. : Flavone Glucosiduronic Acids from *Scutellaria* sp.—a Correction, 1824
Marsh, Dr. George W. (Miller, J. H., and) : Awarded jointly the Mrs Patrick Ness Award of the Royal Geographical Society, 292
Marshall, Sir Guy : *Obituary* by Dr. W. J. Hall, 1364
Marshall, N. B. : Bear Island Cod, 1100
  Obituary of William Hanson, 1715
  Bertil Hanström, *review*, 1767
Marsupial *Trichosurus vulpecula* : Œstrous Cycle, Gestation Period and Parturition in the (Dr. A. G. Lyne, Phyllis E. Pilton and G. B. Sharman), 622
Martell, Arthur E., and others : Metal–Oxygen Stretching Frequencies in the Metal Chelate Compounds of β-Diketones, 459
  Co-ordination Chemistry (Infra-red Spectra of the Metal Complexes of β-Diketones), 1784
Martin, Dr. A. J. P. : Appointed research director of Griffin and George (Research and Development), Ltd., 368
Martin, Dr. B. F. : Enzyme Activity in the 'Isolated' Colon, 1464
Martin, Dr. D. C. : International Conference on Scientific Information, 147
  Automatic Reduction of Geophysical Data (Arrangements for the collection of Data during the International Geophysical Year), 1167
Martin, D. J. R. : Awarded a Premium by the Radio Industry Council, 1023
Martin, Douglas L. : Self-regulation in Living Systems—Symposium at Ottawa, 370
Martin, D. L., and Rossotti, F. J. C. : Co-ordination Chemistry (Stability of Metal Complexes—Polynuclear Copper (II) Complexes of Carboxylic Acids), 1784
Martin, Dr. Gustav J. (edited by) : Clinical Enzymology, *review* by Prof. F. G. Young, 1151
Martin, Sir Leslie : The Commonwealth Advisory Committee on Defence Science—Meeting in Australia, 1165
Martin, Prof. R. M. : Truth and Denotation, a Study in Sementical Theory, *review* by F. I. G. Rawlins, 1628
Martin, Jr., Prof. Thomas L. : Physical Basis for Electrical Engineering, *review* by Dr. D. A. Bell, 707
Martin, Dr. Thomas W. : An Experimental Method for Diffusion and Extraction Studies across the Liquid–Liquid Interface, 312
Martyn, Dr. D. F. : Sporadic *E*-Region Ionization, 'Spread *F*', and the Twinkling of Radio Stars, 1382
Maruzzella, Dr. Jasper C., and Freundlich, Dr. Martin : Antimicrobial Substances from Resistant and Non-resistant Seeds, 972
Marwick, Dr. J. : *Obituary* of Dr. John Henderson, 1[illegible]97
Mascitelli-Coriandoli, E., and Citterio, C. : Effects of Vanadium upon Liver Coenzyme *A* in Rats, 1527
Maser Observations in Radio Astronomy (L. E. Alsop, J. A. Giordmaine, C. H. Mayer and C. H. Townes), 223
Mash (Barley), fermented by the Amylo Process : Unfermented Sugars in (Hideo Ono and Michio Dazai), 1055
Maskell, Prof. E. J. : *Obituary* by Prof. Walter Stiles, 219
Masking in Viral and Rickettsial Infections : Symposium on Latency and—the Proceedings of a Conference held at the University of Wisconsin Medical School, 1957 (edited by Duard L. Walker, Robert P. Hanson and Alfred S. Evans), *review* by Dr. Kenneth M. Smith, 71
Mason, Dr. Brian : Chemical Composition of Tektites, 254
Mason, Dr. B. J. : Appointed visiting professor of meteorology by the University of California, 794
  Interfacial Phenomena (Epitaxial Growth of Ice Crystals on various Substrates), 1097
Mason, P. : Propagation of Finite Elastic Waves in Rubber, 812
Mason, Dr. R. J. : Some South African Stone Age Cultures, 377
Mason, Dr. S. F. (Farrell, P. G., and) : Kinetic Isotope Effect in the Bromination of Dimethylaniline, 250
Mason, Dr. Warren P. : Physical Acoustics and the Properties of Solids, *review* by Prof. E. G. Richardson, 1221
Mass Spectroscopy (Prof. Henry E. Duckworth), *review* by Prof. K. T. Bainbridge, 638
  Apparatus and Applications of, *review* by Prof. K. T. Bainbridge, 638
Massey, Prof. H. S. W. : Inaugural Address at the Physical Society's Conference on Gas Discharges, 91
  Royal Society Discussion on Space Research opened by, 362
Massey, Prof. H. S. W., and Kestelman, H. : Ancillary Mathematics, *review* by Prof. T. A. A. Broadbent, 1703
Mast Cells : Analysis of, by means of Polarization Microscopy (Prof. Leslie Horváth), 1067
  Differences in Mechanism in Staining Reactions for (Dr. Harold M. Fullmer), 1274
  Leucine Aminopeptidase Activity in (Dr. O. Braun-Falco and Dr. K. Salfeld), 51
Masters, E. F. O. (Bowen, J. H., and) : Nuclear Reactor Control and Instrumentation, *review* by R. Vaux, 1149
Mastrokalos, N., and others : New Variant of Human Foetal Haemoglobin, 30
Mastrokalos, N. (Fessas, Dr. Phaedon, and) : Demonstration of Small Components in Red Cell Haemolysates by Starch-gel Electrophoresis, 1261
Matching and Prediction in the Social Sciences (W. A. Belson), 772
Material (Photo-elastic) : Gelatin as a (H. G. Bayley), 1757
Material (Scale-rich), from Wool : Separation and Analysis of (Dr. J. H. Bradbury), 305
Material Transfer in Monomolecular Layers of a Boundary Lubricant (George L. Gaines, jun.), 1110
Materials (Engineering) : The Fracture of (Eastern New York Chapter of the American Society for Metals Conference on), 1368
Materials (Fired Ceramic) : Adsorption and Desorption of Moisture in (F. Vaughan and A. Dinsdale), 600
Materna, J. (Sobotka, A., and) : Forest Seedlings and Mycorrhiza Development on Fly Ash, 1066
Mathematical Colloquium (Edinburgh Mathematical Society), 1234
Mathematical Tables and other Aids to Computation : Appointment of Harry Polachek as chairman of the editorial committee, 865
Mathematical Theory of Inventory and Production : Studies in the (Kenneth J. Arrow, Samuel Karlin and Herbert Scarf), *review* by Dr. L. S. Goddard, 1557
Mathematics (University of Liverpool Conference on), 368
Mathematics at Newcastle-upon-Tyne, 1365
Mathematics in American Secondary Schools, 1366
Mathematics for the Physical Sciences, *review* by Prof. T. A. A. Broadbent, 1703
Mathematics : Ancillary (Prof. H. S. W. Massey and H. Kestelman), *review* by Prof. T. A. A. Broadbent, 1703
  Neuro-, *review* by A. H. Armstrong, 350
  Physics and (Progress in Nuclear Energy, Series I, Vol. 2), (edited by D. J. Hughes, J. E. Sanders and J. Horowitz), *review* by Dr. J. Walker, 422
  Scholarships in, for Courses in Statistics and Computational Methods (London School of Economics and Political Science), 85
  School, 1092
Mathematics (Applied), in the Soviet Union, 863
Mathematics (Secondary School) : An Emerging Programme of (Prof. Max Beberman), 1366
Mathematics (Teaching), in Secondary Schools (Ministry of Education), *review* by W. J. Langford, 1076
Mathematics Research Center, United States Army : Symposium at the University of Wisconsin on Boundary Problems in Differential Equations, 224
Mather, K. B. : Antarctic Meteorology, 1503
Mather, K. B., and Swan, Dr. P. : Nuclear Scattering, *review*, 639
Matheson, Colin : *Obituary* of Dr. J. Travis Jenkins, 789
Matheson, Prof. J. A. L. : Appointed first vice-chancellor of the new Monash University, Melbourne, 1643
Mathews, J. F., and others : Metallic Conduction in the Crystal Compounds of Graphite, 454
Mathewson, D. S., and others : A High-resolution Survey of the Andromeda Nebula at 408 Mc./s., 1250
  A High-Resolution Survey of the Coma Cluster of Galaxies at 408 Mc./s., 1663
Mathieson, Robert T. : Electron Microscopy of Oleophobic Monolayers, 1803
Mating (Assortative), and Reciprocal Difference in the Blue–Snow Goose Complex (Dr. F. G. Cooch and Dr. J. A. Beardmore), 1833

Mating (Assortive) : Possibility of, in the Arctic Skua (P. O'Donald), 1210
Matsen, Prof. F. A. : Chemistry and Quantum Chemistry, 159
Matsui, Toshitaka, and others : Reduced Activity of Histaminase in Rats sensitized by *Bordetella pertussis*, 755, 756
Matsumura, Dr. S. : Wheat Genetics, 26
Matter : Mind and (Prof. Erwin Schrödinger), *review* by Prof. W. H. McCrea, 1218
Matter (Intracellular Particulate), of Rat Liver : Partition of Selenium-75 in the (Dr. Kenneth P. McConnell, Dorothy M. Roth and R. Duncan Dallam), 183
Matter (Particulate) : Examination of, on Filter Membranes (D. Anson, W. J. Grant and R. M. Jones), 1000
Matthew, Prof. R. H. : Elected a Fellow of the Royal Society of Edinburgh, 719
Matthews, C. M. E., and others : Albumin labelled with Iodine-131 in an Analbuminaemic Subject, 606
Matthews, J. E. : Gas Discharges (Spark, High-frequency and Glow Discharges), 93
Matthews, Prof. J. R. : Retirement from the chair of botany in the University of Aberdeen, 1640 ; work of, 1640
Matthews, Dr. L. Harrison : Salt Excretion in Marine Birds, 202
  Early American Naturalists, *review*, 1006
Mattox, Vernon R. (Lewbart, Marvin L., and) : Destruction of Cortisone and related Steroids by Traces of Copper during Purification Procedures, 820
Mattsson, Dr. Lennart : Humid Tropics Vegetation, 795
Maturana, Dr. H. R. : Number of Fibres in the Optic Nerve and the Number of Ganglion Cells in the Retina of Anurans, 1406
Mature Perithecia of *Mycosphaerella pinodes* : Chemical Destruction of (M. V. Carter), 162, *erratum*, 438
Maturing Broad Bean Seeds : Effect of Light on (Dr. G. R. Lane and R. D. Butler), 1063
Maturity (Sexual), in *Drosophila* (Øistein Strømnaes), 409
Matuyama, Eitaro : Structure of Kish and other Graphites, 670
Mawson, 1956 : Marine Studies in the Inshore Waters of Antarctica near (Dr. J. S. Bunt), 1541
May, K. R. : Detecting Volatile Airborne Droplets, 742
Mayer (André) Fellowships in 1959 (Food and Agriculture Organization of the United Nations), 1368
Mayer, C. H., and others : Maser Observations in Radio Astronomy, 223
Mayes, Dr. P. A. : Absence of a Relation between Lipogenesis and Ketogenesis *in vivo*, 540
Maynard, Harold B. : Elected a Fellow of the International Academy of Management, 1719
Mayne, Dr. K. I., and others : The Geological Time-Scale, 212
  How Old is the Cambrian System?, 769
Mazumdar, B. K. : The Nature of Coal (Dehydrogenation Studies on Coals of Different Rank, on Vitrains, on Oxidized and Weathered Coals, and on Coal Extracts and Pitch), 1438
Mazumdar, B. K., and others : The Nature of Coal (Pyrolysis and its relation to the Structural Parameters of Coal), 1439
  Alicyclicity and Smoke Emission of Coal, 1613
Mazur, Prof. Abraham (Harrow, Prof. Benjamin, and) : Textbook of Biochemistry, seventh edition, *review* by Prof. F. G. Young, 967
Mazzanti, G. (Natta, G., and) : Co-ordination Chemistry (Reaction between Aluminium Alkyls and Titanium Halides), 1784
Mead, Prof. Margaret : Education in the Age of Science, 1437
Mealworm Proteins : Electrophoretic Patterns of (D. S. Po-Chedley), 62
Mealy Bug, *Planococcus citri* (Risso) : Triple Coitus in the (Walter A. Nelson-Rees), 479
Means, Ura M., and others : Responses of Seedlings to Extracts of Soybean Nodules bearing Selected Strains of *Rhizobium japonicum*, 308
Meares, Dr. P. (Mackay, Dr. D., and) : Electrical Double Layer in Colloid Science (Electrical Conductivity and Electro-osmotic Water Transport), 80
Measurement : Personality and Motivation Structure and (Prof. Raymond B. Cattell), *review* by Prof. M. D. Vernon, 140
Measurement of the Flocculation of Suspensions (Dr. R. L. Whitmore), 313 ; (E. R. Braithwaite), 740
Measurement of Horizontal Displacement along Faults in the Ocean Floor (Dr. Victor Vacquier), 452
Measurement of Personality, *review* by Prof. M. D. Vernon, 140
Measurement of Soil Properties in the Triaxial Test (Dr. Alan W. Bishop and D. J. Henkel), *review* by Thomas Whitaker, 1151
Measurement of a Staphylococcal Antibody in Human Serum by a Mouse Protection Test (Dr. Myron W. Fisher), 1692
Measurement of the Velocity of Light : A Proposed Method for the (Dr. J. H. Sanders), 312
Measurement (Absolute) of the Intensity of the (111) Reflexion for Diamond (Prof. R. Brill and H. Zandy), 1387
Measurement (Pilot Proficiency) : Aviation Psychology in Western Europe and a Report on Studies of (Western-European Association for Aviation Psychology), 1092
Measurement (Quantitative), of the Effect of Lysergic Acid Diethylamide on Mice and its Interactions with other Drugs (Dr. J. R. Smythies), 545
Measurement (Time) : Handbook of the Collection illustrating (Dr. F. A. B. Ward), Part I, fourth edition (Science Museum), 933
Measurement (X-Ray Diffraction), of Radiation Damage in Stretched Rubber (Wesley E. Shelberg and Lewis H. Gevantman), 456
Measurement and Control in Electrical Engineering (Dr. A. H. M. Arnold), 89
Measurements at Leeds following the Windscale Reactor Accident—Iodine-131 in Human Thyroids and Iodine-131 and Caesium-137 in Milk (Dr. P. R. J. Burch), 515 ; Increase in Background Gamma-Radiation and its Correlation with Iodine-131 in Milk (Prof. F. W. Spiers), 517
Measurements of Oxygen Tension in the Tissues of Mice cooled to 1°C. (Dr. D. B. Cater and Dr. L. Weiss), 1521
Measurements of the Pacific Equatorial Countercurrent (John A. Knauss and Robert Pepin), 380
Measurements of Satellite Orbits : A New Value for the Earth's Flattening, derived from (D. G. King-Hele and R. H. Merson), 881
Measurements (Multiple Geiger Counter Telescope), of the Directions of Air Shower Particles (Dr. H. D. Rathgeber), 386
Measurements (Osmotic) : Cellulose Acetate Membranes suitable for (M. F. Vaughan), 43
Measurements (Radiocarbon), on Samples of Known Age (W. S. Broecker, Edwin A. Olson and Junius Bird), 1582
Measuring Equipment (German Precision) : Exhibition of (Degenhardt and Co., Ltd.), 1163
Measuring Productivity in Breeding of Small Animals (Dr. W. Lane-Petter, Annie M. Brown, Margaret J. Cook, G. Poeter and A. A. Tuffery), 339
Measuring Small Amounts of Water in Fluids : An Automatically Operating, Coulometric Titration Method for continually (E. Barendrecht), 1181
Meat Curing Brines (Fish and) : The Microbiology of—Proceedings of the Second International Symposium on Food Microbiology (Cambridge, 1957), (edited by Dr. B. P. Eddy), *review* by Dr. Magnus Pyke, 351
Mechanical Engineering at Belfast, 1779
Mechanical Engineering Research Laboratory at East Kilbride to be known in future as the National Engineering Laboratory, 1162
Mechanical Engineers (American Society of), and Purdue University Thermophysical Properties Research Center : Symposium on the Thermal Properties of Gases, Liquids and Solids, 294
Mechanical Engineers, Institution of : 1959 James Watt International Medal awarded to (the late) Sir Claude Gibb, 224
  James Clayton Prize for 1958 awarded jointly to William Munger Heynes and Sir F. Ewart Smith, 865
Mechanical Properties of Tissues : Effect of Enzymes on (Margaret L. R. Harkness and R. D. Harkness), 1821
Mechanical Transmission of Cassava Brown Streak Virus (R. M. Lister), 1588
Mechanics : Quantum (Prof. H. A. Kramers), translated by D. ter Haar, *review* by Prof. N. Kemmer, 705
  Quantum (Dr. F. Mandl), second edition, *review* by Prof. N. Kemmer, 705
  Quantum—Non-Relativistic Theory (L. D. Landau and E. M. Lifshitz), translated from the Russian by J. B. Sykes and J. S. Bell, *review* by Prof. N. Kemmer, 705
Mechanics (Fluid) : Proceedings of the Fifth Midwestern Conference on (Michigan, 1957), (edited by Prof. A. M. Kuethe), *review* by J. L. Stollery, 421
Mechanics (Quantum) : Angular Momentum in (E. R. Edmonds), *review* by Prof. N. Kemmer, 705
Mechanics (Quantum), in its Fourth Decade, *review* by Prof. N. Kemmer, 705
Mechanics (Theoretical and Applied) : Fourth Congress on (Indian Society of Theoretical and Applied Mechanics), 366
Mechanics (Theoretical and Applied), Indian Society of : Fourth Congress on Theoretical and Applied Mechanics, 366
Mechanism : A Non-Thermal Direct-Current Plasma-heating (Daryl Reagan), 102
Mechanism of Action of Diphosphopyridine Nucleotidases (Prof. Spyridon G. A. Alivisatos), 1034
Mechanism of Action of Insulin (A. Dunn, N. Altszuler, Prof. R. C. de Bodo, R. Steele, D. T. Armstrong and J. S. Bishop), 1123
Mechanism of Detergence (Dr. A. S. C. Lawrence), 1491
Mechanism of Formation of Anthocyanidins from Leucoanthocyani(di)ns (Dr. David G. Roux and M. C. Bill), 42
Mechanism in Staining Reactions for Mast Cells : Differences in (Dr. Harold M. Fullmer), 1274
Mechanism of Surface Catalysis : A Chromatographic Technique for Studying the (Kenzi Tamaru), 319
Mechanism (Possible Enzymic), for the Development of Resistance against Fluorouracil in Ascites Tumours (Dr. Peter Reichard and Ola Sköld, and Prof. George Klein), 939
Mechanism (XXY Sex-determining) : A Case of Human Intersexuality having a possible (Patricia A. Jacobs and Dr. J. A. Strong), 302
Mechanism or Vitalism?, *review* by Dr. W. Grey Walter, 955
Mechanisms of Visual Fixation : Barbiturate Nystagmus and the (C. Rashbass), 897
Mechanisms (Atomic), of Fracture (U.S. National Academy of Sciences, the U.S. National Science Foundation, the Office of Naval Research and the Air Force Office of Scientific Research International Seminar on), 154
Mechanisms (Radical) : The Kinetics of Vinyl Polymerization by (Dr. C. H. Bamford, Dr. W. G. Barb, Dr. A. D. Jenkins and Dr. P. F. Onyon), *review* by Prof. C. E. H. Bawn, 637
Mechanization of Thought Processes (Symposium at the National Physical Laboratory), 225
Medaković, M., and Spuzić, I. : 5-Hydroxytryptamine in Blood during Experimental Traumatic Shock in Rats, 1685
Medal of the New York Academy of Medicine awarded to Dr. Peyton Rous, 294
Media with Different Sources of Carbon : Carbohydrate Constituents of the Mycelium of *Penicillium chrysogenum* grown in (Roshan J. Irani and Dr. K. Ganapathi), 758
Media lacking Sodium Chloride : Adaptation of Marine Bacteria to Growth in (Prof. D. B. Pratt and G. Waddell), 1208
Media (Porous): Permeability of (Dr. R. J. Millington and Dr. J. P. Quirk), 387
Media (Radiographic Contrast) : Labelling of, with Iodine-131 (J. Liebster, J. Kacl and A. Babicky), 1474
Media (Synthetic) : Glutamine Metabolism of Normal and Malignant Cells cultivated in (Arthur E. Pasieka and Dr. Joseph F. Morgan), 1201
Medial Calcification (Aortic), and Lowered Metabolism in Ground Squirrels (Dr. George R. Zimmerman and Prof. G. Edgar Folk, jun.), 754
Medical Bulletin, British, Vol. 15, No. 1, Recent Advances in Haematology, 1372
Medical Electronics : Second International Conference on, 1094
Medical Practice : Clinical Haematology in (Dr. C. G. de Gruchy), *review* by Dr. R. Biggs, 1151
Medical Research Center (Brookhaven) : The Medical Research Reactor at the (Dr. E. E. Stickley), 1013
Medical Research Council : Collected Papers of the Laboratory Animals Centre, Vol. 7, 1642
Medical Research Reactor at the Brookhaven Medical Research Center (Dr. E. E. Stickley), 1013
Medicinal and Pharmaceutical Chemistry, Journal of, Vol. 1, No. 1, 1304
Medicine : Administrative—Transactions of the Fifth Conference, Princeton, 1956 (edited by George S. Stevenson), *review* by Dr. G. A. Clark, 639
  Aviation—Selected Reviews (edited by Clayton S. White, W. Randolph Lovelace, II, and Frederic G. Hirsch), *review*, 1291
  Biochemistry in, *review* by Prof. J. N. Davidson, 5
  Tropical (United States National Academy of Sciences—National Research Council to organize a survey on), 863

Medicine in Industry, *review* by Dr. A. I. G. McLaughlin, 1148
Medicine (Philosophical), in the Era of the Renaissance : Paracelsus, an Introduction to (Dr. Walter Pagel), *review* by Prof. Erwin H. Ackerknecht, 1147
Medicine and Biology : Electrical Techniques in (American Institute of Electrical Engineers, the Institute of Radio Engineers and the Instrument Society of America twelfth Annual Conference on), 1434
Medium for Immuno-Diffusion : Cellulose Acetate as a (R. Consden and J. Kohn), 1512
Medium (Non-Aqueous) : Potentiometric Titration of Coal in a (W. J. S. Pringle), 815
Medulla (Adrenal) : Deoxyribonucleic Acid Content of the Cell-Nuclei in the, after Exposure to Low Temperatures (L. Leeman), 1188
Medway, Lord (Harrisson, Tom, and): 'Bat Erosion' at Niah Great Caves, 971
Meek, Prof. J. M. : Secondary Ionization in Humid Air, 1805
Meetham, Dr. A. R. : Basic Physics, *review* by S. Weintroub, 354
Megrelishvili, T. G. (Khvostikov, I. A., and) : New Bands and Lines in the Twilight Sky Spectrum, 811
Mehdiratta, Prof. R. C. : Glaciation in the Jammu Hills, 255
Mehl, Dr. L. : The Mechanization of Thought Processes (Automation in the Legal World), 226
Meilman, Edward, and others : Occurrence of 'Ester-like' Linkages in Collagen, 1659
Melanism (Industrial), in the Lepidoptera : New Aspects of the Genetic Control of (Dr. H. B. D. Kettlewell), 918
Melanophore-aggregating Hormone in the Pituitary of the Minnow : Distribution of (A. K. Kent), 544
Melatonin in Peripheral Nerve (Dr. Aaron B. Lerner, James D. Case, Wataru Mori and Margaret R. Wright), 1821
Mellanby, Dr. Kenneth : The Birth of Nigeria's University, *review* by Sir Eric Ashby, 137
    Parasitology (*Sarcoptes scabiei* Infections in Man), 1506
Mellon (A. W.) Educational and Charitable Trust: Grant of 75,000 dollars to Prof. R. A. McConnell (University of Pittsburgh), to continue research on psychological physics, 86
Mellor, M. : Antarctic Meteorology, 1503
Melting Point and Sublimation of Molybdenum Disulphide (Dr. Peter Cannon), 1612
Membrane (Egg), of the Egg of the Brook Trout : X-Ray Diffraction Patterns from the (Dr. Mamoru Kusa and Tsuguyasu Wada), 410
Membrane (Receptor) : Properties of a—Spatial Summation of Electric Activity in a Non-myelinated Nerve Ending (Prof. Werner R. Loewenstein), 1724 ; Spontaneous Fluctuations in Generator Potential in a Receptor Membrane (Nobusada Ishiko and Prof. Werner R. Loewenstein), 1725
    Spontaneous Fluctuations in Generator Potential in a (Properties of a Receptor Membrane), (Nobusada Ishiko and Prof. Werner R. Loewenstein), 1725
Membrane (Squid Axon) : Excitation of the, in Isosmotic Potassium Chloride (Dr. John W. Moore), 265
Membrane Permeability and Pectic Substances in Bean Endocarp : Effects of Auxins on (J. A. Sacher and K. T. Glasziou), 757
Membranes (Cellulose Acetate), suitable for Osmotic Measurements (M. F. Vaughan), 43
Membranes (Cellulose Acetate), used for Zone Electrophoresis : Regeneration of (Dr. S. Jacobs), 1326
Membranes (Filter) : Examination of Particulate Matter on (D. Anson, W. J. Grant and R. M. Jones), 1000
Membranes (Foetal), and Kidneys of Pigs : Glutaminase Activity of the (Ingeborg C. Radde and Prof. R. A. McCance), 115
Membranes (Post-synaptic) : Submicroscopic Organization of (Dr. B. Csillik), 1684
Memorial Meeting to Prof. F. Joliot-Curie, 1020
Men : Listening in the Dark, the Acoustic Orientation of Bats and (Prof. Donald R. Griffin), *review* by Prof. R. J. Pumphrey, 1554
Menadione in Hexane : Reduction of, by Chlorophyll *a* under Ultra-Violet Irradiation (Rudolph J. Marcus and Lloyd K. Moss), 990
Mendelism (20th Century) : Genetics and (Twenty-fourth Cold Spring Harbor Symposium on Quantitative Biology), 934
Mendelism versus Michurinism : Social Implications of (A. Quintanilha), 1222
Mendelssohn, Dr. K. : Low Temperatures, *review*, 1150
Mendilla, Gloria A., and others : Bilirubin Metabolism in the Foetus, 1823
Mendoza, Dr. E. : Awarded a Premium by the Radio Industry Council, 1023
Menschen : Die Infektionskrankheiten des, und ihre Erreger (herausgegeben von Prof. Dr. A. Grumbach und Prof. Dr. Kikuth), *review* by Prof. P. C. C. Garnham, 352
Mental Health, United States National Institute of : Grant of 40,360 dollars to Prof. G. J. Wischner, to continue graduate training in clinical psychology, 86
Mental Illness : The New Chemotherapy in (edited by Dr. Hirsch L. Gordon), *review* by Dr. Marthe Vogt, 1007
    Social Class and (Prof. August B. Hollingsworth and Prof. Frederick C. Redlich), *review* by Dr. Clifford Allen, 354
Mental Images, Institute for the Study of : Communications of the, Vol. I, Part I, and Vol. I, Parts 2 and 3, Introduction to Parapsychology (C. C. L. Gregory and Anita Kohsen), 229
Menzies, Dr. A. C. : *Obituary* of Frank Twyman, 1158
Menzies, Dr. I. A., and others : Electrolytic Deposition of Beryllium, 816
Meprobamate : Detection of, on Paper Chromatograms (H. S. Bedson and T. H. Farmer), 43
5-Mercaptouracil : Anti-Tumour Activity of (Thomas J. Bardos, Albert Segaloff and Julian L. Ambrus), 612
Mercer, D. M. A. : Of What Use is Acoustics to the Musician?, 1294
Mercuric Iodide : Polymorphic Conversion of, on Alumina (Prof. Harry Zeitlin and Harry Goya), 1041
'Mergamma *D*' : Effects of Heat and Loss of Moisture on the Dormancy of Wheat, and some Interactions with (P. D. Hewett), 1600
Meriwether, L. S., and others : Co-ordination Chemistry (Substitution Reactions of Nickel Carbonyl–Phosphine Complexes), 1785
Merson, R. H. : Automatic Reduction of Geophysical Data (Investigations of the Orbits of Artificial Earth Satellites), 1167
Merson, R. H., and others : Changes in the Inclination of Satellite Orbits to the Equator, 239
Merson, R. H. (King-Hele, D. G., and) : A New Value for the Earth's Flattening, derived from Measurements of Satellite Orbits, 881
Mervyn Premium of the Television Society awarded to K. H. Smith, 1161
Merz, Dr. T. (Cohn, Dr. N. S., and) : A Technique for the Sterile Culture of Roots, 412
Mesenteric Ganglion in Man : The Inferior (J. A. Southam), 697
Messadi, Mahmoud : The Role of the Scholar in Society, 1772
Meta-Iodopsin (Lumi- and) : Chicken (Action of Light on Visual Pigments), (Dr. Ruth Hubbard and Dr. Allen Kropf), 448
Meta-Rhodopsins (Lumi- and): Invertebrate (Action of Light on Visual Pigments), (Dr. Ruth Hubbard, Paul K. Brown and Dr. Allen Kropf), 442
Meta-Rhodopsins (Lumi- and), of Squid and Octopus (Action of Light on Visual Pigments), (Dr. Allen Kropf, Paul K. Brown and Dr. Ruth Hubbard), 446
Metabolism : Amino-Acetone, its Isolation and Role in (Dr. W. H. Elliott), 1051
Metabolism of Benzene Hexachloride by Resistant Houseflies *Musca domestica* (Dr. F. R. Bradbury and H. Standen), 983
Metabolism of Chlorpromazine : Role of Liver in (Dr. R. L. Young, J. J. Ross, jun., and Dr. A. R. Maass), 1396
Metabolism of Glycine by a Pseudomonad (Biosynthesis of Cell Constituents from C_2-Compounds), (A. G. Callely and Dr. S. Dagley), 1793
Metabolism of Myleran (1:4-Dimethanesulphonyloxybutane), (Dr. J. J. Roberts and Dr. G. P. Warwick), 1509
Metabolism of Normal Tissues and Neoplasms *in vitro* (Prof. J. H. Quastel and I. J. Bickis), 281
Metabolism in a Pyridoxine-dependent Child : Effects of Pyridoxine Withdrawal on Cerebral Circulation and (Dr. Louis Sokoloff, Dr. Niels A. Lassen, Dr. Guy M. McKhann, Dr. Donald B. Tower and Dr. Wayne Albers), 751
Metabolism of Sulphobromophthalein (G. M. Grodsky, J. V. Carbone and R. Fanska), 469
Metabolism (Acetoacetate), of Liver Homogenates of Normal and Alloxanized Rats : Action of Nicotinamide on (S. Eser, S. Tekman and A. Araz), 184
Metabolism (Amino-acid), in Wool Roots (G. E. Rogers and P. H. Springell), 993
Metabolism (Bilirubin), in the Foetus (Dr. Rudi Schmid, Sue Buckingham, Gloria A. Mendilla and Lydia Hammaker), 1823
Metabolism (Electrolyte), in relation to Age and Sex : Water and (Ciba Foundation Colloquia on Ageing, Vol. 4), (edited by G. E. W. Wolstenholme and Maeve O'Connor), *review* by Prof. P. L. Krohn, 777
Metabolism (Endogenous), of Freshly Harvested Cells of a Brewer's Yeast (V. E. Chester), 902
Metabolism (Glutamine), of Normal and Malignant Cells cultivated in Synthetic Media (Arthur E. Pasieka and Dr. Joseph F. Morgan), 1201
Metabolism (Lowered), in Ground Squirrels : Aortic Medial Calcification and (Dr. George R. Zimmerman and Prof. G. Edgar Folk, jun.), 754
Metabolism (Malonate), by Plant Tissues (Prof. Leland M. Shannon, Roger H. Young and Carlton Dudley), 683
Metabolism (Nucleotide), in Cardiac Activity (Dr. Philip A. Khairallah), 181
Metabolism (Oxidative), of Cartilage (Dr. Philip Person and Dr. Albert Fine), 610
Metabolism (Oxidative), and Puparium Formation in the Ebony Mutant of *Drosophila melanogaster* (Alexander Wolsky and Henrietta G. Kalicki), 1129
Metacercaria (Allocreadioidea) in the Planktonic Ctenophore, *Pleurobrachia globosa* Moser 1903, from the Madras Coast (Sita Anantaraman), 1407
Metal (Trace) : Does Rhodopsin contain a (Isao Fukami, Prof. Bert L. Vallee and Prof. George Wald), 28
Metal Binding : Relationship between Proton and, by some Peptides, Amino-acid Amides and Amino-acids (Dr. S. P. Datta, R. Leberman and Dr. B. R. Rabin), 745
Metal Chelate Compounds of β-Diketones : Metal–Oxygen Stretching Frequencies in the (Kazuo Nakamoto, Paul J. McCarthy and Arthur E. Martell), 459
Metal-Chelating Properties of Plant-Growth Substances (W. L. F. Armarego, M. J. Canny and S. F. Cox), 1176 ; (Prof. O. V. S. Heath and J. E. Clark), 1177
Metal Co-ordination Compounds (Transition) : Explosion of (Seward E. Beacom), 38
Metal Fatigue : Committee on, set up by the Department of Scientific and Industrial Research, 1568
Metal Ions (Bivalent) : Reversal of Antibiotic Action of Cycloheximide (Actidione) by (M. Blumauerová and J. Stárka), 261
Metal–Oxygen Stretching Frequencies in the Metal Chelate Compounds of β-Diketones (Kazuo Nakamoto, Paul J. McCarthy and Arthur E. Martell), 459
Metallic Conduction in the Crystal Compounds of Graphite (Prof. A. R. Ubbelohde, Dr. L. C. F. Blackman and J. F. Mathews), 454
Metallurgists, Institution of : Election of Officers, 1502
Metallurgy at Manchester, 1639
Metallurgy : Nuclear Reactor (Walter D. Wilkinson and William F. Murphy), *review* by Prof. A. H. Cottrell, 1628
Metals : Electric Conduction in Semi-conductors and (Dr. W. Ehrenberg), *review* by Dr. P. T. Landsberg, 138
Metals, American Society for : Appointment of Allen Ray Putnam as managing director, 1094
Metals, American Society for (Eastern New York Chapter) : Conference on the Fracture of Engineering Materials, 1368
Metals, Institute of : Platinum Medal awarded to Dr. L. B. Pfeil, 793
    Rosenhain Medal awarded to Prof. R. W. K. Honeycombe, 793
    Robertson (W. H. A.) Medal and Premium awarded to Dr. R. B. Sims, 793
    Election of Officers, 1024
Metals (Platinum) : Borides and Silicides of the (B. Aronsson, J. Åselius and E. Stenberg), 1318
Metals and Enzyme Activity (Biochemical Society Symposium No. 15, Leeds, 1956), (organized and edited by E. M. Crook), *review* by Dr. O. T. G. Jones, 968
Metastable State of Chlorophyll *b* : Absorption Spectrum and Decay Kinetics of the (Prof. Stig Claesson, Lars Lindqvist and Bertil Holmström), 661
Metastatic Human Tumours : Ploidy of Primary and (Dr. Giancarlo Rabotti), 1276
Metazoa : Oxygen as a Prerequisite to the Origin of the (Dr. J. R. Nursall), 1170

Metcalf, W. K. (Keohane, K. W., and) : Changes in Lymphocytes during Antibody Production, 195
Meteorite (Washington County) : Cosmogenic Noble Gases in the (Oliver A. Schaeffer and David E. Fisher), 660
Meteorite Falls throughout the Ages : Frequency of (Prof. Hans Pettersson), 1114 ; (Dr. J. F. Lovering), 1664
Meteorites : Calculation of Erosion in Space from the Cosmic-Ray Exposure Ages of (Dr. F. L. Whipple and Dr. E. L. Fireman), 1315
  Dirac's Cosmology and the Dating of (Prof. R. H. Dicke), 170
Meteorites at the British Museum (Natural History) : Nuffield Collection of, 221
Meteorites (Chondritic) : Natural Magnetic Moments of Two (Dr. F. D. Stacey and Dr. J. F. Lovering), 529
Meteorological Office (Air Ministry) : Geophysical Memoir No. 101, Upper Air Temperature over the World (N. Goldie, J. G. Moore and E. E. Austin), 864
Meteorological Organization, World : International Meteorological Organization Prize awarded to Prof. J. Bjerknes, 1567
Meteorological Society, Royal : M. E. Shoenberg made a life-member, 368
  Appointment of R. H. Levinson as assistant secretary, 368
Meteorological and Ionospheric Studies in the Arctic, *review* by James Paton, 279
Meteorology : Antarctic (Dr. E. B. Kraus), 1503
  Everyday (Prof. A. Austin Miller and M. Parry), *review* by James A. Taylor, 3
Meteorology (Professional), and Everyday Needs, *review* by James A. Taylor, 3
Meteorology Research, Inc. : To receive a 40,000 dollar contract from the National Science Foundation, for two-year cloud-physics studies at Santa Barbara, under the direction of Paul MacCready, 1371
Methane : Gas-Chromatographic Observation of the Reduction of Carbon Dioxide to, during Anaerobic Digestion (J. Chmielowski and Peter C. G. Isaac), 1120
Methane Pioneer : Arrival of, 580
Methanol-soluble Carbohydrate Complexes (Ernest H. Freund and Kelvin Domovs), 1526
Method for Desalting and Group Separation : Gel Filtration—a (Dr. Jerker Porath and Dr. Per Flodin), 1657
Method of Growing Grass Plants with Separation of Seminal and Adventitious Roots (R. Dorrington Williams), 415
Method of Increasing their Opacity in the Electron Microscope : Chlorination of Proteins as a (Dr. M. M. Coombs and Prof. J. F. Danielli), 1257
Method in Social Anthropology (Prof. A. R. Radcliffe-Brown), edited by Prof. M. N. Srinivas, *review* by Dr. Kenneth Little, 70
Method for Testing the Influence of Drugs and Physical Agents upon Mitosis (Prof. Elio Guido Rondanelli, Pasquale Gorini and Domenico Pecorari), 190
Method (An Automatically Operating, Coulometric Titration), for continually Measuring Small Amounts of Water in Fluids (E. Barendrecht), 1181
Method (An Autoradiographic), for distinguishing Samples labelled with Phosphorus-32 and Sulphur-35 (Dr. W. G. Duncombe), 319
Method (An Experimental), for Diffusion and Extraction Studies across the Liquid-Liquid Interface (Dr. Thomas W. Martin), 312
Method (An Improved), for preparing Pectate Gels (Dr. A. M. Paton), 1812
Method (A Microwave), of determining the Displacement and Velocity of a Piston in a Hypersonic Gun Tunnel (L. Pennelegion), 246
Method (A New), of Chemical Analysis : Magnetometric Titration—a (Dr. M. S. Blackie and Dr. V. Gold), 1804
Method (A New), for Delaying Pupation in *Drosophila melanogaster* (Dr. A. Abd-el-Wahab), 127
Method (A New), of Integration Recording (Allen Strickler and Dr. William S. Gallaway), 1110
Method (A New), for the Microbiological Oxidation of Steroids (Dr. G. Wix and K. Albrecht), 1279
Method (A New), of Particle-counting on the Electron Microscope (Dr. D. Gordon Sharp and Ivan Sorvall, Inc.), 1642
Method (A New Physical), of Creating Chromosomal Aberrations (Dr. John H. Heller and Dr. A. A. Teixeira-Pinto), 905
Method (Nitrophenyl Ester) : Synthesis of Oxytocin by the (Dr. Miklos Bodanszky and Prof. Vincent du Vigneaud), 1324
Method (A Photographic), for Recording Activity and Behaviour in a Group of Small Animals (Dr. D. K. Edwards), 625
Method (A Proposed), for the Measurement of the Velocity of Light (Dr. J. H. Sanders), 312
Method (A Rapid), for Determining the Concentration of Ammonium Sulphate Solutions (Dr. John A. Whitaker and Dr. Robert Hughes), 603
Method (A Rapid), for Examining Diapause Embryos of *Acheta commodus* W. (T. W. Hogan), 269
Method (A Rapid Micro-quantitative), for Estimating Serum Calcium (T. A. Harper), 232
Method (Rapid Specific), for Determination of Aldosaccharides in Body Fluids (Dr. Eric Hultman), 108
Method (A Simple), for the Concentration of Fluids containing Protein (Dr. J. Kohn), 1055
Method (A Simplified Physico-chemical), for Determination of Human Urinary Œstrogens (Dr. Tawfik El-Attar), 1607
Method (A Spectrophotometric), for the Determination of Chlorine (Zd. Spurny), 1390
Method (A Two-Dimensional Paper Chromatographic), combining Ion-Exchange and Partition Techniques (C. S. Knight), 165
Method (Viscometric) : Characterization of Molecular Weight Distributions by a (Dr. P. F. Onyon), 1670
Methods : General Cytochemical (edited by Prof. J. F. Danielli), Vol. I, *review* by Dr. R. Barer, 1355
Methods of Analytical Histology and Histo-Chemistry (Edward Gurr), *review* by S. Bradbury, 211
Methods of Biochemical Analysis (edited by Prof. David Glick), Vol. 6, *review* by Dr. I. D. P. Wootton, 779
Methods of Marking *Tilapia* Spp. (Pisces : Cichlidae), (Vernon D. van Someren and Peter J. Whitehead), 1746
Methods for the Purification of Sugar Sulphates : Some (Dr. J. R. Turvey and M. J. Clancy), 537
Methods of Testing Chemicals on Insects (edited by Harold H. Shepard), Vol. I, *review* by Dr. W. A. L. David, 352
Methods (Approximate), of Higher Analysis (L. V. Kantorovich and V. I. Krylov), translated from the Russian by Curtis D. Benster, *review* by Prof. T. A. A. Broadbent, 1766
Methods (Computational) : Scholarships in Mathematics for Courses in Statistics and (London School of Economics and Political Science), 85
Methods (Gel Diffusion) : Estimation of the Size of Antigens by (Dr. A. C. Allison and Dr. J. H. Humphrey), 1590
Methods (Radiofrequency): The Study of Molecular and Atomic Motions in Solids and Liquids by (British Radio Frequency Spectroscopy Group and the Groupement AMPERE Joint Meeting on), 652
Methosulphate (Phenazine) : Effect of Insulin and, on Pathways of Glucose Catabolism in the Mammary Gland of the Rat (P. McLean), 182
Methotrimeprazine : Action of Ultra-violet Light on Skin—Effect of the Histamine Liberator 48/80 and (Prof. S. Claesson, G. Wettermark and L. Juhlin), 1451
Methoxamine Hydrochloride : Effect of a Sympathomimetic Agent, on Growth of Hair in the House Mouse (*Mus musculus*), (F. Cockrem), 614
8-Methoxypsoralen : Ultra-violet Carcinogenesis in Albino and Pigmented Mice receiving Furocoumarins—Psoralen and (M. A. Pathak, Prof. F. Daniels, jun., C. E. Hopkins and T. B. Fitzpatrick), 728
Methyl Groups : Changes produced in Serum Lipoproteins of Dogs by Cellulose containing (Margaret M. Fröhlich, V. Balázs, K. Kovács and A. Benkö), 1119
  Stable Configuration of, in Dimethyl Ether (Katsumi Kimura and Masaji Kubo), 533
N-Methylation (Enzymatic), of Histamine (Dr. Donald D. Brown, Dr. Julius Axelrod and Dr. Robert Tomchick), 680
S-(Methylcarbamyl) Methyl O,O-Dimethyl-Dithiophosphate : Mode of Action and Biological Properties of the (R. Santi and P. de Pietri-Tonelli), 398
Methyl-naphthohydroquinones (Phosphorylated) : Effect of, on the Response to Radiation in Barley Roots (A. D. McKelvie), 1194
Methylene Radical (Free) : Spectrum and Structure of the (Dr. G. Herzberg and J. Shoosmith), 1801
Metlin, Sol, and others : Behaviour of Dicobalt Octacarbonyl at Elevated Temperature and Carbon Monoxide Pressure, 457
Metropolitan Water Board : Thirty-seventh Report on the Results of the Bacteriological, Chemical and Biological Examination of the London Waters for the Years 1955-56 (E. Windle Taylor), 798
Mewissen, Dr. D. J. : Dose-Response Relationship in Radiation Leukaemia—the Marking Probit, 401
Mewissen, Dr. D. J., and others : Comparative Sensitivity to Radiation of Seeds from a Wild Plant grown on Uraniferous and Non-Uraniferous Soils, 1449
Mexico (America North of) : The Spider Family Dictynidae in (Prof. Ralph V. Chamberlin and Willis J. Gertsch), 1170
Meyer, D. R., and Anderson, A. J. : Temperature and Symbiotic Nitrogen Fixation, 61
Meyer, Dr. Karl (Kaplan, David, and) : Ageing of Human Cartilage, 1267
Meyer, Dr. L. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Meyer, Prof. Wilhelm : Elected a member of the Odontology Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Mica Surfaces : Adhesion and Ion-Exchange between (George L. Gaines, jun.), 1109
Micas : Structural Control of Polymorphism in (E. W. Radoslovich), 253
Mice : Congenital Transmission or Toxoplasmosis through Successive Generations of (Dr. J. K. A. Beverley), 1348
  Oral Induction of Leukaemia in (Bill P. Maduros, Wilma A. Spurrier and Dr. Steven O. Schwartz), 1816
  Quantitative Measurement of the Effect of Lysergic Acid Diethylamide on, and its Interactions with other Drugs (Dr. J. R. Smythies), 545
Mice cooled to 1°C. : Measurements of Oxygen Tension in the Tissues of (Dr. D. B. Cater and Dr. L. Weiss), 1521
Mice treated with Endotoxin: Sparing Effect of Serum from, upon certain Murine Virus Diseases (A. W. Gledhill), 185
Mice of the *IF* Strain : Local Inhibition by Lactation of chemically induced Breast Tumours in (June Marchant), 629
Mice (Albino and Pigmented), receiving Furocoumarins—Psoralen and 8-Methoxypsoralen : Ultra-violet Carcinogenesis in (M. A. Pathak, Prof. F. Daniels, jun., C. E. Hopkins and T. B. Fitzpatrick), 728
Mice (Ascites Tumour) : Lithium Retention in (Shirley E. Simon, E. M. Trautner and D. A. Coats), 1128
Mice (Irradiated) : Effect of Pyrimidine Deoxyribonucleotides on the Regeneration of Bone-Marrow in (Dr. Z. Karpfel, J. Soška and V. Drášil), 1600
Mice (Irradiated), treated with Homologous Tissue Suspensions : Long-term Survival of (Eric L. Simmons, Leon O. Jacobson, Edna K. Marks and Evelyn O. Gaston), 556
Mice (Newly Born) : Response of, to a Chemical Carcinogen (Giuseppe Pietra, Kathryne Spencer and Prof. Philippe Shubik), 1689
Mice (Swiss), and Hamsters : A Cytopathogenic Agent from a Mammary Tumour in a *C3H* Mouse that produces Tumours in (Dr. E. A. McCulloch, A. F. Howatson, L. Siminovitch, A. A. Axelrad and A. W. Ham), 1535
Michell, A. G. M. : *Obituary* by Prof. A. J. Francis, 1714
Michie, R. I. C., and Neale Dr. S. M. : Catalytic Action of Copper in the Alkaline Autoxidation of Cellulose at Low Alkali Concentration, 534
Michurinism : Social Implications of Mendelism versus (A. Quintanilha), 1222
Micklem, H. S. : The Proposed Biological Term 'Pheromone', 1835
Microanalysis (X-Ray) : Second Symposium on X-Ray Microscopy and, 1094
Microbes and Milk, *review* by Dr. C. A. E. Briggs, 637
Microbiological Assays : A Source of Error in, attributable to a Bacterial Inhibitor in Distilled Water (S. A. Price and L. Gare), 838
Micriobiological Defence Research, 366
Microbiological Oxidation of Steroids : A New Method for the (Dr. G. Wix and K. Albrecht), 1279
Microbiological Research in Britain : Reorganization of (D. J. B. Copp), 416
Microbiological Research Establishment : Work of the, 1366
Microbiological Research (Industrial), in Britain : Reorganization of, 1
Microbiological Technology and Engineering, Journal of Biochemical and, Vol. I, No. 1, 1367
Microbiology : Advances in, *review*, 1219
  Annual Review of (edited by Charles E. Clifton in association with Sidney Raffel and Mortimer P. Staff), Vol. 12, *review*, 1219
  Dairy (Prof. Edwin M. Foster, Prof. F. Eugene Nelson, Prof. Marvin L. Speck, Prof. Raymond N. Doetsch and Prof. Joseph C. Olson, Jr.), *review* by Dr. C. A. E. Briggs, 637

Microbiology of Fish and Meat Curing Brines—Proceedings of the Second International Symposium on Food Microbiology (Cambridge, 1957), (edited by Dr. B. P. Eddy), *review* by Dr. Magnus Pyke, 351
Microbiology and Water Circulation in the Black Sea (A. E. Kriss), 437
Microbiology (Food) : Proceedings of the Second International Symposium on (Cambridge, 1957), (The Microbiology of Fish and Meat Curing Brines, edited by Dr. B. P. Eddy), *review* by Dr. Magnus Pyke, 351
Micro Determination of Calcium (A. B. Gilbert), 888, 1754
Micro-Electrode Penetration of Ascites Tumour Cells (B. M. Johnstone), 411
Micrographic Study of Wear of Graphite (Dr. Robert H. Savage), 315
Micrographs (Electron) : The Possibility of Distinguishing between Substances shown on (Dr. Robin C. Valentine), 761
Micro-Methods, Ltd. : Microcopies of unclassified and declassified reports of the United Kingdom Atomic Energy Authority, 365
  Journals issued in micro-card, micro-film or micro-fiche form, 1020
Micronutrients (Inorganic), in Physiology and Agriculture, *review* by Dr. E. J. Hewitt, 1009
Micro-organism : A New Nitrogen-fixing, producing a Red Pigment (Gy. Németh), 1460
Micro-organisms : Allyl Alcohol as a Nutrient for (H. L. Jensen), 903
  The Killing of, *review* by Dr. A. M. Cook, 277
Micro-organisms growing in Defined Glucose-containing Media : Detection of Gentiobiose and Sophorose in Cultures of certain (A. W. Khan, D. N. Pellegrino and Prof. T. K. Walker), 682
Micro-organisms in the Soil (Prof. Alan Burges), *review* by D. M. Webley, 1010
Micro-organisms (Fossil) : Pyrite Granules and (L. G. Lowe), 437
Micro-organisms (Rumen), of the Sheep : Hydrolysis of Lecithin and Lysolecithin by (Dr. R. M. C. Dawson), 1822
Micropulsations : Geomagnetic (Prof. J. A. Jacobs), 381
Micro-quantitative Method (A Rapid), for Estimating Serum Calcium (T. A. Harper), 232
Microscope : A 'Solid-Image' (R. L. Gregory and P. E. K. Donaldson), 246
  The Three-Dimensional or Solid-Image (W. D. Jackson), 1048
Microscope (Electron) : Chlorination of Proteins as a Method of Increasing their Opacity in the (Dr. M. M. Coombs and Prof. J. F. Danielli), 1257
  A New Method of Particle-counting on the (Dr. D. Gordon Sharp and Ivan Sorvall, Inc.), 1642
  Techniques and Applications of the (Cornell University Annual Summer Laboratory Course in), 1094
Microscope (Electron) Examination : Preparation and Sectioning of Tissues embedded in 'Araldite' for (J. M. Davis), 200
Microscope (Electron) Images of Crystal Lattices : Spacing Anomaly in (Dr. H. Hashimoto and Dr. H. Yotsumoto), 1001
Microscope (Electron) Observations on the Neurohypophysis of the Ferret (Dr. R. L. Holmes and F. G. W. Knowles), 1745
Microscope (Electron) Society of America : Annual Meeting (Symposium on Contribution of Electron Microscopy of Viruses and Cells to the Problem of Cancer), 1719
Microscopes (Photometric Instruments and) : Exhibition of (Degenhardt and Co., Ltd.), 1164
Microscopic (Electron) Observations on a Fibrous Component in Amyloid of Diverse Origins (Dr. Alan S. Cohen and Dr. Evan Calkins), 1202
Microscopic (Electron) Study of Finback Whale Myoglobin Crystals (D. E. Bradley), 941
Microscopy with X-Rays (Dr. V. E. Cosslett), 1423
Microscopy (Electron) : A. or $m\mu$ in (Dr. John R. Baker), 416
  Improved Preservation of Tendon for, through Wet Freeze-drying (Dr. David B. Scott and Marie U. Nylen), 1205
  Observations by, on the Structure of an Acephaline Gregarine (*Apolocystis elongata*, Phillips and MacKinnon), (Dr. D. Lacy and H. B. Miles). 1456
  Preparation of Autoradiograms for (R. T. O'Brien and L. A. George, II), 1461
Microscopy (Electron), of Oleophobic Monolayers (Robert T. Mathieson), 1803
Microscopy (Electron), of Sodium Laurate (T. H. Shuttleworth and M. Camp), 535
Microscopy (Electron), of Synaptic Contacts on Dendrite Spines of the Cerebral Cortex (Dr. E. G. Gray), 1592
Microscopy (Electron), of Viruses and Cells : Contribution of, to the Problem of Cancer (Electron Microscope Society of America Symposium on), 1719
Microscopy (Polarization) : Analysis of Mast Cells by means of (Prof. Leslie Horváth), 1067
Microscopy (X-Ray), and X-Ray Microanalysis : Second Symposium on, 1094
Microseismic Research at the National Institute of Oceanography (Dr. H. M. Iyer and B. J. Hinde), 1558
Microseisms at Scott Base (Dr. T. Hatherton and R. H. Orr), 1760
Microsomal Malic Dehydrogenase (Kenneth H. Shull), 259
Microsomes (Liver) : Activation of Thionophosphates by (Prof. R. D. O'Brien), 121
Microspore of *Encephalartos barteri* Carruth. : Mitosis in the (Dr. Geoffrey K. Berrie), 834
Micro-Spot Cathode-Ray Tube : The Ferranti 5/71 *CM*, 1642
Micro-Stirrer : A Simple (R. Morris), 201
Micro-volume Drop-plate Assay of Antibiotics (Dr. M. R. S. Iyengar), 684
Microwave Dieletric Properties of Indian Shellac in the 8-mm. Range (Dr. S. S. Srivastava and Dr. D. D. Puri), 37
Microwave Method of determining the Displacement and Velocity of a Piston in a Hypersonic Gun Tunnel (L. Pennelegion), 246
Microwave Spectra : Molecular Symmetry in *Cyclo*pentadienyl Thallium and some related Substances from their (J. K. Tyler, A. P. Cox and Dr. J. Sheridan), 1182
Middle East Technical University, Ankara : Approval of the charter, 1571
Middleton, John, and Tait, the late David (edited by) : Tribes without Rulers—Studies in African Segmentary Systems, *review* by Prof. M. Fortes, 1006
Middleton, M. D., and others : Reaction of some Silicates with Chelating Agents, 99, *erratum*, 1719
Midgut of Beetles : Proepithelial Regeneration in the (A. Ameen and Dr. S. A. Shafiq), 913
Midwestern Conference on Fluid Mechanics : Proceedings of the Fifth (Michigan, 1957), (edited by Prof. A. M. Kuethe), *review* by J. L. Stollery, 421
Migration and Dispersal of New Zealand Gannets (Kazimierz Wodzicki and Peter Stein), 1790
Mildew and Yellow Rust of Wheat : 'Karathane'—the Value of its Differential Fungicidal Effect in relation to (D. A. Doling and Shirley Hepple), 622
Miles, Prof. A. A., and others : Enzymic Nature of the Serum Globulin Permeability Factor, 1264
Miles, H. B. (Lacy, Dr. D., and) : Observations by Electron Microscopy on the Structure of an Acephaline Gregarine (*Apolocystis elongata*, Phillips and MacKinnon), 1456
Miles, Dr. H. T. : Gas Discharges (Operation of SCEPTRE III in the Laboratories of Associated Electrical Industries), 92
  A Proposed Interpretation of Infra-red Spectral Changes occurring upon the Interaction of Polynucleotides, 1814
Miles, Dr. P. W. : Secretion of Two Types of Saliva by an Aphid, 756
Milk : Increase in Background Gamma-Radiation and its Correlation with Iodine-131 in (Measurements at Leeds following the Windscale Reactor Accident), (Prof. F. W. Spiers), 517
  Iodine-131 in Human Thyroids and Iodine-131 and Caesium–137 in (Measurements at Leeds following the Windscale Reactor Accident), (Dr. P. R. J. Burch), 515
  Microbes and, *review* by Dr. C. A. E. Briggs, 637
  Separation of Strontium-90 from Calcium in (Dr. N. A. Myers), 1807
Milk as an Eluant of Polycyclic Aromatic Hydrocarbons added to Wax (Dr. Hans L. Falk, Dr. Paul Kotin and Adele Miller), 1184
Milk Marketing Board : Breeding 10,000,000 Cattle, 1641
Milk and Milk Products Technical Advisory Committee of the Ministry of Agriculture, Fisheries and Food : Appointment of Prof. A. N. Duckham as chairman, 368
Milk and Soil (Swedish) : Caesium-137 in (K. Löw and K. Edvarson), 1104
Milk (Dried) : Caesium-137 in (D. V. Booker), 921
Milk (Skim): Distribution of Kappa-Casein in (Royal A. Sullivan, Margaret M. Fitzpatrick and Elizabeth M. Stanton), 616
Milk Fat : Depression in Percentage of, by Parenteral Glucose Infusion and Glycerol Feeding (W. S. Vallance and Prof. G. L. McClymont), 466
Miller, I. T. (Mann, F. G., and) : Co-ordination Chemistry (Determination of Grignard Reagents), 1785
Miller, Adele, and others : Milk as an Eluant of Polycyclic Aromatic Hydrocarbons added to Wax, 1184
Miller, Prof. A. Austin, and Parry, M. : Everyday Meteorology, *review* by James A. Taylor, 3
Miller, Daniel G., and others : Granulocyte Precipitins of Human Tissues and Activated Sera, 330
Miller, Dr. G. L. : Zirconium, second edition, *review* by Dr. W. D. Jones, 1768
Miller, J. F. A. P. : Role of the Thymus in Murine Leukaemia, 1069
Miller, J. H., and Marsh, Dr. George W. : Awarded jointly the Mrs. Patrick Ness Award of the Royal Geographical Society, 292
Miller, Dr. O. Neal (Sellinger, Dr. Otto Z., and) : Anion Inhibition of α-Glycerophosphate Dehydrogenase, 889
Miller, Dr. S. A. : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1236
Miller, T. B., and others : A Chemical Basis for the Classification of Glume Colour in Nigerian Cultivated Sorghums, 807
Milligan, Prof. G. C. : *Obituary* of Prof. G. V. Douglas, 860
$m\mu$ in Electron Microscopy : A. or (Dr. John R. Baker), 416
Milling (Ball) : Release of Fixed Ammonium from the Soil by (P. M. McDonnell, Prof. F. J. Stevenson and Dr. J. M. Bremner), 1414
Millington, Dr. R. J., and Quirk, Dr. J. P. : Permeability of Porous Media, 387
Millman, B. M. (Lowy, Dr. J., and) : Contraction and Relaxation in Smooth Muscles of Lamellibranch Molluscs, 1730
Millot, J., et Anthony, J.: Anatomie de *Latimeria chalumnae*, Tome I, Squelette, Muscles et Formations de Soutien, *review* by Dr. E. Trewavas, 566
Mills, Lord : To open a new Exhibition at the Science Museum, London, on the Principles underlying the Manufacture of Iron and Steel, 293
Mills, O. S., and others : Co-ordination Chemistry (Determinations of the Crystal Structure of some Organo-transition Metal Complexes), 1785
Mills, Dr. W. H. : *Obituary* by Dr. A. G. Sharpe, 929
Mills ('Ball') : Grinding at Super-Critical Speeds in (Dr. H. E. Rose and M. D. Trbojević), 813
Milne, Dr. A. : Population Ecology, *review*, 1220
Milner, Dr. P. M. : Self-regulation in Living Systems (Knowledge of the Nervous System), 370
Minc, S., and Libus, W. : Co-ordination Chemistry (Physical Properties and Relative Stabilities of the various types of Cobalt (II) Complex in Solution), 1784
Mind (Modern) : The Emergence of the (edited by Prof. Frederick C. Gruber), *review* by T. H. B. Hollins, 953
Mind and Matter (Prof. Erwin Schrödinger), *review* by Prof. W. H. McCrea, 1218
Mineral Deposits (British) : Isotopic Composition of Lead from (S. Moorbath), 595
Mineral Nutrition and Age of Plants : Amino-Acid Composition of the Proteins of Barley Leaves in relation to the (Dr. B. P. Pleshkov and Dr. L. Fowden), 1445
Mineralogical Society (Clay Minerals Group) : Meeting on Clay Minerals and Industry, 1024
Minerals (Clay), and Biological Fibres (X-Ray Analysis Group of the Institute of Physics Conference on), 1024
Minerals (Clay), and Industry (Clay Minerals Group of the Mineralogical Society Meeting on), 1024
Minerals (Heavy), in certain Old Red Sandstone and Silurian Limestones of Monmouth (C. B. Crampton), 485
Minerals (Rare-Earth), from the Pegmatites of South Harris, Outer Hebrides : Niobium–Zirconium–Thorium–Uranium and (Dr. O. von Knorring and R. Dearnley), 255
Minessy, Dr. Faisal A. : Inducing Chlorophyll Formation in Albino Citrus Seedlings, 553
Miniature Nuclear Generator, *SNAP III* : The American (W. S. Eastwood, L. B. Mullett and J. L. Putman), 643
Minimum Oxygen off Bombay : Shorewards Upslope of the Layer of—its Influence on Marine Biology, especially Fisheries (Dr. J. N. Carruthers, S. S. Gogate, J. R. Naidu and T. Laevastu), 1084

Mining Engineers, Institution of : Election of R. G. Baker as president for 1960-61, 1716
Mining and Metallurgy, Institution of : Grants in 1959 from the Bosworth Smith Trust, 18
  Gold Medal for 1958 awarded to Dr. A. J. Orenstein, 1499
  Honorary membership conferred on W. A. C. Newman, on Brig. R. S. G. Stokes and on Sir Alexander Fleck, 1499
  Consolidated Gold Fields of South Africa, Ltd. Gold Medal for 1957-58 awarded to F. A. Williams, 1499
  Consolidated Gold Fields of South Africa, Ltd. Premium for 1957-58 awarded jointly to H. H. Fraser and O. E. A. Somerset, 1499
  William Frecheville Student's Prize awarded to I. R. M. Chaston, 1499
Minkowski, Dr. Rudolph L. B. : Elected a member of the United States National Academy of Sciences, 1575
Minnis, C. M. : Automatic Reduction of Geophysical Data, 1166
Minnow : Distribution of Melanophore-aggregating Hormone in the Pituitary of the (A. K. Kent), 544
Minsky, Dr. M. L. : The Mechanization of Thought Processes (Heuristic Programming), 225
Misener, Dr. A. D. : Appointed a member of the National Research Council of Canada, 1161
Misho, R. H. (Montgomery, Prof. D. J., and) : Infra-red Dispersion Wavelengths for Solid Lithium Fluoride containing varying Proportions of Lithium Isotopes, 103
Misra, Dr. G., and Patnaik, S. N. : Effect of Coumarin on the Germination and Growth of Rice Seedlings, 989
Missile Engineering Design, *review*, 210
Missile Engineering Handbook (C. W. Besserer), *review*, 210
Missiles : Guided—Operations, Design and Theory (sponsored by the United States Department of the Air Force), *review*, 210
Mitamura, Takaaki, and others : Effect of Morphine upon the Adrenal 17-Hydroxycorticosteroid Secretion in the Dog, 825
Mitchell, Dr. A. D. : *Obituary* of Dr. G. M. Bennett, 717
Mitchell, J. W., and Parasnis, A. S. : Interfacial Phenomena (Generation of Dislocations at Incoherent Interfaces), 1099
Mitidieri, Emilio, and Affonso, Ottilia R. : Effect of Salicylate on Blood and Liver Xanthine Dehydrogenate of Rats, 471
Mitochondria (Isolated) : Effect of Reduced Diphosphopyridine Nucleotide on the Swelling of (Dr. G. Di Sabato), 997
  Effects of 2:4-Dinitrophenol and other Agents on the Swelling of (Dr. J. B. Chappell and Dr. G. D. Greville), 1737
  Inhibition of Electron Transport and the Swelling of (Dr. J. B. Chappell and Dr. G. D. Greville), 1525
Mitochondria (Tumour) : Influence of L-3',5,3-Triiodothyronine on the Oxidative Phosphorylation of (Prof. W. Lührs, E. Heise and G. Bacigalupo), 1534
Mitochondrial Population of Ageing Periosteum : Changes in the Osteoblastic and (Dr. E. A. Tonna and Dr. N. Pillsbury), 337
Mitomycin *C* : Selective Inhibition of Formation of Deoxyribonucleic Acid in *Escherichia coli* by (S. Shiba, A. Terawaki, T. Taguchi and Prof. J. Kawamata), 1056
  Synthesis of Deoxyribonucleic Acid by Phage-infected *Escherichia coli* in the Presence of (Dr. Matsuo Sekiguchi and Dr. Yasuyuki Takagi), 1134
Mitosis : Method for Testing the Influence of Drugs and Physical Agents upon (Prof. Elio Guido Rondanelli, Pasquale Gorini and Domenico Pecorari), 190
Mitosis in the Microspore of *Encephalartos barteri* Carruth. (Dr. Geoffrey K. Berrie), 834
Mitra, Dr. G. C., and Allsopp, Dr. A. : Effects of Kinetin, Gibberellic Acid and certain Auxins on the Development of Shoot Buds on the Protonema of *Pohlia nutans*, 974
Mixed Pigments in Colour Vision (Dr. R. W. G. Hunt), 1601
Mixtures (Fatty Acid) : Effect of, on the Rice Stylet Nematode (*Tylenchorhynchus martini* Fielding, 1956), (Dr. Titus M. Johnston), 1392
Mixtures (Hydrocarbon Gas) : Analysis of Light (Dr. J. A. Barnard and H. W. D. Hughes), 250
Miyake, T., and Demerec, Dr. M. : *Salmonella–Escherichia* Hybrids, 1586
Mizuno, D., and others : A Possible Negative Feedback Phenomenon controlling Formation of Alkaline Phosphomonoesterase in *Escherichia coli*, 1529
Mobility (Electrophoretic), of the Precipitating Antibodies present in the Serum of Cattle recovering from Foot-and-Mouth Disease : Changes in Specificity and (F. Brown and J. H. Graves), 1688
Mockeridge, Prof. Florence A. : *Obituary* by Prof. H. E. Street, 150
Mode of Action of the Contact γ-Aluminium Oxide/Platinum : Structure and (Prof. Alfons Krause), 1615
Mode of Action and Biological Properties of the S-(Methylcarbamyl) Methyl O,O-Dimethyl-Dithiophosphate (R. Santi and P. de Pietri-Tonelli), 398
Mode of Division of Pediococci (Dr. Helge-Liane Gunther), 903
Mode of Trehalose Biosynthesis in the Locust : Site and (D. J. Candy and Dr. B. A. Kilby), 1594
Mode (European), of Life : Consequences of the Use of Nuclear Energy for the (Council of Europe Competition for a thesis on), 509
Model Oxygen-carrying Compounds and the Iron-*bis*-Indigo Complex (L. F. Larkworthy and Prof. R. S. Nyholm), 1377
Modern Ghosts : Four (Dr. Eric J. Dingwall and Trevor H. Hall), *review* by Dr. D. J. West, 351
Modern Mind : The Emergence of the (edited by Prof. Frederick C. Gruber), *review* by T. H. B. Hollins, 953
Modern Network Theory (Electrical Engineering Department of the University of Birmingham Residential Conference on), 1783
Modern Systems for Detecting and Evaluating Optical Radiation (International Commission for Optics Symposium on), 1571
Modern Tauberian Analysis, *review* by Prof. T. A. A. Broadbent, 1626
Modern Valve Design Technique (English Electric Valve Co., Ltd., Exhibition of), 224
Modern World : Communication in the (Granada Lectures of the British Association for the Advancement of Science), 293
Modern and Fossil Gastropod Shells : Manganese in (Dr. David Krinsley), 770
Modification of the Oxygen Effect when Bacteria are given Large Pulses of Radiation (D. L. Dewey and Dr. J. W. Boag), 1450
Modified Koelle Technique : Selective Staining of Visceral Efferents in the Rat Brain Stem by a (Dr. P. R. Lewis and Dr. C. C. D. Shute), 1743
Mohammed, Dr. A. H. Helmy : Systematic and Experimental Studies on Protozoal Blood Parasites of Egyptian Birds, *review* by Dr. Elizabeth U. Canning, 1081
Mohanty, S. R. (Maddock, Dr. A. G., and) : Thermal Annealing of Chemical Radiation Damage, 86
Mohr, Elisabeth (Schramm, Prof. Gerhard, and) : Purification of Neuraminidase from *Vibrio cholerae*, 1677
Moir, J. : Stereophonic Sound Recording, Reproduction and Broadcasting (Cinema Stereophony), 1721
Moir, T. R. G. (Whyte, Dr. R. O., and) : Legumes in African Agriculture, 439
Moistening : Non-respiratory Gas released from Seeds during (Alan H. Haber and Nancy Brassington), 619
Moisture : Effects of Heat and Loss of, on the Dormancy of Wheat, and some Interactions with 'Mergamma *D*' (P. D. Hewett), 1600
Moisture in Fired Ceramic Materials : Adsorption and Desorption of (F. Vaughan and A. Dinsdale), 600
Moisture Content of Whole Bread and Bread Crumb (Y. Pomeranz), 1122
Mok, Chi-Ching (Common, Prof. R. H., and) : Phosvitin in the Serum of the Hen, 1811
Mole, R. H., and others : Differential Distribution of Radioactive Strontium and Yttrium in the Tissues of the Rabbit's Eye, 802
Molecular Adaptation in Haemoglobins—Nature of the Bohr Effect (Austen Riggs), 1037
Molecular Biology, Journal of, Vol. 1, No. 1, 1641
Molecular Hydrogen Peroxide in the Radiolysis of Water labelled with Oxygen-18 : Determination of the Yields of (Dr. J. D. Backhurst, Dr. G. R. A. Johnson, Dr. G. Scholes and Prof. J. Weiss), 176
Molecular Motion of Enclathrated Compounds as studied by Nuclear Magnetic Resonance (Dr. D. F. R. Gilson and Prof. C. A. McDowell), 1183
Molecular Orientation at the Surface of *Amoebae* during Pinocytosis (Ronald C. Rustad), 1058
Molecular Structure and Spectroscopy (Ohio State University Symposium on), 722
Molecular Symmetry in *Cyclo*pentadienyl Thallium and some related Substances from their Microwave Spectra (J. K. Tyler, A. P. Cox and Dr. J. Sheridan), 1182
Molecular Weight 18,000 : Native Tobacco Mosaic Virus Protein of (Allen T. Ansevin and Prof. Max A. Lauffer), 1601
Molecular Weight Distributions : Characterization of, by a Viscometric Method (Dr. P. F. Onyon), 1670
Molecular Weights of Polysaccharides : Determination of, by Overoxidation with Periodate (F. W. Parrish and Dr. W. J. Whelan), 991
Molecular and Atomic Motions in Solids and Liquids : The Study of, by Radio-frequency Methods (British Radio Frequency Spectroscopy Group and the Groupement AMPERE Joint Meeting on), 652
Molecule : The Myoglobin (Dr. Helen Scouloudi), 374
Molecules (Free Atoms and) : Radiofrequency Spectroscopy of (Radiofrequency Spectroscopy Group Autumn Meeting on), 1502
Møller, Ib (Thomsen, Ellen, and) : Neurosecretion and Intestinal Proteinase Activity in an Insect, *Calliphora erythrocephala* Meig., 1401
Mollusc : The Living, *review* by Prof. C. M. Yonge, 3
Molluscs (Dr. J. E. Morton), *review* by Prof. C. M. Yonge, 3
Molluscs (Lamellibranch) : Contraction and Relaxation in Smooth Muscles of (Dr. J. Lowy and B. M. Millman), 1730
Molnar, J., and Lorand, Dr. L. : Transphosphorylating Enzymes and Muscle Relaxation, 1032
Molybdenum : Ductile Cleavage Fracture of (A. A. Johnson and B. J. Shaw), 1542
Molybdenum, Osmium and Cobalt in Dietary Necrotic Liver Degeneration : Ineffectiveness of (Dr. Klaus Schwarz, Edward E. Roginski and Calvin M. Foltz), 472
Molybdenum Disulphide : Melting Point and Sublimation of (Dr. Peter Cannon), 1612
Momentum (Angular) : Elementary Theory of (M. E. Rose), *review* by Prof. N. Kemmer, 705
Momentum (Angular), in Quantum Mechanics (E. R. Edmonds), *review* by Prof. N. Kemmer, 705
Monaghan, R. J. : Hypersonic Flow (Problems of Hypersonic Aerodynamics), 1095
Monash University, Melbourne : Appointment of Prof. J. A. L. Matheson as first vice-chancellor, 1643
Mond Nickel Co., Ltd. : Development and Research Appointments at the, 1432
Mond Nickel Fellowships, 367
Mongar, Dr. J. L. : Title of reader in chemical pharmacology in the University of London (at University College) conferred on, 86
Monde : Le Système du (Prof. Pierre Duhem), Tome 8, Histoire des Doctrines Cosmologiques de Platon à Copernic, *review* by Prof. E. J. Dijksterhuis, 964
Mongolian Earthquake, 367
Monkeys : Space, 1568
Monmouth : Heavy Minerals in certain Old Red Sandstone and Silurian Limestones of (C. B. Crampton), 485
Monoamine Oxidase Inhibitors : Ganglionic Block and (Dr. Sheldon B. Gertner), 750
Mono-*n*-butyl Phosphate and Di-*n*-butyl Phosphate : Separation of, by means of Ion Exclusion (E. Carrai and F. Gadda), 1528
Monofluorosulphonate, Difluorophosphate and Fluoroborate Ions : Effect of, on the Iodine Uptake of the Thyroid Gland (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Monogenetic Trematode New to the British Fauna (Z. Kabata), 481
Monolayers (Oleophobic) : Electron Microscopy of (Robert T. Mathieson), 1803
Monomolecular Layers of a Boundary Lubricant : Material Transfer in (George L. Gaines, jun.), 1110
Mononucleosis (Infectious) : Incorporation of Thymidine labelled with Tritium by Circulating Cells of (Dr. F. Gavosto, A. Pileri and G. Maraini), 1691
Mono-Telluride : Indium (H. C. Wright and J. C. Brice), 27
Monoxide (Carbon) Content of the Blood and other Observations on Weddell Seals (Dr. L. G. C. E. Pugh), 74
Monoxide (Carbon) Pressure : Behaviour of Dicobalt Octacarbonyl at Elevated Temperature and (Sol Metlin, Irving Wender and Heinz W. Sternberg), 457
Monozygotic Twin Calves : Threshold Values for Taste in (Dr. F. R. Bell and H. L. Williams), 345

Montagna, William, and Ellis, Richard A. (edited by) : The Biology of Hair Growth, *review* by Dr. F. W. Dry, 851
Montgomery, Prof. D. J., and Misho, R. H. : Infra-red Dispersion Wavelengths for Solid Lithium Fluoride containing varying Proportions of Lithium Isotopes, 103
Montmorillonite : Density of Water Sorbed on (Dr. W. F. Bradley), 1614 ; (Dr. Robert C. Mackenzie), 1615
Moody, N. F. : Appointed professor of electrical engineering in the University of Saskatchewan, 1302 ; work of, 1302
Moon : Craters on the, 864
  Eclipse of the, 722
  Sub-surface Temperatures on the (Prof. J. C. Jaeger), 1316 ; (Dr. J. H. Fremlin), 1317
  Volcanoes on the (Dr. J. H. Fremlin), 239
Moon and Solar Corona : Radio Reflexions from the (Prof. O. Burkard), 1180
Moorbath, S. : Isotopic Composition of Lead from British Mineral Deposits, 595
Moore, Prof. Dan H. (Stone, Robert S., and) : Purification of the Mouse Mammary Carcinoma Agent by means of a Fluorocarbon, 1275
Moore, Prof. Hilary B. : Marine Ecology, *review* by Prof. C. M. Yonge, 420
Moore, J. G., and others : Upper Air Temperature over the World (Meteorological Office, Geophysical Memoir No. 101), 864
Moore, Dr. John W. : Excitation of the Squid Axon Membrane in Isosmotic Potassium Chloride, 265
Moore, Ruth (van den Brenk, H. A. S., and) : Effect of High Oxygen Pressure on the Protective Action of Cystamine and 5-Hydroxytryptamine in Irradiated Rats, 1530
Moorhead, Lynn V., and others : Juvenile Hormone in Thymus, Human Placenta and other Mammalian Organs, 405
Mordike, B. L. : Awarded a Ciba Fellowship for 1959-1960, 1161
Moreland, W. B. : Antarctic Meteorology, 1503
Moreton, B. D. : The True Book about Insects, *review*, 709
Morgan, D. R., and Street, Prof. H. E. : Respiration of Excised Tomato Roots, 1023
Morgan, E. D. (Gill, E. W., and) : Intramolecular Hydrogen Bonding in Heterocyclic Systems, 248
Morgan, Dr. Joseph F. (Pasieka, Arthur E., and) : Glutamine Metabolism of Normal and Malignant Cells cultivated in Synthetic Media, 1201
Morgan, Dr. Joseph F., and others : Activity of 10-Hydroxydecenoic Acid from Royal Jelly against Experimental Leukaemia and Ascitic Tumours, 1270
Morgan, Dr. K. (Yaphe, Dr. W., and) : Enzymic Hydrolysis of Fucoidin by *Pseudomonas atlantica* and *Pseudomonas carrageenovora*, 761
Morgan, Dr. M. A. : The Black Fens, *review*, 965
Morgan, T. J. : Telecommunication Economics, *review* by Prof. Colin Cherry, 778
Morgenthau, Hans : Education in the Age of Science, 1437
Morhana Parar (Dr. F. R. Allchin), 437
Mori, Wataru, and others : Melatonin in Peripheral Nerve, 1821
Morison, Dr. Robert S. : Elected director for medical and natural sciences, Rockefeller Foundation, 1018
Morita, Y. : Antarctic Meteorology, 1503
Morlin, Z. : Slip Sources on Sodium Chloride Surfaces, 1319
Morphine : Effect of, upon the Adrenal 17-Hydroxycorticosteroid Secretion in the Dog (Prof. Tatuzi Suzuki, Kazukuni Yamashita, Seiichi Zinnouchi and Takaaki Mitamura), 825
Morphogenesis : Plant (Prof. C. W. Wardlaw), 584
Morphogenesis in an Oleaceous Tree, *Nyctanthes arbor-tristis* : Regulation of (Subodh Kumar Roy), 1410
Morphogenetic Response of *Citrus* Ovules to Growth Adjuvants in Culture (N. S. Ranga Swamy), 735
Morphological Alterations (Geotropic and), in Rice Seedlings caused by Plant Growth Regulators (E. H. Roberts), 1197
Morphologische, Biologische und Serologische Eigenschaften der Bartonellen (Dr. Reinhard Wigand), *review* by Dr. A. Lwoff, 207
Morrell, Dr. Roger M. : Recurrent Inhibition in Cerebral Cortex, 979
Morris, D. W., and Hughes, C. J. : Phase Characteristics of Radio Signals received via the Ionosphere, 310
Morris, Dr. K. R. S. : Awarded a research fellowship by the Leverhulme Trust, 1499
Morris, M. B., and Roberts, J. B. : A Group of Pseudomonads able to Synthesize Poly-β-hydroxybutyric Acid, 1538
Morris, R. : A Simple Micro-Stirrer, 201
Morrogh, H. : Appointed director of the British Cast Iron Research Association, 84 ; work of, 84
Mortality (Early Foetal), in Cattle : β-Globulin Polymorphism and (Dr. G. C. Ashton), 404
Mortari, A., and others : Reserpine Derivatives with Specific Hypotensive or Sedative Activity, 1273
Mortimer, Dr. C. H. : Appointed a member of the Water Pollution Research Board, 934
  The National Oceanographic Council—Report for 1957-58, 1305
Mortimer, Robert K., and Johnston, John R. : Life Span of Individual Yeast Cells, 1751
Mortimore, C. G. (Whitney, N. J., and) : An Antifungal Substance in the Corn Plant and its Effect on Growth of Two Stalk-rotting Fungi, 341
Morton, Dr. J. E. : Molluscs, *review* by Prof. C. M. Yonge, 3
Moruzzi, Prof. Giuseppe (Dow, Prof. Robert Stone, and) : The Physiology and Pathology of the Cerebellum, *review* by Dr. C. G. Phillips, 954
Mosaic : A Presumptive Human *XXY/XX* (Dr. C. E. Ford, and Dr. P. E. Polani, J. H. Briggs and Dr. P. M. F. Bishop), 1030
Mosaic Virus (Tobacco) : Infectious Ribonucleic Acid as Precursor of (Reto Engler and Prof. Gerhard Schramm), 1277
  Photoreactivation of Nucleic Acid from (F. C. Bawden and A. Kleczkowski), 503
Mosaic Virus (Tomato Aucuba) : Persistence of, in Dried Leaf Tissue (Prof. John Caldwell), 1142
Mosaic Virus Protein (Tobacco), of Molecular Weight 18,000 : Native (Allen T. Ansevin and Prof. Max A. Lauffer), 1601
Mosbach, Dr. Rolf, and others : An Electron Spin Resonance Study of the State of Copper in Fungal Laccase, 321
Moseman, Dr. Albert H. : Appointed deputy director for agricultural sciences, Rockefeller Foundation, 1018
Moser, Hermann : The Dynamics of Bacterial Populations maintained in the Chemostat, *review* by Dr. A. C. R. Dean, 424
Mosquito Numbers: Influence of Larval Population Density on Fluctuation in (Gordon Surtees), 269
Mosquitoes (Adult) : Galeal Structure in (Gordon Surtees), 971
Moss, Dr. A. A. : Appointed deputy keeper of the Department of Mineralogy in the British Museum (Natural History), 1304
Moss, Lloyd K. (Marcus, Rudolph J., and) : Reduction of Menadione in Hexane by Chlorophyll *a* under Ultra-Violet Irradiation, 990
Moss, P., and Thomas, A. J. : Detection and Estimation of Benzenoid Compounds by Chromatography, 1611
Motility of Muscle : Reflexions on the, *review* by J. R. Bendall, 278
Motility of Muscle and Cells (Prof. Hans H. Weber), *review* by J. R. Bendall, 278
Motion (Collective), in Physics : Problems of (Physical Society Conference on), 866
Motion (Molecular), of Enclathrated Compounds as studied by Nuclear Magnetic Resonance (Dr. D. F. R. Gilson and Prof. C. A. McDowell), 1183
Motions (Molecular and Atomic), in Solids and Liquids : The Study of, by Radiofrequency Methods (British Radio Frequency Spectroscopy Group and the Groupement AMPERE Joint Meeting on), 652
Motivation : The Concept of (Dr. R. S. Peters), *review* by Prof. L. S. Hearnshaw, 567
Motivation Structure and Measurement : Personality and (Prof. Raymond B. Cattell), *review* by Prof. M. D. Vernon, 140
Mott, Prof. N. F. : Elected Master of Gonville and Caius College, Cambridge, 438
Motu Locali Animalium : De, 1627 (William Harvey), edited, translated and introduced by Dr. Gweneth Whitteridge, *review* by Prof. K. J. Franklin, 1486
Mould, D. L., and Silverman, Dr. P. H. : Electrophoretic Patterns of the Serum Proteins of Sheep infected with *Haemonchus contortus*, 1735
Moullec, Dr. J., and Le Chevrel, Dr. P. : A Rare Variant of B in a Human Blood Sample belonging to Group AB, 1733
Mount Stromlo Observatory : To set up a Field Station near Griffith, 1091
Mountains (Pare) : Effect of Residual House Spraying in the Plains on Anopheline Densities in Huts on the (Dr. A. Smith), 198
Mountford, Charles P. : The Tiwi—their Art, Myth and Ceremony, *review* by Dr. Phyllis Kaberry, 1080
Mouse : Incorporation of Labelled Thymidine in the Seminal Vesicle of the (Dr. S. R. Pelc and P. B. Gahan), 335
  Increase of Viral Haemagglutinability of Red Cells of the, after Treatment with Formalin (B. Fauconnier and D. Barua), 629
Mouse (*C3H*) : A Cytopathogenic Agent from a Mammary Tumour in a, that produces Tumours in Swiss Mice and Hamsters (Dr. E. A. McCulloch, A. F. Howatson, L. Siminovitch, A. A. Axelrad and A. W. Ham), 1535
Mouse (House), *Mus musculus* : Effect of a Sympathomimetic Agent (Methoxamine Hydrochloride) on Growth of Hair in the (F. Cockrem), 614
  Selection for Relationships Opposite to those predicted by the Genetic Correlation between Two Traits in the (F. Cockrem), 342
Mouse Erythrocytes (Rat and), in the Rat–Mouse Chimera : Life-Span of (Dr. Joan W. Goodman and Dr. L. H. Smith), 1833
Mouse Hepatitis : Complement Fixation with Tissue Culture and Liver Antigens of (Dr. Theodore J. Starr and Dr. Morris Pollard), 1690
Mouse Hepatitis (Experimental) : Effect of Dietary Protein on the Severity of (Dr. Boris Ruebner and James L. Bramhall), 609
Mouse Liver : Effect of Azaserine (*o*-Diazo-acetyl-L-serine) on the Pyridine Nucleotide Levels of (Stuart A. Narrod, Thomas A. Langan, jun., Prof. Nathan O. Kaplan and Abraham Goldin), 1674
Mouse Mammary Carcinoma Agent : Purification of the, by means of a Fluorocarbon (Robert S. Stone and Prof. Dan H. Moore), 1275
Mouse Protection Test : Measurement of a Staphylococcal Antibody in Human Serum by a (Dr. Myron W. Fisher), 1692
Moustafa, Dr. Esam M. : Paper Electrophoretic Separation of the Proteins of some Leguminous Seeds, 199
Movement in Animals : Harvey on, *review* by Prof. K. J. Franklin, 1486
Movement of Auroral Echoes and the Magnetic Disturbance Current System (R. S. Unwin), 1044
Mrak, E. M., and Stewart, G. F. (edited by) : Advances in Food Research, Vol. 8, *review* by Dr. Magnus Pyke, 351
Mucopolysaccharides (Acid), of Normal Urine (Dr. J. F. Heremans, J. P. Vaerman and M. Th. Heremans), 1606
Mucoprotein of Bronchial Mucus Gel (J. C. White, P. C. Elmes and W. Whitley), 1810
Mucor ramannianus Moller : Ecology of (Dr. Geoffrey W. F. Sewell and Dr. Juliet C. Brown), 1344
Mucosa (Fallopian-Tube) : Entry of Spermatozoa into the (Dr. C. R. Austin), 908
Mucus Gel (Bronchial) : Mucoprotein of (J. C. White, P. C. Elmes and W. Whitley), 1810
Mudd, J. B. : Interaction of Magnesium and Adenosine Diphosphate in Photosynthetic Phosphorylation, 900
Muir, Dr. Alex : Palaeopedology, *review*, 1355
Muir, Sir Robert : *Obituary* by Prof. D. F. Cappell, 1363
Muir-Wood, Dr. Helen M. : Upper Devonian Spirifers of the Catskill Delta, *review*, 959
Muir-Wood, Dr. Helen M. (Oakley, Dr. Kenneth P., and) : The Succession of Life through Geological Time, third edition, *review*, 73
Mukherjee, Dr. P. N., and Lahiri, Dr. A. : The Nature of Coal (Constitution of Humic Acids), 1438
Mulcock, A. P. : Discoloration of Wool Fibres by a Fungus, 1281
Mullard Premium of the Television Society awarded to J. Polonsky, 1161
Müller, A. (Boag, Dr. J. W., and) : Changes in the Electron Spin Resonance Spectrum of Glycine with Increasing Doses of Radiation, 831
  Electron Spin Resonance in Irradiated Deoxyribonucleic Acid, 831
Muller, L. B., and others : The American Miniature Nuclear Generator, *SNAP III*, 643
Mulliken, Prof. R. S. : Chemistry and Quantum Chemistry, 158
Mullins, Dr. L., and Turner, Dr. D. T. : Estimation of Chain Fracture during the Cross-linking of Rubber Hydrocarbons by High-Energy Radiation, 1547
Multiple Geiger Counter Telescope Measurements of the Directions of Air Shower Particles (Dr. H. D. Rathgeber), 386
Multiple Malformations : Co-existence of the Embryonic (Third Normal) Haemoglobin Fraction with Erythroblastosis in the Blood of Two Full-term New-born Babies with (Prof. I. Halbrecht, Ch. Klibanski and F. Bar Ilan), 327

Multiplication (Influenza Virus) : Inhibition of, with a Glucose Antimetabolite (2-deoxy-D-glucose), (Prof. Edwin D. Kilbourne), 271
Multiplicity of Histidine—Cu(II) Complexes (R. Leberman and Dr. B. R. Rabin), 746
Mummery, P. W. : Nuclear Fuel Cycles (Long-term Reactivity Changes), 1647
Mummified Tissue : Persistence of Sudanophilic Lipid in Sections of (Dr. A. T. Sandison), 196
Munro, G. H. : Diurnal Lapse of Signals from *Sputnik III*, 1549
Munro, G. H., and Heisler, L. H. : Recording Radio Signals from Earth Satellites, 809
Munro, Dr. T. A. : Elected a Fellow of the Royal Society of Edinburgh, 719
Münzinger, Dr. F. : Presented with a Gold Medal of the Institut Français des Combustibles et de l'Energie, 151
Murakoshi, N. : Antarctic Meteorology, 1503
Murayama, Makio, and Ingram, Dr. V. M. : Constituents of Human Haemoglobin—Comparison of Normal Adult Human Haemoglobin with Haemoglobin I by 'Fingerprinting', 1798
Murchison Fund for 1959 of the Geological Society awarded to Dr. D. T. Donovan, 364
Murchison Grant of the Royal Geographical Society awarded to Prof. S. P. Chatterjee, 292
Murchison Medal for 1959 of the Geological Society awarded to Prof. S. E. Hollingworth, 364
Murgatroyd, Prof. W. : To visit Venezuela, Colombia, Peru and Mexico, 510
Murine Leukaemia : Role of the Thymus in (J. F. A. P. Miller), 1069
Murine Virus Diseases : Sparing Effect of Serum from Mice treated with Endotoxin upon certain (A. W. Gledhill), 185
Murphy, Prof. A. J. : Appointed to the Board of the College of Technologists, 1500
  Elected president of the Institution of Metallurgists, 1502
Murphy, Prof. Gordon J.: Basic Automatic Control Theory, *review* by M. J. Somerville, 211
Murphy, William F. (Wilkinson, Walter D., and) : Nuclear Reactor Metallurgy, *review* by Prof. A. H. Cottrell, 1628
Murray, E. G. D. : Our Debt to the Future—Symposium presented on the Seventy-fifth Anniversary, 1957 (Royal Society of Canada 'Studia Varia' Series, Vol. 2), *review* by R. Brightman, 1702
Murray (John) Travelling Studentships in Oceanography and Limnology for 1959 awarded by the Royal Society to A. D. Ansell and to G. Evans, 1365
Murray, Prof. J. Randolph : Effect of Chloral Hydrate on Growth of Hair, 984
Murray Valley Encephalitis Virus (Impure) : Yield of Infective 'Ribonucleic Acid' from, after Different Treatments (G. L. Ada and S. G. Anderson), 799
Murrell, Dr. J. N., and others : Existence of Two Liquid Phases in the System Cobalt Chloride–Water–Acetone, 459
Mursaid, -. : Humid Tropics Vegetation (Problems of Sylviculture in Indonesia), 796
Murty, Y. V. Ramana, and others : Effect of Magnetic Activity on Drifts of the *F2* Region, 667
Mus musculus : Effect of a Sympathomimetic Agent (Methoxamine Hydrochloride) on Growth of Hair in the House Mouse (F. Cockrem), 614
  Selection for Relationships Opposite to those predicted by the Genetic Correlation between Two Traits in the House Mouse (F. Cockrem), 342
Musaceae : Two New Basic Chromosome Numbers in the (K. Shepherd), 1539
Musca domestica : Metabolism of Benzene Hexachloride by Resistant Houseflies (Dr. F. R. Bradbury and H. Standen), 983
Muschel, Louis H. (Toussaint, Andre J., and) : Neutralization of Bacteriophage by Normal Serum, 1825
Muscle: Effect of Insulin on Sulphydryl Groups in (Dr. G. Ungar and Dr. S. Kadis), 49
  Reflexions on the Motility of, *review* by J. R. Bendall, 278
Muscle (Heart) : Excitation–Contraction Coupling in (Prof. H. Reichel and A. Bleichert), 826
Muscle (Mammalian Skeletal) : Synthesis of Adenylosuccinic Acid in Preparations of (C. L. Davey), 995
Muscle (Pig Heart) : Glutamic–Aspartic Transaminase of (B. E. C. Banks, K. G. Oldham, E. M. Thain and C. A. Vernon), 1187
Muscle (Smooth) : Slow Contraction of, produced by Human Plasma (Dr. Yousry Gabr and Raga H. Aly), 897
Muscle Fibres (Cardiac) : Relation of Extracellular to Intracellular Potential Records from Single (Dr. E. M. Vaughan Williams), 1341
Muscle Fibres (Glycerol-treated) : Relaxation of, by Acetone (Dr. Setsuro Ebashi and Dr. Fumiko Ebashi), 687
Muscle Phosphorylase : Effect of Salicylate on (Dr. Stanton Segal and Alberta Blair), 1609
Muscle Physiology, *review* by Dr. D. R. Wilkie, 1008
Muscle Relaxation : Transphosphorylating Enzymes and (J. Molnar and Dr. L. Lorand), 1032
Muscle and Cells : The Motility of (Prof. Hans H. Weber), *review* by J. R. Bendall, 278
Muscle (Red), as a Possible Character for the Identification of Sharks (Olaf R. Braekkan), 556
Muscles (Fast and Slow), in Mammals (Dr. A. J. Buller, Dr. A. C. Dornhorst, Dr. R. Edwards, Dr. D. Kerr and Dr. R. F. Whelan), 1516
Muscles (Indirect Flight), in Primitive Flies : Origin of (Dr. H. E. Hinton), 557
Muscles (Poultry Breast), at Slaughter : Changes in *p*H and Temperature in (F. E. Peters and J. W. Dodge), 687
Muscles (Smooth), of Lamellibranch Molluscs : Contraction and Relaxation in (Dr. J. Lowy and B. M. Millman), 1730
Muscular Activity (Prolonged), without Phosphate Exchange (Prof. Jacob Sacks), 825
Muscular Dystrophy (Human), as an Aberration of the Connective Tissue (Prof. Geoffrey H. Bourne and M. Nelly Golarz), 1741
Museum, Florida State : Annual Report for 1957-58, 1433
Museum, National Maritime : Exhibition of an Astrolabe made by Regiomontanus, 508
Museum, South African : Report for 1957-58, 1570
Museum, South Australian : *Records* of the, Vol. 13, No. 2, 1092
Museum, Transvaal : Annual Report for 1957-58, 721
  Memoir No. 11, The Transvaal Ape-Man-bearing Cave Deposits (C. K. Brain), 1433
Museum, United States National : Annual Report for 1957-58, 1641
Museum of English Rural Life, Reading : Exhibition of Old-time Beekeeping, 1782
Museum (National), of Canada : Bulletin No. 140, Flora of Manitoba (H. J. Scoggan), *review* by N. Y. Sandwith, 966
Museum (National), of Wales : Annual Report for 1957-58, 509
Museum Council, Regional : Formation of a, 437
  Appointment of Sir John Hobhouse as chairman, 437
Museum and Art Gallery, Durban : Annual Report for 1957-58, 1641
Museum Treatment of Weakened Fabrics (E. R. Beecher), 1501
Musical Acoustics (Prof. E. G. Richardson), 1293
Musician ? : Of What Use is Acoustics to the (Acoustics Group of the Physical Society Discussion on), 1293
Muskeltätigkeit : Die (Prof. Eugen Ernst), *review* by Dr. D. R. Wilkie, 1008
Mussel (Edible), *Mytilus edulis* : Feeding of the Oystercatcher (*Haematopus ostralegus*) on the, in the Estuary of the River Conway (R. E. Drinnan), 153
Mustafa, Prof. Ahmed, and others : Pharmacological and Toxicological Properties of 5-Benzylidenerhodanine, 607
Mustard (Phenylalanine) : Ratio of Visible to Lethal Mutations produced in *Drosophila* by (L. S. Altenburg and Edgar Altenburg), 699
Mutagenic Activity of the Alkaloid Heliotrine in *Drosophila* (Dr. A. M. Clark), 731
Mutant (Ebony), of *Drosophila melanogaster* : Oxidative Metabolism and Puparium Formation in the (Alexander Wolsky and Henrietta G. Kalicki), 1129
Mutant (ey^2), of *Drosophila* : Early Formation of Sperms in the (H. H. Shatoury), 1696
Mutant (An Induced), in *Triticum carthlicum* with the Diagnostic Feature of *T. vavilovi* (Z. Barabás, jun.), 1349
Mutant State (Potentially), in Bacteria : Linear Transfer of a (Dr. F. Kaudewitz), 871
Mutant Strains of *Salmonella* : Formation of 'Protoplasts' in, induced by Galactose (Toshio Fukasawa and Hiroshi Nikaido), 1131
Mutants (Bacterial) : Production of, with Nitrous Acid (Dr. Fritz Kaudewitz), 1829
Mutants (Bacterial), of Increased Sensitivity to 'Aminopterin': Selection of (Dr. Charles A. Nichol), 550
Mutants (Four), in the Syrian Hamster : Genetic Independence of (Roy Robinson), 125
Mutation (*S* Gene) : Homozygosity and (Dr. J. L. Brewbaker and N. Shapiro), 1209
Mutations: Ratio of Visible to Lethal, produced in *Drosophila* by Phenylalanine Mustard (L. S. Altenburg and Edgar Altenburg), 699
Mutations (Recoverable Lethal), in *Drosophila* Sperm (Prof. K. G. Lüning and H. O. Henriksson), 1211
Mutelid Lamellibranch : Development in a (Dr. G. Fryer), 1342
Muzik, Prof. T. J., and Lawrence, J. M. : Separation of Specific and Non-Specific Effects of Chemicals on Plants, 482
Mycelium of *Penicillium chrysogenum* grown in Media with Different Sources of Carbon : Carbohydrate Constituents of the (Roshan J. Irani and Dr. K. Ganapathi), 758
Mycobacteria : Factors Inhibiting and Stimulating Growth of, in the Blood and Serum of Non-immunized and Immunized Animals (J. Hubáćek and I. Málek), 187
  Malachite Green-reducing Enzyme in (Iván Tárnock and Pál Czanik), 549
Mycobacterium : Effect of Streptomycin on the Incorporation of Amino-Acids labelled with Carbon-14 into Ribonucleic Acid and Protein in a Cell-free System of a (T. Erdös and Agnes Ullmann), 618
Mycobacterium butyricum : Replacement of Thiamine as a Growth Factor for (Dr. D. E. Wright), 262
Mycorrhiza Development on Fly Ash : Forest Seedlings and (A. Sobotka and J. Materna), 1066
Mycosphaerella pinodes : Chemical Destruction of Mature Perithecia of (M. V. Carter), 162, *erratum*, 438
Myeloma and Macroglobulinaemia : Starch Gel Electrophoresis Studies on Abnormal Proteins in (Dr. J. M. Fine and Dr. R. Creyssels), 392
Myers, Clark E., and Kirby, F. A. : Changing Industry, 657
Myers, Sir James : *Obituary* by Prof. H. Lipson, 82
Myers, Dr. N. A. : Separation of Strontium-90 from Calcium in Milk, 1807
Mykura, H. : Interfacial Phenomena (Surface Tension of Metallic Interfaces), 1098
Mykytowycz, Dr. R. : Effect of Infection with Myxomatosis Virus on the Endoparasites of Rabbits, 555
Myleran (1:4-Dimethanesulphonyloxybutane) : Metabolism of (Dr. J. J. Roberts and Dr. G. P. Warwick), 1509
Myocardial Damage due to Lymphatic Congestion : Changes in Serum Transaminase Activity following (M. Földi, Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 1333
Mycoglobin : The Iron-Protein Link in Haemoglobin and (Dr. J. E. O'Hagan), 393
Myoglobin Crystals (Finback Whale) : Electron-Microscopic Study of (D. E. Bradley), 941
Myoglobin Molecule (Dr. Helen Scouloudi), 374
Myosin (Cod) : Aggregation of, during Frozen Storage (J. J. Connell), 664
Myrdal, Dr. Gunmar : Value in Social Theory, *review* by Prof. T. S. Simey, 4
Myristicaceae (Malayan) : A Revision of the (J. Sinclair), 1169
Mysore State, India : Trap-Shotten Rock from the Biligirirangan Hills (Prof. C. S. Pichamuthu), 483
Mytilus edulis (Edible Mussel) : Feeding of the Oystercatcher (*Haematopus ostralegus*) on the, in the Estuary of the River Conway (R. E. Drinnan), 153
Myxomatosis Virus : Effect of Infection with, on the Endoparasites of Rabbits (Dr. R. Mykytowycz), 555

NAGATSU, Dr. Toshiharu (Yagi, Dr. Kunio, and) : Condensation Products of Ethylenediamine with Adrenaline, 822
Nagel, Prof. Ernest : Education in the Age of Science, 1436
Naidu, J. R., and others : Shorewards Upslope of the Layer of Minimum Oxygen off Bombay—its Influence on Marine Biology, especially Fisheries, 1084
Nairn, Dr. A. E. M., and others : Palaeomagnetism of certain Rocks from Newfoundland, 596
Nairn, Dr. A. E. M. (Wen-you, Dr. Chang, and) : Some Palaeomagnetic Investigations on Chinese Rocks, 254, 652

Nakahira, Dr. M. (Brindley, Prof. G. W., and) : Evidence for a Variable Long-range Order in nearly Anhydrous Gamma Alumina, 1620
Nakamoto, K., and others : Metal–Oxygen Stretching Frequencies in the Metal Chelate Compounds of β-Diketones, 459
  Co-ordination Chemistry (Infra-red Spectra of the Metal Complexes of β-Diketones), 1784
Nakamura, Prof. Mitsuru, and Edwards, jun., Philip R. : Casease in *Entamoeba histolytica*, 397
Nakayama, T. O. M. (Claes, Dr. H., and) : Isomerization of Poly-*cis*-carotens by Chlorophyll *in vivo* and *in vitro*, 1053
Naldini, L. : Co-ordination Chemistry (Salts of the Low-spin (Hexa-aryl Isocyanide)–Manganese (II) Complexes), 1785
Names and Ciphers in Organic Chemistry, *review* by Dr. E. H. Rodd, 960
Naphthoic Acid Hydrazide (Feulgen–) Reaction applied to Blood Smears (Dr. R. K. Archer), 820
Naraghi, Prof. Ehsan : The Role of the Scholar in Society, 1773
Náray-Szabó, Dr. I. : Structure of Glass, 886
Narrod, Stuart A., and others : Effect of Azaserine (*o*-Diazoacetyl-L-serine) on the Pyridine Nucleotide Levels of Mouse Liver, 1674
Nassar, Dr. Salwa : The Role of the Scholar in Society, 1773
Nast, Prof. R. : Co-ordination Chemistry (Complex Acetylides of the Metals), 1785
Nath, Prof. M. C., and Belkhode, M. L. : Glucose-*cyclo*-Acetoacetate as a Precursor of Ascorbic Acid in Germinating Green Gram, 1258
Nath, Prof. M. C., and others : Disturbance in the Pattern of Serum Proteins in Experimental Atherosclerosis and its Prevention, 894
National Academy of Sciences (United States) : Centennial gift of 1,000,000 dollars from the Equitable Life Assurance Society of the United States, for the erection of a Hall of the Life Sciences, 1574
  Election of Dr. Hugh L. Dryden as home secretary, 1575
  Election of Dr. Roger Adams and Dr. William V. Houston as members of the Council, 1575
  Election of members, 1575
National Academy of Sciences (United States), and others : International Seminar on the Atomic Mechanisms of Fracture, 154
National Academy of Sciences (United States)—National Research Council : Armed Forces—National Research Council Committee on Bio-Astronautics to advise on the biological or medical aspects of space exploration, 651
  Survey on Tropical Medicine, 863
  Appointment of Harry Polachek as chairman of the Editorial Committee of *Mathematical Tables and other Aids to Computation*, 865
  To study technical assistance programmes to be used by the International Co-operation Administration, 1163
  Grant of 10,000 dollars from the National Science Foundation, for a Conference on the Design and Conduct of Research Programmes in Weather Modification, 1372
National Academy of Sciences (United States)—National Research Council, and others : International Conference on Scientific Information, 147
National Aeronautical Establishment : Formation of, as a new Division of the National Research Council of Canada, 291
  Appointment of Frank R. Thurston as acting director, 291
National Agricultural Advisory Service : Retirement of Sir Robert Rae from the directorship, 1160
  Appointment of J. A. McMillan as director, 1160
  Appointment of W. E. Jones as senior education and advisory officer, 1160
  Appointment of H. E. Evans as director of the National Agricultural Advisory Service in Wales, 1160
National Bureau of Standards (United States) : Circular No. 594, Preparation, Maintenance and Applications of Standards of Radioactivity (W. B. Mann and H. H. Seliger), 1023
National Chemical Laboratory, Teddington : Appointment of Dr. J. S. Anderson as director, 1719
National Committee on Antarctic Research (British) : To co-ordinate British Antarctic Activities, 292
  Appointment of Sir Raymond Priestley as chairman, 292
National Committee for Nuclear Research (Italian) : Congress on Nuclear Energy, 1094
National Education and Careers Exhibition (National Union of Teachers), 794
National Electronics Conference (United States) : Fifteenth Annual, 582, 1094
  Election of Virgil H. Disney as president, 582
National Engineering Laboratory : New name of the Mechanical Engineering Research Laboratory at East Kilbride, 1162
National Food Reserve Policies in Underdeveloped Countries (United Nations Food and Agriculture Organization, FAO Commodity Policy Studies No. 11), 635
National Foundation, United States (formerly the National Foundation for Infantile Paralysis) : Grant of 73,594 dollars to Dr. Renato Dulbecco (California Institute of Technology), for investigations on virus inheritance in experiments involving polio virus mutations, 224
  Grant of 33,943 dollars to Prof. Linus Pauling (California Institute of Technology), for investigations on the structure of nucleic acids, 224
National Fruit and Cider Institute, Long Ashton, Bristol : Annual Report for 1957, with Index 1953-57, 1507
National Institute of Industrial Psychology : Report 13, Comments on the Job (Dr. Isabel Blain), 372
National Institute of Mental Health (United States) : Grant of 40,360 dollars to Prof. G. J. Wischner (University of Pittsburgh), to continue graduate training in clinical psychology, 86
National Institute of Oceanography : Microseismic Research at the (Dr. H. M. Iyer and B. J. Hinde), 1558
National Institute for Research in Dairying : Appointment of Prof. R. G. Baskett as director, 294, 365
National Institute of Health (United States) (Endocrinology Study Section) : Supplies of Follicle-stimulating Hormone, 865
National Institutes of Health, United States (New York Academy of Sciences and the) : Papers presented at the Conference on the Genetic Concept for the Origin of Cancer (Annals of the New York Academy of Sciences, Vol. 71), 1234
National Lending Library for Science and Technology, 16
National Maritime Museum : Exhibition of an Astrolabe made by Regiomontanus, 508
National Museum (United States) : Annual Report for 1957-58, 1641
National Museum of Canada : Bulletin No. 140, Flora of Manitoba (H. J. Scoggan), *review* by N. Y. Sandwith, 966
National Museum of Wales : Annual Report for 1957-58, 509
National Oceanographic Council : Annual Report for 1957-58, 1305
National Parks Commission : Guide No. 2, Snowdonia (edited by E. Vale), 721
  Ninth Report (1957-58), 917, 937
  Appointment of Elwyn Davies and John C. P. de Winton as members, 1094
National Physical Laboratory : The Automatic Computing Engine at the (J. H. Wilkinson and D. W. Davies), 22
  International Symposium on Interferometry, 223
  Symposium on the Mechanization of Thought Processes, 225
National Reliability Award (United States) for 1958 awarded to Ralph Brewer, 365
National Research Council of Canada : Formation of a new Division to be known as the National Aeronautical Establishment, 291
  Appointment of Frank R. Thurston as acting director of the National Aeronautical Establishment, 291
  Symposium on Self-regulation in Living Systems, 370
  Forty-first Annual Report (1957-58), including the Annual Report of Canadian Patents and Development, Limited, 441
  New Fire Research Laboratory (F. R. Legget), 653
  Annual grant of 90,000 dollars to Dalhousie University, Halifax, Nova Scotia, for the establishment of an Institute of Oceanography, 1161
  Appointment of new members, 1161
  Report on University Support 1958-59, 1642
National Research Council of Canada, in co-operation with the Chemical Institute of Canada : Ninth Canadian High Polymer Forum, 1643
National Research Council (United States) (National Academy of Sciences —) : Armed Forces—National Research Council Committee on Bio-Astronautics to advise on the biological or medical aspects of space exploration, 651
  Survey on Tropical Medicine, 863
  Appointment of Harry Polachek as chairman of the Editorial Committee of *Mathematical Tables and other Aids to Computation*, 865
  To study technical assistance programmes to be used by the International Co-operation Administration, 1163
  Grant of 10,000 dollars from the National Science Foundation, for a Conference on the Design and Conduct of Research Programmes in Weather Modification, 1372
National Research Council (United States) (National Academy of Sciences —), and others : International Conference on Scientific Information, 147
National Research Development Corporation : Appointment of J. C. Duckworth as managing director, 861
  Appointment of Dennis Hennessey as deputy managing director, 862
  Report and Statement of Accounts for 1957-1958, 1026
National Research Development Corporation of India : Fourth Annual Report, 1092
National Science Foundation (United States) : Grant of 23,000 dollars to Dr. G. Felsenfeld (University of Pittsburgh), to initiate research on the active site in some copper-carrying proteins, 86
  Inquiry into the knowledge of foreign languages possessed by American scientists, 863
  Establishment of an Office of Social Sciences, 1018
  Appointment of an Advisory Committee for the Social Sciences, to advise on programmes and policy, 1018
  Appointment of Albert P. Crary as chief scientist of the Antarctic Research Programme, 1090
  Request to teachers of science for proposals for the construction of better laboratory equipment for use in schools, 1163
  Graduate and Post-doctoral Fellowships, 1233
  Grants for laboratory research, field experiments and conferences on meteorological methods directed toward modification of weather, 1371
  Publication of the *Science Information News*, Vol. 1, No. 1, 1501
  Eighth Annual Report for 1957-58, 1577
  Scientific Research and Development in Colleges and Universities—Expenditure and Manpower, 1953-54, 1717
National Science Foundation (United States), and others : International Conference on Scientific Information, 147
  International Seminar on the Atomic Mechanisms of Fracture, 154
National Science Foundation (United States), (American Institute of Physics, in co-operation with the) : To publish an English translation of the *Astronomical Journal of the Academy of Sciences, U.S.S.R.*, under the title *Soviet Astronomy—AJ*, 1164
National Scientific Document Centre (Indian) : Report for 1957-58, 721
National Union of Students : Memorandum on Grants to Students in Britain, 864
National Union of Teachers: National Education and Careers Exhibition, 794
National University, Australian : Appointment of Dr. A. G. Ogston to the chair of physical Biochemistry, 151
  To set up a Field Station for Astronomy, 1091
Native Tobacco Mosaic Virus Protein of Molecular Weight 18,000 (Allen T. Ansevin and Prof. Max A. Lauffer), 1601
Native Venezuelans : Distribution of Haptoglobins in (Dr. M. L. Gallango de Rodriguez and Dr. Tulio Arends), 1465
NATO : Support for Institutes for Advanced Study in Science, 509
  Studentships and Fellowships, 793
NATO (Advisory Group for Aeronautical Research and Development) : Meeting on Chemistry of Propellants, 1094
  Discussion on Basic Problems in Propulsion, 1094
NATO Conference on Operational Research in Practice : Report of a (edited by Max Davies and Michel Verhulst), *review* by Dr. Cecil Gordon, 424
Natta, G., and co-workers : Co-ordination Chemistry (Synthesis of Succinic Acid from Carbon Monoxide, Acetylene and Water in the presence of Metal Carbonyls), 1785
Natta, G., and Mazzanti, G. : Co-ordination Chemistry (Reaction between Aluminium Alkyls and Titanium Halides), 1784
Natural History : Intelligence Unit for, 1231
Natural History, American Museum of : *Curator*, Vol. 1, No. 1, 223
  Bulletin, Vol. 116, Art. 1, The Spider Family Dictynidae in America North of Mexico (Prof. Ralph V. Chamberlin and Willis J. Gertsch), 1170

Natural History, Society for the Bibliography of : Election of Officers, 1094
Natural History of British Spiders, *review* by Dr. Eric Duffey, 1079
Natural History and other Field Studies : Directory of (British Association for the Advancement of Science), 1723
Natural History Societies : School, 1718
Natural Magnetic Moments of Two Chondritic Meteorites (Dr. F. D. Stacey and Dr. J. F. Lovering), 529
Natural Selection To-day : The Theory of (Prof. J. B. S. Haldane), 710
Natural Selection in Man (Society for the Study of Human Biology Symposium on), 159
Natural Tin Whiskers : A Source of (Malcolm J. Fraser), 670
Natural and Synthetic High Polymers : The Effects of Ionizing Radiation on (Dr. Frank A. Bovey), *review* by Prof. C. E. H. Bawn, 637
Natural and Synthetic Rubbers : Chemistry of (Prof. Harry L. Fisher), *review* by Dr. W. J. S. Naunton, 779
Naturalists : Curious (Dr. Niko Tinbergen), *review*, 211
  Early American, *review* by Dr. L. Harrison Matthews, 1006
Naturally Occurring Quinones (Dr. R. H. Thomson), *review* by Dr. R. I. T. Cromartie, 1291
Nature : Contributions to, 15
Nature : The Physicist's Conception of (Prof. Werner Heisenberg), *review* by Prof. W. H. McCrea, 1218
Nature, Council for : Establishment of a Conservation Corps for young volunteers, 508
  Annual grant of £5,000 for three years from the British Broadcasting Corporation, for the establishment of an Intelligence Unit, 1231
Nature of the Bohr Effect : Molecular Adaptation in Haemoglobins— (Austen Riggs), 1037
Nature of Cancer : Surmise and Fact on the (Dr. Peyton Rous), 1357
Nature of Coal (Central Fuel Research Institute, India, Symposium on), 86, 1438
Nature of Fluorescence of Uranium in Fused Sodium Fluoride (Haydée le Roux), 1180
Nature of the Vibrato and Control Loop in Singing (Dr. J. A. Deutsch and J. K. Clarkson), 167
Nature (Endothermic), of the Initial Stage of Reaction : Gas Phase Oxidation of Hydrocarbons— (Dr. K. C. Salooja), 602
Nature (Enzymic), of the Serum Globulin Permeability Factor (E. L. Becker, D. L. Wilhelm and Prof. A. A. Miles), 1264
Nature Conservancy : Purchase of Skomer Island as a Nature Reserve, 222
  Sands of Forvie Nature Reserve, 366
  Booklet on the Growth and Development of the, 931
  Report for 1957-58, 917, 935
  Rhinogs Nature Reserve, 1649
  Coed Dolgarrog Nature Reserve, 1649
  Coed Gorswen Nature Reserve, 1650
  Allt Rhyd-y-groes Nature Reserve, 1650
  Blackcliff and Wyndcliff Forest Nature Reserve, 1650
Nature Conservation and Ecological Research, 205
Nature Reserve : Skomer Island as, 222
  Sands of Forvie, 366
  Wonderboom (Special issue of *Transvaal Fauna and Flora*), 1023
  Rhinogs, 1649
  Coed Dalgarrog, 1649
  Coed Gorswen, 1649
  Allt Rhyd-y-groes, 1650
  Blackcliff and Wyndcliff Forest, 1650
Nature Reserves (New), in Britain, 1649
Naudé, Dr. S. M. : The South African Council for Scientific and Industrial Research, 853
Naunton, Dr. W. J. S. : Science and Technology of Rubber, *review*, 779
Naval College (Royal), Greenwich : Appointment of J. Edwards to the new chair of nuclear science and technology, 791
Naval Research, United States Office of: Grant of 41,600 dollars to Dr. T. M. Donahue (University of Pittsburgh), to continue studies on capture-ions and ionization cross-sections of ions and neutral particles, 86
  Grant of 129,000 dollars to Prof. A. J. Allen (University of Pittsburgh), to continue research on precision scattering of nuclear particles, 86
  Transfer of 50,000 dollars from the National Science Foundation to the, in support of cloud electrification studies by A. D. Little, Inc., under the direction of Bernard Vonnegut, 1371
Naval Research, United States Office of, and others : International Seminar on the Atomic Mechanisms of Fracture, 154
Naval Research, United States Office of (Information Systems Branch), and the Armour Research Foundation: Interdisciplinary Conference on Self-Organizing Systems, 86
Navigation : Inertial (D. Chilton), 64
Navigation Prize of the Royal Aeronautical Society awarded to C. M. Cade, 1649
Navigational Aids for Aircraft, 1019
Nayler, J. H. C., and others : Synthesis of Penicillin—6-Aminopenicillanic Acid in Pennicillin Fermentation, 257
Naylor, Dr. M. : Feulgen Reaction in the Fucales, 627
Neale, Dr. S. M. (Michie, R. I. C., and) : Catalytic Action of Copper in the Alkaline Autoxidation of Cellulose at Low Alkali Concentration, 534
Neales, T. F. : Effect of Boron Supply on the Sugars, Soluble in 80 per cent Ethanol, in Flax Seedlings, 483
Neatby, Dr. Kenneth W. : *Obituary* by C. H. Goulden, 82
Nebula (Andromeda), at 408 Mc./s. : A High-resolution Survey of the (Dr. M. I. Large, D. S. Mathewson and C. G. T. Haslam), 1250
Nebula (Spiral) : The Galactic System as a (Dr. R. H. Garstang), 1308
Nebulae (Planetary), in the Large Magellanic Cloud (E. M. Lindsay), 453
Necheles, Thomas, and others : Incidence of the Erythrocytic Defect associated with Drug-Sensitivity among Oriental Subjects, 684
Necrotic Liver Degeneration (Dietary) : Ineffectiveness of Molybdenum, Osmium and Cobalt in (Dr. Klaus Schwarz, Edward E. Roginski and Calvin M. Foltz), 472
Need for a Balanced Education, 1075
Needham, Dr. Rodney : Cambridge Anthropology, *review*, 1625
Needs (Everyday): Professional Meteorology and, *review* by James A. Taylor, 3
Negative Air Ions : An Enzymatic Basis for the Acceleration of Ciliary Activity by (Prof. A. P. Krueger and Richard F. Smith), 1332
Negative Feedback Phenomenon (A Possible), controlling Formation of Alkaline Phosphomonoesterase in *Escherichia coli* (T. Horiuchi, S. Horiuchi and D. Mizuno), 1529
Negroes (American) : Haptoglobin Types in (Dr. Eloise R. Giblett), 192
Nehring, Dr. K. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Nelder, J. A. : Appointed a recognised lecturer in the Department of Pure Mathematics in the University of Birmingham, 1571
Nelson, Arne, and others : Bone and Radiostrontium, *review* by J. Vennart, 965
Nelson, Prof. F. Eugene, and others : Dairy Microbiology, *review* by Dr. C. A. E. Briggs, 637
Nelson, Dr. L. S. (Lundberg, Dr. J. L., and) : Initiation of Thermal Reactions by the Flash Illumination of Absorbing Bodies, 1560
Nelson-Rees, Walter A. : Triple Coitus in the Mealy Bug, *Planococcus citri* (Risso), 479
Nematode Host : Freeze-drying of *Harposporium anguillulae* Lohde in its (William A. Feder and Dr. C. L. Duddington), 767
Nematode (Rice Stylet), *Tylenchorhynchus martini* Fielding, 1956 : Effect of Fatty Acid Mixtures on the (Dr. Titus M. Johnston), 1392
Nematodes *Ostertagia lyrata* Sjöberg, 1926 and *Trichostrongylus longispicularis* Gordon, 1933, in British Cattle (Dr. J. H. Rose), 1745
Nemec, Prof. Bohumil : Elected a member of the Botany Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Németh, Gy. : A New Nitrogen-fixing Micro-organism producing a Red Pigment, 1460
Neoplasms *in vitro* : Metabolism of Normal Tissues and (Prof. J. H. Quastel and I. J. Bickis), 281
Neoplastic Antibodies : Homologous Species (Dr. Hoy A. Cranston and Frederick O. Eggert), 1471
Neotetrazolium Chloride : Reduction of, by Vitamin K_3 (T. F. Slater), 50
Nephila maculata Fabr., 1763 : Amounts of Deoxyribonucleic Acid in the Silk Glands of the Spider (Prof. N. B. Inamdar and U. V. Wagh), 1541
Nerve (Insect) : Collagen in the Perilemma of (David S. Smith and Prof. V. B. Wigglesworth), 127
Nerve (Optic) : Number of Fibres in the, and the Number of Ganglion Cells in the Retina of Anurans (Dr. H. R. Maturana), 1406
Nerve (Peripheral) : Melatonin in (Dr. Aaron B. Lerner, James D. Case, Wataru Mori and Margaret R. Wright), 1821
Nerve Ending (Non-myelinated) : Spatial Summation of Electric Activity in a (Properties of a Receptor Membrane), (Prof. Werner R. Loewenstein), 1724
Nervous Activity : Neuronal Dye-Sorption as a Histochemical Indicator of (Prof. Roland Fischer and Prof. Wolfgang Zeman), 1337
Nervous System (Central) : Persistence of Cholesterol-4-^{14}C in the (Dr. A. N. Davison and Martha Wajda), 1606
Nervous System (Reptilian) : Environmental Temperature and the (B. B. Boycott and Dr. R. W. Guillery), 62
Ness (Mrs. Patrick) Award of the Royal Geographical Society awarded jointly to J. H. Miller and Dr. George W. Marsh, 292
Nessim Habif Prize for 1959 (Université de Genève), 1093
Nethercot, W., and Riddlestone, H. G. : Effects of Arc Stage of Electrical Discharge on Ignition of Inflammable Gas, 669
Nettley, P. T. (Stevenson, Dr. R. W. H., and) : Refractivity and Lattice Constant Ratios of Lithium-6- and Lithium-7-rich Fluorides, 1000
Network Theory : Modern (Electrical Engineering Department of the University of Birmingham Residential Conference on), 1783
Neuberg Medal of the American Society of European Chemists awarded to Dr. H. Albert Barker, 1304
Neumann, Dr. B. H. : Elected a Fellow of the Royal Society, 861
Neuraminidase from *Vibrio cholerae* : Purification of (Prof. Gerhard Schramm and Elisabeth Mohr), 1677
Neuraminidase (Baceterial), Receptor-destroying Enzyme : Purification of (G. L. Ada and E. L. French), 1740
Neuroblastoma : Pressor Amines and (Dr. J. D. P. Graham), 1733
Neurohypophysis of the Ferret : Electron Microscope Observations on the (Dr. R. L. Holmes and F. G. W. Knowles), 1745
Neurological Basis of Behaviour : Ciba Foundation Symposium on the (edited by G. E. W. Wolstenholme and Cecilia M. O'Connor), (in commemoration of Sir Charles Sherrington, 1857-1952), *review* by Dr. P. B. Bradley, 954
Neuro-Mathematics, *review* by A. H. Armstrong, 350
Neuromuscular Blocking Agents of Short Duration (C. G. Haining, R. G. Johnston and J. M. Smith), 542
Neuro-Muscular Junction : Action of Pyrrolizidine and Alkaloids on the (Dr. C. H. Gallagher and Dr. J. H. Koch), 1124
Neuronal Dye-Sorption as a Histochemical Indicator of Nervous Activity (Prof. Roland Fischer and Prof. Wolfgang Zeman), 1337
Neurones (Spinal) : Chemical Excitation of (Dr. D. R. Curtis, J. W. Phillis and Dr. J. C. Watkins), 611
Neurophysiology of Behaviour, *review* by Dr. P. B. Bradley, 954
Neurosecretion and Intestinal Proteinase Activity in an Insect, *Calliphora erythrocephala* Meig. (Ellen Thomsen and Ib Møller, 1401
Neurospora crassa : Linkage of Polygenes controlling Size of Ascospore in (B. T. O. Lee and J. A. Pateman), 698
Neutral Red : Effect of, on Plaque Formation by Fowl Plague Virus (Dr. A. P. Waterson), 628
Neutralization of Bacteriophage by Normal Serum (Andre J. Toussaint and Louis H. Muschel), 1825
Neutrino : The (Prof. James S. Allen), *review* by Prof. H. W. B. Skinner, 1421
Neutron Diffraction at a High-Flux Reactor (Dr. G. E. Bacon and R. F. Dyer), 35
Neutron Irradiation (Thermal) : Effect of, on Oxide Catalysts for the Decomposition of Nitrous Oxide (Yasukazu Saito, Yukio Yoneda and Shoji Makishima), 388
Nevard, E. H., and others : Copper–Cellulose Complexes, 988
New to the British Fauna : A Monogenetic Trematode (Z. Kabata), 481
New Amino-Acid in *Stizolobium hassjoo* : Stizolobic Acid, a (Prof. A. Hattori and Dr. A. Komamine), 1116
New Antibiotic, Kanamycin : Basic and Clinical Research of the (Maxwell Finland, and 93 other authors), 1570
New Aspects of the Genetic Control of Industrial Melanism in the Lepidoptera (Dr. H. B. D. Kettlewell), 918
New Bands and Lines in the Twilight Sky Spectrum (I. A. Khvostikov and T. G. Megrelishvili), 811
New Basic Chromosome Numbers in the Musaceae : Two (K. Shepherd), 1539
New Biochemistry, *review* by Prof. F. G. Young, 961

New Canadian Fire Research Laboratory (R. F. Legget), 653
New Chemotherapy in Mental Illness (edited by Dr. Hirsch L. Gordon), *review* by Dr. Marthe Vogt, 1007
New Class : Colour Vision Phenomenon of a (Dr. William A. Shurcliff), 202
New Cytostatic Agent : 1,6-Di-(2-Bromoethylamino)-1,6-Dideoxy-D-Mannitol Dihydrobromide—a (L. Vargha and T. Horváth), 394
New Drugs used by Psychiatrists, *review* by Dr. Marthe Vogt, 1007
New Electronic Device Premium (Institution of Electronics), 1023
New European Nuclear Energy Project, 507
New Ferodo Research Laboratories (Dr. R. C. Parker), 297
New Field Centre, 1570
New Fossil, *Spriggina floundersi* (M. F. Glaessner), 1782
New General Route to Aromatic Fluorocarbons (B. Gething, Dr. C. R. Patrick, Prof. M. Stacey and Prof. J. C. Tatlow), 588
New Guinea (*Australian Museum Magazine*, Vol. 12, No. 12, devoted almost entirely to), 1368
New Haemagglutinating Substance in the Gm System, Anti-Gm (Dr. Morten Harboe), 1468
New Inhibitor and Erythrocyte Receptor Substances for certain Asian Strains of Influenza Virus (Gy. Takátsy and K. Barb), 52
New Investigations with SCEPTRE III—Axial Positive Ion Velocities in SCEPTRE III (T. P. Hughes and Dr. S. Kaufman), 7 ; The Positive Ion Heating Mechanism in SCEPTRE III (Dr. A. A. Ware), 8
New Iodine Compound, I_2OH^- (Dr. J. Sigalla), 178
New Ionospheric Phenomenon (H. J. A. Chivers and H. W. Wells), 1178
New Leech-infesting Cercaria from Duddingston Loch, Edinburgh (Prof. M. B. Lal), 697
New Light on Old Darkness, *review* by Prof. R. J. Pumphrey, 1554
New Members of the British Marine Bottom Fauna (G. M. Spooner), 1695
New Method of Chemical Analysis : Magnetometric Titration—a (Dr. M. S. Blackie and Dr. V. Gold), 1804
New Method for Delaying Pupation in *Drosophila melanogaster* (Dr. A. Abd-el-Wahab), 127
New Method of Integration Recording (Allen Strickler and Dr. William S. Gallaway), 1110
New Method for the Microbiological Oxidation of Steroids (Dr. G. Wix and K. Albrecht), 1279
New Method of Particle-counting on the Electron Microscope (Dr. D. Gordon Sharp and Ivan Sorvall, Inc.), 1642
New Nature Reserves in Britain, 1649
New Nitrogen-fixing Micro-organism producing a Red Pigment (Gy. Németh), 1460
New Oxidation States of Technetium (J. E. Fergusson and Prof. R. S. Nyholm), 1039
New Physical Method of Creating Chromosomal Aberrations (Dr. John H. Heller and Dr. A. A. Teixeira-Pinto), 905
New Polypeptide Fold in Poly-β-Benzyl-L-Aspartate : α-Helices and a (E. M. Bradbury, L. Brown, A. R. Downie, Dr. A. Elliott, W. E. Hanby and T. R. R. McDonald), 1736
New Process of making Plate Glass (Pilkington Brothers, Ltd.), 293
New Reactor (*HERO*) to be built at Windscale, 508
New Science Officers for American Embassies, 15
New Sensitive Indicator for Semi-Micro Chelometric Titrations (Prof. Robert H. Maier), 461
New Series of Anti-Tumour Agents : 'Dual Antagonists' ; Alkyl N-(*bis*-(ethylenimido) phosphoro)-carbamates, a (Thomas J. Bardos, Zinon B. Paranastassiou, Albert Segaloff and Julian L. Ambrus), 399
New Short-acting Thiobarbiturate (Dr. M. E. Peel, Barbara Macauley, Dr. H. O. J. Collier, Dr. J. H. Hunt, Dr. F. A. Robinson and Dr. E. P. Taylor), 1443, *erratum*, 1571
New Silicide in a 12 per cent Chromium Steel (H. Hughes), 1543
New Solution to the Atlantic Eel Problem (Dr. Denys W. Tucker), 495
New Solutions (Old and), to the Eel Problem (Prof. Umberto D'Ancona), 1405 ; (Dr. Denys W. Tucker), 1406
New Techniques in the Analysis of Noise and Vibration (Acoustics Group of the Physical Society and the Institute of Physics Symposium on), 438, 794
New Term for a Class of Biologically Active Substances : 'Pheromones', a (Dr. P. Karlson and Prof. M. Lüscher), 55
New Theory of the Solar Corona (Prof. Paul J. Kellogg and Prof. Edward P. Ney), 1297
New Twilight Airglow at 6708 A. : Origin of Upper-Atmosphere Lithium Atoms responsible for the (D. R. Barber), 384
New Type of Chromaffin Cells, probably storing Dopamine (Bengt Falck, Prof. Nils-Åke Hillarp and Alf Torp), 267
New Types of Salting-out Paper Chromatograms of Antibiotics (Dr. Joseph Uri), 1188
New Value for the Earth's Flattening, derived from Measurements of Satellite Orbits (D. G. King-Hele and R. H. Merson), 881
New Variant of Human Foetal Haemoglobin (Dr. Phaedon Fessas, N. Mastrokalos and G. Fostiropoulos), 30 ; (Dr. F. Vella, Dr. J. A. M. Ager and Dr. H. Lehmann), 31
New Year Honours, 83
New York Academy of Medicine : Medal awarded to Dr. Peyton Rous, 294
  Plaque awarded to Montgomery B. Angell, 294
New York Academy of Sciences : Annals, Vol. 70, Article 4, Nuclear Magnetic Resonance (H. S. Gutowsky, and seventeen other authors), *review* by R. E. Richards, 969
  Annals, Vol. 71, Papers presented at the Conference on the Genetic Concept for the Origin of Cancer, 1234
New Zealand : The Climate of (Prof. B. J. Garnier), *review* by Prof. Gordon Manley, 421
  Diseases of Domestic Animals in (prepared by the Technical Committee of the New Zealand Veterinary Association, Inc.), *review* by Dr. J. N. Oldham, 967
  Science in (edited by F. R. Callaghan), *review*, 1010
New Zealand Association for the Advancement of Science : Science in New Zealand (edited by F. R. Callaghan), *review*, 1010
New Zealand Department of Scientific and Industrial Research : Annual Report (1957-58), 90
New Zealand Gannets : Migration and Dispersal of (Kazimierz Wodzicki and Peter Stein), 1790
New Zealand Snows : Organic Nitrogen in (A. T. Wilson), 318
New Zealand Veterinary Association, Inc. (prepared by the Technical Committee of the) : Diseases of Domestic Animals in New Zealand, *review* by Dr. J. N. Oldham, 967
New-born Infants in Indonesia : Haemoglobin of (Dr. Lie-Injo Luan Eng), 1125
Newbury, N. F. : The Teaching of Chemistry, second edition, *review* by Prof. M. J. S. Dewar, 566
Newell, Dr. : Space Research (Results from Inboard Satellite Instruments), 364 ; (Future of American research under the National Aeronautics and Space Act), 364
Newfoundland : Palaeomagnetism of certain Rocks from (Dr. A. E. M. Nairn, D. V. Frost and B. G. Light), 596
Newley, E. F. : Appointed deputy director of the Weapons Group of the United Kingdom Atomic Energy Authority, 582
Newly Born Mice : Response of, to a Chemical Carcinogen (Giuseppe Pietra, Kathryne Spencer and Prof. Philippe Shubik), 1689
Newly Synthesized Deoxyribonucleic Acid in Dividing Chromosomes : Distribution of (Philip S. Woods and Marie U. Schairer), 303
Newman, Dr. A. C. C. : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1236
Newman, Dr. Henry, and Smith, Marion Edmonds : Triiodothyronine in Acute Alcoholic Intoxication, 689
Newman, M. F. : Appointed assistant lecturer in mathematics at University College of North Staffordshire, 1783
Newman, R. C. : Interfacial Phenomena (Reflexion Electron Diffraction Techniques to study the Deposition of Copper on Silver), 1097
Newman, R. C., and others : Precipitation on a Dislocation, 34
Newman, W. A. C. : Honorary membership of the Institution of Mining and Metallurgy conferred on, 1499
Newt *Triturus taeniatus* : Inhibitory Effect of Colchicine upon the Transplantable Fibroma of the Skin in the (Prof. A. Stolk), 555
Newton, Mrs. Lily : Awarded a research grant by the Leverhulme Trust, 1499
Newton Telescope to be erected at the Royal Greenwich Observatory, Hurstmonceux, 579
Ney, Prof. Edward P. : Cosmic Radiation and the Weather, 451
Ney, Prof. Edward P., and others : Geophysical Effects associated with High-Altitude Explosions, 358
Ney, Prof. Edward P. (Kellogg, Prof. Paul J., and) : A New Theory of the Solar Corona, 1297
Neyman, J. : Two-year grant of 64,900 dollars from the National Science Foundation, to direct a group on randomized cloud-seeding experiment, 1372
Niah Great Caves : 'Bat Erosion' at (Tom Harrisson and Lord Medway), 971
Niblett, G. B. F. : Gas Discharges (Shock Waves from Electrodeless Discharges), 93
Nichol, Dr. Charles A. : Selection of Bacterial Mutants of Increased Sensitivity to 'Aminopterin', 550
Nichols, Prof. J. E. : Hill Farming Research Organization—Report for 1954-58, 727
Nichols, R. (Dudman, W. F., and) : Absence of Gibberellin-like Substances in Filtrates of *Marasmius perniciosus* Stahel (Witch Broom Disease of Cacao), 899
Nicholson, A. J. : Density-Dependent Factors in Ecology, 911
Nicholson, R. B. (Thomas, G., and) : Interfacial Phenomena (Modes of Dislocations Precipitate Interactions), 1099
Nickel (II) : Tetra-co-ordination of—some Complexes with *Cyclo*hexylphosphine (Dr. Aldo Turco, Dr. Vladimiro Scatturin and Dr. Giovanni Giacometti), 601
  Tetrahedral Co-ordination in (Dr. L. I. Katzin), 1672 ; (Prof. E. C. Lingafelter), 1673
Nickel Co., Inc. (International), New York : Transfer of Dr. W. Steven as superintendent of the Development and Research Department of the Mond Nickel Co., Ltd., Birmingham, as director of research in the Development and Research Division of the, 1432
Nicolic, Dr. S. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Nicotinamide : Action of, on Acetoacetate Metabolism of Liver Homogenates of Normal and Alloxanized Rats (S. Eser, S. Tekman and A. Araz), 184
Nicotine : Cotinine, an Oxidation Product of, formed by Rabbit Liver (Howard B. Hucker, James R. Gillette and Bernard B. Brodie), 47
  Inhibition of Sensitiveness to, of Rabbit Aorta by Reserpine, Hexamethonium, Ethyl Flavone-7-Oxyacetate and other Compounds (Dr. I. Setnikar and M. Ravasi), 898
Nidditch, Dr. Peter : Benedict de Spinoza, the Elements of his Philosophy, *review*, 964
Niebuhr, Prof. Reinhold : Education in the Age of Science, 1437
Nielsen, Dr. Sigurd O. (Glahn, Dr. Poul E., and) : Energetic Coupling in the Respiratory Chain, 1578
Nieweg, H. O., and others : Ethylenediamine Tetraacetate and the Intestinal Absorption of Vitamin B_{12}, 1395
Niger (River), as a Barrier in the Spread Eastwards of Haemoglobin C—a Survey of Haemoglobins in the Ibo (Dr. H. Lehmann and Dr. C. Nwokolo), 1587
Nigeria : International Commission on Higher Education in, 1231
  Zoology in—Ecology of Lagos Lagoon (Prof. J. E. Smith), 295
Nigeria's University : The Birth of (Dr. Kenneth Mellanby), *review* by Sir Eric Ashby, 137
Nigerian Cultivated Sorghums : A Chemical Basis for the Classification of Glume Colour in (W. R. Stanton, T. B. Miller and D. L. Curtis), 807
Night : Occurrence of Giant Travelling Ionospheric Disturbances at (L. H. Heisler), 383
Night Sky, in January, 18 ; in February, 294 ; in March, 581 ; in April, 865 ; in May, 1164 ; in June, 1502
Night-Time Reception (Anomalous), of a Major Solar Radio Burst (Prof. Alex. G. Smith, T. D. Carr and W. H. Perkins), 597
Nightingale, —. : Of What Use is Acoustics to the Musician?, 1294
Nikaido, Hiroshi (Fukasawa, Toshio, and) : Formation of 'Protoplasts' in Mutant Strains of *Salmonella* induced by Galactose, 1131
Ninhydrin : Green Fluorescence of Guanidinium Compounds with (Dr. Rex B. Conn, jun., and Dr. Richard B. Davis), 1053
Nininger, Dr. H. H. : Substantial part of his collection of meteorites purchased for the British Museum (Natural History) through a gift of £50,000 from the Nuffield Foundation, 221
Niobium–Zirconium–Thorium–Uranium and Rare-Earth Minerals from the Pegmatites of South Harris, Outer Hebrides (Dr. O. von Knorring and R. Dearnley), 255

Nisonoff, Dr. A., and Woernley, D. L. : Effect of Hydrolysis by Papain on the Combining Sites of an Antibody, 1325
Nitrate Reductase in Higher Plants : Adaptive Synthesis of (Dr. E. J. Hewitt and M. M. R. K. Afridi), 57
Nitrogen (Ammonia) : Assimilation of, by Rumen Bacteria (A. T. Phillipson, Marjorie J. Dobson and T. H. Blackburn), 402
Nitrogen (Organic), in New Zealand Snows (A. T. Wilson), 318
Nitrogen (Pure) : Townsend's First Ionization Coefficient in (Dr. A. E. D. Heylen), 1545
Nitrogen in Proteins : Determination of, by means of Indanetrione Hydrate (Dr. S. Jacobs), 262
N_2^+ Band (3914 A.), in Sunlit Aurorae : Rotational Structure of the (Dr. D. M. Hunten, H. J. Koenig and Prof. A. Vallance Jones), 453
Nitrogen Deficiency : Phosphates and Organic Substances in (International Association for Research on Phosphates Congress on), 513
Nitrogen Fixation (Symbiotic) : Temperature and (D. R. Meyer and A. J. Anderson), 61
Nitrogen-fixing Micro-organism (A New), producing a Red Pigment (Gy. Németh), 1460
Nitrogen-fixing Strain of *Aerobacter aerogenes* : Aerobic Fermentation of Whey by a (Prof. D. B. Johnstone and M. Pfeffer), 992
Nitrophenyl Ester Method : Synthesis of Oxytocin by the (Dr. Miklos Bodanszky and Prof. Vincent du Vigneaud), 1324
Nitrous Acid : Oxidation of Ascorbic Acid and similar Reductones by (Dr. C. A. Bunton and Prof. H. Dahn and Dr. Lotte Loewe), 163
  Production of Bacterial Mutants with (Dr. Fritz Kaudewitz), 1829
Nitrous Oxide : Effect of Thermal Neutron Irradiation on Oxide Catalysts for the Decomposition of (Yasukazu Saito, Yukio Yoneda and Shoji Makishima), 388
Niwa, Makoto, and others : Reduced Activity of Histaminase in Rats sensitized by *Bordetella pertussis*, 755
Njoku, Dr. Eni: Elected president of the Science Association of Nigeria, 1163
  Response of Rice to Small Differences in Length of Day, 1598
  The Role of the Scholar in Society, 1773
No More War (Dr. Linus Pauling), *review* by R. Brightman, 952
Noakes, G. R. : Fundamentals of Optics, *review*, 969
Noble Gases (Cosmogenic), in the Washington County Meteorite (Oliver A. Schaeffer and David E. Fisher), 660
Nocardia opaca : Effect of Substitution in the Side Chain on β-Oxidation of Aryloxy-alkylcarboxylic Acids by (D. M. Webley, R. B. Duff and V. C. Farmer), 748
Nockolds, Dr. S. R. : Elected a Fellow of the Royal Society, 861
Nodulation : Gibberellins and (Prof. A. W. Galston), 545
Nodulation in *Coriaria* : Records of (R. E. R. Grimmett), 223
Nodules formed by the Grain Boundary Reaction of Aluminium–Zinc Alloys : Crystallographic Orientation of (Dr. Ryoji Watanabe and Dr. Shigeyasu Koda), 1667
Nodules (Soybean), bearing Selected Strains of *Rhizobium japonicum* : Responses of Seedlings to Extracts of (Herbert W. Johnson, Ura M. Means and Francis E. Clark), 308
Nodules (Subcutaneous), in Rabbits : Induction of, with the *SE* Polyoma Virus (Dr. Bernice E. Eddy, Sarah E. Stewart, Ruth L. Kirschstein and Ralph D. Young), 766
Noel-Baker, Rt. Hon. Philip : The Arms Race, a Programme for World Disarmament, *review* by R. Brightman, 952
  Obituary of Prof. A. C. Pigou, 1089
Nogueira, A. R., and others : Haemoglobin *N* in Portuguese Guinea, 193
Noise in Industry, 580
Noise Problems : Recent Studies of (Acoustics Group of the Physical Society Symposium on), 438
Noise Theory, *review* by R. A. King, 353
Noise Theory (Random) : Principles and Applications of (Dr. Julius S. Bendat), *review* by R. A. King, 353
Noise and Vibration : New Techniques in the Analysis of (Acoustics Group of the Physical Society and the Institute of Physics Symposium on), 438, 794
Nolan, B., and others : Equilibration of Labelled Magnesium between Sheep Plasma and Red Cells, 1265
Nomenclature of Organic Chemistry, 1957 (International Union of Pure and Applied Chemistry), *review* by Dr. E. H. Rodd, 960
Nomenclature (Generic), of the Intermediate Hosts of *Schistosoma mansoni* (Dr. C. A. Wright), 906
Nomenclature and Classification of the Tea Plant (Dr. W. Wight), 1726
Non-Aqueous Medium : Potentiometric Titration of Coal in a (W. J. S. Pringle), 815
Non-Flagellar Appendages of Bacteria (Dr. Charles C. Brinton, jun.), 782
Non-Fusion : Nuclear Fusion and, in *Theobroma cacao* L. (M. C. Bennett and F. W. Cope), 1540
Non-immunized and Immunized Animals : Factors Inhibiting and Stimulating Growth of *Mycobacteria* in the Blood and Serum of (J. Hubáček and I. Málek), 187
Non-Keratinolytic Fungi : Hair as a Substrate for (Dr. D. M. Griffin), 1281
Non-living Vaccines: Vaccination against Tubercolosis with (Centro per la Vaccinazione Antitubercolare of the Istituto d'Igiene dell'Universita di Pisa International Symposium on), 154, 722
Non-myelinated Nerve Ending : Spatial Summation of Electric Activity in a (Properties of a Receptor Membrane), (Prof. Werner R. Loewenstein), 1724
Non-resistant Seeds (Resistant and) : Anti-microbial Substances from (Dr. Jasper C. Maruzzella and Dr. Martin Freundlich), 972
Non-respiratory Gas released from Seeds during Moistening (Alan H. Haber and Nancy Brassington), 619
Non-Specific Effects (Specific and), of Chemicals on Plants : Separation of (Prof. T. J. Muzik and J. M. Lawrence), 482
Non-Thermal Direct-Current Plasma-heating Mechanism (Daryl Reagan), 102
Non-Uraniferous Soils (Uraniferous and) : Comparative Sensitivity to Radiation of Seeds from a Wild Plant grown on (Dr. D. J. Mewissen, J. Damblon and Prof. Z. M. Bacq), 1449
Nonweiler, T. R. F. : Hypersonic Flow (Aerodynamic Problems of Manned Space Vehicles), 1096
  Awarded the Edward Busk Memorial Prize of the Royal Aeronautical Society, 1648
Nord, F. F. (edited by) : Advances in Enzymology and related Subjects of Biochemistry, Vol. 20, *review* by Dr. Edwin C. Webb, 961
Nordengren, Dr. S. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Norleucine and related Compounds : Effect of, on Growth of the White Rat (M. Rechcigl, jun., H. H. Williams and J. K. Loosli), 1519
Normal Adult Human Haemoglobin : Comparison of, with Haemoglobin I by 'Fingerprinting' (Constituents of Human Haemoglobin), (Makio Murayama and Dr. V. M. Ingram), 1798
Normal Components of Guinea Pig Serum which may cause Antigens to show an Apparent Anti-complementary Effect (M. M. H. Sewell), 1062
Normal Connective Tissue, of Tissue surrounding a Tumour and of Growing Rat Sarcoma : Collagen Content of (Maria Grabowska), 1186
Normal Serum : Neutralization of Bacteriophage by (Andre J. Toussaint and Louis H. Muschel), 1825
Normal Tissues and Neoplasms *in vitro* : Metabolism of (Prof. J. H. Quastel and I. J. Bickis), 281
Normal Urine : Acid Mucopolysaccharides of (Dr. J. F. Heremans, J. P. Vaerman and M. Th. Heremans), 1606
Normal and Alloxanized Rats : Action of Nicotinamide on Acetoacetate Metabolism of Liver Homogenates of (S. Eser, S. Tekman and A. Araz), 184
Normal and Atheromatous Tissue : Liquid Crystals of Lipid in (G. T. Stewart), 871
Normal and Doubly Abnormal Haemoglobins : Formation of, by Recombination of Haemoglobin I with S and C (Constituents of Human Haemoglobin), (Dr. Harvey A. Itano and Elizabeth Robinson), 1799
Normal and Malignant Cells cultivated in Synthetic Media : Glutamine Metabolism of (Arthur E. Pasieka and Dr. Joseph F. Morgan), 1201
Norreys, J. J. (Brown, A., and) : Beta-Polymorphs of Uranium and Thorium Disilicides, 673
Norris, W. T. : Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
North American *Daphnia* : The Systematics of (Dr. John Langdon Brooks), 93
North Wales : Stability of Stone Polygons in (John H. Tallis and Dr. K. A. Kershaw), 485
North-Eastern Tanganyika : Relationship between Salinity and Breeding of *Anopheles gambiae* in (A. Smith and J. W. Vail), 1203
North West Atlantic Fisheries, International Commission for the, and others : International Conference on Fishery Statistics, 1783
Northcote, D. H. : General Biochemistry, *review*, 968
Northern Hemisphere : Observations of the Lithium Lines in the Twilight Airglow in the (Prof. A. Vallance Jones), 1315
Northern Ireland : Physiological Races of *Phytophthora infestans* Mont. (de Bary) in (K. G. Proudfoot), 626
Northmore, J. M. : Iodine and Copper Uptake by Soil Organic Matter, 1309
Northwestern Canada : Late Tertiary Geomagnetic Field in (P. M. Du Bois), 1617
Norway : A Marine Transgression of Boreal Age in the Southernmost Part of (Gunnar Gabrielsen), 1616
Norway (Western) : Pogonophora in the Hardangerfjord (Prof. Hans Brattström), 1458
Notation : A Proposed International Chemical (prepared by the Commission on Codification, Ciphering and Punched Card Techniques of the International Union of Pure and Applied Chemistry), tentative version subject to revision, *review* by Dr. E. H. Rodd, 960
Notched Specimens : Improvement of the Fatigue Strength of, by Artificially Induced Residual Stresses (T. R. Gurney), 883
Nowinski, Prof. Wiktor, W., and Mahaffey, William C. : Oxidative Phosphorylation in the Chick Embryo, 45
Nowosielski-Slepowron, B. : Ptaki Ziem Polskich (The Birds of Poland), *review*, 73
Nuclear Bombing and the Life of Man : The Devil's Repertoire or (Victor Gollancz), *review* by R. Brightman, 952
Nuclear Disarmament, 1351
  The Vienna Declaration and, 1303
Nuclear Energy : Congress on (Italian National Committee for Nuclear Research), 1094
  International Courses on (European Nuclear Energy Agency of the Organization for European Economic Co-operation), 1163
  On—its Potential for Peacetime Uses (Dr. Donald J. Hughes), *review* by Prof. G. O. Jones, 1077
  Industrial Prospects in (European Nuclear Energy Agency of the Organization for European Economic Co-operation Conference on), 652, 1094
  Progress in, Series I, Physics and Mathematics, Vol. 2 (edited by D. J. Hughes, J. E. Sanders and J. Horowtiz), *review* by Dr. J. Walker, 422
Nuclear Energy for the European Mode of Life : Consequences of the Use of (Council for Europe Competition for a thesis on), 509
Nuclear Energy Agency (European) of the Organization for European Economic Co-operation : Third International project for the Development of Nuclear Power for Peaceful Purposes on a European Basis, 507
  European Conference for Industrial Management (Industrial Prospects in Nuclear Energy), 652, 1094
Nuclear Energy Agency (European) of the Organization for European Economic Co-operation, and the Danish Atomic Energy Commission : Symposium on the Scientific and Technical Aspects of Health Physics in Atomic Installations, 934
Nuclear Energy Conference, British (Institute of Physics, in collaboration with the) : Symposium on Nuclear Fuel Cycles, 1646
Nuclear Energy Project : New European, 507
Nuclear Engineering Monographs, *review* by R. Vaux, 1149
Nuclear Explosions (High-Altitude) : Geophysical Effects of (T. Obayashi, S. C. Coroniti and E. T. Pierce), 1476
Nuclear Fuel Cycles (Institute of Physics, in collaboration with the British Nuclear Energy Conference Symposium on), 1646
Nuclear Fuel Elements : Commercial Manufacture of, 1232
Nuclear Fusion and Non-Fusion in *Theobroma cacao* L. (M. C. Bennett and F. W. Cope), 1540
Nuclear Generator, *SNAP III* : The American Miniature (W. S. Eastwood, L. B. Mullett and J. L. Putman), 643
Nuclear Magnetic Resonance (H. S. Gutowsky, and seventeen other authors), *review* by R. E. Richards, 969
  Molecular Motion of Enclathrated Compounds as studied by (Dr. D. F. R. Gilson and Prof. C. A. McDowell), 1183
Nuclear Magnetic Resonance in Rolled Copper Sheet (E. A. Faulkner), 1043
Nuclear Magnetic Resonance Spectra of Solids : Removal of Dipolar Broadening of, by Specimen Rotation (Prof. E. R. Andrew, A. Bradbury and R. G. Eades), 1802

Nuclear Origin of Ribonucleic Acid (M. Zalokar), 1330
Nuclear Physics (Physical Society Conference on), 794
  Concepts of, *review* by Prof. B. H. Flowers, 492
  Elementary (W. K. Mansfield), *review* by R. Vaux, 1149
Nuclear Power Industry : Safety and the (House of Commons Debate on), 292
Nuclear Power Plant : Steam Cycles for (W. H. Wootton), *review* by R. Vaux, 1149
Nuclear Power Station : The Chapelcross, 649 ; (J. C. C. Stewart), 1361
Nuclear Power Station on the Lleyn Peninsula, 222
Nuclear Quadrupole Resonance Spectroscopy (T. P. Das and E. L. Hahn), *review* by Dr. R. H. Tredgold, 1078
Nuclear Reactor Control and Instrumentation (J. H. Bowen and E. F. O. Masters), *review* by R. Vaux, 1149
Nuclear Reactor Metallurgy (Walter D. Wilkinson and William F. Murphy), *review* by Prof. A. H. Cottrell, 1628
Nuclear Reactor Shielding (J. R. Harrison), *review* by R. Vaux, 1149
Nuclear Reactor Theory (J. J. Syrett), *review* by R. Vaux, 1149
Nuclear Reactors on a Commercial Basis, 436
Nuclear Research : Glass in, 292
Nuclear Research, European Organization for : Annual Report for 1957, 21
Nuclear Research, Italian National Committee for : Congress on Nuclear Energy, '1094
Nuclear Research Centre, Grenoble, 858
Nuclear Research Centre at Ispra : Italian, 1232
Nuclear Scattering (K. B. Mather and Dr. P. Swan), *review*, 639
Nuclear Science and Technology at the Royal Naval College, Greenwich, 791
Nuclear Structure (Queen's University, Kingston, Ontario, and Atomic Energy of Canada, Ltd., International Conference on), 1571
Nuclear Structure (Dr. Leonard Eisenbud and Prof. Eugene P. Wigner), *review* by Prof. B. H. Flowers, 492
  Proceedings of the Rehovoth Conference on, held at the Weizmann Institute of Science, Rehovoth, 1957, under the auspices of the International Union of Pure and Applied Physics (edited by Dr. H. J. Lipkin), *review* by Prof. B. H. Flowers, 709
Nuclear Technology at the Imperial College of Science and Technology, 1091
Nuclear Training in the Biological Sciences in the United States, 1091
Nuclear Warfare : Common Sense and (Bertrand Russell), 1351
Nuclei: Size Relationship of Oocytes and their, in Two Species of Ascidians (S. R. Venkatasubba Rao), 1454
Nuclei (Atmospheric Ice) : Volcanoes as a Source of (K. Isono, M. Komabayasi and A. Ono), 317
Nuclei (Cell-), in the Adrenal Medulla : Deoxyribonucleic Acid Content of the, after Exposure to Low Temperatures (L. Leeman), 1188
Nuclei (Isolated), of Rabbit Appendix: Effects of X- and Ultra-Violet Irradiation on the Incorporation of Phosphorus-32 into (Yuong-Tchel Tchoe and Prof. A. Sibatani), 1334
Nucleic Acid from Tobacco Mosaic Virus : Photoreactivation of (F. C. Bawden and A. Kleczkowski), 503
Nucleic Acid Synthesis in Coleoptile Tissues : Relationship between Auxins and (B. B. Biswas and S. P. Sen), 1824
Nucleic Acids and their Derivatives: Bromination of (A. S. Jones and D. L. Woodhouse), 1603
Nucleoli in Oocytes of *Patella coerulea* : Ultrastructure of (A. Bolognari), 1136
Nucleolus of Mammalian Cells : Two Types of Ribonucleoprotein in the (Dr. Robert Love and Dr. T. P. Bharadwaj), 1453
Nucleoside Triphosphates : Are, Precursors of Mammalian Ribonucleic Acid *in vivo* ? (Prof. Paul Mandel, Jacques-David Weill, Marc Ledig and Suzanne Busch), 1114
Nucleotidases (Diphosphopyridine) : Mechanism of Action of (Prof. Spyridon G. A. Alivisatos), 1034
Nucleotide (Dihydrodiphosphopyridine) : Structure of (Sidney Shifrin and Dr. Nathan O. Kaplan), 1529
Nucleotide (Diphosphopyridine) : Effect of Reduced, on the Swelling of Isolated Mitochondria (Dr. G. Di Sabato), 997
Nucleotide (Diphosphopyridine)–Neotetrazolium Reductase : Reduced (Dr. T. F. Slater), 1679
Nucleotide Levels (Pyridine), of Mouse Liver : Effect of Azaserine (*o*-Diazoacetyl-L-serine) on the (Stuart A. Narrod, Thomas A. Langan, jun., Prof. Nathan O. Kaplan and Abraham Goldin), 1674
Nucleotide Metabolism in Cardiac Activity (Dr. Philip A. Khairallah), 181
Nucleus, The, an International Journal of Cytology and allied topics, Vol. I, No. 1 (University of Calcutta), 366
Nuclides : Sullivan's Trilinear Chart of (Replacement sheets for), (United States Atomic Energy Commission), 1719
Nuffield Collection of Meteorites at the British Museum (Natural History), 221
Nuffield Foundation : Thirteenth Annual Report (1957-58), 19
  Television and the Child (Dr. Hilde T. Himmelweit, A. N. Oppenheim and Pamela Vince), *review*, 780
  Grant of £12,000 to the University of Birmingham, towards the cost of an investigation to be carried out in the Research Department of the Institute of Education into the placing, counselling and teaching of part-time students in a local technical college, 1571
Nuffield Foundation (Royal Society and) : Fifth Annual Report on the Commonwealth Bursaries Scheme, 1304
Nuffield—Witwatersrand University Expeditions to Kalahari Bushmen, 1958-59 (Prof. P. V. Tobias), 1011
Number of Epidermal Cells in Petioles of Strawberry : Effect of Gibberellic Acid on Length and (C. G. Guttridge and P. A. Thompson), 197
Number of Fibres in the Optic Nerve and the Number of Ganglion Cells in the Retina of Anurans (Dr. H. R. Maturana), 1406
Number of Ganglion Cells in the Retina of Anurans : Number of Fibres in the Optic Nerve and the (Dr. H. R. Maturana), 1406
Number of Vertebrae in Fish : Influence of Temperature on the (Dr. Yasuo Itazawa), 1408
Number (Reynolds), at the Transition from Streamline to Turbulent Flow: Variations in the Value of (Dr. P. J. Isaac, I. B. Williams and Dr. W. M. Jones), 531
Nursall, Dr. J. R. : Oxygen as a Prerequisite to the Origin of the Metazoa, 1170
Nutmegs : Bamboos and, 1169
Nutrient for Micro-organisms : Allyl Alcohol as a (H. L. Jensen), 903
Nutrition Society : Election of Officers, 1643
  Symposium on Function of the Rumen, 1644
Nutrition Society (Scottish Group) : Symposium on Obesity, 582
Nutrition (Human) : Legumes in Agriculture and (Food and Agriculture Organization of the United Nations and the Commission for Technical Co-operation in Africa South of the Sahara Technical Meeting on), 439
Nutrition (Mineral), and Age of Plants : Amino-Acid Composition of the Proteins of Barley Leaves in relation to the (Dr. B. P. Pleshkov and Dr. L. Fowden), 1445
Nutrition, Food and Beverage Technology and Distribution, 1936-56 : Bibliography of Food—a Select International Bibliography of (E. Alan Baker and D. J. Foskett), *review* by Dr. Magnus Pyke, 351, 582
Nutritional Biochemicals Corporation : New Catalogue, 934
Nutritive Spheres in the *Proteus* Group of *Amoebae* : Utilization of (Sister Monica Taylor), 1458
Nutting, Dr. J. : Precipitation in Alloys, 796
  Interfacial Phenomena, 1097
Nwokolo, Dr. C. (Lehmann, Dr. H., and) : The River Niger as a Barrier in the Spread Eastwards of Haemoglobin C—a Survey of Haemoglobins in the Ibo, 1587
Nyctanthes arbor-tristis : Regulation of Morphogenesis in an Oleaceous Tree (Subodh Kumar Roy), 1410
Nye, Dr. J. F. : Characteristics of the Antarctic Ice-Sheet, 1576
Nyholm, Prof. R. S. (Fergusson, J. E., and) : New Oxidation States of Technetium, 1039
Nyholm, Prof. R. S. (Larkworthy, L. F., and) : Model Oxygen-carrying Compounds and the Iron-*bis*-Indigo Complex, 1377
Nylen, Marie U. (Scott, Dr. David B., and) : Improved Preservation of Tendon for Electron Microscopy through Wet Freeze-drying, 1205
Nylon Capillary Columns for use in Gas–Liquid Chromatography (R. P. W. Scott), 1753
Nystagmus (Barbiturate), and the Mechanisms of Visual Fixation (C. Rashbass), 897
Nystagmus (Dissociated), in the Rabbit (Dr. J. Lachmann and Prof. F. Bergmann), 1065

OAK Ridge National Laboratory : Conference on Ion Exchange, 1719
Oakley, Dr. Kenneth P., and Muir-Wood, Helen M. : The Succession of Life through Geological Time, third edition, *review*, 73
Obayashi, T., and others : Geophysical Effects of High-Altitude Nuclear Explosions, 1476
Obesity (Scottish Group of the Nutrition Society Symposium on), 582
O'Brien, Prof. R. D. : Activation of Thionophosphates by Liver Microsomes, 121
O'Brien, R. T., and George, II., L. A. : Preparation of Autoradiograms for Electron Microscopy, 1461
Observation (Gas–Chromatographic), of the Reduction of Carbon Dioxide to Methane during Anaerobic Digestion (J. Chmielowski and Peter C. G. Isaac), 1120
Observation and Interpretation—Proceedings of the Ninth Symposium of the Colston Research Society held in the University of Bristol, 1957 (edited by Prof. S. Körner in collaboration with Prof. M. H. L. Pryce), *review* by Dr. E. F. Caldin, 1010
Observations by Electron Microscopy on the Structure of an Acephaline Gregarine (*Apolocystis elongata*, Phillips and MacKinnon), (Dr. D. Lacy and H. B. Miles), 1456
Observations of Intense Ionization of Long Duration below 50 km. Altitude after some Strong Solar Flares (Dr. Bengt Hultqvist and Johannes Ortner), 1179
Observations of the Lithium Lines in the Twilight Airglow in the Northern Hemisphere (Prof. A. Vallance Jones), 1315
Observations on Weddell Seals : Carbon Monoxide Content of the Blood and other (Dr. L. G. C. E. Pugh), 74
Observations (Electron Microscope), on the Neurohypophysis of the Ferret (Dr. R. L. Holmes and F. G. W. Knowles), 1745
Observations (Electron Microscopic), on a Fibrous Component in Amyloid of Diverse Origins (Dr. Alan S. Cohen and Dr. Evan Calkins), 1202
Observations (Maser), in Radio Astronomy (L. E. Alsop, J. A. Giordmaine, C. H. Mayer and C. H. Townes), 223
Observer's Book of Sea Fishes (A. Laurence Wells), *review* by Dr. D. P. Wilson, 140
Obstruction (Acute Biliary) : Determination of Transaminase Activity in Dogs' Serum and Lymph after Hepatic Damage due to (Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 48
Occult Viruses, *review* by Dr. Kenneth M. Smith, 71
Occupational Hygiene Society, British : Conference on the Control of Dust and Fumes in Industry, 865
Occurrence of 'Ester-like' Linkages in Collagen (Paul M. Gallop, Prof. Sam Seifter and Edward Meilman), 1659
Occurrence of Giant Travelling Ionospheric Disturbances at Night (L. H. Heisler), 383
Occurrence of *Pyrosoma* on the Sea-Floor 160 Metres Deep (Dr. D. E. Hurley and D. G. McKnight), 554
Occurrence of D-Serine in Lombricine (Biochemistry of Lombricine), (Iva M. Beatty, Dr. D. I. Magrath and Prof. A. H. Ennor), 591
Occurrence of Two Characteristic Wealden Ferns in the Jabalpur Series (Dr. M. N. Bose and Sukh Dev), 130
Occurrence (Simultaneous), of Sub-Visual Aurorae and Radio Noise Bursts on 4·6 kc./s. (R. A. Duncan and G. R. Ellis), 1618
Ocean Floor : Measurement of Horizontal Displacement along Faults in the (Dr. Victor Vacquier), 452
Oceanographic Congress : International (American Association for the Advancement of Science, in co-operation with Unesco and the International Council of Scientific Unions), 1093, 1502
Oceanographic Council, National : Annual Report for 1957-58, 1305
Océanographique (Institut), Monaca : Annales, Nouvelle Série, Tome 36, Fasc. 4, Résultats scientifiques des Campagnes du Bathyscaphe *F.N.R.S.* III, 1954-57, 1651
Oceanography : Grants for research in Marine Biology or (Challenger Society), 1368
Oceanography, National Institute of : Microseismic Research at the (Dr. H. M. Iyer and B. J. Hinde), 1558
Oceans : Water Circulation in (V. G. Bogorov and E. M. Kreps), 437
Ochotona roylei Ogilby : Re-ingestion in *Lepus capensis* L. and (C. H. Tyndale-Biscoe), 471

O'Connell, D. J. K. : The Green Flash and other Low Sun Phenomena, *review* by James Paton, 423
O'Connor, Cecilia M. (edited by Wolstenholme, Dr. G. E. W., and) : Ciba Foundation Colloquia on Ageing, Vol. 4, Water and Electrolyte Metabolism in relation to Age and Sex, *review* by Prof. P. L. Krohn, 777
  Ciba Foundation Symposium on the Neurological Basis of Behaviour (in commemoration of Sir Charles Sherrington, 1857-1952), *review* by Dr. P. B. Bradley, 954
Octacarbonyl (Dicobalt), at Elevated Temperature and Carbon Monoxide Pressure : Behaviour of (Sol Metlin, Irving Wender and Heinz W. Sternberg), 457
Octopus : Lumi- and Meta-Rhodopsins of Squid and (Action of Light on Visual Pigments), (Dr. Allen Kropf, Paul K. Brown and Dr. Ruth Hubbard), 466
O'Donald, P. : Possibility of Assortive Mating in the Arctic Skua, 1210
O'Donoghue, Prof. Chas. H. : *Obituary* of Prof. F. J. Cole, 788
O'Donovan, Dr. D. G., and others : Carotene Content of *Ulex europaeus* (Common Furze), 1680
Œstrogen Titre in Stored Urine : Changes in (Y. A. Leon, R. D. Bulbrook and F. C. Greenwood), 189
Œstrogens (Human Urinary) : A Simplified Physico-chemical Method for Determination of (Dr. Tawfik El-Attar), 1607
Œstrous Cycle, Gestation Period and Parturition in the Marsupial *Trichosurus vulpecula* (Dr. A. G. Lyne, Phyllis E. Pilton and G. B. Sharman), 622
Office Chairs and Tables : Anatomical, Physiological and Anthropometric Principles in the Design of (Dr. W. F. Floyd and Dr. D. F. Roberts), 1022
Ogston, Dr. A. G. : Appointed to the chair of physical biochemistry in the Australian National University, 151 ; work of, 151
Oguchi, Takashi, and Kodama, Masahiro : Difference between Cosmic-Ray Equator and the Geomagnetic Dip Equator, 103
O'Hagan, Dr. J. E. : The Iron–Protein Link in Haemoglobin and Myoglobin, 393
Ohio Agricultural Experiment Station : Proceedings of the Conference on Trace Elements, 1957 (edited by C. A. Lamb, O. G. Bentley and J. M. Beattie), *review* by Dr. E. J. Hewitt, 1009
Ohio State University: Symposium on Molecular Structure and Spectroscopy, 722
Oil and Colour Chemists' Association : Eleventh Technical Exhibition, 438
  Conference on a Survey of Polymers, 652
Oil and Gas from Coal : Chemicals, (Ministry of Power to set up a Committee on), 1162
Oil (Dietary Cod-liver), and some Fractions of Cod-liver Oil : Influence of, on Serum Cholesterol-level of Rats (A. P. de Groot and S. A. Reed), 1191
Okunuki, Prof. Kazuo, and others : Peroxidases from Wheat Germ, 111
Okyar, Osman : The Role of the Scholar in Society, 1773
Olcott, H. S., and Kuta, E. J. : Basic Substances as Synergists for Fat Antioxidants, 1812
Old Darkness : New Light on, *review* by Prof. R. J. Pumphrey, 1554
Old and New Solutions to the Eel Problem (Prof. Umberto D'Ancona), 1405 ; (Dr. Denys W. Tucker), 1406
Old Red Sandstone and Silurian Limestones of Monmouth : Heavy Minerals in certain (C. B. Crampton), 485
Old-time Beekeeping : Exhibition of (Museum of English Rural Life, Reading), 1782
Oldham, Dr. J. N. : Diseases of Domestic Animals in New Zealand, *review*, 967
Oldham, K. G., and others : Glutamic–Aspartic Transaminase of Pig Heart Muscle, 1187
Oleaceous Tree, *Nyctanthes arbor-tristis* : Regulation of Morphogenesis in an (Subodh Kumar Roy), 1410
O'Leary, U., and others : Carotene Content of *Ulex europaeus* (Common Furze), 1680
Oleophobic Monolayers : Electron Microscopy of (Robert T. Mathieson), 1803
Olesen, P. E., and Szabo, L. : Crystallization of Gramicidin, 749
Olitzki, Prof. A. L., and others : Immunizing Properties of Insoluble Cell Material derived from *Brucella*, 1693
Olivine-Spinel Transformation (R. H. Wentorf, jun.), 1617
Olson, Edwin A., and others : Radiocarbon Measurements on Samples of Known Age, 1582
Olson, Dr. Harry F. : Elected a member of the United States National Academy of Sciences, 1575
Olson, Jr., Prof. Joseph C., and others : Dairy Microbiology, *review* by Dr. C. A. E. Briggs, 637
Oluwassanmi, Dr. H. A. : The Role of the Scholar in Society, 1773
Olwin, John H., and others : Arginine Esterase Activity of 'Blood Thromboplastin', 753
Omardeen, T. A. : Resistance of *Anopheles aquasalis* Curry to Dieldrin in Trinidad, 131
100 Years of Synthetic Dyestuffs : Perkin Centenary, London—*review* by R. Brightman, 709
Ono, A., and others : Volcanoes as a Source of Atmospheric Ice Nuclei, 317
Ono, Hideo, and Dazai, Michio : Unfermentable Sugars in Barley Mash fermented by the Amylo Process, 1055
Ono, Joji (Suzuki, Kenshi, and) : Biochemical Heterogeneity of the Ribonucleic Acid synthesized by *Escherichia coli B* after Irradiation with Ultra-Violet Light, 395
Onset of Human Labour : Recovery of Injected Progesterone and its relation to the (Prof. Lars Ph. Bengtsson), 405
Onyon, Dr. P. F. : Characterization of Molecular Weight Distributions by a Viscometric Method, 1670
Onyon, Dr. P. F., and others : The Kinetics of Vinyl Polymerization by Radical Mechanisms, *review* by Prof. C. E. H. Bawn, 637
Oocyte (Primary), in the Rabbit : Content of Deoxyribonucleic Acid of the Germinal Vesicle of the (D. Van de Kerckhove), 329
Oocytes and their Nuclei : Size Relationship of, in Two Species of Ascidians (S. R. Venkatasubba Rao), 1454
Oocytes of *Patella coerulea* : Ultrastructure of Nucleoli in (A. Bolognari), 1136
Oort, Prof. J. H. : Elected a Foreign Member of the Royal Society, 1230, 1499 ; work of, 1499
Oort, Prof. J. H., and others : Report on the Progress of Astronomy, 1308
Oospore Germination in *Albugo candida* (T. C. Vanterpool), 1718
Opacity in the Electron Microscope : Chlorination of Proteins as a Method of Increasing their (Dr. M. M. Coombs and Prof. J. F. Danielli), 1257
Operational Research : Second International Conference on (International Federation of Operational Research Societies), 934
Operational Research in Practice—Report of a NATO Conference (edited by Max Davies and Michel Verhulst), *review* by Dr. Cecil Gordon, 424
Operational Research Societies, International Federation of : Creation of the, 17
  Second International Conference on Operational Research, 934
Operational Research Society : Appointment of G. M. Heselton as secretary, 794
  1959 Conference, 1164
Ophiobolus graminis var. *avenae* and *Aspergillus niger* : Inhibition of Growth and Respiration of, by Cystine (Elizabeth M. C. Turner), 1130
Öpik, A. A. : Genal Caeca of Agnostids, 1750
Oppenheim, A. N., and others : Television and the Child, *review*, 780
Opportunities for Women in Engineering : Training and (Women's Engineering Society), 161
Optic Nerve : Number of Fibres in the, and the Number of Ganglion Cells in the Retina of Anurans (Dr. H. R. Maturana), 1406
Optical Radiation : Modern Systems for Detecting and Evaluating (International Commission for Optics Symposium on), 1571
Optical Rotation and Configuration of Poly-L-tyrosine (A. R. Downie, Dr. A. Elliott and W. E. Hanby), 110
Optically Active Fluorite Films (Niels O. Young and Jakym Kowal), 104
Optics : Fundamentals of (Prof. Francis A. Jenkins and Prof. Harvey E. White), third edition, *review* by G. R. Noakes, 969
Optics, International Commission for : Symposium on Modern Systems for Detecting and Evaluating Optical Radiation, 1571
Oral Administration : Presence of Griseofulvin in Hair of Guinea Pigs after (J. C. Gentles, M. J. Barnes and K. H. Fantes), 256
Oral Induction of Leukaemia in Mice (Bill P. Maduros, Wilma A. Spurrier and Dr. Steven O. Schwartz), 1816
Orally Administered Vitamin B_{12} : Effect of D-Sorbitol on the Absorption of (Dr. J. N. Marshall Chalmers and N. K. Shinton), 120
Orbital Acceleration of Artificial Satellites : Two Atmospheric Effects in the (Dr. Luigi G. Jacchia), 526
Orbits (Artificial Satellite) : Density of the Atmosphere at Heights between 200 km. and 400 km., from Analysis of (D. G. King-Hele), 1224
Orbits (Satellite) : Changes in the Inclination of, to the Equator (R. H. Merson, D. G. King-Hele and R. N. A. Plimmer), 239
  A New Value for the Earth's Flattening, derived from Measurements of (D. G. King-Hele and R. H. Merson), 881
Orcein Derivative of Elastin : Spectrophotometric Investigation on the (V. Scarselli), 1739
Orchin, M. (Kirch, L., and) : Co-ordination Chemistry (Experimental Work on the Oxo-Reaction), 1785
Order of the Dannebrog : Appointment of Prof. J. M. Yoffey as a Knight first class of the, 154
Orenstein, Dr. A. J. : Awarded the Gold Medal for 1958 of the Institution of Mining and Metallurgy, 1499
Organ Activation by Stress : Target (Prof. Jenö Kramár, Harry H. McCarthy, Margarete Simay-Kramár and Anthony J. Carnazzo), 1522
Organic Carbon : Role of Poly-β-Hydroxybutyric Acid in the Assimilation of, by Bacteria (Prof. M. Doudoroff and Prof. R. Y. Stanier), 1440
Organic Chemistry at Birmingham, 791
Organic Chemistry at Perth, Australia, 578
Organic Chemistry : An Introduction to Electronic Theories or (G. I. Brown), *review* by Dr. R. I. Reed, 279
  Electronic Theories of (John William Baker), *review* by Dr. R. I. Reed, 777
  Names and Ciphers in, *review* by Dr. E. H. Rodd, 960
  Nomenclature of, 1957 (International Union of Pure and Applied Chemistry), *review* by Dr. E. H. Rodd, 960
  Recent Progress in (International Symposium on, Mexico), 294
  Theoretical Principles of (Prof. Walter Hückel), Vol. 2, translated from the corrected seventh German edition by Prof. F. H. Rathmann, *review* by Dr. P. B. D. de la Mare, 852
Organic Fluorine Chemistry, *review* by Prof. R. N. Haszeldine, 139
Organic Hydroxy Acids and Germanic Acid : Interaction between, in Aqueous Solution (E. R. Clark), 536
Organic Matter (Soil) : Iodine and Copper Uptake by (J. M. Northmore), 1309
Organic Nitrogen in New Zealand Snows (A. T. Wilson), 318
Organic Substances in Nitrogen Deficiency : Phosphates and (International Association for Research on Phosphates Congress on), 513
Organisation (Central), for Defence (White Paper on), 1483
Organisms (Living) : The Evolution of (Royal Society of Victoria Symposium on), 86
Organization for European Economic Co-operation (European Nuclear Energy Agency) : Third International Project for the Development of Nuclear Power for Peaceful Purposes on a European Basis, 507
  European Conference for Industrial Management (Industrial Prospects in Nuclear Energy), 652, 1094
  Conference on Industrial Prospects in Nuclear Energy, 652, 1094
  International Courses on Nuclear Energy, 1163
Organization for European Economic Co-operation (European Nuclear Energy Agency), and the Danish Atomic Energy Commission : Symposium on the Scientific and Technical Aspects of Health Physics in Atomic Installations, 934
Organization (Submicroscopic), of Post-synaptic Membranes (Dr. B. Csillik), 1684
Organo-Mercurial Fungicides : Inactivation of, in Groundwood Pulp made from Logs stored in Salt Water, and the Possible Role of Sulphur Compounds (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Organs (Mammalian) : Juvenile Hormone in Thymus, Human Placenta and other (Prof. Carroll M. Williams, Lynn V. Moorhead and Jean F. Pulis), 405
Organs (Reproductive), of *Hyla aurea* : Histolytic Activity in Seasonal Hypertrophy of the (Prof. L. R. Richardson), 480
Orgen, Dr. L. E. : Co-ordination Chemistry, 1784
Oriental Subjects : Incidence of the Erythrocytic Defect associated with Drug-Sensitivity among (Dr. Ernest Beutler, Mary K. Y. Yeh and Thomas Necheles), 684

Orientation (Acoustic), of Bats and Men : Listening in the Dark, the (Prof. Donald R. Griffin), *review* by Prof. R. J. Pumphrey, 1554
Orientation (Molecular), at the Surface of *Amoebae* during Pinocytosis (Ronald C. Rustad), 1058
Orientation (Crystallographic), of Nodules formed by the Grain Boundary Reaction of Aluminium–Zinc Alloys (Dr. Ryoji Watanabe and Dr. Shigeyasu Koda), 1667
Origin of Cancer : Papers presented at the Conference on the Genetic Concept for the (Annals of the New York Academy of Sciences, Vol. 71), 1234
Origin of *Homo sapiens* : The Fontéchevade Skulls and the (Dr. J. C. Trevor), 1369
Origin of Indirect Flight Muscles in Primitive Flies (Dr. H. E. Hinton), 557
Origin of Libyan Desert Silica-Glass (Dr. Alvin J. Cohen), 1548
Origin of the Lunar Craters and Maria (Prof. Zdenek Kopal), 169, 737 ; (Dr. William G. van Dorn), 737
Origin of the Metazoa : Oxygen as a Prerequisite to the (Dr. J. R. Nursall), 1170
Origin of the Radiation near the Earth discovered by means of Satellites (Prof. T. Gold), 355
Origin of Sodium and Lithium in the Upper Atmosphere (Dr. T. M. Donahue), 1480
Origin of Species : The (Scottish Branch of the British Sociological Association Conference on Darwinism and the Study of Society, to mark the Centenary of), 1562
Origin of Upper-Atmosphere Lithium Atoms responsible for the New Twilight Airglow at 6708 A. (D. R. Barber), 384
Origin (Biological), of Manganese-rich Deposits of the Sea Floor (John W. Graham and Susan C. Cooper), 1050
Origin (Nuclear), of Ribonucleic Acid (M. Zalokar), 1330
Original Research and its Encouragement, 563
Orioli, P. (Ferroni, E., and) : Co-ordination Chemistry (X-Ray Determination of the Structure of a Complex formed by Azobenzene and Arsenic Trichloride), 1784
Ornithology, British Trust for : *Bird Migration*, Vol. 1, No. 1, 436
O'Rourke, Prof. Fergus J. : Serological Relationships in the Genus *Gadus*, 1192
Orr, R. H., and others : Thickness of the Earth's Crust in Antarctica, 306
Orr, R. H. (Hatherton, Dr. T., and) : Microseisms at Scott Base, 1760
Orthoptera : Hair Plates on the First Cervical Sclerites of the (Hair Receptors in Locusts), (Dr. L. J. Goodman), 1106
Ortner, Johannes (Hultqvist, Dr. Bengt, and) : Observations of Intense Ionization of Long Duration below 50 km. Altitude after some Strong Solar Flares, 1179
Oryza sativa (var. *indica*) : Second Flowering in (Subodh Kumar Roy), 1458
Osawa, Syozo (Kondo, Nobuko, and) : Differences in Chromatographic Patterns of Deoxyribonucleic Acid from various Tissues, 1602
Osborne, Daphne J. : Control of Leaf Senescence by Auxins, 1459
  Identity of the Abscission-accelerating Substance in Senescent Leaves, 1593
Osgood, Dr. Thomas H. : Appointed Science Officer in the American Embassy in London, 15
Oskam, H. J., and Koelman, A. : Application of Logarithms to the Base 2 in the Use of Exponential Dilution Series for the Study of Antibiotic Combinations, 840
Osmer, John, and others : Anti-Thyroid Action of β-Aminoethyl*iso*thiouronium Dibromide in Rats, 470
Osmium and Cobalt in Dietary Necrotic Liver Degeneration : Ineffectiveness of Molybdenum, (Dr. Klaus Schwartz, Edward E. Roginski and Calvin M. Foltz), 472
Osmotic Lysis : Spermine as a Protective Agent against (J. Mager), 1827
Osmotic Measurements : Cellulose Acetate Membranes suitable for (M. F. Vaughan), 43
Osmotic Pressure (Colloid), of Rheumatoid Synovial Fluid (Paavo Mäkinen and Eino Kulonen), 475
Osteoblastic and Mitochondrial Population of Ageing Periosteum : Changes in the (Dr. E. A. Tonna and Dr. N. Pillsbury), 337
Ostertagia spp. : *In vitro* Cultivation of the Histotrophic Stages of *Haemonchus contortus* and (Dr. Paul H. Silverman), 197
Ostertagia lyrata Sjöberg, 1926, and *Trichostrongylus longispicularis* Gordon, 1933, in British Cattle : The Nematodes (Dr. J. H. Rose), 1745
Oswald, W., and others : Nuclear Fuel Cycles (Choice of Fuel Cycle for Nuclear Power Stations), 1647
Ottewill, Dr. R. H. : Electrical Double Layer in Colloid Science (Electroviscous Effect), 79
Ouabain : Effect of, on Sodium Flux in Human Red Cells (Thomas J. Gill and Prof. A. K. Solomon), 1127
Outer Hebrides (South Harris) : Niobium–Zirconium–Thorium–Uranium and Rare-Earth Minerals from the Pegmatites of (Dr. O. von Knorring and R. Dearnley), 255
Outer Space : Peaceful Uses of (United Nations Committee to study the question of international co-operation in the), 649
Outgrowths (Some Unusual), from Secondary Follicles in Soay Sheep (Dr. M. L. Ryder), 1831
Output (Cardiac), in Cattle (Edward W. Fisher and Rodger G. Dalton), 829
Output (The Work), of Animals—Flight by Birds and by Man-power (Dr. D. R. Wilkie), 1515
Ovalbumin : Biosynthesis of (Prof. D. V. Siva Sankar and Henry W. Theis), 1057
Ovarial Teratomas in Viviparous Toothcarps by Pathological Parthenogenesis : Development of (Prof. A. Stolk), 763
Ovariectomy and Steroid Administration : Succinic Dehydrogenase Activity in Brain Tissue of Rats after (H. Sobel and B. Eckstein), 54
Ovary : Influence of the Anterior Pituitary on the Ageing Process in the (Dr. E. C. Jones and Prof. P. L. Krohn), 1155
Overbeek, Prof. J. Th. G., and van Geelen, Dr. B.: Electrical Double Layer in Colloid Science (Electrophoresis and Electrical Transport in Solutions of Polymethacrylic Acid), 78
Overend, Prof. W. G. : *Obituary* of Prof. W. Wardlaw, 505
Over-oxidation with Periodate : Determination of Molecular Weights of Polysaccharides by (F. W. Parrish and Dr. W. J. Whelan), 991
Overseas : British Books and Information Services, 1417
Overseas Geological Surveys : Quarterly Bulletin (*Colonial Geology and Mineral Resources*) renamed *Overseas Geology and Mineral Resources*, 581
  Retirement of Dr. Frank Dixey from the directorship, 1230
  Appointment of Dr. S. H. Shaw as director, 1230
Overseas Geology and Mineral Resources : New title of the quarterly bulletin (*Colonial Geology and Mineral Resources*) of the Overseas Geological Surveys, 581
Overseas Information Services, 1417
Overseas Surveys, Directorate of : Gambia Land Use Map, Sheet 12/1, Janneh Kunda; Gambia Land Use Map, Sheet 14/11, Mansa Konko, 20
Overton, B. : Awarded the *Wireless World* Premium of the Television Society, 1161
Overvoltage (Hydrogen) : Feedback Theory of (J. F. Chittum), 589
Ovules (*Citrus*) : Morphogenetic Response of, to Growth Adjuvants in Culture (N. S. Ranga Swamy), 735
Owen, Dr. A. R. G. : Natural Selection in Man (Mathematical Models for Selection), 160
Owen, Dr. D. E. : Annual Report for 1957-58 of the Manchester Museum, 1718
Owen, Dr. J. : Awarded a Royal Society Research Fellowship (Mr. and Mrs. John Jaffé Donation), 1365
Owen, L. W., and others : Electrolytic Deposition of Beryllium, 816
Oxalate : Formation of Glycerate from, by *Pseudomonas oxalaticus* (OX1) grown in Oxalate (Biosynthesis of Cell Constituents from C_2-Compounds), (J. R. Quayle and Dr. D. B. Keech), 1794
Oxetanes : A Simple Synthesis of (L. F. Schmoyer and Prof. L. C. Case), 389
'Oxford English Dictionary' : Books required for the, 1434
Oxidase Inhibitors (Monoamine) : Ganglionic Block and (Dr. Sheldon B. Gertner), 750
Oxidation (Queen Mary College Symposium on), 865
Oxidation of Ascorbic Acid and similar Reductones by Nitrous Acid (Dr. C. A. Bunton, and Prof. H. Dahn and Dr. Lotte Loewe), 163
Oxidation of Thiosulphate by *Thiobacillus thioparus* (Dr. Boleslaw Skarzyński and Tadeusz W. Szczepkowski), 1413
β-Oxidation of Aryloxy-alkylcarboxylic Acids by *Nocardia opaca* : Effect of Substitution in the Side-Chain on (D. M. Webley, R. B. Duff and V. C. Farmer), 748
Oxidation (Anodic) : Refractive Index of Uranium Oxide produced by (A. E. Stebbens and Dr. L. L. Shreir), 1113
Oxidation (Gas Phase), of Hydrocarbons—Endothermic Nature of the Initial Stage of Reaction (Dr. K. C. Salooja), 602
Oxidation (High-Temperature), of Zinc Sulphide (Gordon S. G. Beveridge and Prof. Kenneth G. Denbigh), 106
Oxidation (Liver Tyrosine) : Reversal of Epinephrine Inhibition of (Prof. Gerald Litwack and Valentina Wojciechowski), 1675
Oxidation (Microbiological), of Steroids : A New Method for the (Dr. G. Wix and K. Albrecht), 1279
Oxidation (Uronate), by Phytopathogenic Pseudomonads (Wendell W. Kilgore and Prof. Mortimer P. Starr), 1412
Oxidation Product of Nicotine formed by Rabbit Liver : Cotinine, an (Howard B. Hucker, James R. Gillette and Bernard B. Brodie), 47
Oxidation States (Lowest), of Technetium and Rhenium (R. Colton, J. Dalziel, W. P. Griffith and Prof. G. Wilkinson), 1755
Oxidation States (New), of Technetium (J. E. Fergusson and Prof. R. S. Nyholm), 1039
Oxidative Metabolism of Cartilage (Dr. Philip Person and Dr. Albert Fine), 610
Oxidative Metabolism and Puparium Formation in the Ebony Mutant of *Drosophila melanogaster* (Alexander Wolsky and Henrietta G. Kalicki), 1129
Oxidative Phosphorylation : Differential Effect of Phenothiazines on (J. D. Judah, Dr. K. R. Rees and M. J. R. Dawkins), 821
Oxidative Phosphorylation in the Chick Embryo (Prof. Wiktor W. Nowinski and William C. Mahaffey), 45
Oxidative Phosphorylation of Tumour Mitochondria : Influence of L-3',5,3-Triiodothyronine on the (Prof. W. Lührs, E. Heise and G. Bacigalupo), 1534
Oxide (Aluminium) Anodic Films : Sealing of (Dr. R. M. Hinde, E. A. Kellett and P. H. Harris), 39
Oxide (Nitrous) : Effect of Thermal Neutron Irradiation on Oxide Catalysts for the Decomposition of (Yasukazu Saito, Yukio Yoneda and Shoji Makishima), 388
Oxide (Uranium) : Refractive Index of, produced by Anodic Oxidation (A. E. Stebbens and Dr. L. L. Shreir), 1113
Oxide Catalysts : Effect of Thermal Neutron Irradiation on, for the Decomposition of Nitrous Oxide (Yasukazu Saito, Yukio Yoneda and Shoji Makishima), 388
Oxide Layers : An Effect of, on the Behaviour of Vacuum Arc Cathode Spots (H. Wroe and R. H. Alderson), 1544
Oxides (Hydrous) : Binding of Water in some Hydroxides and (Structure of some Hydroxides and Hydrous Oxides), (C. Glemser), 943
  Structure of some Hydroxides and—Binding of Water in some Hydroxides and Hydrous Oxides (C. Glemser), 943 ; Positions of Protons in Aluminium Hydroxides derived from Proton Magnetic Resonance (D. J. Kroon and C. v. d. Stolpe), 944
Oxygen : Electron Affinity of (B. A. Tozer), 1389
  Heterogeneous Atomization of Hydrogen and (Dr. D. Brennan and P. C. Fletcher), 249
Oxygen-18 : Determination of the Yields of Molecular Hydrogen Peroxide in the Radiolysis of Water labelled with (Dr. J. D. Backhurst, Dr. G. R. A. Johnson, Dr. G. Scholes and Prof. J. Weiss), 176
Oxygen as a Prerequisite to the Origin of the Metazoa (Dr. J. R. Nursall), 1170
Oxygen (Minimum), off Bombay : Shorewards Upslope of the Layer of—its Influence on Marine Biology, especially Fisheries (Dr. J. N. Carruthers, S. S. Gogate, J. R. Naidu and T. Laevastu), 1084
Oxygen-carrying Compounds (Model), and the Iron-*bis*-Indigo Complex (L. F. Larkworthy and Prof. R. S. Nyholm), 1377
Oxygen Consumption of Different Forms of Stable L *Proteus* P18 growing in Hypertonic Liquid Medium (Prof. P. Mandel, T. Terranova, M. Sensenbrenner and F. Feo), 194
Oxygen Deficiency and Radiation Damage in the Insect *Rhodnius* (W. F. Baldwin and T. N. Salthouse), 974
Oxygen Effect : Modification of the, when Bacteria are given Large Pulses of Radiation (D. L. Dewey and Dr. J. W. Boag), 1450
Oxygen Equilibrium of Human Haemoglobin in Strong Salt Solutions (Prof. A. Rossi-Fanelli, E. Antonini and A. Caputo), 827
Oxygen Exposure and Brain Damage (Lars Gyllenstein), 1068
Oxygen Poisoning in the Rat : Effects of Deficiency of Pantothenic Acid on (Dr. D. W. Taylor), 257

Oxygen Pressure (High) : Effect of, on the Protective Action of Cystamine and 5-Hydroxytryptamine in Irradiated Rats (H. A. S. van den Brenk and Ruth Moore), 1530
Oxygen Tension in the Tissues of Mice cooled to 1°C. : Measurements of (Dr. D. B. Cater and Dr. L. Weiss), 1521
Oxytocin : Synthesis of, by the Nitrophenyl Ester Method (Dr. Miklos Bodanszky and Prof. Vincent du Vigneaud), 1324
Oystercatcher (*Haematopus ostralegus*) : Feeding of the, on the Edible Mussel (*Mytilus edulis*) in the Estuary of the River Conway (R. E. Drinnan), 153

PACIFIC Equatorial Countercurrent : Measurements of the (John A. Knauss and Robert Pepin), 380
Pacific (South-Eastern) : Heat-Flow Values from the (Dr. R. Von Herzen), 882
Page, Dr. F. M., and Sugden, Dr. T. M. : Bond Energies of some Alkali Fluorides, 1672
Page, Griffith : Changing Industry, 655
Page, Prof. L. A. : Awarded a grant of 27,243 dollars by the United States Army Office of Ordnance Research, to begin a research programme on low-energy nuclear and electron physics, 86
Pagel, Dr. Walter : Paracelsus, an Introduction to Philosophical Medicine in the Era of the Renaissance, *review* by Prof. Erwin H. Ackerknecht, 1147
Pairing (Chromosome), in Intergeneric Hybrids with Wheat : Genetic Control of (Dr. Ralph Riley, Victor Chapman and Gordon Kimber), 1244
Paist, Walter D. : Cellulosics, *review* by Dr. S. H. Pinner, 851
Pal, Dr. B. P. : The Indian Agricultural Research Institute, 371
Palaeoecology (Linnean Society Symposium on), 1370
Palaeomagnetic Investigations on Chinese Rocks : Some (Dr. Chang Wen-you and Dr. A. E. M. Nairn), 254, 652
Palaeomagnetism of Igneous Rocks : Magnetostriction and (P. M. Scott and Dr. F. D. Stacey), 384 ; (Dr. John W. Graham, A. F. Buddington and J. R. Balsley), 1318
Palaeomagnetism of certain Rocks from Newfoundland (Dr. A. E. M. Nairn, D. V. Frost and B. G. Light), 596
Palaeontology in Malaya : Geology and—Pre-Tertiary Stratigraphic Succession in Malaya (J. B. Alexander), 230 ; Jurassic/Cretaceous Sediments in Malaya (J. R. Paton), 231 ; Graptolites recorded from Malaya (C. R. Jones), 231
Palaeopedology, *review* by Dr. Alex Muir, 1355
Paléontologie Humaine, Institut de (Paris) : Mémoire 29, La Grotte de Fontéchevade, Deuxième partie, Anthropologie (Henri-V. Vallois) ; Troisième partie, Géologie et Paléontologie (H. Alimen, C. Arambourg et A. Schreuder, avec la collaboration de G. Henri-Martin, J. Berlioz et J. Bouchud), 1369
Palestine (North and South) : From Dan to Beersheba—Excavations in, *review* by Peter J. Parr, 951
Palladium–Platinum–Hydrogen System : Electrode Potentials and Compound Formation in the (A. W. Carson, Dr. T. B. Flanagan and Dr. F. A. Lewis), 39, 510
Panchet Beds of India : Fossil Reptiles from the (L. B. Tarlo), 912 ; (Dr. Pamela Lamplugh Robinson), 913
Pancreatic Activity of Guinea Pigs : Effect of β-Hydroxybutyrate Injections on the (Dr. H. D. Brahmachari and Mahendra Kumar), 51
Pantin, Prof. C. F. A. : Appointed to the chair of zoology in the University of Cambridge, 506 ; work of, 506
Pantothenic Acid : Effects of Deficiency of, on Oxygen Poisoning in the Rat (Dr. D. W. Taylor), 257
Papain : Effect of Hydrolysis by, on the Combining Sites of an Antibody (Dr. A. Nisonoff and D. L. Woernley), 1325
Papanastassiou, Zinon B., and others : 'Dual Antagonists' ; Alkyl N-(*bis*-(ethylenimido)phosphoro)-carbamates, a New Series of Anti-Tumour Agents, 399
Paper: Ultra-Violet Fluorescence of Quinine Sulphate for Detection of Phosphate Ester Spots on (Dr. Edward S. Rorem), 1739
Paper Chromatograms : Detection of Meprobamate on (H. S. Bedson and T. H. Farmer), 43
  Quantitative Estimation of Purines by the Visual Scanning of Photographs of (B. M. Johnstone and G. P. Briner), 681
Paper Chromatograms (Salting-out), of Antibiotics : New Types of (Dr. Joseph Uri), 1188
Paper Chromatographic Method (A Two-Dimensional), combining Ion-Exchange and Partition Techniques (C. S. Knight), 165
Paper Chromatography : Conversion of Caffeic Acid to Esculetin during (Warren L. Butler and H. W. Siegelman), 1813
Paper Chromatography (Rapid Quantitative Horizontal), at an Elevated Temperature—Determination of Aspartic and Glutamic Acids (Henry R. Roberts and Michael G. Kolor), 460
Paper Electrophoresis Strips : Detection of Antigens as Specific Precipitates on (S. Buttery), 686
Paper Electrophoretic Separation of the Proteins of some Leguminous Seeds (Dr. Esam M. Moustafa), 199
Papers (Collected), of Charles Sanders Pierce (edited by Arthur W. Burks), Vol. 7, Science and Philosophy ; Vol. 8, Reviews, Correspondence and Bibliography, *review* by F. I. G. Rawlins, 276
Papilloma Virus (Shope Rabbit) : Induction of Arginase in Rabbit Epithelium by the (Prof. Stanfield Rogers), 1815
Papp, Dr. M., and others : Determination of Transaminase Activity in Dogs' Serum and Lymph after Hepatic Damage due to Acute Biliary Obstruction, 48
  Changes in Serum Transaminase Activity following Myocardial Damage due to Lymphatic Congestion, 1333
Paracelsus, an Introduction to Philosophical Medicine in the Era of the Renaissance (Dr. Walter Pagel), *review* by Prof. Erwin H. Ackerknecht, 1147
Paracelsus : The Quintessence of, *review* by Prof. Erwin H. Ackerknecht, 1147
Paralysing Agent (Crab-), of the Posterior Salivary Glands of Cephalopods : Cephalotoxin, the (Dr. F. Ghiretti), 1192
Paralysis (Tick) : Failure of Acetylcholine in (Patricia Emmons and Prof. H. McLennan), 474
Parapsychology (Dr. W. E. Hick), 229
  Introduction to (C. C. L. Gregory and Anita Kohsen), 229
Parasite (Ecto-) of the Jelly-fish, *Cyanea capillata* : The Amphipod, *Hyperia galba*, an (Prof. Erik Dahl), 1749
Parasites (Protozoal Blood), of Egyptian Birds : Systematic and Experimental Studies on (Dr. A. H. Helmy Mohammed), *review* by Dr. Elizabeth U. Canning, 1081
Parasitic Diseases : Chemotherapy of (Parasitology Group of the Institute of Biology Discussion on), 1029
Parasitic Soil-inhabiting Fungi (Saprophytic and) : Differential Reaction of, to Indoleacetic Acid (E. W. B. Ward and Prof. A. W. Henry), 1064
Parasitism (Facultative), and Dietary Change in *Harmolita hyalipenne* Walker (R. Bailey), 341
Parasitology (Parasitology Group of the Institute of Biology Discussion on), 438, 1506
Parasnis, A. S. (Mitchell, J. W., and) : Interfacial Phenomena (Generation of Dislocations at Incoherent Interfaces), 1099
Parbrook, Dr. H. D. : Of What Use is Acoustics to the Musician?, 1294
Pare Mountains : Effect of Residual House Spraying in the Plains on Anopheline Densities in Huts on the (Dr. A. Smith), 198
Parenteral Glucose Infusion and Glycerol Feeding : Depression in Percentage of Milk Fat by (W. S. Vallance and Prof. G. L. McClymont), 466
Parietal Cell (Gastric) : Functional Changes in the Vacuole–containing Bodies of the (A. D. Hally), 408
Parker, Dr. R. C. : The New Ferodo Research Laboratories, 297
Parker, Dr. Robert T. : Appointed head of the Banbury and Geneva offices of the Aluminium Laboratories, Ltd., 1502
Parkin, Dr. D. W., and Hunter, W. : Cosmic Dust in the Atmosphere, 732
Parkinson, Dr. D. H. : Hydrogen Liquefaction and Associated Techniques (Design and Construction of Small-scale Liquefiers), 1504
Parks Commission, National: Guide No. 2, Snowdonia (edited by E. Vale), 721
  Ninth Report (1957-58), 917, 937
  Appointment of Elwyn Davies and John C. P. de Winton as members, 1094
Parkyn, D. G. : Atmospheric Tides and Earth Satellite Observations, 1045
Parliamentary and Scientific Committee : Annual Report for 1958, 1021
Parr, Dr. J. C. : Awarded the *Electronic Engineering* Premium of the Television Society, 1161
Parr, Peter J. : From Dan to Beersheba—Excavations in North and South Palestine, *review*, 951
Parrish, F. W., and Whelan, Dr. W. J. : Determination of Molecular Weights of Polysaccharides by Over-oxidation with Periodate, 991
Parry, Gwyneth, and others : 'Chloride-Secretary' Cells in the Gills of Teleosts, 1248
Parry, M. (Miller, Prof. A. Austin, and) : Everyday Meteorology, *review* by James A. Taylor, 3
Parry, R. H. G. : Latent Interparticle Forces in Clays, 538
Parsons, Dr. R. : *Obituary* of Prof. D. C. Grahame, 290
  Interfacial Phenomena (Phenomena at Metal—Electrolyte Interfaces), 1098
Part-Time Work for Women Graduates (D. D. Furley), 1790
Parthenogenesis (Pathological) : Development of Ovarial Teratomas in Viviparous Toothcarps by (Prof. A. Stolk), 763
Partial Drying of Hardened Portland Cement during Testing : Errors caused by (Dr. K. M. Alexander), 885
Particle : The Elusive, *review* by Prof. H. W. B. Skinner, 1421
Particle-counting on the Electron Microscope : A New Method of (Dr. D. Gordon Sharp and Ivan Sorvall, Inc.), 1642
Particles (Air Shower) : Multiple Geiger Counter Telescope Measurements of the Directions of (Dr. H. D. Rathgeber), 386
Particles (Radioactive) : Induction of Lung Tumours by (Lewis A. Temple, D. H. Willard, S. Marks and W. J. Bair), 408
Particles (Tobacco Smoke) : Size Distribution of (Elaine Harris and Dr. H. F. Kay), 741
Particles (Virus-like), in Chemically induced Carcinoma of the Uterine Cervix (Dr. M. Thiery, Dr. M. De Groodt, Prof. F. De Rom, Prof. M. Sebruyns and Dr. A. Lagasse), 694
Particulate Matter : Examination of, on Filter Membranes (D. Anson, W. J. Grant and R. M. Jones), 1000
Particulate Matter (Intracellular), of Rat Liver : Partition of Selenium-75 in the (Dr. Kenneth P. McConnell, Dorothy M. Roth and R. Duncan Dallam), 183
Partington, Prof. J. R. : *Obituary* of Prof. Niels Bjerrum, 290
  John Dalton, *review*, 1765
Partition of Selenium-75 in the Intracellular Particulate Matter of Rat Liver (Dr. Kenneth P. McConnell, Dorothy M. Roth and R. Duncan Dallam), 183
Partition Techniques (Ion-Exchange and) : A Two-Dimensional Paper Chromatographic Method combining (C. S. Knight), 165
Parturition in the Marsupial *Trichosurus vulpecula* : Œstrous Cycle, Gestation Period and (Dr. A. G. Lyne, Phyllis E. Pilton and G. B. Sharman), 622
Pashley, D. W. : Interfacial Phenomena (Films Deposited in Vacuum), 1097
Pashley, D. W. (Glossop, A., and) : Interfacial Phenomena (Reflexion Electron Diffraction Techniques to study the Deposition of Copper on Silver), 1097
Pasieka, Arthur E., and Morgan, Dr. Joseph F. : Glutamine Metabolism of Normal and Malignant Cells cultivated in Synthetic Media, 1201
Paspalum scrobiculatum Grain : Pharmacology of a Tranquillizing Principle in (Dr. N. K. Bhide and R. A. Aimen), 1735
Passive Antibody Decay in Thyroidectomized Rabbits (Dr. Ignatius L. Trapani, Dr. Allen Lein and Dr. Dan H. Campbell), 982
Past : Reconstructing the, *review* by M. C. Burkitt, 1486
Pasteurella haemolytica from Sheep : Isolation of Two Types of (Geoffrey R. Smith), 1132
Pasture Plants : Uptake of Strontium by, and its Possible Significance in relation to the Fall-out of Strontium-90 (Dr. P. B. Vose and Dr. H. V. Koontz), 1447 ; (Dr. R. Scott Russell and Dr. R. J. Garner), 1806
Pasture Production (Winter) : Effects of Gibberellic Acid on (Dr. G. Scurfield and E. F. Biddiscombe), 1196
Patella coerulea : Ultrastructure of Nucleoli in Oocytes of (A. Bolognari), 1136
Pateman, J. A. (Lee, B. T. O., and) : Linkage of Polygenes controlling Size of Ascospore in *Neurospora crassa*, 698
Patents and Development, Ltd., Canadian : Forty-first Annual Report of the National Research Council of Canada (1957-58), including the Annual Report of, 441

Pathak, M. A., and others : Ultra-Violet Carcinogenesis in Albino and Pigmented Mice receiving Furocoumarins—Psoralen and 8-Methoxypsoralen, 728
Pathogen of Cladocera : Carotenoid Pigment in *Spirobacillus cienkowskii* Metchnikoff, a (J. Green), 56
Pathological Parthenogenesis : Development of Ovarian Teratomas in Viviparous Toothcarps by (Prof. A. Stolk), 763
Pathology of the Cerebellum : The Physiology and (Prof. Robert Stone Dow and Prof. Giuseppe Moruzzi), *review* by Dr. C. G. Phillips, 954
Pathology (Synovial) : Entropy and (D. P. Page Thomas and J. T. Dingle), 543
Pathria, R. K. (Singh, A. D., and) : Bose—Einstein Statistics and Helium Films, 668
Pathways of Glucose Catabolism in the Mammary Gland of the Rat : Effect of Insulin and Phenazine Methosulphate on (P. McLean), 182
Pathways and the Physiological Site of Anserine Formation (Prof. Theodore Winnick and R. E. Winnick), 1466
Patients (Thyrotoxic) : An Iodine Compound associated with Albumin in the Plasma of (Christina Cameron and K. Fletcher), 116
Patnaik, S. N. (Misra, Dr. G., and) : Effect of Coumarin on the Germination and Growth of Rice Seedlings, 989
Paton, Dr. A. M. : An Improved Method for preparing Pectate Gels, 1812
Paton, James : Meteorological and Ionospheric Studies in the Arctic, *review*, 279
  The Green Flash, *review*, 423
Paton, J. R. : Geology and Palaeontology in Malaya—Jurassic/Cretaceous Sediments in Malaya, 231
Paton, Prof. W. D. M. : Appointed to the chair of pharmacology in the University of Oxford, 790 ; work of, 790
Patrick, Dr. C. R., and others : Thermal Reactions of Highly Fluorinated *Cyclo*hexadienes, 586
  A New General Route to Aromatic Fluorocarbons, 588
Patron's Medal of the Royal Geographical Society awarded to Comdr. W. R. Anderson, 292
Pattern of Recurrent Conditioning of Spinal Reflexes (Dr. V. J. Wilson, W. H. Talbot and F. P. J. Diecke), 824
Pattern of Serum Proteins in Experimental Atherosclerosis : Disturbance in the, and its Prevention (Prof. M. C. Nath, A. Saikia and B. I. Uppin), 894
Pattern of Synthesis of Deoxyribonucleic Acid in *Bacillus cereus* growing synchronously out of Spores (Dr. I. Elizabeth Young and Prof. Philip C. Fitz-James), 372
Pattern (Electrophoretic), of Serum Albumin during Short-term Action of Pepsin at Room Temperature : Splitting of the (E. Annau), 190
Pattern (Singing), of the Common Chaffinch, *Fringilla coelebs* Linn. (D. R. Barber), 129
Patterns in the Amino-Acid Sequences of the Corticotropins (Drew Schwartz), 464
Patterns (Chromatographic), of Deoxyribonucleic Acid from various Tissues : Differences in (Nobuko Kondo and Syozo Osawa), 1602
Patterns (Electrophoretic), of Mealworm Proteins (D. S. Po-Chedley), 62
Patterns (Electrophoretic), of the Serum Proteins of Sheep infected with *Haemonchus contortus* (D. L. Mould and P. H. Silverman), 1735
Patterns (Personality) : ESP and (Dr. Gertrude Raffel Schmeidler and Dr. R. A. McConnell), *review* by Dr. R. H. Thouless, 964
Patterns (Powder), of Ferroelectric Domains (G. L. Pearson and W. L. Feldmann), 367
Patterns (X-Ray Diffraction), from the Egg Membrane of the Egg of the Brook Trout (Dr. Mamoru Kusa and Tsuguyasu Wada), 410
Patterson, Dr. E. M. : Elected a Fellow of the Royal Society of Edinburgh, 719
Patty, Frank A. (edited by) : Industrial Hygiene and Toxicology, Vol. I, General Principles, second edition, *review* by Dr. A. I. G. McLaughlin, 1148
Pauli, Prof. Wolfgang E. : *Obituary* by Prof. N. Kemmer, 1089
Pauling, Prof. Linus : Chemistry and Quantum Chemistry, 158
  Grant of 33,943 dollars from the United States National Foundation, for investigations on the structure of nucleic acids, 224
  No More War, *review* by R. Brightman, 952
Pauly, H. : Electrical Conductance and Dieletric Constant of the Interior of Erythrocytes, 333
Pauncz, Dr. R. : Chemistry and Quantum Chemistry, 158
Pautard, Dr. F. G. E. : Proton Transfer and Supercontraction in Actomyosin, 1391
Paycha, Dr. F. : The Mechanization of Thought Processes (Logical Structure of Medical Diagnosis), 226
Paying for the Railways (Political and Economic Planning, Broadsheet No. 429), 938
Payne, C. S. : Injury-feigning Behaviour of Wood-Pigeons, 1643
Payne, Dr. R. M. (Allen, Dr. N. L., and) : Gas Discharges (Operation of SCEPTRE III in the Laboratories of Associated Electrical Industries), 92
Payne, W. J. A. : A Possible Vitamin E Deficiency occurring in a Herd of Pigs fed Standard Rations in the Tropics, 828
Pea Seedlings : Utilization of Alcohol in Germinating (E. A. Cossins and Dr. E. R. Turner), 1599
Peabody Museum of Natural History (Yale University) : Bulletin No. 11, *Spirifer disjunctus*, its Evolution and Palaeoecology in the Catskill Delta (Hugo Greiner), *review* by Dr. H. M. Muir-Wood, 959
  Retirement of Prof. C. O. Dunbar from the directorship, 1019
  Appointment of Dr. S. Dillon Ripley as director, 1019
Peaceful Uses of Atomic Energy : Technical Films used at the Geneva Conference on the (United States Atomic Energy Commission), 721
Peaceful Uses of Outer Space (United Nations Committee to study the question of international co-operation in the), 649
Peacetime Uses : On Nuclear Energy—its Potential for (Dr. Donald J. Hughes), *review* by Prof. G. O. Jones, 1077
Peach Seedlings : Temperature Control of Physiological Dwarfing in (Prof. Bruce M. Pollock), 1687
Peacock, R. D. (Hargreaves, G. B., and) : Co-ordination Chemistry (Complex Fluorides of Molybdenum and Tungsten and Rhenium), 1785
Peak Dimensions in Gas Chromatography (C. H. Bosanquet), 252
Pearce, Dr. J. G. : Retirement from the directorship of the British Cast Iron Research Association, 84 ; work of, 84
Pearce, S. A. : The Art of Grafting, *review*, 958
Pearsall, Prof. W. H. : Present Trends in Botanical Studies, *review*, 1484
Pearse, Dr. A. G. E. (Hess, Dr. R., and) : Labelling of Proteins with Cellulose-reactive Dyes, 260
Pearson, Prof. Eric B. : Technology of Instrumentation, *review* by R. L. Grimsdale, 970
Pearson, G. L., and Feldmann, W. L. : Powder Patterns of Ferroelectric Domains, 367
Pearson, Sir Ralph : *Obituary* by W. A. Robertson, 150
Pecorari, Domenico, and others : Method for Testing the Influence of Drugs and Physical Agents upon Mitosis, 190
Pectate Gels : An Improved Method for preparing (Dr. A. M. Paton), 1812
Pectic Substances in Bean Endocarp : Effects of Auxins on Membrane Permeability and (J. A. Sacher and K. T. Glasziou), 757
Pediococci : Mode of Division of (Dr. Helge-Liane Gunther), 903
Pediococcus : Reclassification of *Leuconostoc mesenteroides P*.60 as a (Ellen I. Garvie), 1411
Peek (Cuthbert) Grant of the Royal Geographical Society awarded to W. George Lowe, 292
Peel, Dr. M. E., and others : A New Short-acting Thiobarbiturate, 1443, *erratum*, 1571
Peerless, R. J., and others : Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in Salt Water, and the Possible Role of Sulphur Compounds, 1346
Pegmatites of South Harris, Outer Hebrides : Niobium–Zirconium–Thorium–Uranium and Rare-Earth Minerals from the (Dr. O. von Knorring and R. Dearnley), 255
Peierls, Prof. R. E. : Problems of Collective Motion in Physics (Liquid Helium and Superconductivity), 866
Pelc, Dr. S. R., and Gahan, P. B. : Incorporation of Labelled Thymidine in the Seminal Vesicle of the Mouse, 335
Pelc, Dr. S. R. (La Cour, L. F., and) : Effect of Colchicine on the Utilization of Thymidine labelled with Tritium during Chromosomal Reproduction, 1455
Pellegrino, D. N., and others : Detection of Gentiobiose and Sophorose in Cultures of certain Micro-organisms growing in Defined Glucose-containing Media, 682
Penetration (Micro-Electrode), of Ascites Tumour Cells (B. M. Johnstone), 411
Penfield, Dr. Wilder : The Excitable Cortex in Conscious Man, *review* by Dr. P. B. Bradley, 781
Penguin : The Adélie, *Pygoscelis adeliae* (Hombron and Jacquinot), (Dr. William J. L. Sladen), 23
Penicillin : Synthesis of—6-Aminopenicillanic Acid in Penicillin Fermentation (F. R. Batchelor, F. P. Doyle, J. H. C. Nayler and Dr. G. N. Rolinson), 257
Penicillin as an Antigen (K. C. Watson, S. M. Joubert and M. A. E. Bennett), 468
Penicillin Derivatives of *p*-Aminobenzylpenicillin (A. Ballio, Prof. E. B. Chain, F. Dentice di Accadia, Dr. G. N. Rolinson and S. R. Batchelor), 180, *erratum*, 224
Penicillin Fermentation : Synthesis of Penicillin—6-Aminopenicillanic Acid in (F. R. Batchelor, F. P. Doyle, J. H. C. Nayler and Dr. G. N. Rolinson), 257
Penicillin Treatment of *Escherichia coli B* : *T*2 Phage Infection of 'Protoplasts' obtained by (Dr. G. Dénes and L. Polgár), 696
Penicillium chrysogenum : Inhibitory Action of Amino-Acid Esters on the Production of Extracellular Amylase by (Dr. L. Horváth, S. Bajusz and A. Szentirmai), 477
Penicillium chrysogenum grown in Media with Different Sources of Carbon : Carbohydrate Constituents of the Mycelium of (Roshan J. Irani and Dr. K. Ganapathi), 758
Peninsula (Lleyn) : Nuclear Power Station on the, 222
Pennelegion, L. : A Microwave Method of determining the Displacement and Velocity of a Piston in a Hypersonic Gun Tunnel, 246
Penney, Sir William : To succeed Sir John Cockcroft as the United Kingdom Atomic Energy Authority's member for research, 582
Penney, W. G. : Turbidity Currents, 658
Penrose, Prof. L. S. : Natural Selection in Man, 159
Penrose, O. : Problems of Collective Motion in Physics (Liquid Helium and Conductivity), 866
Pentacyanocobaltate (III) Complexes : Polarography of (Nobufumi Maki, Junnosuke Fujita and Ryutaro Tsuchida), 458
Pepin, Robert (Knauss, John A., and) : Measurements of the Pacific Equatorial Countercurrent, 380
'Pepper' in West Africa : A Third Species of (J. Yanney Wilson), 1142
Pepsin at Room Temperature : Splitting of the Electrophoretic Pattern of Serum Albumin during Short-term Action of (E. Annau), 190
Peptide Chains of Human Globin : Separation of the (Constituents of Human Haemoglobin), (Dr. V. M. Ingram), 1795
Peptide Synthesis : An Effect of Insulin on, independent of Glucose or Amino-Acid Transport (Prof. Ira G. Wool and Dr. M. E. Krahl), 1399
Peptides : Synthesis of (Czechoslovak Academy of Science International Symposium on), 152
Peptides, Amino-acid Amides and Amino-acids : Relationship between Proton and Metal Binding by some (Dr. S. P. Datta, R. Leberman and Dr. B. R. Rabin), 745
Pepys, Dr. J. : Immunological Aspects of Allergic Disorders, 296
Percentage of Milk Fat : Depression in, by Parenteral Glucose Infusion and Glycerol Feeding (W. S. Vallance and Prof. G. L. McClymont), 466
Perception : Experimental Studies of, *review* by Prof. R. W. Pickford, 1625
  Readings in (selected and edited by Prof. David C. Beardslee and Prof. Michael Wertheimer), *review* by Prof. R. W. Pickford, 1625
Percival, J. C. (Thornton, Dr. R. H., and): A Hepatotoxin from *Sporidesmium bakeri* capable of producing Facial Eczema Diseases in Sheep, 63
Percival, Dr. W. S. : Stereophonic Sound Recording, Reproduction and Broadcasting (Broadcast Stereophony), 1721
Pereira, Dr. H. G., and others : Study of Adenovirus Antigens by Immunoelectrophoresis, 895
Perel, Y. G. : History of the Calendar, 509
Perfect Stage of *Keratinomyces ajelloi* (Christine O. Dawson and J. C. Gentles), 1345
Performance Tests : Diagnostic (Boris Semeonoff and Eric Trist), *review* by Prof. O. L. Zangwill, 1767
Perilemma of Insect Nerve : Collagen in the (David S. Smith and Prof. V. B. Wigglesworth), 127
Periodate : Determination of Molecular Weights of Polysaccharides by Over-oxidation with (F. W. Parrish and Dr. W. J. Whelan), 991
Periosteum (Ageing) : Changes in the Osteoblastic and Mitochondria Population of (Dr. E. A. Tonna and Dr. N. Pillsbury), 337

Peripheral Nerve : Melatonin in (Dr. Aaron B. Lerner, James D. Case, Wataru Mori and Margaret R. Wright), 1821
Perithecia (Mature), of *Mycosphaerella pinodes* : Chemical Destruction of (M. V. Carter), 162, *erratum*, 438
Perkin Centenary, London—100 Years of Synthetic Dyestuffs, *review* by R. Brightman, 709
Perkins, W. H. (edited by) : Science in Schools—Proceedings of a Conference under the auspices of the British Association for the Advancement of Science (London, 1958), *review*, 211
Perkins, W. H., and others : Anomalous Night-Time Reception of a Major Solar Radio Burst, 597
Permanent Graticules, 223
Permeability effected by Lipid-soluble Analogues of Acetylcholine : Distinction between Sodium and Potassium in Change in (Dr. Wolf D. Dettbarn), 465
Permeability of Porous Media (Dr. R. J. Millington and Dr. J. P. Quirk), 387
Permeability Factor (Serum Globulin) : Enzymic Nature of the (E. L. Becker, D. L. Wilhelm and Prof. A. A. Miles), 1264
Permeability (Iodine), and the Gram Characteristic of Cells : A Correlation between (Prof. J. W. Bartholomew, Thomas Cromwell and Harold Finkelstein), 123
Permeability (Membrane), and Pectic Substances in Bean Endocarp : Effects of Auxins on (J. A. Sacher and K. T. Glasziou), 757
Permeability (Selective), of Living Tissues to Carbonic Acid (Dr. B. N. Halpern and R. Binaghi), 1397
Peroxidase : Inactivation of Isoniazid by (Dr. M. O. Tirunarayanan and Dr. W. A. Vischer), 681
Peroxidase (Tryptophan) : Prevention of Adaptive Formation of, by a Carcinogenic Azo Dye (Dr. Silvio Fiala and Anna E. Fiala), 1532
Peroxidases from Wheat Germ (Kunio Tagawa, Masateru Shin and Prof. Kazuo Okunuki), 111
Peroxide (Molecular Hydrogen), in the Radiolysis of Water labelled with Oxygen-18 : Determination of the Yields of (Dr. J. D. Backhurst, Dr. G. R. A. Johnson, Dr. G. Scholes and Prof. J. Weiss), 176
Perri, Dr. Giulio C., and others : Biological Activity of L-Tryptophan Esters, 116
Perri, V., and others : Effect of Toxopyrimidine on Glutamic-decarboxylase and Glutamic-oxalacetic Transaminase of Rat Brain, 1126
Perrone, J. C., and others : Electrophoretic Heterogeneity of Trypsin, 605
Perrot, Jean, and others : Hazor I, an Account of the First Season of Excavations, 1955 (The James A. De Rothschild Expedition at Hazor), *review* by Peter J. Parr, 951
Perry, Prof. W. L. M. : Elected a Fellow of the Royal Society of Edinburgh, 719
Persistence of Cholesterol-4-^{14}C in the Central Nervous System (Dr. A. N. Davison and Martha Wajda), 1606
Persistence of Sudanophilic Lipid in Sections of Mummified Tissue (Dr. A. T. Sandison), 196
Persistence of Tomato Aucuba Mosaic Virus in Dried Leaf Tissue (Prof. John Caldwell), 1142
Person, Dr. Philip, and Fine, Dr. Albert : Oxidative Metabolism of Cartilage, 610
Personality : Measurement of, *review* by Prof. M. D. Vernon, 140
Personality Patterns : ESP and (Dr. Gertrude Raffel Schmeidler and Dr. R. A. McConnell), *review* by Dr. R. H. Thouless, 964
Personality and Motivation Structure and Measurement (Prof. Raymond B. Cattell), *review* by Prof. M. D. Vernon, 140
Personnel : Exchange of, between the Post Office and Industry, 16
Personnel Management in Perspective—Suggestions on the Correct Place of Personnel Activities in Business Organization (Col. L. Urwick), 1372
Personnel Management, Institute of : Annual Conference (Industry and the Individual), 87
  Occasional Papers No. 13, Personnel Management in Perspective—Suggestions on the Correct Place of Personnel Activities in Business Organization (Col. L. Urwick), 1372
Perspective : Personnel Management in—Suggestions on the Correct Place of Personnel Activities in Business Organization (Col. L. Urwick), 1372
Persson, K. : Gas Discharges (Micro-wave Technique—Measurements on High-density Plasmas), 93
Peru Current off the Chilean Coast : Relationship between the Hake Fishery and a Southerly Sub-surface Return Flow below the (Dr. Wilhelm Brandhorst), 1832
Perutz, Dr. M. F. : More Protein Chemistry, *review*, 1290
Pest Infestation Laboratory of the Department of Scientific and Industrial Research to be transferred to the Agricultural Research Council, 862
Petch, Prof. N. J. : Appointed to the chair of metallurgy in King's College, Newcastle-on-Tyne, 1643
Peters, F. E., and Dodge, J. W. : Changes in *p*H and Temperature in Poultry Breast Muscles at Slaughter, 687
Peters, Dr. R. S. : The Concept of Motivation, *review* by Prof. L. S. Hearnshaw, 567
Petherbridge, F. R. : *Obituary* by F. G. W. Jones, 576
Petioles of Strawberry : Effect of Gibberellic Acid on Length and Number of Epidermal Cells in (C. G. Guttridge and P. A. Thompson), 197
Petrásek, Dr. R. : Liver Hexokinase Activity in Rats adapted to Intermittent Starvation, 329
Pettersson, Prof. Hans : Drilling a Borehole to the Earth's Mantle, 436
  Frequency of Meteorite Falls throughout the Ages, 1114
Petty, J. H. P., and others : Effect of Gibberellic Acid on Development of Autumn Colour and Leaf-fall of Deciduous Woody Plants, 58
Pfaffmann, Prof. C. : Elected a member of the United States National Academy of Sciences, 1575
Pfeffer, M. (Johnstone, Prof. D. B., and) : Aerobic Fermentation of Whey by a Nitrogen-fixing Strain of *Aerobacter aerogenes*, 992
Pfeil, Dr. L. B. : Awarded the Platinum Medal of the Institute of Metals, 793
  Elected to Fellowship of the Imperial College of Science and Technology, 1161
Pfeil, P. C. L., and Griffiths, L. B. : Effect of Cathode Inclusions on Electrical Discharges, 1481
Pfizer, Ltd. : University scholarship for science awarded to Penny Howard, 1719
  University scholarship for chemistry awarded to George Sayce, 1719
*p*H and Temperature in Poultry Breast Muscles at Slaughter : Changes in (F. E. Peters and J. W. Dodge), 687
Phage-infected *Escherichia coli* : Synthesis of Deoxyribonucleic Acid by, in the Presence of Mitomycin *C* (Dr. Matsuo Sekiguchi and Dr. Yasuyuki Takagi), 1134
*T*2 Phage Infection of 'Protoplasts' obtained by Penicillin Treatment of *Escherichia coli B* (Dr. G. Dénes and L. Polgár), 696
Phagocytosis of *Escherichia coli* Protoplasts (Józef Lisowski, Zbigniew Wieczorek and Miroslaw Kańtoch), 1828
Phagocytosis and Cell Division (Klaus G. Bensch, Stanley Simbonis, Rolla B. Hill, jun., and Prof. Donald W. King), 476
Pharmaceutical Chemistry (Medicinal and), Journal of, Vol. 1, No. 1, 1304
Pharmacological Actions of γ-Butyrobetaine (Dr. E. A. Hosein and Prof. H. McLennan), 328
Pharmacological Properties of its Isomers : Resolution of Chlorpheniramine and the (R. T. Brittain, Dr. P. F. D'Arcy and Dr. J. H. Hunt), 734
Pharmacological and Toxicological Properties of 5-Benzylidenerhodanine (Salah A. Tawab, Prof. Ahmed Mustafa and A. F. A. Nawgoud Shalaby), 607
Pharmacology at Oxford, 790
Pharmacology at the Royal College of Surgeons, 16
Pharmacology of a Tranquillizing Principle in *Paspalum scrobiculatum* Grain (Dr. N. K. Bhide and R. A. Aimen), 1735
Pharmacology (Applied), Toxicology and, Vol. 1, No. 1, 650
Phase Characteristics of Radio Signals received via the Ionosphere (D. W. Morris and C. J. Hughes), 310
Phase Equilibria involving Clathrates : Validity of Clapeyron's Equation for (Dr. J. H. van der Waals and Dr. J. C. Platteeuw), 462 ; (Prof. R. M. Barrer), 463
Phase Transitions : Co-operative Phenomena and (Physical Society Conference on), 1234, 1643
Phaseolus vulgaris : Purification of a Toxic Phytohaemagglutinin from Black Beans (Dr. Werner G. Jaffé and Karl Gaede), 1329
Phelp, N. R., and others : 'Ring Angels' over South-East England, 1759
Phenazine Methosulphate : Effect of Insulin and, on Pathways of Glucose Catabolism in the Mammary Gland of the Rat (P. McLean), 182
Phenolic Acids as Growth and Germination Inhibitors in Dry Fruits (M. Varga and E. Köves), 401
Phenolics in Plants in Health and Disease (Plant Phenolics Group Symposium on), 510
Phenomena : Interfacial (Physical Society Biennial Conference on Solid State Physics), 1097
Phenomena (Co-operative), and Phase Transitions (Physical Society Conference on), 1234, 1643
Phenomena (Ionization), in Gases (University of Uppsala in collaboration with the Swedish National Committee for Physics Fourth International Conference on), 1164
Phenomenon : A New Ionospheric (H. J. A. Chivers and H. W. Wells), 1178
Phenomenon which includes the Fibroma–Myxoma Virus Transformation of Berry and Dedrick : Reactivation of Heat-inactivated Poxviruses—a General (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340
Phenomenon (Colour Vision), of a New Class (Dr. William A. Shurcliff), 202
Phenomenon (A Possible Negative Feedback), controlling Formation of Alkaline Phosphomonoesterase in *Escherichia coli* (T. Horiuchi, S. Horiuchi and D. Mizuno), 1529
Phenothiazines : Differential Effect of, on Oxidative Phosphorylation (J. D. Judah, Dr. K. R. Rees and M. J. R. Dawkins), 821
Phenotype K–, k–, Kp(a–b–), (Kell Blood Group): A Further Example of the (Hiroko Kaito, Marion Lewis, Dr. Bruce Chown and Eileen Gard), 1586
Phenylalanine Mustard : Ratio of Visible to Lethal Mutations produced in *Drosophila* by (L. S. Altenburg and Edgar Altenburg), 699
Phenylalanine Test on Kligler's Iron Agar for the Identification of *Proteus* (D. J. Stewart), 1537
'Pheromone': The Proposed Biological Term (H. S. Micklem), 1835; (Dr. P. Karlson and Prof. M. Lüscher), 1835
'Pheromones', a New Term for a Class of Biologically Active Substances (Dr. P. Karlson and Prof. M. Lüscher), 55
Phillips, Dr. C. G. : Physiology of the Cerebellum, *review*, 954
Phillips, J. H. : Promoted to Deputy Chief Scientific Officer and appointed to the headquarters post of director of Guided Weapons (Techniques), Ministry of Supply, 648 ; work of, 648
Phillips, Dr. K. (Allen, K. R., and) : Effect of Humidity on the Spark Breakdown Voltage, 174
  Effect of Radiation on the Breakdown of Homogeneous Field and Sphere Gaps, 233
Phillips, Dr. K., and others : Effect of Humidity on the Breakdown of a 1-cm. Homogeneous Field Spark Gap in Air, 532
Phillipson, Dr. A. T. : Function of the Rumen (The Rumen in relation to the Animal), 1645
Phillipson, Dr. A. T., and others : Assimilation of Ammonia Nitrogen by Rumen Bacteria, 402
Phillis, J. W., and others : Chemical Excitation of Spinal Neurones, 611
Philosophical Medicine in the Era of the Renaissance : Paracelsus, an Introduction to (Dr. Walter Pagel), *review* by Prof. Erwin H. Ackerknecht, 1147
Philosophical Psychology, *review* by Prof. L. S. Hearnshaw, 567
Philosophical Transactions of the Royal Society : Series B, Vol. 241, The Ecology of Lagos Lagoon, 1, The Lagoons of the Guinea Coast (J. E. Webb) ; 2, The Topography and Physical Conditions of Lagos Harbour and Lagos Lagoon (M. B. Hill and J. E. Webb) ; 3, The Life History of *Branchiostoma nigeriense* Webb (J. E. Webb) ; 4, On the Reactions of *Branchiostoma nigeriense* Webb to its Environment (M. B. Hill and J. E. Webb), 295
Philosophy : Benedict de Spinoza, the Elements of his (Prof. H. F. Hallett), *review* by Dr. Peter Nidditch, 964
Philosophy of Science, British Society for the : Fourth Annual Conference, 1783
Philosophy of Wittgenstein : The Later (Dr. David Pole), *review* by F. I. G. Rawlins, 494
Philosophy and Religion : Science, (Sir Russell Brain), 154, 1022
Philosophy (Wittgenstein's) : Critique of, *review* by F. I. G. Rawlins, 494
Phocaena phocaena : Audio-direction Finding in the Porpoise (W. H. Dudok van Heel), 1063
Phonetics : Manual of (edited by L. Kaiser), *review* by D. Abercrombie, 209
Phosphatase (Alkaline) : Distribution of, in the Arteries of several Species (Dr. Manuel René Malinow, Martha A. Fernandez, Alvaro L. Gimeno and Grato E. Bur), 1262

Phosphatase Activity (Lipase and Alkaline) : Histochemical Demonstration of, in the Fat Body of the Desert Locust (J. C. George and J. Eapen), 268
Phosphatase-elevating Activity (Acid) : Fractionation of Brain Extracts for (Dr. V. Schreiber, Prof. J. Charvát, V. Kmentová and M. Rybák), 473
Phosphate in Red Blood Cells : Rate of Exchange of—Effect of Thyroid Hormones (A. M. Ermans and Prof. P. A. Bastenie), 679
Phosphate (Ammonium Dihydrogen) Crystals : Effect of Tartar Emetic on the Growth of (Yutaka Kunisaki), 105
Phosphate (Di-*n*-butyl) : Separation of Mono-*n*-butyl Phosphate and, by means of Ion Exclusion (E. Cerrai and F. Gadda), 1528
Phosphate (Mono-*n*-butyl), and Di-*n*-butyl Phosphate : Separation of, by means of Ion Exclusion (E. Cerrai and F. Gadda), 1528
Phosphate Compounds (Trichloracetic Acid-insoluble), in Cartilage (R. G. Whitehead and Dr. S. M. Weidmann), 876
Phosphate Ester Spots on Paper: Ultra-Violet Fluorescence of Quinine Sulphate for Detection of (Dr. Edward S. Rorem), 1739
Phosphate Exchange : Prolonged Muscular Activity without (Prof. Jacob Sacks), 825
Phosphates, International Association for Research on : Congress in Biarritz (Phosphates and Organic Substances in Nitrogen Deficiency), 513
Phosphates and Organic Substances in Nitrogen Deficiency (International Association for Research on Phosphates Congress on), 513
Phospholipase *D* : Isolation of an Activator for (Herbert Weiss, Herbert E. Spiegel and Elwood Titus), 1393
Phosphomonoesterase (Alkaline), in *Escherichia coli* : A Possible Negative Feedback Phenomenon controlling Formation of (T. Horiuchi, S. Horiuchi and D. Mizuno), 1529
Phosphors (Short-Persistence) : Rise and Decay of Intensity of Luminescence of (Dr. R. Feinberg), 1546
Phosphorus-32: Effects of X- and Ultra-Violet Irradiation on the Incorporation of, into Isolated Nuclei of Rabbit Appendix (Yuong-Tchel Tchoe and Prof. A. Sibatani), 1334
  A Sex Difference in Radioactivity of *Artemia* cultured in Sea Water containing (Prof. Daniel S. Grosch and Mary Ellen Plumb), 122
Phosphorus-32 and Sulphur-35 : An Autoradiographic Method for distinguishing Samples labelled with (Dr. W. G. Duncombe), 319
Phosphorus Compound in Platelet-rich Plasma on Clotting: Appearance of a (Dr. G. V. R. Born and Dr. M. P. Esnouf), 478
Phosphorus (III) *Iso*cyanate : Solution of Iodine in (Dr. Ervin Colton and Lewis St. Cyr), 1042
Phosphorylase (Muscle) : Effect of Salicylate on (Dr. Stanton Segal and Alberta Blair), 1609
Phosphorylase (Polynucleotide) : Inhibition of, by Degraded Ribonucleic Acid—its Reversal by various Agents (Dr. Roland F. Beers, jun.), 1335
Phosphorylase (Polynucleotide), from Sperm : Synthetic Activity of (Prof. Anwar A. Hakim), 334
Phosphorylated Methyl-naphthohydroquinones : Effect of, on the Response to Radiation in Barley Roots (A. D. McKelvie), 1194
Phosphorylation (Oxidative) : Differential Effect of Phenothiazines on (J. D. Judah, Dr. K. R. Rees and M. J. R. Dawkins), 821
Phosphorylation (Oxidative), in the Chick Embryo (Prof. Wiktor W. Nowinski and William C. Mahaffey), 45
Phosphorylation (Oxidative), of Tumour Mitochondria : Influence of L-3',5,3-Triiodothyronine on the (Prof. W. Lührs, E. Heise and G. Bacigalupo), 1534
Phosphorylation (Photosynthetic) : Interaction of Magnesium and Adenosine Diphosphate in (J. B. Mudd), 900
Phosvitin in the Serum of the Hen (Prof. R. H. Common and Chi-Ching Mok), 1811
Photochemical Reduction of Blue Tetrazolium by Isolated Chloroplasts (John J. Taylor and Prof. Meyer Chessin), 626
Photoconductivity (Associated) : Absorption Spectra and, of Pure and Decomposed Crystals of Thallous Azide (B. L. Evans and A. D. Yoffe), 1241
Photo-elastic Material : Gelatin as a (H. G. Bayley), 1757
Photoelasticity at University College, London, 934
Photoelasticity : Developments in—Commemoration at University College, London (Prof. R. E. D. Bishop), 1495
  A Treatise on (Prof. E. G. Coker and Prof. L. N. G. Filon), second edition, revised by H. T. Jessop, *review* by E. K. Frankl, 1010
Photoelectric Spectrometry Group : Summer Meeting, 1368
Photographic Method for Recording Activity and Behaviour in a Group of Small Animals (Dr. D. K. Edwards), 625
Photographic Recording of Agar Diffusion Plates (J. R. Hunter), 1283
Photographic Society, Royal (Scientific and Technical Group) : Symposium on Photography in the International Geophysical Year, 1368
Photographic and Television Exhibition : Industrial (R. J. Hercock), 1721
Photographs of Paper Chromatograms : Quantitative Estimation of Purines by the Visual Scanning of (B. M. Johnstone and G. P. Briner), 681
Photographs (Powder) : Use of Synthetic Quartz Crystals as a Support for Specimens in (Hitosi Hagihara, Shuji Yamashita and Akitsu Takeda), 1666
Photography in the International Geophysical Year (Scientific and Technical Group of the Royal Photographic Society Symposium on), 1368
Photometer : Adaptation of a, for the Direct Recording of Column Chromatograms (Prof. M. Verzele), 604
Photometric Instruments and Microscopes : Exhibition of (Degenhardt and Co., Ltd.), 1164
Photoperiod-controlled Growth of *Weigela:* Gibberellin Effects on (Prof. Martin J. Bukovac and Harold Davidson), 59
Photoperiodism : Dark Fixation of Carbon Dioxide in *Kalanchoe blossfeldiana* in relation to (Dr. G. Zabka, Prof. F. G. Gregory and Dr. J. Edelman), 1375
Photoproduction and Scattering of Pions from Hydrogen : Interpretation of Resonance Energies in the (Dr. K. M. Guggenheimer), 1758
Photoreactivation of Nucleic Acid from Tobacco Mosaic Virus (F. C. Bawden and A. Kleczkowski), 503
Photospheric Granulation : 'Turbulence' and the (R. E. Loughhead and R. J. Bray), 240
Photosynthetic Phosphorylation : Interaction of Magnesium and Adenosine Diphosphate in (J. B. Mudd), 900
Phthiocerol : Structure of (Dr. H. Demarteau-Ginsburg, Dr. E. Lederer, Dr. R. Ryhage, Dr. S. Ställberg-Stenhagen and Prof. E. Stenhagen), 1117
Phycomyces : Effects of Starvation and Diphenylamine on Carotenoids in (T. N. R. Varma, Prof. C. O. Chichester and G. Mackinney), 188
Physical Acoustics and the Properties of Solids (Dr. Warren P. Mason), *review* by Prof. E. G. Richardson, 1221
Physical Agents : Method for Testing the Influence of Drugs and, upon Mitosis (Prof. Elio Guido Rondanelli, Pasquale Gorini and Domenico Pecorari), 190
Physical Anthropology : The Scope of, and its Place in Academic Studies—a Symposium held at the Ciba Foundation, 1957 (edited by D. F. Roberts and J. S. Weiner), *review* by Dr. Kenneth Little, 70
Physical Basis for Electrical Engineering (Prof. Thomas L. Martin, Jr.), *review* by Dr. D. A. Bell, 707
Physical Biochemistry at Canberra, 151
Physical Chemistry of High Polymers (Dr. Maurice L. Huggins), *review* by Prof. C. E. H. Bawn, 637
Physical Electronics : Solid State (Prof. Aldert van der Ziel), *review* by Dr. G. T. Wright, 1356
Physical Foundation of Biology (Prof. Walter M. Elsasser), *review* by Dr. W. Grey Walter, 955
Physical Method (A New), of Creating Chromosomal Aberrations (Dr. John H. Heller and Dr. A. A. Teixeira-Pinto), 905
Physical Sciences : Mathematics for the, *review* by Prof. T. A. A. Broadbent, 1703
Physical Society : Conference on Gas Discharges, 91
  Reports on Progress in Physics, Vol. 20 (1957), Vol. 21 (1958), (edited by A. C. Stickland), *review* by S. Weintroub, 138
  Conference on Nuclear Physics, 794
  Conference on Problems of Collective Motion in Physics, 866
  Biennial Conference on Solid State Physics (Interfacial Phenomena), 1097
  Conference on Co-operative Phenomena and Phase Transitions, 1234, 1643
Physical Society (Acoustics Group) : Symposium on Recent Studies of Noise Problems, 438
  Discussion on Of What Use is Acoustics to the Musician?, 1293
Physical Society (Acoustics Group), and the Institute of Physics : Symposium on New Techniques in the Analysis of Noise and Vibration, 438, 794
Physical Society (Low Temperature Group) : Symposium on Hydrogen Liquefaction and Associated Techniques, 1504
Physical Society, Italian : Summer Courses of the International School of Physics, 1368
Physical and Azeotropic Data—Hydrocarbons and Sulphur Compounds boiling below 200°C. (G. Claxton), *review* by Dr. B. A. Rose, 709
Physical and Chemical Exploration of the Cell, *review* by Dr. R. Barer, 1355
Physicist's Conception of Nature (Prof. Werner Heisenberg), *review* by Prof. W. H. McCrea, 1218
Physico-chemical Method (A Simplified), for Determination of Human Urinary Œstrogens (Dr. Tawfik El-Attar), 1607
Physico-chemical Studies (Exploratory), on the Sense of Taste (Dr. Aetius R. Lawrence and Lloyd N. Ferguson), 1469
Physics : Basic (Dr. A. R. Meetham), *review* by S. Weintroub, 354
  Dictionary of (compiled and edited by H. J. Gray), *review* by Prof. H. Lipson, 1768
  Information Theory and its Applications to Fundamental Problems in (Prof. L. Brillouin), 501
  International School of, of the Società Italiana di Fisica (Summer Courses of the), 1368
  Nuclear (Physical Society Conference on), 794
  Problems of Collective Motion in (Physical Society Conference on), 866
  Reports on Progress in (edited by A. C. Stickland), Vol. 20 (1957), Vol. 21 (1958), (Physical Society), *review* by S. Weintroub, 138
  Solid State (Prof. Adrianus J. Dekker), *review* by Prof. G. F. J. Garlick, 1007
  Solid State (Australian Branch of the Institute of Physics Conference on), 1643
Physics, American Institute of, in co-operation with the National Science Foundation : To publish an English translation of the *Astronomical Journal of the Academy of Sciences, U.S.S.R.*, under the title *Soviet Astronomy–AJ*, 1164
Physics, Institute of : Symposium on Current Developments in the Production of High Vacua, 368
Physics, Institute of (Stress Analysis Group), and the Instituut T.N.O. : Conference at the Technische Hoogeschool, Delft, 438
Physics, Institute of (X-Ray Analysis Group) : Conference on Clay Minerals and Biological Fibres, 1024
Physics, Institute of (X-Ray Diffraction and Electron Microscopy Groups) : Conference on Precipitation in Alloys, 796
Physics, Institute of (Acoustics Group of the Physical Society and the) : Symposium on New Techniques in the Analysis of Noise and Vibration, 438, 794
Physics, Institute of (Australian Branch) : Conference on Solid State Physics, 1643
Physics, Institute of, in collaboration with the British Nuclear Energy Conference : Symposium on Nuclear Fuel Cycles, 1646
Physics, Swedish National Committee for (University of Uppsala, in collaboration with the) : Fourth International Conference on Ionization Phenomena in Gases, 1164
Physics for the Electrical Engineer, *review* by Dr. D. A. Bell, 707
Physics (Atomic), and Human Knowledge (Dr. Niels Bohr), *review* by Prof. W. H. McCrea, 1218
Physics (Health), in Atomic Installations : The Scientific and Technical Aspects of (European Nuclear Energy Agency and the Danish Atomic Energy Commission Symposium on), 934
Physics (Nuclear) : Concepts of, *review* by Prof. B. H. Flowers, 492
  Elementary (W. K. Mansfield), *review* by R. Vaux, 1149
Physics and Chemistry : Low Temperature—Proceedings of the Fifth International Conference on Low Temperature Physics and Chemistry, Madison, 1957 (edited by Joseph R. Dillinger), *review* by Dr. K. Mendelssohn, 1150
Physics and Mathematics (Progress in Nuclear Energy, Series I, Vol. 2), (edited by D. J. Hughes, J. E. Sanders and J. Horowitz), *review* by Dr. J. Walker, 422
Physiological Dwarfing in Peach Seedlings : Temperature Control of (Prof. Bruce M. Pollock), 1687
Physiological Races of *Phytophthora infestans* Mont. (de Bary) in Northern Ireland (K. G. Proudfoot), 626

Physiological Sciences : Twenty-first International Congress of, 1304
Physiological Site of Anserine Formation : Pathways and the (Prof. Theodore Winnick and R. E. Winnick), 1466
Physiological and Anthropometric Principles in the Design of Office Chairs and Tables : Anatomical, (Dr. W. F. Floyd and Dr. D. F. Roberts), 1022
Physiologists (Plant), Canadian Society of : Election of Officers, 933
Physiology : Muscle, *review* by Dr. D. R. Wilkie, 1008
Physiology of the Cerebellum, *review* by Dr. C. G. Phillips, 954
Physiology (Plant), in Czechoslovakia (Prof. W. Stiles), 369
Physiology (Plant), at the Imperial College of Science and Technology, 220
Physiology (Plant) : Annual Review of (edited by A. S. Crafts, in association with Leonard Machlis and John G. Torrey), Vol. 9, *review* by Prof. W. Stiles, 1703
  Recent Developments in, *review* by Prof. W. Stiles, 1703
Physiology and Agriculture : Inorganic Micronutrients in, *review* by Dr. E. J. Hewitt, 1009
Physiology and Pathology of the Cerebellum (Prof. Robert Stone Dow and Prof. Giuseppe Moruzzi), *review* by Dr. C. G. Phillips, 954
Phytate (Dietary) : Effect of, on Faecal Absorption of Radioactive Ferric Chloride (Dr. Henry Foy, Athena Kondi and W. H. Austin), 691
Phytohaemagglutinin (Toxic), from Black Beans (*Phaseolus vulgaris*) : Purification of a (Dr. Werner G. Jaffé and Karl Gaede), 1329
Phytopathogenic Pseudomonads : Uronate Oxidation by (Wendell W. Kilgore and Prof. Mortimer P. Starr), 1412
Phytophthora infestans Mont. (de Bary) in Northern Ireland : Physiological Races of (K. G. Proudfoot), 626
Pichamuthu, Prof. C. S. : Trap-Shotten Rock from the Biligirirangan Hills, Mysore State, India, 483
Pick, M. J. : Interfacial Phenomena (Work of the J. Lucas Research Group on Electro-deposition), 1098
Pickford, Prof. R. W. : Experimental Studies of Perception, *review*, 1625
Pidgeon (Daniel) Fund for 1959 of the Geological Society of London awarded (in moieties) to Dr. M. K. Howarth and to Dr. M. J. S. Rudwick, 1434
Pierce, Charles Sanders : Collected Papers of (edited by Arthur W. Burks), Vol. 7, Science and Philosophy : Vol. 8, Reviews, Correspondence and Bibliography, *review* by F. I. G. Rawlins, 276
Pierce, E. T., and others : Geophysical Effects of High-Altitude Nuclear Explosions, 1476
Pierce, Prof. L. : Chemistry and Quantum Chemistry, 158
Pietra, Giuseppe, and others : Response of Newly Born Mice to a Chemical Carcinogen, 1689
Pietsch, Dr. E. : At the International Conference on Scientific Information (The Organization of the 'Handbuch für der anorganische Chemie'), 148
Pig Heart Muscle : Glutamic–Aspartic Transaminase of (B. E. C. Banks, K. G. Oldham, E. M. Thain and C. A. Vernon), 1187
Pigeons (Wood-) : Injury-feigning Behaviour of (C. S. Payne), 1643
Pigman, Ward (edited by) : The Carbohydrates—Chemistry, Biochemistry, Physiology, *review* by Prof. M. Stacey, 1079
Pigment (Carotenoid), in *Spirobacillus cienkowskii* Metchnikoff, a Pathogen of Cladocera (J. Green), 56
Pigment (Purple) : Formation of, in *Spirogyra pratensis* Cultures (Dr. Ann Allen and Dr. R. E. Alston), 1064
Pigment (Red) : A New Nitrogen-fixing Micro-organism producing a (Gy. Németh), 1460
Pigmented Mice (Albino and), receiving Furocoumarins—Psoralen and 8-Methoxypsoralen : Ultra-Violet Carcinogenesis in (M. A. Pathak, Prof. F. Daniels, jun., C. E. Hopkins and T. B. Fitzpatrick), 728
Pigments (Mixed), in Colour Vision (Dr. R. W. G. Hunt), 1601
Pigments (Urobilinoid) : Conjugated Forms of (I. L. Kahán and A. Kahán), 463
Pigments (Visual) : Action of Light on—Vertebrate Lumi- and Meta-Rhodopsins (Dr. Ruth Hubbard, Paul K. Brown and Dr. Allen Kropf), 442 ; Lumi- and Meta-Rhodopsins of Squid and Octopus (Dr. Allen Kropf, Paul K. Brown and Dr. Ruth Hubbard), 446 ; Chicken Lumi- and Meta-Iodopsin (Dr. Ruth Hubbard and Dr. Allen Kropf), 448
Pigou, Prof. A. C. : *Obituary* by the Rt. Hon. Philip Noel-Baker, 1089
Pigs : Glutaminase Activity of the Foetal Membranes and Kidneys of (Ingeborg C. Radde and Prof. R. A. McCance), 115
Pigs fed Standard Rations in the Tropics : A Possible Vitamin E Deficiency occurring in a Herd of (W. J. A. Payne), 929
Piiroinen, Pirkko (Kallio, Prof. Paavo, and) : Effect of Gibberellin on the Termination of Dormancy in some Seeds, 1830
Pilcher Memorial Prize of the Royal Aeronautical Society awarded to A. W. Kitchenside, 1649
Pileri, A., and others : Incorporation of Thymidine labelled with Tritium by Circulating Cells of Infectious Mononucleosis, 1691
Pilkington Brothers, Ltd. : New Process of Making Plate Glass, 293
Pillsbury, Dr. N. (Tonna, Dr. E. A., and) : Changes in the Osteoblastic and Mitochondrial Population of Ageing Periosteum, 337
Pilot Proficiency Measurement : Aviation Psychology in Western Europe and a Report on Studies of (Western-European Association for Aviation Psychology), 1092
Pilton, Phyllis E., and others : Œstrous Cycle, Gestation Period and Parturition in the Marsupial *Trichosurus vulpecula*, 622
Pincus, Gregory (edited by) : Recent Progress in Hormone Research, Vol. 14—Proceedings of the Laurentian Hormone Conference, 1957, *review* by Prof. F. G. Young, 1422
Pineal Eye Sensory Cells : Ultrastructure of (Dr. W. Steyn), 764
Pinner, Dr. S. H. : Plastics for the Practical Man, *review*, 851
  Enhancement of Radiation-induced Cross-linking of Polyvinyl Chloride, 1108
Pinocytosis : Molecular Orientation at the Surface of *Amoebae* during (Ronald C. Rustad), 1058
Pinnipedia : The, *review* by Prof. V. C. Wynne-Edwards, 1420
Pinter, Dr. G. G., and Zilversmit, Dr. D. B. : Lack of Effect of Histidine on Rabbit Atheromatosis, 1272
Pioneer 4 : United States, 720
Pions from Hydrogen : Interpretation of Resonance Energies in the Photoproduction and Scattering of (Dr. K. M. Guggenheimer), 1758
Piret, Dr. Edgar L. : Appointed Science Officer in the American Embassy in Paris, 15
Pirie, Antoinette : Crystals of Riboflavin making up the Tapetum Lucidum in the Eye of a Lemur, 985
Pirie, Antoinette, and others : Differential Distribution of Radioactive Strontium and Yttrium in the Tissues of the Rabbit's Eye, 802
Piston in a Hypersonic Gun Tunnel : A Microwave Method of determining the Displacement and Velocity of a (L. Pennelegion), 246
Pisum sativum and *Tropaeolum majus* : Effects of Wave-length and Time of Irradiation on Internode Length in (P. J. M. Sale and Dr. D. Vince), 1174
Pits (Etch), on Calcite Cleave Faces (Dr. H. Watts), 314 ; (R. C. Stanley), 1548
Pitt, G. J., and others : Smoke Emission of Low-Temperature Chars, 33
Pitt, Prof. H. R. : Tauberian Theorems, *review* by Prof. T. A. A. Broadbent, 1626
Pittaway, G. S. : Appointed lecturer in chemical engineering at the University of Birmingham, 438
Pitteway, M. L. V. : Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
Pittsburgh Award for 1958 of the Pittsburgh Section of the American Chemical Society awarded to Dr. Max A. Lauffer, 224
Pituitary of the Minnow : Distribution of Melanophore-aggregating Hormone in the (A. K. Kent), 544
Pituitary (Anterior) : Influence of the, on the Ageing Process in the Ovary (Dr. E. C. Jones and Prof. P. L. Krohn), 1155
Pituitary Gland of the Ferret : Seasonal Variations in the (Dr. R. L. Holmes), 1521
Pituitary Glands (Sheep Anterior) : Bioassay of (Dr. D. R. Lamond, H. M. Radford and A. L. Wallace), 1597
Place of Science in Universities Past and Present (Rt. Hon. Lord Adrian), 1706
Placenta (Human), and other Mammalian Organs : Juvenile Hormone in Thymus, (Prof. Carroll M. Williams, Lynn V. Moorhead and Jean F. Pulis), 405
Plaice : Leucocytosis in Response to Bacteraemia as a Feature of the Acute Radiation Syndrome in the (A. Preston), 832
Plain Carbon Steels : Structure of Scale on (Dr. S. Garber), 1387
Plains : Effect of Residual House Spraying in the, on Anopheline Densities in Huts on the Pare Mountains (Dr. A. Smith), 198
Planet : The Russian Artificial, 83
Planet 2 : Artificial, 720
Planetary Nebulae in the Large Magellanic Cloud (E. M. Lindsay), 453
Planets (Artificial) : Verification of General Relativity by means of (John J. Gilvarry), 666
Planing : Wear of Graphite Surface by Punching and (Dr. Robert H. Savage), 454
Planktonic Ctenophore, *Pleurobrachia globosa* Moser 1903, from the Madras Coast : Metacercaria (Allocreadioidea) in the (Sita Anantaraman), 1407
Planning of Experiments (Dr. D. R. Cox), *review* by Dr. D. J. Finney, 1766
Planning (Land), in the Tropics : Scientific Basis of (Prof. L. Dudley Stamp), 20
Planococcus citri (Risso) : Triple Coitus in the Mealy Bug (Walter A. Nelson-Rees), 479
Plant (Corn) : An Antifungal Substance in the, and its Effect on Growth of Two Stalk-rotting Fungi (N. J. Whitney and C. G. Mortimore), 341
Plant (Food-) : Insect and (Proceedings of a Symposium on, Wageningen, 1957, under the auspices of the Comité Européen de Zoologie Agricole and the Agricultural University, Wageningen), *review* by Dr. C. J. Banks, 1767
Plant (Nuclear Power) : Steam Cycles for (W. H. Wootton), *review* by R. Vaux, 1149
Plant (Tea) : Nomenclature and Classification of the (Dr. W. Wight), 1726
Plant (Wild), grown on Uraniferous and Non-Uraniferous Soils : Comparative Sensitivity to Radiation of Seeds from a (Dr. D. J. Mewissen, J. Damblon and Prof. Z. M. Bacq), 1449
Plant Ashes and Animal Bones : Radioactivity of Soils, (Sir Ernest Marsden), 924
Plant Breeding, Indian Society of Genetics and : Election of Officers for 1959, 722
Plant Breeding Station, Njoro, Kenya (H. C. Thorpe), 1307
Plant Design : Instrumentation and Computation in Process Development and (Institution of Chemical Engineers, the Society of Instrument Technology and the British Computer Society Joint Symposium on), 652
Plant Ecology of Ancient Periods (Prof. Tom M. Harris), 1370
Plant Extracts : Separation of Anthocyanins from (Dr. B. V. Chandler and Dr. T. Swain), 989
Plant Growth Regulators : Geotropic and Morphological Alterations in Rice Seedlings caused by (E. H. Roberts), 1197
Plant-Growth Substances : Metal-Chelating Properties of (W. L. F. Armarego, M. J. Canny and S. F. Cox), 1176 ; (Prof. O. V. S. Heath and J. E. Clark), 1177
Plant Morphogenesis (Prof. C. W. Wardlaw), 584
Plant Phenolics Group : Symposium on Phenolics in Plants in Health and Disease, 510
  Discussion on the Chemistry of Condensed Tannins, 1168
  International Symposium on Humic Acid, 1719
Plant Physiologists, Canadian Society of : Election of Officers, 933
Plant Physiology in Czechoslovakia (Prof. Walter Stiles), 369
Plant Physiology at the Imperial College of Science and Technology, 220
Plant Physiology : Annual Review of (edited by A. S. Crafts, in association with Leonard Machlis and John G. Torrey), Vol. 9, *review* by Prof. W. Stiles, 1703
  Recent Developments in, *review* by Prof. W. Stiles, 1703
Plant Protein Foodstuffs : Processed (edited by Aaron M. Altschul), *review* by Dr. Magnus Pyke, 351
Plant Species : Population Differentiation within, in Response to Soil Factors (A. D. Bradshaw and R. W. Snaydon), 129, *erratum*, 368
Plant Tissue Cultures : Absorption of Alkali Cations by (Dr. J. F. Sutcliffe and E. R. Counter), 1513
Plant Tissues : Malonate Metabolism by (Prof. Leland M. Shannon, Roger H. Young and Carlton Dudley), 683
Planteydt, H. T. (Willighagen, R. G. J., and) : Aminopeptidase Activity in Cancer Cells, 263
Plants : Amino-Acid Composition of the Proteins of Barley Leaves in relation to the Mineral Nutrition and Age of (Dr. B. P. Pleshkov and Dr. L. Fowden), 1445
  Bibliography on the Effects of Ionizing Radiations on, 1895-1955 (Arnold H. Sparrow, John P. Binnington and Virginia Pond), *review* by Dr. Alma Howard, 639

  Experimental Approaches to the Problems of Growth and Form in (Experimental Morphology Group of the Linnean Society Symposium on), 584
  Separation of Specific and Non-Specific Effects of Chemicals on (Prof. T. J. Muzik and J. M. Lawrence), 482
Plants in Health and Disease : Phenolics in (Plant Phenolics Group Symposium on), 510
Plants and Fall-out (F. R. Fosberg), 1448
Plants (Deciduous Woody) : Effect of Gibberellic-Acid on Development of Autumn Colour and Leaf-fall of (Dr. P. W. Brian, J. H. P. Petty and P. T. Richmond), 58
Plants (Grass), with Separation of Seminal and Adventitious Roots : A Method of Growing (R. Dorrington Williams), 415
Plants (Higher) : Adaptive Synthesis of Nitrate Reductase in (Dr. E. J. Hewitt and M. M. R. K. Afridi), 57
Plants (Marine) : Chlorophyll *a* in some Corals and (Dr. Paul R. Burkholder, Lillian M. Burkholder and Juan A. Rivero), 1338
Plants (Pasture) : Uptake of Strontium by, and its Possible Significance in relation to the Fall-out of Strontium-90 (Dr. P. B. Vose and Dr. H. V. Koontz), 1447 ; (Dr. R. Scott Russell and Dr. R. V. Garner), 1806
Plaque of the New York Academy of Medicine awarded to Montgomery B. Angell, 294
Plaque Formation by Fowl Plague Virus : Effect of Neutral Red on (Dr. A. P. Waterson), 628
Plaque Production with Yellow Fever and related Arthropod-borne Viruses (J. S. Porterfield), 1069
Plasma of Thyrotoxic Patients : An Iodine Compound associated with Albumin in the (Christina Cameron and K. Fletcher), 116
Plasma (Human) : Preparation of Caeruloplasmin from the *G*2 Fraction of (Dr. G. Curzon and L. Vallet), 751
  Slow Contraction of Smooth Muscle produced by (Dr. Yousry Gabr and Raga H. Aly), 897
Plasma (Platelet-rich) : Appearance of a Phosphorus Compound in, on Clotting (Dr. G. V. R. Born and Dr. M. P. Esnouf), 478
Plasma (Sheep), and Red Cells : Equilibration of Labelled Magnesium between (A. D. Care, D. C. Macdonald and B. Nolan), 1265
Plasma and Serum through Glass Capillaries : An Equation for the Flow of Blood, (Dr. G. W. Scott Blair), 613
Plasma-heating Mechanism : A Non-Thermal Direct-Current (Daryl Reagan), 102
Plasmas (Ionized) : Propulsion by Ions and (Dr. A. von Engel), 573
Plastic Sheet Forming (Robert L. Butzko), *review* by Dr. S. H. Pinner, 851
Plastics : Reinforced (British Plastics Federation Conference on), 24
Plastics for the Practical Man, *review* by Dr. S. H. Pinner, 851
Plastics Abstracts (Plastics Investigations), 436
Plastics Federation, British : Conference on Reinforced Plastics, 24
Plastics Investigations : Publication of *Plastics Abstracts*, 436
Plate Glass : New Process of making (Pilkington Brothers, Ltd.), 293
Platelet-rich Plasma : Appearance of a Phosphorus Compound in, on Clotting (Dr. G. V. R. Born and Dr. M. P. Esnouf), 478
Platelets : Histochemical Demonstration of A and B Antigens in (Dr. B. D. Janković and K. Arsenijević), 695
Platelets (Human Blood) : Taurine in (Julian Frendo, Aleksander Koj and Jan M. Zgliczyński), 685
Platinum Electrode : Cyclic Alternating-Current Voltammetry with a (André L. Juliard), 1040
Platinum Medal of the Institute of Metals awarded to Dr. L. B. Pfeil, 793
Platinum Metals : Borides and Silicides of the (B. Aronsson, J. Åselius and E. Stenberg), 1318
Platteeuw, Dr. J. C. (van der Waals, Dr. J. H., and) : Validity of Clapeyron's Equation for Phase Equilibria involving Clathrates, 462
Plenderleith, Dr. H. J. : Retirement from the keepership of the Research Laboratory of the British Museum, 791 ; work of, 791
Pleshkov, Dr. B. P., and Fowden, Dr. L. : Amino-Acid Composition of the Proteins of Barley Leaves in relation to the Mineral Nutrition and Age of Plants, 1445
Pleurobrachia globosa Moser 1903 from the Madras Coast : Metacercaria (Allocreadioidea) in the Planktonic Ctenophore (Sita Anantaraman), 1407
Plimmer, R. N. A., and others : Changes in the Inclination of Satellite Orbits to the Equator, 239
Ploidy of Primary and Metastatic Human Tumours (Dr. Giancarlo Rabotti), 1276
Plowden, Sir Edwin : Life peerage conferred on, 294
Plumb, Mary Ellen (Grosch, Prof. Daniel S., and) : A Sex Difference in Radioactivity of *Artemia* cultured in Sea Water containing Phosphorus-32, 122
Plutonium : Battelle Memorial Institute new laboratory for research on, 720
  Charges for Uranium-233 and (United States Atomic Energy Commission), 84
Po-Chedley, D. S. : Electrophoretic Patterns of Mealworm Proteins, 62
Pochon, Dr. J. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Podio, Dr. Giuseppe, and others : Antiviral Activity of Lysozyme, 548
Pogonophora in the Hardangerfjord, Western Norway (Prof. Hans Brattström), 1458
Pohlia nutans : Effects of Kinetin, Gibberellic Acid and certain Auxins on the Development of Shoot Buds on the Protonema of (Dr. G. C. Mitra and Dr. A. Allsopp), 974
Point of View : The Employee's, 371
Poisoning (Oxygen), in the Rat : Effects of Deficiency of Pantothenic Acid on (Dr. D. W. Taylor), 257
Poisson's Law and the Frequency of Hurricanes (Dr. Charles H. Smiley), 814
Polachek, Harry : Appointed chairman of the editorial committee for the journal *Mathematical Tables and other Aids to Computation*, 865
Poland : The Birds of (Ptaki Ziem Polskich), (Jan Sokolowski), Tom 2, *review* by B. Nowosielski-Slepowron, 73
Polani, Dr. P. E., and others : A Presumptive Human *XXY/XX* Mosaic, 1030
Polanyi, Prof. M. : The Role of the Scholar in Society, 1772
Polar Atmosphere Symposium, Oslo, 1956 ; Part 1, Meteorology Section (edited by R. C. Sutcliffe) ; Part 2, Ionospheric Section (edited by K. Weekes), *review* by James Paton, 279
Polarizability of Ions and other Significant Properties : Relation between the (Prof. K. Krishnamurti), 1043
Polarization Microscopy : Analysis of Mast Cells by means of (Prof. Leslie Horváth), 1067
Polarographic Research Society, British : Course in Polarography, 18
Polarography : Course in (British Polarographic Research Society), 18
  Direct Determination of Drug Concentrations in Biological Fluids by (Dr. P. O. Kane), 1674
Polarography of Aromatic Hydrocarbons (H. J. Gardner), 320
Polarography of Pentacyanocobaltate (III) Complexes (Nobufumi Maki, Junnosuke Fujita and Ryutaro Tsuchida), 458
Pole, Dr. David : The Later Philosophy of Wittgenstein, *review* by F. I. G. Rawlins, 494
Polgár, L. (Dénes, Dr. G., and) : *T*2 Phage Infection of Protoplasts' obtained by Penicillin Treatment of *Escherichia coli B*, 696
Policies (Social), and Social Change, *review* by M. P. Hall, 1147
Policy (Public) : Science and (Dr. J. R. Killian), 1215
Poliomyelitis Virus : Structure of (J. T. Finch and Dr. A. Klug), 1709
Polish Academy of Sciences : *Acta Biologica Cracoviensia*, Vol. 1, No. 1, 1781
Polish Scientific Books : Exhibitions at Oxford, Cambridge and Glasgow, 582
Polish State Publishing House for Scientific Literature, Warsaw : Exhibitions in Oxford, Cambridge and Glasgow of Polish scientific books, 582
Political and Economic Planning : Broadsheet No. 427, Prospects for Television, 222
  Broadsheet No. 428, The Development of the Steel Industry, 222
  Broadsheet No. 429, Paying for the Railways, 938
Pollard, Dr. Morris (Starr, Dr. Theodore J., and) : Complement Fixation with Tissue Culture and Liver Antigens of Mouse Hepatitis, 1690
Pollen (Atmospheric), in relation to Land Use (H. A. Hyde), 1694
Pollock, Prof. Bruce M. : Temperature Control of Physiological Dwarfing in Peach Seedlings, 1687
Pollution from Power Station Chimneys, 85
Pollution (Air) Control Association : Annual Meeting, 722
Pollution Research (Water), 1957—the Report of the Water Pollution Research Board with the Report of the Director of the Water Pollution Research Laboratory, 161
Polmear, I. J. : Fatigue Properties of Ternary Aluminium–Zinc–Magnesium Alloys, 1388
Polonium–Actinium (Chemistry of the Rare Radioelements), (Dr. K. W. Bagnall), *review* by G. R. Hall, 962
Polonsky, J. : Awarded the Mullard Premium of the Television Society, 1161
Polskich : Ptaki Ziem (The Birds of Poland), (Jan Sokolowski), Tom 2, *review* by B. Nowosielski-Slepowron, 73
Poly-β-Benzyl-L-Aspartate : α-Helices and a New Polypeptide Fold in (E. M. Bradbury, L. Brown, A. R. Downie, Dr. A. Elliott, W. E. Hanby and T. R. R. McDonald), 1736
Poly-β-Hydroxybutyric Acid : A Group of Pseudomonds able to synthesize (M. B. Morris and J. B. Roberts), 1538
  Role of, in the Assimilation of Organic Carbon by Bacteria (Prof. M. Doudoroff and Prof. R. Y. Stanier), 1440
Poly-*cis*-carotenes : Isomerization of, by Chlorophyll *in vivo* and *in vitro* (Dr. H. Claes and T. O. M. Nakayama), 1053
Poly-L-tyrosine : Optical Rotation and Configuration of (A. R. Downie, Dr. A. Elliott and W. E. Hanby), 110
Polyamide Resins (Don E. Floyd), *review* by Dr. S. H. Pinner, 851
Polychaetes (Errant) : Role of the Supraoesophageal Ganglion during the Early Stages of Caudal Regeneration in some (Dr. R. B. Clark and M. E. Clark), 1834
Polycrystalline Cadmium Sulphide and Polyethylene : Conductivity induced by Radiation in (C. G. Clayton, B. C. Haywood and Dr. J. F. Fowler), 1112
Polycyclic Aromatic Hydrocarbons added to Wax : Milk as an Eluant of (Dr. Hans L. Falk, Dr. Paul Kotin and Adele Miller), 1184
Polyethylene : Conductivity induced by Radiation in Polycrystalline Cadmium Sulphide and (C. G. Clayton, B. C. Haywood and Dr. J. F. Fowler), 1112
Polyethylene (Irradiated) : A Dose Test for (E. H. Cornish and D. M. Cutting), 1804
Polygenes controlling Size of Ascospore in *Neurospora crassa* : Linkage of (B. T. O. Lee and J. A. Pateman), 698
Polygons (Stone), in North Wales : Stability of (John H. Tallis and Dr. K. A. Kershaw), 485
Polymer Chemistry, *review* by Prof. C. E. H. Bawn, 637
Polymer (High) Forum : Ninth Canadian (National Research Council of Canada, in co-operation with the Chemical Institute of Canada), 1643
Polymerization (Vinyl), by Radical Mechanisms : The Kinetics of (Dr. C. H. Bamford, Dr. W. G. Barb, Dr. A. D. Jenkins and Dr. P. F. Onyon), *review* by Prof. C. E. H. Bawn, 637
Polymers : A Survey of (Oil and Colour Chemists' Association Conference on), 652
Polymers (High) : Direct Examination of the Degradation of, by Gas Chromatography (Dr. R. S. Lehrle and Prof. J. C. Robb), 1671
  Physical Chemistry of (Dr. Maurice L. Huggins), *review* by Prof. C. E. H. Bawn, 637
Polymers (Natural and Synthetic High) : The Effects of Ionizing Radiation on (Dr. Frank A. Bovey), *review* by Prof. C. E. H. Bawn, 637
Polymers (Stereospecific), and Block and Graft Co-polymers (Bradford Institute of Technology Course on), 224
Polymorphic Conversion of Mercuric Iodide on Alumina (Prof. Harry Zeitlin and Harry Goya), 1041
Polymorphic Transitions in Anhydrous Sodium Sulphate (Dr. C. N. R. Rao and L. V. Gregor), 1391
Polymorphism in Micas : Structural Control of (E. W. Radoslovich), 253
Polymorphism (β-Globulin), and Early Foetal Mortality in Cattle (Dr. G. C. Ashton), 404
β-Polymorphs of Uranium and Thorium Disilicides (A. Brown and J. J. Norreys), 673
Polynomial Representation of Steam Tables (W. G. Berry, G. Black and J. A. Enderby), 598
Polynucleotide Phosphorylase : Inhibition of, by Degraded Ribonucleic Acid—its Reversal by various Agents (Dr. Roland F. Beers, jun.), 1335
Polynucleotide Phosphorylase from Sperm : Synthetic Activity of (Prof. Anwar A. Hakim), 334
Polynucleotides : A Proposed Interpretation of Infra-red Spectral Changes occurring upon the Interaction of (H. Todd Miles), 1814
SE Polyoma Virus : Induction of Subcutaneous Nodules in Rabbits with the (Dr. Bernice E. Eddy, Sarah E. Stewart, Ruth L. Kirschstein and Ralph D. Young), 766
Polypeptide Fold (A New), in Poly-β-Benzyl-L-Aspartate : α-Helices and (E. M. Bradbury, L. Brown, A. R. Downie, Dr. A. Elliott, W. E. Hanby and T. R. R. McDonald), 1736

Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b* : Infra-red and the Near Ultra-Violet Absorption Spectra of (Dr. C. N. R. Rao, J. Ramachandran, M. S. C. Iah, S. Somasekhara and T. V. Rajakumar), 1475

Polypropylene in Britain : Manufacture of, 1162

Polysaccharide Fibres in Mammalian Connective Tissue (A. J. Cruise and J. W. Jeffery), 677

Polysaccharides : Determination of Molecular Weights of, by Over-oxidation with Periodate (F. W. Parrish and Dr. W. J. Whelan), 991

Polysaccharides in Biology—Transactions of the Second Josiah Macy Jr. Foundation Conference, Princeton, 1956 (edited by Dr. George F. Springer), *review* by Prof. M. Stacey, 1219

Polystyrene : Cohesive Energy Density of (Dr. J. H. S. Green), 818

Polystyrene (Cross-linked) : Immuno-chemically Active (L. H. Kent and J. H. R. Slade), 325

Polytechnic Management Association : Urwick Medal for Management Studies, 1643

Polytetrafluoroethylene : Resin-bonded Coatings of (Acheson Colloid, Ltd.), 1501

Polyurethanes (Bernard A. Dombrow), *review* by Dr. S. H. Pinner, 851

Polyvinyl Chloride : Enhancement of Radiation-induced Cross-linking of (Dr. S. H. Pinner), 1108

Pomeranz, Y. : Moisture Content of Whole Bread and Bread Crumb, 1122

Pond, Virginia, and others : Bibliography on the Effects of Ionizing Radiations on Plants, 1896-1955, *review* by Dr. Alma Howard, 639

Pond-stored Logs : Bacterial Action in (Eric L. Ellwood and Barton A. Ecklund), 1206

Ponder, Dr. Eric : Haemoglobin and 'Apparent Protein' in the Human Red Cell, 1330

Popham, Dr. Edward J. : Respiration of Corixidae (Hemiptera–Heteroptera), 914

Pople, Dr. J. A. : Relaxation Processes (Ultrasonic Relaxation observed in Toluene), 584

Popov Gold Medal of the Academy of Sciences of the U.S.S.R. awarded to Dr. Louis Essen, 1502

Popper, Prof. Karl R. : The Logic of Scientific Discovery, *review* by Dr. E. H. Hutten, 1078

  Darwinism and the Study of Society, 1563

Popularizing Astronomy, 1019

Population (Osteoblastic and Mitochondrial), of Ageing Periosteum : Changes in the (Dr. E. A. Tonna and Dr. N. Pillsbury), 337

Population Density (Larval) : Influence of, on Fluctuation in Mosquito Numbers (Gordon Surtees), 269

Population Differentiation within Plant Species in Response to Soil Factors (A. D. Bradshaw and R. W. Snaydon), 129, *erratum*, 368

Population Ecology, *review* by Dr. A. Milne, 1220

Population Studies—Animal Ecology and Demography (Cold Spring Harbor Symposia on Quantitative Biology, Vol. 22), *review* by Dr. A. Milne, 1220

Population Studies (Bacterial), in the Chemostat, *review* by Dr. A. C. R. Dean, 424

Populations (Bacterial), maintained in the Chemostat : The Dynamics of (Hermann Moser), *review* by Dr. A. C. R. Dean, 424

Populations (Eskimo and Indian), of Alaska : Urinary Excretion of β-Amino*iso*butyric Acid in (Dr. A. C. Allison, Dr. B. S. Blumberg and Dr. S. M. Gartler), 118

Populations (Testing) of Beet Eelworm, *Heterodera schachtii* Schmidt, for Resistance-breaking Biotypes, using the Wild Beet (*Beta patellaris* Moq.) as Indicator (Audrey M. Shepherd), 1141

Porath, Dr. Jerker, and Flodin, Dr. Per : Gel Filtration—a Method for Desalting and Group Separation, 1657

Poria vaillantii (D. C. ex Fr.) Cke. Strains : Abnormal Resistance of, to Copper-Chrome–Arsenate Wood Preservatives (E. W. B. Da Costa), 910

Porous Media : Permeability of (Dr. R. J. Millington and Dr. J. P. Quirk), 387

Porphyrins and Chlorins : Detection of Hydroxyl Groups in (J. Barrett), 1185

Porpoise (*Phocaena phocaena*) : Audio-direction Finding in the (W. H. Dudok van Heel), 1063

Porter, C. A., and others : Evidence for the Conversion of Quinic Acid to Shikimic Acid in Roses, 326

Porter, G., and others : Measuring Productivity in Breeding of Small Animals, 339

Porter, Dr. Helen K. : Appointed to the chair of plant physiology in the Imperial College of Science and Technology, 220 ; work of, 220

Porter, Dr. Roger S., and Johnson, Dr. Julian F. : Circular Gas Chromatograph, 391

Porterfield, J. S. : Plaque Production with Yellow Fever and related Arthropod-borne Viruses, 1069

Portland Cement (Hardened), during Testing : Errors caused by Partial Drying of (Dr. K. M. Alexander), 885

Portuguese Guinea : Haemoglobin *N* in (Prof. Carlos Trincão, L. T. de Almeida Franco and A. R. Nogueira), 193

Position of the Fatty Acids in Cardiolipin (Dr. Marjorie G. Macfarlane and L. W. Wheeldon), 1808

Position and Functions of the Research Associations, 275

Position-Effect Explanation of Gene Conversion (Prof. J. A. Serra), 700

Positions of Protons in Aluminium Hydroxides derived from Proton Magnetic Resonance (Structure of some Hydroxides and Hydrous Oxides), (D. J. Kroon and C. v. d. Stolpe), 944

Pospíšil, M., and others : Stress Activation of Adrenal Glomerulosa, 1819

Possibility of Assortive Mating in the Arctic Skua (P. O'Donald), 1210

Possibility of Ion Runaway in ZETA (Dr. A. Gibson), 101

Possibility of Distinguishing between Substances shown on Electron Micrographs (Dr. Robin C. Valentine), 761

Possible Causes of Geomagnetic Fluctuations having a 6-Sec. Period (H. J. Duffus, J. A. Shand and Sir Charles Wright), 1479, *erratum*, 1783

Possible Character for the Identification of Sharks : Red Muscle as a (Olaf R. Braekkan), 556

Possible Enzymic Mechanism for the Development of Resistance against Fluorouracil in Ascites Tumours (Dr. Peter Reichard and Ola Sköld, and Prof. George Klein), 939

Possible Experimental Test of Einstein's Second Postulate (Prof. Herbert Dingle), 1761

Possible Negative Feedback Phenomenon controlling Formation of Alkaline Phosphomonoesterase in *Escherichia coli* (T. Horiuchi, S. Horiuchi and D. Mizuno), 1529

Possible Role of Sulphur Compounds : Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in Salt Water, and the (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346

Possible Role of Water in Collagen Structure (R. D. B. Fraser and T. P. Macrae), 179

Possible Significance in relation to the Fall-out of Strontium-90 : Uptake of Strontium by Pasture Plants and its (Dr. P. B. Vose and Dr. H. V. Koontz), 1447

Possible Vitamin E Deficiency occurring in a Herd of Pigs fed Standard Rations in the Tropics (W. J. A. Payne), 828

Post Office and Industry : Exchange of Personnel between the, 16

Postdoctoral Fellowships : Graduate and (National Science Foundation), 1233

Postelnek, William, and others : Aliphatic Fluorine Compounds, *review* by Prof. R. N. Haszeldine, 139

Posterior Salivary Glands of Cephalopods : Cephalotoxin, the Crab-paralysing Agent of the (Dr. F. Ghiretti), 1192

Postgate, Dr. John : A Diagnostic Reaction of *Desulphovibrio desulphuricans*, 481

Postgraduate Course in Biochemical Engineering (University College, London), 933

Postgraduate Lecture Course on Recent Advances in Protein Chemistry (Department of Chemistry, Biology and Geology of the Kingston Technical College), 86

Postgraduate Training Grants in Fishery Research (Development Commissioners, in association with the Ministry of Agriculture, Fisheries and Food, and the Scottish Home Department), 1094

Postlethwait, Dr. S. N., and others : Use of Radioactive Tracers in Studies of the Shoot Apex, 1580

Post-synaptic Membranes : Submicroscopic Organization of (Dr. B. Csillik), 1684

Postulate (Einstein's Second) : A Possible Experimental Test of (Prof. Herbert Dingle), 1761

Potassium : Distinction between Sodium and, in Change of Permeability effected by Lipid-soluble Analogues of Acetylcholine (Dr. Wolf D. Dettbarn), 465

Potassium Chloride (Isosmotic) : Excitation of the Squid Axon Membrane in (Dr. John W. Moore), 265

Potassium, Calcium and Chloride Ion Contents and Protein Fractions in the Fluids of Chick Embryos: Sodium, (Dr. Aleksandra Smoczkiewiczowa), 1260

Potato : Differential Response of Human Serum Cholinesterase Types to an Inhibitor in (Dr. H. Harris and Mary Whittaker), 1808

Potato *D*-Enzyme : Synthesis of Amylose by (Dr. Gwen J. Walker and Dr. W. J. Whelan), 46

Potato Root Eelworm, *Heterodera rostochiensis* Wollenweber : Chromosome Number of the (J. Cotten), 128

Potential for Peacetime Uses : On Nuclear Energy—its (Dr. Donald J. Hughes), *review* by Prof. G. O. Jones, 1077

Potential (Generator), in a Receptor Membrane : Spontaneous Fluctuations in (Properties of a Receptor Membrane), (Nobusada Ishiko and Prof. Werner R. Loewenstein), 1725

Potential Records : Relation of Extracellular to Intracellular, from Single Cardiac Muscle Fibres (Dr. E. M. Vaughan Williams), 1341

Potentially Mutant State in Bacteria : Linear Transfer of a (Dr. F. Kaudewitz), 871

Potentials (Electrode), and Compound Formation in the Palladium–Platinum–Hydrogen System (A. W. Carson, Dr. T. B. Flanagan and Dr. F. A. Lewis), 39, 510

Potentials (Ionization), of Electron Donors (Dr. R. Foster), 1253

Potentiometric Titration of Coal in a Non-Aqueous Medium (W. J. S. Pringle), 815

Potter, Dr. C. : *Obituary* of Dr. F. Tattersfield, 1778

Poultry Breast Muscles at Slaughter : Changes in *p*H and Temperature in (F. E. Peters and J. W. Dodge), 687

Pound (Avoirdupois) for Science and Technology : The Yard and the, 80

Powder Patterns of Ferroelectric Domains (G. L. Pearson and W. L. Feldmann), 367

Powder Photographs : Use of Synthetic Quartz Crystals as a Support for Specimens in (Hitosi Hagihara, Shuji Yamashita and Akitsu Takeda), 1666

Powell, Prof. C. F. : Space Research (Potential Value of Artificial Satellites to the Study of Fundamental Problems in the Physics of Cosmic Rays and Very High-energy Particles), 362

Powell, D. B., and Sheppard, N. : Co-ordination Chemistry (Metal Complexes of Amines and Ethylenediamine), 1784

Power : Fuel and, in Britain (Debate in the House of Lords on), 511

Power in Britain : Research on Fuel and, 507

Power in British Industry : Fuel and (A. M. Wandless), 154

Power, Ministry of : To set up a Committee on Chemicals, Oil and Gas from Coal, 1162

Power Plant (Nuclear) : Steam Cycles for (W. H. Wootton), *review* by R. Vaux, 1149

Power Station (Atomic), for Japan, 1019

Power Station (Atomic) : Training Courses at the Shippingport (United States Atomic Energy Commission), 153

Power Station (Nuclear) : The Chapelcross, 649 ; (J. C. C. Stewart), 1361

Power Station (Nuclear), on the Lleyn Peninsula, 222

Power Station Chimneys : Pollution from, 85

Power Stations : Advanced Gas-cooled Reactor, 508

Power Stations in Britain, 794

Poxviruses (Heat-inactivated) : Reactivation of—a General Phenomenon which includes the Fibroma–Myxoma Virus Transformation of Berry and Dedrick (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340

Practical Man : Plastics for the, *review* by Dr. S. H. Pinner, 851

Practice : Chemical Engineering (edited by Herbert W. Cremer and Trefor Davies), Vol. 5, Fluid Systems I, *review* by Prof. J. M. Coulson, 492

  Operational Research in—Report of a NATO Conference (edited by Max Davies and Michel Verhulst), *review* by Dr. Cecil Gordon, 424

  The Theory of (Dr. D. R. Cox), *review* by Dr. D. J. Finney, 1766

Prasad, A. N. : Gas Discharges (Measurements of Pre-breakdown Ionization Currents), 92

Pratt, Prof. D. B., and Waddell, G. : Adaptation of Marine Bacteria to Growth in Media lacking Sodium Chloride, 1208

Pratt, J. G. D. : Characteristics of the Antarctic Ice-Sheet, 1576
Prawirohardjo, Prof. Sarwono : Humid Tropics Vegetation, 795
Pre-Tertiary Stratigraphic Succession in Malaya (Geology and Palaeontology in Malaya), (J. B. Alexander), 230
Prealbumin as a Complex in the α-Globulin Fraction in Human Serum (Dr. J. R. Tata), 877
Precambrian Coelenterata from Australia, Africa and England (Dr. M. F. Glaessner), 1472
Precipitates (Specific), on Paper Electrophoresis Strips : Detection of Antigens as (S. Buttery), 686
Precipitating Antibodies present in the Serum of Cattle recovering from Foot-and-Mouth Disease : Changes in Specificity and Electrophoretic Mobility of the (F. Brown and J. H. Graves), 1688
Precipitation in Alloys (X-Ray Diffraction and Electron Microscopy Groups of the Institute of Physics Conference on), 796
Precipitation on a Dislocation (R. Bullough, R. C. Newman, J. Wakefield and J. B. Willis), 34
Precipitins (Granulocyte), of Human Tissues and Activated Sera (Dr. Leonhard Korngold, Gerda Van Leeuwen and Daniel G. Miller), 330
Precision Measuring Equipment (German) : Exhibition of (Degenhardt and Co., Ltd.), 1163
Precolostral Calf Serum : Immunological Activity of (J. L. Turk), 838
Precursor of Ascorbic Acid in Germinating Green Gram : Glucose-*cyclo*-Acetoacetate as a (Prof. M. C. Nath and M. L. Belkhode), 1258
Precursor of Tobacco Mosaic Virus : Infectious Ribonucleic Acid as (Reto Engler and Prof. Gerhard Schramm), 1277
Precursors of Mammalian Ribonucleic Acid *in vivo?* : Are Nucleoside Triphosphates (Prof. Paul Mandel, Jacques-David Weill, Marc Ledig and Suzanne Busch), 1114
Predatory Animals in Spain, 1782
Prediction in the Social Sciences : Matching and (W. A. Belson), 772
Preference in the Rat : The Water–Salt Receptor and (Dr. J. A. Deutsch and A. D. Jones), 1472
Preferences for Different Combinations of Chance and Skill in Gambling (Prof. John Cohen and C. E. M. Hansel), 841
Pregnancies : Sex Incidence of Vascular Lesions in Ageing Rats in relation to Previous (Prof. Theodore Gillman and Michael Hathorn), 1139
Pregnant Sheep : Adrenal Cortical Function in the (Kathleen W. Robinson), 690
Preliminary Information on the Genetics of Ethiopian Coffees (Dr. Alcides Carvalho), 906
Premiums for Papers published in the *Proceedings* during 1959 (Institution of Electronics), 1023
Premiums for Technical Writing (Radio Industry Council Awards), 1023
Preparation of Autoradiograms for Electron Microscopy (R. T. O'Brien and L. A. George, II.), 1461
Preparation of Ceruloplasmin (Dr. M. Steinbuch and M. Quentin), 323
Preparation of Caeruloplasmin from the *G*2 Fraction of Human Plasma (Dr. G. Curzon and L. Vallet), 751
Preparation of an Electron-dense Antibody Conjugate (Prof. S. J. Singer), 1523
Preparation of Programs for an Electronic Digital Computer (Dr. Maurice V. Wilkes, Dr. David J. Wheeler and Dr. Stanley Gill), second edition, *review* by E. L. Albasiny, 969
Preparation and the Haemoglobin Content of Red Cell 'Ghosts' (Helen M. Anderson and Dr. Joseph C. Turner), 112
Preparation, Maintenance and Application of Standards of Radioactivity (W. B. Mann and H. H. Seliger), 1023
Preparation and Sectioning of Tissues embedded in 'Araldite' for Electron Microscope Examination (J. M. Davis), 200
Preparations of Mammalian Skeletal Muscle : Synthesis of Adenylosuccinic Acid in (C. L. Davey), 995
Preparing Pectate Gels : An Improved Method for (Dr. A. M. Paton), 1812
Prerequisite to the Origin of the Metazoa : Oxygen as a (Dr. J. R. Nursall), 1170
Presence of Antigen—a Factor determining the Duration of Antibody Formation by Transferred Cells (Dr. J. Sterzl), 547
Presence of Griseofulvin in Hair of Guinea Pigs after Oral Administration (J. C. Gentles, M. J. Barnes and K. H. Fantes), 256
Presentation of Taxonomic Information—a Short Guide for Contributors to Flora Europaea (Dr. V. H. Heywood), 721
Presenting Science to the Public, 1569
Preservation of the Countryside in Britain, 917
Preservation of Rural Wales, Society for the (Caernarvonshire Branch) : Annual Report, 222
Preservation (Food) : Government Research on, 862
Preservation (Improved), of Tendon for Electron Microscopy through Wet Freeze-drying (Dr. David B. Scott and Marie U. Nylen), 1205
Preservatives (Copper–Chrome–Arsenate Wood) : Abnormal Resistance of *Poria vaillantii* (D.C. ex Fr.) Cke. Strains to (E. W. B. Da Costa), 910
President : A Statement by the, and Strengthening American Science—a Report of the President's Science Advisory Committee, 1215
President of the United States : Appointment of Prof. G. B. Kistiakowsky as special assistant for science and technology to the, 1639
President's Science Advisory Committee : A Statement by the President, and Strengthening American Science—a Report of the, 1215
Pressor Amines and Neuroblastoma (Dr. J. D. P. Graham), 1733
Pressure (Carbon Monoxide) : Behaviour of Dicobalt Octacarbonyl at Elevated Temperature and (Sol Metlin, Irving Wender and Heinz W. Sternberg), 457
Pressure (Colloid Osmotic), of Rheumatoid Synovial Fluid (Paavo Mäkinen and Eino Kulonen), 475
Pressure (High Oxygen) : Effect of, on the Protective Action of Cystamine and 5-Hydroxytryptamine in Irradiated Rats (H. A. S. van den Brenk and Ruth Moore), 1530
Preston, A. : Leucocytosis in Response to Bacteraemia as a Feature of the Acute Radiation Syndrome in the Plaice, 832
Preston, Prof. R. D., and others : Copper–Cellulose Complexes, 988
Prestwichia aquatica, the Fairy Fly (C. I. Ison), 1782
Presumptive Human *XXY/XX* Mosaic (Dr. C. E. Ford, and Dr. P. E. Polani, J. H. Briggs and Dr. P. M. F. Bishop), 1030
Preuss, Dr. H. : Chemistry and Quantum Chemistry, 158
Prevention : Disturbance in the Pattern of Serum Proteins in Experimental Atherosclerosis and its (Prof. M. C. Nath, A. Saikia and B. I. Uppin), 894
Prevention of Adaptive Formation of Tryptophan Peroxidase by a Carcinogenic Azo Dye (Dr. Silvio Fiala and Anna E. Fiala), 1532
Prevention of Freezing Damage to Living Cells by Dimethyl Sulphoxide (Dr. J. E. Lovelock and Dr. M. W. H. Bishop), 1394
Prevention of Road Accidents : Research on the, 649
Price, Prof. H. H. : Retirement from the Wykeham chair of logic in the University of Oxford, 792 ; work of, 792
Price, S. A., and Gare, L. : A Source of Error in Microbiological Assays attributable to a Bacterial Inhibitor in Distilled Water, 838
Price, Prof. W. C. : Elected a Fellow of the Royal Society, 861
Priestley, C. H. B. : Antarctic Meteorology (Heat and Mass Exchanges), 1503
Priestley, Sir Raymond : Appointed chairman of the British National Committee on Antarctic Research, 292
  Awarded the Founder's Medal of the Royal Geographical Society, 292
Primary Oocyte in the Rabbit : Content of Deoxyribonucleic Acid of the Germinal Vesicle of the (D. Van de Kerckhove), 329
Primary and Metastatic Human Tumours : Ploidy of (Dr. Giancarlo Rabotti), 1276
Primitive Flies : Origin of Indirect Flight Muscles in (Dr. H. E. Hinton), 557
Principle : *In vitro* Synthesis of the Crown-Gall Tumour-inducing (Alan J. Thomas and Richard M. Klein), 113
Principles underlying the Manufacture of Iron and Steel (Exhibition at the Science Museum, London), 293
Principles (Anatomical, Physiological and Anthropometric), in the Design of Office Chairs and Tables (Dr. W. F. Floyd and Dr. D. F. Roberts), 1022
Principles (Communication), at the Bell Telephone Laboratories, 648
Principles (Theoretical), of Organic Chemistry (Prof. Walter Hückel), Vol. 2, translated from the corrected seventh German edition by Prof. F. H. Rathmann, *review* by Dr. P. B. D. de la Mare, 852
Principles and Applications of Random Noise Theory (Dr. Julius S. Bendat), *review* by R. A. King, 353
Pringle, W. J. S. : Potentiometric Titration of Coal in a Non-Aqueous Medium, 815
Printed Circuits : The Technology of (Dr. Paul Eisler), *review* by J. C. Cluley, 1487
Probabilities (*A Priori*), in Gambling (C. H. A. Dale), 842
Probability (Stimulus and Response) : Effects of Independent Variations in (P. M. A. Rabbit), 1212
Probability (Transition) : Changes in, due to the Interaction of Rotation and Vibration in Diatomic Band Spectra (R. C. M. Learner and Dr. A. G. Gaydon), 242
Probert, R. P. : Awarded the Simms Gold Medal of the Royal Aeronautical Society, 1648
Probit (Marking): Dose–Response Relationship in Radiation Leukaemia—the (Dr. D. J. Mewissen), 401
Problem : The Lymphocyte (Prof. J. M. Yoffey), 76
Problem (Atlantic Eel) : A New Solution to the (Dr. Denys W. Tucker), 495
Problem (Eel) : Old and New Solutions to the (Prof. Umberto D'Ancona), 1405 ; (Dr. Denys W. Tucker), 1406
Problem of Cancer : Contribution of Electron Microscopy of Viruses and Cells to the (Electron Microscope Society of America Symposium on), 1719
Problems of Collective Motion in Physics (Physical Society Conference on), 866
Problems of Growth and Form in Plants : Experimental Approach to the (Experimental Morphology Group of the Linnean Society Symposium on), 584
Problems of Progress in Industry, 3, Management and Technology (Joan Woodward), 300
Problems (Basic), in Propulsion (Advisory Group for Aeronautical Research and Development of NATO Discussion on), 1094
Problems (Boundary), in Differential Equations (Mathematics Research Center, United States Army, Symposium on, at the University of Wisconsin), 224
Problems (Fundamental), in Physics : Information Theory and its Applications to (Prof. L. Brillouin), 501
Problems (Noise) : Recent Studies of (Acoustics Group of the Physical Society Symposium on), 438
Procedures (Purification) : Destruction of Cortisone and related Steroids by Traces of Copper during (Marvin L. Lewbart and Vernon R. Mattox), 820
Process (Ageing), in the Ovary : Influence of the Anterior Pituitary on the (Dr. E. C. Jones and Prof. P. L. Krohn), 1155
Process (New), of making Plate Glass (Pilkington Brothers, Ltd.), 293
Process Development and Plant Design : Instrumentation and Computation in (Institution of Chemical Engineers, the Society of Instrument Technology and the British Computer Society Joint Symposium on), 652
Processed Plant Protein Foodstuffs (edited by Aaron M. Altschul), *review* by Dr. Magnus Pyke, 351
Processes : Relaxation (Faraday Society Discussion on), 583
Processes (Separation), in Analytical Chemistry (Royal Institute of Chemistry Symposium on), 934
Processes (Simultaneous Decomposition), in Soils (H. F. Birch), 1415
Processes (Thought) : The Mechanization of (Symposium at the National Physical Laboratory), 225
Processing (Data) : Digitizers and other Equipment for (Hilger and Watts, Ltd.), 651
Production : Studies in the Mathematical Theory of Inventory and (Kenneth J. Arrow, Samuel Karlin and Herbert Scarf), *review* by Dr. L. S. Goddard, 1557
Production of Acid from Arabinose and Xylose by Strains of *Azotobacter* (Vagn Jensen), 1536
Production of Acute Insulin Deficiency by Administration of Insulin Antiserum (P. H. Wright), 829
Production of Amide Groups and Ammonia in the Radiolysis of Aqueous Solutions of Protein (Dr. Winifred Bennett and Dr. Warren M. Garrison), 889
Production of Bacterial Mutants with Nitrous Acid (Dr. Fritz Kaudewitz), 1829
Production of Extracellular Amylase by *Penicillium chrysogenum* : Inhibitory Action of Amino-Acid Esters on the (Dr. L. Horváth, S. Bajusz and A. Szentirmai), 477

Production of High Vacua : Current Developments in the (Institute of Physics Symposium on), 368
Production of 5-Keto-gluconic Acid by a Species of *Pseudomonas* (D. J. Stewart), 1133
Production of Silicon in Britain : Bulk (Imperial Chemical Industries, Ltd.), 932
Production and Use of Grass : Chemical Aspects of the (Dublin and District Section and the Agriculture Group of the Society of Chemical Industry Symposium on), 1783
Production (Antibody) : Changes in Lymphocytes during (K. W. Keohane and W. K. Metcalf), 195
Production (Excessive Uric Acid), in the Human induced by 2-Ethylamino-1,3,4-thiadiazole (Dr. J. E. Seegmiller, Arthur I. Grayzel and Lois Liddle), 1463
Production (Plaque), with Yellow Fever and related Arthropod-borne Viruses (J. S. Porterfield), 1069
Production (Winter Pasture) : Effects of Gibberellic Acid on (Dr. G. Scurfield and E. F. Biddiscombe), 1196
Production Characters in the Fowl : Effect of Controlled Lighting on (J. C. Bowman and J. D. H. Archibald), 1138
Production and Marketing of Radioactive Isotopes in Britain, 720
Productivity in Breeding of Small Animals : Measuring (Dr. W. Lane-Petter, Annie M. Brown, Margaret J. Cook, G. Porter and A. A. Tuffery), 339
Products (Condensation), of Ethylene-diamine with Adrenaline (Dr. Kunio Yagi and Dr. Toshiharu Nagatsu), 822
Proepithelial Regeneration in the Midgut of Beetles (A. Ameen and Dr. S. A. Shafiq), 913
Profession ? : Is Management a (Lyndall F. Urwick), 419
Professional Meteorology and Everyday Needs, *review* by James A. Taylor, 3
Proficiency Measurement (Pilot) : Aviation Psychology in Western Europe and a Report on Studies of (Western-European Association for Aviation Psychology), 1092
Progesterone (Injected) : Recovery of, and its relation to the Onset of Human Labour (Prof. Lars Ph. Bengtsson), 405
Programme for World Disarmament : The Arms Race, a (Philip Noel-Baker), *review* by R Brightman, 952
Programming (Automatic), of Digital Computers (Brighton Technical College Residential Working Conference on), 438, 1779
Programme (An Emerging), of Secondary School Mathematics (Prof. Max Beberman), 1366
Programs for an Electronic Digital Computer : The Preparation of (Dr. Maurice V. Wilkes, Dr. David J. Wheeler and Dr. Stanley Gill), second edition, *review* by E. L. Albasiny, 969
Progress of Astronomy : Report on the (J. H. Oort, F. T. Kerr and G. Westerhout), 1308
Progress in British Forestry (Sir Harry Champion), 1100
Progress of the Five-Year Defence Plan (White Paper on), 1483
Progress in Hormone Research : Recent—Vol. 14, Proceedings of the Laurentian Hormone Conference, 1957 (edited by Gregory Pincus), *review* by Prof. F. G. Young, 1422
Progress in Industry : Problems of, 3, Management and Technology (Joan Woodward), 300
Progress in Nuclear Energy : Series 1, Physics and Mathematics, Vol. 2, (edited by D. J. Hughes, J. E. Sanders and J. Horowitz), *review* by Dr. J. Walker, 422
Progress in Organic Chemistry : Recent (International Symposium on, Mexico), 294
Progress in Physics : Reports on (edited by A. C. Stickland), Vol. 20 (1957), Vol. 21 (1958), (Physical Society), *review* by S. Weintroub, 138
Progress in Vitamin and Hormone Research, *reviews* by Prof. F. G. Young, 568, 778
Progress (Educational), in Scotland : Intelligence, Family Background and, *review* by Jean Floud, 493
Prolonged Muscular Activity without Phosphate Exchange (Prof. Jacob Sacks), 825
Prolonged Survival of *Trichomonas vaginalis* at -79°C. (Dr. M. G. McEntegart), 270
Prolonging Dormancy in *Vitis vinifera* with Gibberellin (Robert J. Weaver), 1198
Promethium : Structural Chemistry of (M. Bruno and Prof. U. Croatto), 601
Propagation of Finite Elastic Waves in Rubber (P. Mason), 812
Propellants : Chemistry of (Advisory Group for Aeronautical Research and Development of NATO Meeting on), 1094
Properties of a Receptor Membrane—Spatial Summation of Electric Activity in a Non-myelinated Nerve Ending (Prof. Werner R. Loewenstein), 1724 ; Spontaneous Fluctuations in Generator Potential in a Receptor Membrane (Nobusada Ishiko and Prof. Werner R. Loewenstein), 1725
Properties of Solids : Physical Acoustics and the (Dr. Warren P. Mason), *review* by Prof. E. G. Richardson, 1221
Properties (Biological), of the S-(Methylcarbamyl) Methyl O,O-Dimethyl-Dithiophosphate : Mode of Action and (R. Santi and P. de Pietri-Tonelli), 398
Properties (Fatigue), of Ternary Aluminium–Zinc–Magnesium Alloys (I. J. Polmear), 1388
Properties (Immunizing), of Insoluble Cell Material derived from *Brucella* (J. Markenson, D. Sulitzeanu and Prof. A. L. Olitzki), 1693
Properties (Mechanical), of Tissues : Effect of Enzymes on (Margaret L. R. Harkness and R. D. Harkness), 1821
Properties (Metal-Chelating), of Plant-Growth Substances (W. L. F. Armarego, M. J. Canny and S. F. Cox), 1176 ; (Prof. O. V. S. Heath and J. E. Clark), 1177
Properties (Microwave Dielectric), of Indian Shellac in the 8-mm. Range (Dr. S. S. Srivastava and Dr. D. D. Puri), 37
Properties (Pharmacological), of its Isomers : Resolution of Chlorphenir-amine and the (R. T. Brittain, Dr. P. F. D'Arcy and Dr. J. H. Hunt), 734
Properties (Pharmacological and Toxicological), of 5-Benzylidenerhodanine (Salah A. Tawab, Prof. Ahmed Mustafa and A. F. A. Mawgoud Shalaby), 607
Properties (Significant) : Relation between the Polarizability of Ions and other (Prof. K. Krishnamurti), 1043
Properties (Soil), in the Triaxial Test : The Measurement of (Dr. Alan W. Bishop and D. J. Henkel), *review* by Thomas Whitaker, 1151
Properties (Thermal), of Gases, Liquids and Solids (American Society of Mechanical Engineers and Purdue University Thermo-physical Properties Research Center Symposium on), 294
Prophylaxie Criminelle : First Congrès International de, 1783
Proposed Biological Term 'Pheromone' (H. S. Micklem), 1835 ; (Dr. P. Karlson and Prof. M. Lüscher), 1835
Proposed Interpretation of Infra-red Spectral Changes occurring upon the Interaction of Polynucleotides (H. Todd Miles), 1814
Proposed Method for the Measurement of the Velocity of Light (Dr. J. H. Sanders), 312
Propulsion : Basic Problems in (Advisory Group for Aeronautical Research and Development of NATO Discussion on), 1094
Propulsion by Ions and Ionized Plasmas (Dr. A. von Engel), 573
Prospects for Television (Political and Economic Planning, Broadsheet No. 427), 222
Prospects (Industrial), in Nuclear Energy (European Conference for Industrial Management), (European Nuclear Energy Agency of the Organization for European Economic Co-operation), 652, 1094
Protection of the Shropshire Hills, 932
Protection (Radiation), and Free Radicals (Dr. Bernard Smaller and Dr. Eugene C. Avery), 539
Protection Test (Mouse) : Measurement of a Staphylococcal Antibody in Human Serum by a (Dr. Myron W. Fisher), 1692
Protective Action of Cystamine and 5-Hydroxytryptamine in Irradiated Rats : Effect of High Oxygen Pressure on the (H. A. S. van den Brenk and Ruth Moore), 1530
Protective Agent again Osmotic Lysis : Spermine as a (J. Mager), 1827
Protective Effect of β-Aminoethylthiosulphuric Acid against Ionizing Radiation (Bo Holmberg and Bo Sörbo), 832
Protein : Production of Amide Groups and Ammonia in the Radiolysis of Aqueous Solutions of (Dr. Winifred Bennett and Dr. Warren M. Garrison), 889
  A Simple Method for the Concentration of Fluids containing (Dr. J. Kohn), 1055
Protein in a Cell-free System of a *Mycobacterium* : Effect of Streptomycin on the Incorporation of Amino-Acids labelled with Carbon-14 into Ribonucleic Acid and (T. Erdös and Agnes Ullmann), 618
Protein of Diaphragms of Hypophysectomized Rats : *In vitro* Effects of Insulin and Glucose on Leucine-2-^{14}C Incorporation into (Dr. J. L. Kostyo), 1518
Protein' ('Apparent), in the Human Red Cell : Haemoglobin and (Dr. Eric Ponder), 1330
Protein (Dietary) : Effect of, on the Severity of Experimental Mouse Hepatitis (Dr. Boris Ruebner and James L. Bramhall), 609
Protein (Tobacco Mosaic Virus), of Molecular Weight 18,000 : Native (Allen T. Ansevin and Prof. Max A. Lauffer), 1601
Protein Biosynthesis : Vitamin B_{12} and—Vitamin B_{12} and Biosynthesis in Chick Liver (Dr. M. J. Fraser and Dr. E. S. Holdsworth), 519 ; Vitamin B_{12} and Biosynthesis in Rat Liver (Dr. H. R. V. Arnstein and Dr. J. L. Simkin), 523
Protein Chemistry : Advances in (edited by C. B. Anfinsen, Jr., M. L. Anson, Kenneth Bailey and John T. Edsall), Vol. 12, *review* by Dr. M. F. Perutz, 1290
  Recent Advances in (Department of Chemistry, Biology and Geology of the Kingston Technical College Postgraduate Lecture Course on), 86
  More, *review* by Dr. M. F. Perutz, 1290
Protein Feeding-Stuffs : Quality of (Sir Solly Zuckerman), 1303
Protein Foodstuffs : Processed Plant (edited by Aaron M. Altschul), *review* by Dr. Magnus Pyke, 351
Protein Fractions in the Fluids of Chick Embryos : Sodium, Potassium, Calcium and Chloride Ion Contents and (Dr. Aleksandra Smoczkiewiczowa), 1260
Protein-free Diet : Effect of, on the Vitamin A Storage in the Rat Liver (M. Rechcigl, Jun., S. Berger, J. K. Loosli and H. H. Williams), 1597
Proteinase Activity (Intestinal) : Neurosecretion and, in an Insect *Calliphora erythrocephala* Meig. (Ellen Thomsen and Ib Møller), 1401
Proteins : Chlorination of, as a Method of Increasing their Opacity in the Electron Microscope (Dr. M. M. Coombs and Prof. J. F. Danielli), 1257
  Determination of Nitrogen in, by means of Indanetrione Hydrate (Dr. S. Jacobs), 262
  Labelling of, with Cellulose-reactive Dyes (Dr. R. Hess and Dr. A. G. E. Pearse), 260
Proteins of Barley Leaves : Amino-Acid Composition of the, in relation to the Mineral Nutrition and Age of Plants (Dr. B. P. Pleshkov and Dr. L. Fowden), 1445
Proteins of some Leguminous Seeds : Paper Electrophoretic Separation of the (Dr. Esam M. Moustafa), 199
Proteins (Abnormal), in Myeloma and Macroglobulinaemia : Starch Gel Electrophoresis Studies on (Dr. J. M. Fine and Dr. R. Creysels), 392
Proteins (Mealworm) : Electrophoretic Patterns of (D. S. Po-Chedley), 62
Proteins (Serum), in Experimental Atherosclerosis : Disturbance in the Pattern of, and its Prevention (Prof. M. C. Nath, A. Saikia and B. I. Uppin), 894
Proteins (Serum), of Sheep infected with *Haemonchus contortus* : Electrophoretic Patterns of the (D. L. Mould and P. H. Silverman), 1735
Proteins (Silk) : Activation of Amino-Acids in relation to the Synthesis of (Prof. J. Heller, Dr. P. Szafrański and Dr. E. Sulkowski), 397
Proteus : The Phenylalanine Test on Kligler's Iron Agar for the Identification of (D. J. Stewart), 1537
Proteus P 18 (Stable L), growing in Hypertonic Liquid Medium : Oxygen Consumption of Different Forms of (Prof. P. Mandel, T. Terranova, M. Sensenbrenner and F. Feo), 194
Proteus Group of *Amoebae* : Utilisation of Nutritive Spheres in the (Sister Monica Taylor), 1458
Prothoracic Hair Receptors in the Desert Locust : Function of certain (Hair Receptors in Locusts), (Dr. P. T. Haskell), 1107
Proton and Metal Binding by some Peptides, Amino-acid Amides and Amino-acids : Relationship between (Dr. S. P. Datta, R. Leberman and Dr. B. R. Rabin), 745
Proton Magnetic Resonance : Positions of Protons in Aluminium Hydroxides derived from (Structure of some Hydroxides and Hydrous Oxides), (D. J. Kroon and C.v.d. Stolpe), 944
Proton Transfer and Supercontraction in Actomyosin (Dr. F. G. E. Pautard), 1391
Protonema of *Pohlia nutans* : Effects of Kinetin, Gibberellic Acid and certain Auxins on the Development of Shoot Buds on the (Dr. G. C. Mitra and Dr. A. Allsopp), 974

Protons in Aluminium Hydroxides derived from Proton Magnetic Resonance : Positions of (Structure of some Hydroxides and Hydrous Oxides), (D. J. Kroon and C. v. d. Stople), 944
Protoplast (Growing Yeast) : Formation of Aberrant Cell Walls and of Spores by the (A. A. Eddy and D. H. Williamson), 1101
'Protoplasts' : T2 Phage Infection of, obtained by Penicillin Treatment of *Escherichia coli B* (Dr. G. Dénes and L. Polgár), 696
'Protoplasts' in Mutant Strains of *Salmonella* induced by Galactose: Formation of (Toshio Fukasswa and Hiroshi Nikaido), 1131
Protoplasts (*Escherichia coli*) : Phagocytosis of (Józef Lisowski, Zbigniew Wieczorek and Miroslaw Kańtoch), 1828
Protozoa and Diet : A Relationship between some Bacteria, in Early Weaned Calves (J. Margaret Eadie, Dr. P. N. Hobson and S. O. Mann), 624
Protozoal Blood Parasites of Egyptian Birds : Systematic and Experimental Studies on (Dr. A. H. Helmy Mohammed), *review* by Dr. Elizabeth U. Canning, 1081
Proudfoot, K. G. : Physiological Races of *Phytophthora infestans* Mont. (de Bary) in Northern Ireland, 626
Proudman, Prof. J. : Appointed chairman of the Sub-Committee of the Central Advisory Water Committee on the Demand for Water, 152
Prout, Dr. E. G. : Thermal Decomposition of Irradiated Solids, 884
Prowse, G. A. : Relationship between Epiphytic Algal Species and their Macrophytic Hosts, 1204
Pruvost, Prof. Pierre : Awarded the Wollaston Medal for 1959 of the Geological Society, 364
Pryce, Prof. M. H. L. (edited by Körner, Prof. S., in collaboration with) : Observation and Interpretation—Proceedings of the Ninth Symposium of the Colston Research Society held at the University of Bristol, 1957, *review* by Dr. E. F. Caldin, 1010
Prydie, J. (Burdin, M. L., and) : Lumpy Skin Disease of Cattle in Kenya, 949
Przemieniecki, Dr. J. S. : Awarded the Usborne Memorial Prize of the Royal Aeronautical Society, 1649
Przibram, Dr. K. : Atmospheric Dust and Fluorescence, 1048
Pseudomonad : Metabolism of Glycine by a (Biosynthesis of Cell Constituents from C_2-Compounds), (A. G. Callely and Dr. S. Dagley), 1793
Pseudomonads able to Synthesize Poly-β-hydroxybutyric Acid : A Group of (M. B. Morris and J. B. Roberts), 1538
Pseudomonads (Phytopathogenic) : Uronate Oxidation by (Wendell W. Kilgore and Prof. Mortimer P. Starr), 1412
Pseudomonas : Production of 5-Ketogluconic Acid by a Species of (D. J. Stewart), 1133
Pseudomonas atlantica and *Pseudomonas carrageenovora* : Enzymic Hydrolysis of Fucoidin by (Dr. W. Yaphe and Dr. K. Morgan), 761
Pseudomonas ovalis Chester : Formation of Malate from Glycollate by (Biosynthesis of Cell Constituents from C_2-Compounds), (Dr. H. L. Kornberg and A. M. Gotto), 1791
Pseudomonas oxalaticus (OX1) grown in Oxalate : Formation of Glycerate from Oxalate by (Biosynthesis of Cell Constituents from C_2-Compounds), (J. R. Quayle and Dr. D. B. Keech), 1794
Psoralen and 8-Methoxypsoralen : Ultra-violet Carcinogenesis in Albino and Pigmented Mice receiving Furocoumarins— (M. A. Pathak, Prof. F. Daniels, jun., C. E. Hopkins and T. B. Fitzpatrick), 728
Psychiatrists : New Drugs used by, *review* by Dr. Marthe Vogt, 1007
Psychiatry in the British Army in the Second World War (Dr. Robert H. Ahrenfeldt), *review* by Dr. D. Russell Davis, 208
Psychiatry in Wartime, *review* by Dr. D. Russell Davis, 208
Psychological Man : Behaviour and (Prof. Edward Chace Tolman), *review* by Prof. John Cohen, 781
Psychology : Philosophical, *review* by Prof. L. S. Hearnshaw, 567
  Soviet, *review* by Dr. Peter McKellar, 1008
Psychology, British Journal of : Monograph Supplement 31, Figural After-Effects (Dr. Peter McEwen), 1027
Psychology in the Soviet Union (edited by Brian Simon), translated by J. and M. Ellis, J. McLeish, H. Milne, N. Parsons and others, *review* by Dr. Peter McKellar, 1008
Psychology (Aviation), in Western Europe and a Report on Studies of Pilot Proficiency Measurement (Western-European Association for Aviation Psychology), 1092
Psychology (Aviation), Western-European Association for : Publication No. 1, Aviation Psychology in Western Europe and a Report on Studies of Pilot Proficiency Measurement, 1092
Psychology (Industrial). National Institute of : Report 13, Comments on the Job (Dr. Isabel Blain), 372
Psychology and Sociology : Introduction to Difference Equations with Illustrative Examples from Economics, (Prof. Samuel Goldberg), *review* by Dr. L. S. Goddard, 970
Psychomotor Behaviour and Delinquency : Association between (H. S. Anthony), 343
Psychopathology of Science, *review* by Dr. A. R. Hall, 1419
Psychosis : Amphetamine (Dr. P. H. Connell), *review* by Dr. W. R. Bett, 639
Ptaki Ziem Polskich (The Birds of Poland), (Jan Sokolowski), Tom 2, *review* by B. Nowosielski-Slepowron, 73
Public : Presenting Science to the, 1569
Public Expenditure on Education, 16
Public Libraries in England and Wales, 1437
Public Library Service in England and Wales : The Structure of the (Ministry of Education), 1289, 1437
Public Policy : Science and (Dr. J. R. Killian), 1215
Publications in Microform, 1020
Puckey, Sir Walter : Industry and the Individual, 87
Pugh, Dr. L. G. C. E. : Carbon Monoxide Content of the Blood and other Observations on Weddell Seals, 74
Pugsley, Dr. A. T. : Wheat Genetics, 27
Pulis, Jean F., and others : Juvenile Hormone in Thymus, Human Placenta and other Mammalian Organs, 405
Pulp (Groundwood), made from Logs stored in Salt Water : Inactivation of Organo-Mercurial Fungicides in, and the Possible Role of Sulphur Compounds (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Pulses (Large), of Radiation : Modification of the Oxygen Effect when Bacteria are given (D. L. Dewey and Dr. J. W. Boag), 1450
Pumphrey, Prof. R. J. : New Light on Old Darkness, *review*, 1554
Pumping Speeds (Dual), of some Ionization Pumps (G. Carter), 1619
Pumps (Ionization) : Dual Pumping Speeds of some (G. Carter), 1619
Punching and Planing : Wear of Graphite Surface by (Dr. Robert H. Savage), 454
Puparium Formation in the Ebony Mutant of *Drosophila melanogaster* : Oxidative Metabolism and (Alexander Wolsky and Henrietta G. Kalicki), 1129
Pupation in *Drosophila melanogaster* : A New Method for delaying (Dr. A. Abd-el-Wahab), 127
Purchon, Prof. R. D. : Darwin, Wallace and Linnaeus Celebrations in Singapore, 723
Purdom, M. R. (Hobson, Dr. P. N., and): A Gram-negative Sporing Bacterium from the Rumen, 904
Purdue University Thermo-physical Properties Research Center (American Society of Mechanical Engineers and) : Symposium on the Thermal Properties of Gases, Liquids and Solids, 294
Pure Nitrogen : Townsend's First Ionization Coefficient in (Dr. A. E. D. Heylen), 1545
'Pure' Sample with an 'Impure' Carrier : Analysis by Gas Chromatography of a (V. Willis), 1754
Pure α-, β-, γ- and δ-Tocopherols in the Growing Chick : Relative Rates of Liver Storage of (T. W. Griffiths), 1061
Pure and Applied Chemistry : Seventeenth International Congress of, 1368
Pure and Applied Chemistry, International Union of : Formation of a Special Group under the auspices of the Analytical Chemistry Section, to make recommendations for a standard terminology in Gas Chromatography, 722
  Nomenclature of Organic Chemistry, 1957, *review* by Dr. E. H. Rodd, 960
  A Proposed International Chemical Notation (prepared by the Commission on Codification, Ciphering and Punched Card Techniques), tentative version subject to revision, *review* by Dr. E. H. Rodd, 960
Pure and Applied Chemistry, International Union of (Commission on Geochemistry) : Symposium on Geochemistry, 1719
Pure and Applied Chemistry, International Union of (organized by the Chemical Society and sponsored by the) : Fourth International Conference on Co-ordination Chemistry, 1784
Pure and Decomposed Crystals of Thallous Azide : Absorption Spectra and Associated Photoconductivity of (B. L. Evans and A. D. Yoffe), 1241
Puri, Dr. D. D. (Srivastava, Dr. S. S., and) : Microwave Dielectric Properties of Indian Shellac in the 8-mm. Range, 37
Purification of Bacterial Neuraminidase (Receptor-destroying Enzyme), (G. L. Ada and E. L. French), 1740
Purification of the Mouse Mammary Carcinoma Agent by means of a Fluorocarbon (Robert S. Stone and Prof. Dan H. Moore), 1275
Purification of Neuraminidase from *Vibrio cholerae* (Prof. Gerhard Schramm and Elisabeth Mohr), 1677
Purification of Sugar Sulphates : Some Methods for the (Dr. J. R. Turvey and M. J. Clancy), 537
Purification of a Toxic Phytohaemagglutinin from Black Beans (*Phaseolus vulgaris*), (Dr. Werner G. Jaffé and Karl Gaede), 1329
Purification Procedures : Destruction of Cortisone and related Steroids by Traces of Copper during (Marvin L. Lewbart and Vernon R. Mattox), 820
Purine Biosynthesis : Feedback Control of, by Purine Ribonucleotides (Dr. James B. Wyngaarden and Doris M. Ashton), 747
Purine Ribonucleotides : Feedback Control of Purine Biosynthesis by (Dr. James B. Wyngaarden and Doris M. Ashton), 747
Purines: Quantitative Estimation of, by the Visual Scanning of Photographs of Paper Chromatograms (B. M. Johnstone and G. P. Briner), 681
Purkyne Medical Society (Czechoslovak Academy of Sciences and the) : Symposium on Antibiotics, 154
Purple Pigment : Formation of, in *Spirogyra pratensis* Cultures (Dr. Ann Allen and Dr. R. E. Alston), 1064
Purpose (Technics and) : No. 5, On Being a Technologist (Prof. D. G. Christopherson) ; No. 6, The Educated Man Today and Tomorrow (Sir John Wolfenden), 1780
Purseglove, Prof. J. W.: An Introduction to Tropical Agriculture, *review*, 966
Pursey, Dr. D. L. : Elected a Fellow of the Royal Society of Edinburgh, 719
Purves, P. E. (Fraser, Dr. F. C., and) : The Ear under Water (Anatomy and Function of the Cetacean Ear), 1788
Purvis, Dr. Olive N. (Gregory, Prof. F. G., and) : Experimental Approaches to the Problems of Growth and Form in Plants (Effect of Very Long Days on the Flowering of Winter Rye), 585
Putman, J. L., and others : The American Miniature Nuclear Generator, *SNAP III*, 643
Putnam, Allan Ray : Appointed managing director of the American Society of Metals, 1094
Pye Premium of the Television Society awarded to L. J. Griffen, 1161
Pygoscelis adeliae : The Adélie Penguin (Hombron and Jacquinot), (Dr. William J. L. Sladen), 23
Pyke, Dr. Magnus : Research on Food, *review*, 351, 582
Pylarino, Giacomo (1659-1718), 17
Pyridine 2-Aldoxime : Ferrous and Ferric Complexes with (Dr. G. I. H. Hanania and Dr. D. H. Irvine), 40
Pyridine Nucleotide Levels of Mouse Liver : Effect of Azaserine (o-Diazoacetyl-L-serine) on the (Stuart A. Narrod, Thomas A. Langan, jun., Prof. Nathan O. Kaplan and Abraham Goldin), 1674
Pyridoxine Withdrawal : Effects of, on Cerebral Circulation and Metabolism in a Pyridoxine-dependent Child (Dr. Louis Sokoloff, Dr. Niels A. Lassen, Dr. Guy M. McKhann, Dr. Donald B. Tower and Dr. Wayne Albers), 751
Pyridoxine-dependent Child : Effects of Pyridoxine Withdrawal on Cerebral Circulation and Metabolism in a (Dr. Louis Sokoloff, Dr. Niels A. Lassen, Dr. Guy M. McKhann, Dr. Donald B. Tower and Dr. Wayne Albers), 751
Pyrimidine Deoxyribonucleotides : Effect of, on the Regeneration of Bone-Marrow in Irradiated Mice (Dr. Z. Karpfel, J. Soška and V. Drášil), 1600
Pyrite Granules and Fossil Micro-organisms (L. G. Lowe), 437
Pyrogen (Endogenous), in Serum : Demonstration of, during Systemic Tuberculin Reaction in Rabbits (Dr. J. Johanovsky), 693
Pyrosoma on the Sea-Floor 160 Metres Deep : Occurrence of (Dr. D. E. Hurley and D. G. McKnight), 554
Pyrrolizidine Alkaloids : Action of, on the Neuro-Muscular Junction (Dr. C. H. Gallagher and Dr. J. H. Koch), 1124

QUADRUPOLE Resonance, *review* by Dr. R. H. Tredgold, 1078
Quadrupole Resonance Spectroscopy : Nuclear (T. P. Das and E. L. Hahn), *review* by Dr. R. H. Tredgold, 1078
Quality of Protein Feeding-Stuffs (Sir Solly Zuckerman), 1303
Quantitative Biology : Cold Spring Harbor Symposia on, Vol. 24, Genetics and 20th-Century Mendelism, 934 ; Vol. 22, Population Studies —Animal Ecology and Demography, *review* by Dr. A. Milne, 1220
Quantitative Estimation of Amineoxidase (Dr. George C. Cotzias and Dr. James J. Greenough), 1732
Quantitative Estimation of Purines by the Visual Scanning of Photographs of Paper Chromatograms (B. M. Johnstone and G. P. Briner), 681
Quantitative Horizontal Paper Chromatography at an Elevated Temperature : Rapid—Determination of Aspartic and Glutamic Acids (Henry R. Roberts and Michael G. Kolor), 460
Quantitative Measurement of the Effect of Lysergic Acid Diethylamide on Mice and its Interactions with other Drugs (Dr. J. R. Smythies), 545
Quantitative Serum–Agar Technique (S. T. C. Wright), 1282
Quantum Chemistry : Chemistry and (Quantum Chemistry Group, Uppsala, Discussion on), 158
Quantum Mechanics (Prof. H. A. Kramers), translated by D. ter Haar, *review* by Prof. N. Kemmer, 705
Quantum Mechanics (Dr. F. Mandl), second edition, *review* by Prof. N. Kemmer, 705
  Angular Momentum in (E. R. Edmonds), *review* by Prof. N. Kemmer, 705
  —Non-Relativistic Theory (L. D. Landau and E. M. Lifshitz), translated from the Russian by J. B. Sykes and J. S. Bell, *review* by Prof. N. Kemmer, 705
Quantum Mechanics in its Fourth Decade, *review* by Prof. N. Kemmer, 705
Quartz Crystal: Sintering of (A. C. D. Chaklader and Prof. A. L. Roberts), 1252
Quartz Crystals : Synthetic (Western Electric Company and the Bell Telephone Laboratories), 294
Quartz Crystals (Synthetic) : Use of, as a Support for Specimens in Powder Photographs (Hitosi Hagihara, Shuji Yamashita and Akitsu Takeda), 1666
Quastel, Prof. J. H. : The McGill—Montreal General Hospital Research Institute, 716
Quastel, Prof. J. H., and Bickis, I. J. : Metabolism of Normal Tissues and Neoplasms *in vitro*, 281
Quayle, J. R., and Keech, Dr. D. B. : Biosynthesis of Cell Constituents from C_2-Compounds—Formation of Glycerate from Oxalate by *Pseudomonas oxalaticus* (OXI) grown in Oxalate, 1794
Queen, H.M. The : Birthday Honours List, 1715
Queen and Servant of the Sciences, *review* by W. J. Langford, 1076
Queen Mary College, London : Appointment of Dr. R. F. Saxe to the University of London readership in nuclear engineering, 794
  Symposium on Oxidation, 865
Queen's, a Short History of Queen's College, Belfast, and the Queen's University of Belfast (Prof. J. C. Beckett), 1501
Queen's University, Belfast : Appointment of G. C. R. Carey to a lectureship in preventive medicine, 86
  Appointment of Dr. G. S. Higginson to a supernumerary lectureship in physics, 86
  Appointment of Dr. A. H. Jarrett as lecturer in applied mathematics, 1024
  Appointment of Dr. R. W. J. McCarroll as lecturer in applied mathematics, digital computing, 1024
  Appointment of Dr. M. W. Roberts as lecturer in physical chemistry, 1024
  Appointment of Dr. S. C. R. Dennis as lecturer in engineering mathematics, 1024
  Appointment of A. M. Arthurs as lecturer in engineering mathematics, 1024
  Appointment of B. G. Leary as lecturer in electrical engineering, 1024
  Queen's, a Short History of Queen's College, Belfast, and the Queen's University of Belfast (Prof. J. C. Beckett), 1501
  Retirement of Prof. F. V. Warnock from the chair of mechanical engineering, 1779
  Appointment of Dr. B. Crossland to the chair of mechanical engineering, 1779
Queen's University, Kingston, Ontario (Atomic Energy of Canada, Ltd., and) : International Conference on Nuclear Structure, 1571
Quenby, J. J. (Elliot, Dr. H., and) : The Samoan Artificial Aurora, 810
Quentin, M. (Steinbuch, Dr. M. and) : Preparation of Ceruloplasmin, 323
Quinic Acid to Shikimic Acid in Roses : Evidence for the Conversion of (L. H. Weinstein, C. A. Porter and H. J. Laurencot, jun.), 326
l-Quinic Acid in Citrus Fruit : Isolation of (Dr. S. V. Ting and Dr. E. J. Deszyck), 1404
Quinine Sulphate: Ultra-Violet Fluorescence of, for Detection of Phosphate Ester Spots on Paper (Dr. Edward S. Rorem), 1739
Quinones : Naturally Occurring (Dr. R. H. Thomson), *review* by Dr. R. I. T. Cromartie, 1291
Quintanalha, A. : Social Implications of Mendelism versus Michurinism, 1222
Quintessence of Paracelsus, *review* by Prof. Erwin H. Ackerknecht, 1147
Quirk, Dr. J. P. (Aylmore, L. A. G., and) : Swelling of Clay–Water Systems, 1752
Quirk, Dr. J. P. (Millington, Dr. R. J., and) : Permeability of Porous Media, 387

RABBIT, P. M. A. : Effects of Independent Variations in Stimulus and Response Probability, 1212
Rabbit : Absorption of Radioiodine through the Bladder-Wall in the (Oskar Andrysek and Ota Schück), 893
  Content of Deoxyribonucleic Acid of the Germinal Vesicle of the Primary Oocyte in the (D. Van de Kerckhove), 329
  Dissociated Nystagmus in the (Dr. J. Lachmann and Prof. F. Bergmann), 1065
  Regeneration of the Lens of the Eye in the (D. Stenhouse Stewart and Prof. Paul G. 'Espinasse), 1815
Rabbit Aorta : Inhibition of Sensitiveness to Nicotine of, by Reserpine, Hexamethonium, Ethyl Flavone-7-Oxyacetate and other Compounds (Dr. I. Setnikar and M. Ravasi), 898
Rabbit Appendix: Effects of X- and Ultra-Violet Irradiation on the Incorporation of Phosphorus-32 into Isolated Nuclei of (Yuong-Tchel Tchoe and Prof. A. Sibatani), 1334
Rabbit Atheromatosis : Lack of Effect of Histidine on (Dr. G. G. Pinter and Dr. D. B. Zilversmit), 1272
Rabbit Bile : Ester Sulphate Pattern of (Dr. Harry Boström and Anders Vestermark), 1593
Rabbit Epithelium : Induction of Arginase in, by the Shope Rabbit Papilloma Virus (Prof. Stanfield Rogers), 1815
Rabbit Liver : Cotinine, an Oxidation Product of Nicotine formed by (Howard B. Hucker, James R. Gillette and Bernard B. Brodie), 47
Rabbit Papilloma Virus (Shope) : Induction of Arginase in Rabbit Epithelium by the (Prof. Stanfield Rogers), 1815
Rabbit's Eye : Differential Distribution of Radioactive Strontium and Yttrium in the Tissues of the (R. H. Mole, Antoinette Pirie and Janet M. Vaughan), 802
Rabbits : Demonstration of Endogenous Pyrogen in Serum during Systemic Tuberculin Reaction in (Dr. J. Johanovsky), 693
  Effect of Infection with Myxomatosis Virus on the Endoparasites of (Dr. R. Mykytowycz), 555
  Induction of Subcutaneous Nodules in, with the *SE* Polyoma Virus (Dr. Bernice E. Eddy, Sarah E. Stewart, Ruth L. Kirschstein and Ralph D. Young), 766
Rabbits (Adult) : Serum Antibody and γ-Globulin in Baby Rabbits after Transfer of Ribonucleoprotein from (Dr. Miroslava Hrubešova, Dr. Brigitte A. Askonas and Dr. J. H. Humphrey), 97
Rabbits (Baby) : Serum Antibody and γ-Globulin in, after Transfer of Ribonucleoprotein from Adult Rabbits (Dr. Miroslava Hrubešova, Dr. Brigitte A. Askonas and Dr. J. H. Humphrey), 97
Rabbits (Thyroidectomized) : Passive Antibody Decay in (Dr. Ignatius L. Trapani, Dr. Allen Lein and Dr. Dan H. Campbell), 982
Rabin, Dr. B. R. (Leberman, R., and) : Multiplicity of Histidine—Cu(II) Complexes, 746
Rabin, Dr. B. R., and others : Relationship between Proton and Metal Binding by some Peptides, Amino-acid Amides and Amino-acids, 745
Rabotti, Dr. Giancarlo : Ploidy of Primary and Metastatic Human Tumours, 1276
Race, Dr. R. R., and Sanger, Dr. Ruth : Blood Groups in Man, third edition, *review* by Dr. F. Stratton, 280
Race : The Arms, a Programme for World Disarmament (Philip Noel-Baker), *review* by R. Brightman, 952
Races (Physiological), of *Phytophthora infestans* Mont. (de Bary) in Northern Ireland (K. G. Proudfoot), 626
Rachitic Rat Cartilage : Influence of Vitamin D on Synthesis of Hexosamine by (P. K. Dikshit), 334
Radar Establishment (Royal), Malvern : Appointment of Dr. T. S. England as head of the Airborne Radar Department, 294, 647
  Promotion of Dr. T. S. England to Deputy Chief Scientific Officer, 647
Radar Simulator System (A. F. Wilkins), 157
Radar (Airborne), at the Royal Radar Establishment, 647
Radcliffe-Brown, Prof. A. R. : Method in Social Anthropology (edited by Prof. M. N. Srinivas), *review* by Dr. Kenneth Little, 70
Radde, Ingeborg C., and McCance, Prof. R. A. : Glutaminase Activity of the Foetal Membranes and Kidneys of Pigs, 115
Radford, H. M., and others : Bioassay of Sheep Anterior Pituitary Glands, 1597
Radial Distance of 107,400 km. : Radiation around the Earth to a (Prof. James A. Van Allen and Louis A. Frank), 430
Radiation : Changes in the Electron Spin Resonance Spectrum of Glycine with Increasing Doses of (Dr. J. W. Boag and A. Müller), 831
  Comparative Sensitivity to, of Seeds from a Wild Plant grown on Uraniferous and Non-Uraniferous Soils (Dr. D. J. Mewissen, J. Damblon and Prof. Z. M. Bacq), 1449
  Conductivity induced by, in Polycrystalline Cadmium Sulphide and Polyethylene (C. G. Clayton, B. C. Haywood and Dr. J. F. Fowler), 1112
  Effect of, on the Breakdown of Homogeneous Field and Sphere Gaps (K. R. Allen and Dr. K. Phillips), 233
  Modification of the Oxygen Effect when Bacteria are given Large Pulses of (D. L. Dewey and Dr. J. W. Boag), 1450
  The Twilight, at 6708 A. (Prof. G. Kvifte), 1384
Radiation in Barley Roots : Effect of Phosphorylated Methyl-naphthohydroquinones on the Response to (A. D. McKelvie), 1194
Radiation between Diethyl Sulphate and Labelled Sulphuric Acid : Exchange Reaction induced by—a Possibly Ionic Reaction (Dr. Paul Y. Feng and Ahren Jacobson), 251
Radiation around the Earth to a Radial Distance of 107,400 km. (Prof. James A. Van Allen and Louis A. Frank), 430
Radiation near the Earth discovered by means of Satellites : Origin of the (Prof. T. Gold), 355
Radiation (Corpuscular), and the Acceleration of Artificial Satellites (Dr. Luigi G. Jacchia), 1662
Radiation (Cosmic), and the Weather (Prof. Edward P. Ney), 451
Radiation (High-Energy) : Estimation of Chain Fracture during the Cross-linking of Rubber Hydrocarbons by (Dr. L. Mullins and Dr. D. T. Turner), 1547
Radiation (Ionizing) : The Effects of, on Natural and Synthetic High Polymers (Dr. Frank A. Bovey), *review* by Prof. C. E. H. Bawn, 637
  Protective Effect of β-Aminoethylthiosulphuric Acid against (Bo Holmberg and Bo Sörbo), 832
  Variation of Sensitivity to, with Age (M. L. Crosfill, Patricia J. Lindop and Prof. J. Rotblat), 1729
Radiation (Low-Energy Corpuscular), at High Latitudes (K. D. Cole), 738
Radiation (Optical) : Modern Systems for Detecting and Evaluating (International Commission for Optics Symposium on), 1571
Radiation (Van Allen), of Solar Origin (Prof. Paul J. Kellogg), 1295
γ-Radiation : Differential Response of Male and Female Adults of *Trogoderma granarium* Everts towards Sterilizing Doses of (G. C. Carney), 338
  Effect of, on Weeds (H. J. M. Bowen and S. R. Smith), 907
  Effects of, on some Carbohydrates, Hydroxyacids and Amino-acids in Aqueous Solutions (Dr. S. A. Barker, Dr. P. M. Grant, Prof. M. Stacey and Dr. R. B. Ward), 376
  Inactivation of Spores of *Bacillus anthracis* by (T. Horne, G. C. Turner and A. T. Willis), 475

γ-Radiation (Background) : Increase in, and its Correlation with Iodine-131 in Milk (Measurements at Leeds following the Windscale Reactor Accident), (Prof. F. W. Spiers), 517
Radiation-absorbing Glasses (Chance-Pilkington Optical Works), 292
Radiation-induced Cross-linking of Polyvinyl Chloride : Enhancement of (Dr. S. H. Pinner), 1108
Radiation Biology, International Journal of, Vol. 1, No. 1, 1020
Radiation Chemistry (Bradford Chemical Society, the Department of Chemical Technology of the Bradford Institute of Technology and the Yorkshire Council for Further Education Symposium on), 18
Radiation Damage in the Insect *Rhodnius* : Oxygen Deficiency and (W. F. Baldwin and T. N. Salthouse), 974
Radiation Damage in Stretched Rubber : X-Ray Diffraction Measurement of (Wesley E. Shelberg and Lewis H. Gevantman), 456
Radiation Damage (Chemical) : Thermal Annealing of (Dr. A. G. Maddock and S. R. Mohanty), 86
Radiation Leukaemia : Dose–Response Relationship in—the Marking Probit (Dr. D. J. Mewissen), 401
Radiation Protection and Free Radicals (Dr. Bernard Smaller and Dr. Eugene C. Avery), 539
Radiation Research : International Congress on (Publication of the Proceedings), 368
Radiation Syndrome (Acute), in the Plaice : Leucocytosis in Response to Bacteraemia as a Feature of the (A. Preston), 832
Radiations on *Escherichia coli B* : Reduction in the Lethal Effects of, by Treatment with Chloramphenicol (Dr. N. E. Gillies and Tikvah Alper), 237
Radiations (Ionizing) : Bibliography on the Effects of, on Plants, 1896-1955 (Arnold H. Sparrow, John P. Binnington and Virginia Pond), *review* by Dr. Alma Howard, 639
Radical (Free Methylene) : Spectrum and Structure of the (Dr. G. Herzberg and J. Shoosmith), 1801
Radical Mechanisms : The Kinetics of Vinyl Polymerization by (Dr. C. H. Bamford, Dr. W. G. Barb, Dr. A. D. Jenkins and Dr. P. F. Onyon), *review* by Prof. C. E. H. Bawn, 637
Radicals (Free) : Radiation Protection and (Dr. Bernard Smaller and Dr. Eugene C. Avery), 539
Radicals (Free), from Chlorpromazine (Dr. I. Gordon Fels and Marty Kaufman), 1392
Radio Astronomy : Maser Observations in (L. E. Alsop, J. A. Giordmaine, C. H. Mayer and C. H. Townes), 223
Radio Burst (Solar) : Anomalous Night-Time Reception of a Major (Prof. Alex G. Smith, T. D. Carr and W. H. Perkins), 597
Radio Communication Link across the Atlantic : A Lunar, 1500
Radio Engineers, Institute of, and others : Twelfth Annual Conference on Electrical Techniques in Medicine and Biology, 1434
Radio Engineers, British Institution of : Election of Eric K. Cole as an honorary member, 582
  Convention on Television Engineering in Science, Industry and Broadcasting, 1234
Radio Industry Council : Award of Premiums for Technical Writing, 1023
Radio Noise Bursts on 4.6 kc./s. : Simultaneous Occurrence of Sub-Visual Aurorae and (R. A. Duncan and G. R. Ellis), 1618
Radio Observatory of the California Institute of Technology : Appointment of Dr. J. G. Bolton as the first director, 506
Radio Reception : Effects of the Aurora on, 579
Radio Reflexions from the Moon and Solar Corona (Prof. O. Burkard), 1180
Radio Signals from Earth Satellites : Recording (G. H. Munro and L. H. Heisler), 809
Radio Signals received via the Ionosphere : Phase Characteristics of (D. W. Morris and C. J. Hughes), 310
Radio Stars : Sporadic *E*-Region Ionization, 'Spread F', and the Twinkling of (Dr. D. F. Martyn), 1382
Radio Telescope : Jodrell Bank (Cost of the), 862
Radio Transmission by Wave-Guide (Dr. R. L. Smith-Rose), 727
Radio Waves (Extra-Terrestrial), in the Ionosphere : Refraction of (M. M. Komesaroff and C. A. Shain), 1584
Radioactive Elements, *review* by G. R. Hall, 962
Radioactive Fall-out (Dr. C. Auerbach), 1773
Radioactive Ferric Chloride : Effect of Dietary Phytate on Faecal Absorption of (Dr. Henry Foy, Athena Kondi and W. H. Austin), 691
Radioactive Iron : Incorporation of, into Haematin *a* (Prof. R. Lemberg and A. Benson), 678
Radioactive Isotopes in Biochemistry, *review* by Dr. H. R. V. Arnstein, 1149
Radioactive Isotopes in Britain : Production and Marketing of, 720
Radioactive Particles : Induction of Lung Tumours by (Lewis A. Temple, D. H. Willard, S. Marks and W. J. Bair), 408
Radioactive Strontium and Yttrium in the Tissues of the Rabbit's Eye : Differential Distribution of (R. H. Mole, Antionette Pirie and Janet M. Vaughan), 802
Radioactive Tracers : Use of, in Studies of the Shoot Apex (Dr. A. Booth, Dr. E. G. Cutter, Dr. S. N. Postlethwait, B. R. Voeller and Prof. P. F. Wareing), 1580
Radioactive Waste : Disposal of, 437
Radioactivity : Preparation, Maintenance and Application of Standards of (W. B.-Mann and H. H. Seliger), 1023
Radioactivity of *Artemia* cultured in Sea Water containing Phosphorus-32 : A Sex Difference in (Prof. Daniel S. Grosch and Mary Ellen Plumb), 122
Radioactivity of Soils, Plant Ashes and Animal Bones (Sir Ernest Marsden), 924
Radioaktive Isotope in der Biochemie (Prof. Engelbert Broda), *review* by Dr. H. R. V. Arnstein, 1149
Radioassay of Aqueous Solutions mixed with Solid Crystalline Fluors (Dr. Daniel Steinberg), 1253
Radiocarbon Measurements on Samples of Known Age (W. S. Broecker, Edwin A. Olson and Junius Bird), 1582
Radioelements (Rare) : Chemistry of the—Polonium–Actinium (Dr. K. W. Bagnall), *review* by G. R. Hall, 962
Radiofrequency Methods : The Study of Molecular and Atomic Motions in Solids and Liquids by (British Radio Frequency Spectroscopy Group and the Groupement AMPERE Joint Meeting on), 652
Radiofrequency Spectroscopy of Free Atoms and Molecules (Radiofrequency Spectroscopy Group Autumn Meeting on), 1502
Radiofrequency Spectroscopy Group : Autumn Meeting (Radiofrequency Spectroscopy of Free Atoms and Molecules), 1502
Radiofrequency Spectroscopy Group, and the Groupement AMPERE : Joint Meeting on the Study of Molecular and Atomic Motions in Solids and Liquids by Radiofrequency Methods, 652
Radiographic Contrast Media : Labelling of, with Iodine-131 (J. Liebster, J. Kácl and A. Babicky), 1474
Radioiodine : Absorption of, through the Bladder-Wall in the Rabbit (Oskar Andrysek and Ota Schück), 893
Radioisotope Technology : Grants for Training in (United States Atomic Energy Commission), 1641
Radiology : International Congress on, 1304
Radiolysis of Aqueous Solutions of Protein : Production of Amide Groups and Ammonia in the (Dr. Winifred Bennett and Dr Warren M. Garrison), 889
Radiolysis of Water labelled with Oxygen-18 : Determination of the Yields of Molecular Hydrogen Peroxide in the (Dr. J. D. Backhurst, Dr. G. R. A. Johnson, Dr. G. Scholes and Prof. J. Weiss), 176
Radiosensitivity as a Function of Antigenic Equivocation (Dr. L. Cohen and Dr. A. Cohen), 692
Radiostrontium : Bone and (Arne Engström, Rolf Björnerstedt, Carl-Johan Clemedson and Arne Nelson), *review* by J. Vennart, 965
Radley, Sir Gordon : *Obituary* of Sir Stanley Angwin, 1638
Radok, U. : Antarctic Meteorology, 1503
Radoslovich, E. W. : Structural Control of Polymorphism in Micas, 253
Rae, Sir Robert : Retirement from the directorship of the National Agricultural Advisory Service, 1160 ; work of, 1160
Raeburn, Dr. J. R. : Appointed to the Strathcone–Fordyce chair of agriculture in the University of Aberdeen, 862 ; work of, 862
Raether, Prof. H. : Gas Discharges (Investigation of the Secondary Processes in the Townsend and Streamer Regime), 92
Raffel, Sidney, and Starr, Mortimer P. (edited by Clifton, Charles E., in association with) : Annual Review of Microbiology, Vol. 12, *review*, 1219
Raftery, Joseph : Ancient Ireland, *review*, 1704
Railway Economics, 938
Railways : Paying for the (Political and Economic Planning, Broadsheet No. 429), 938
Raimes, Dr. S. : Problems of Collective Motion in Physics (Plasma Problems in the Electron Theory of Metals), 866
Rainey, Dr. R. C. : Flying Locusts and Atmospheric Turbulence, 1367
Rainfall (Annual) : World Variation in (J. F. Griffiths), 132
Rajakumar, T. V., and others: Infra-red and the Near Ultra-Violet Absorption Spectra of Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b*, 1475
Rakovsky, W. : The Nature of Coal (Processes of Formation of Fuels), 1438
Rakowski, A. : Of What Use is Acoustics to the Musician?, 1294
Ralston, Dr. A. : Appointed temporary lecturer in the Department of Mathematics (Electronic Computing Laboratory), University of Leeds, 1024
Ramachandran, J., and others: Infra-red and the Near Ultra-Violet Absorption Spectra of Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b*, 1475
Ramberg, Dr. Walter : Appointed Science Officer in the American Embassy in Rome, 15
Ramo, Simon, and others (edited by) : Handbook of Automation, Computation and Control, Vol. 1, Control Fundamentals, *review* by P. H. Hammond, 1556
Ramsay Memorial Fellowships for Advanced Students of Chemistry, 367
Ramsbottom, Dr. J. : Elected president of the Society for the Bibliography of Natural History, 1094
Ramsbottom, Dr. W. H. C. : Awarded a moiety of the Lyell Fund for 1959 of the Geological Society, 364
Rand, M., and Stafford, Anne : Effect of the Rate of Elimination of Digoxigenin in the Guinea Pig on the Determination of its Lethal Dose, 688
Rand Corporation : Set of research publications presented to the Science Museum Library, London, 1022
Randall, Margaret : Appointed organic chemist at the Long Ashton Research Station (University of Bristol), 581
Random Noise Theory : Principles and Applications of (Dr. Julius S. Bendat), *review* by R. A. King, 353
Ranga Swamy, N. S. : Morphogenetic Response of *Citrus* Ovules to Growth Adjuvants in Culture, 735
Rao, Prof. B. Ramachandra, and others : Effect of Magnetic Activity on Drifts of the *F*2 Region, 667
Rao, Dr. C. N. R., and Gregor, L. V. : Polymorphic Transitions in Anhydrous Sodium Sulphate, 1391
Rao, Dr. C. N. R., and others : Infra-Red and the Near Ultra-Violet Absorption Spectra of Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b*, 1475
Rao, E. Bhagiratha, and others : Effect of Magnetic Activity on Drifts of the *F*2 Region, 667
Rao, H. S., and others : The Nature of Coal (Disposition of Methyl Groups), 1439
Rao, S. R. Venkatasubba : Size Relationship of Oocytes and their Nuclei in Two Species of Ascidians, 1454
Rapid Method for Determining the Concentration of Ammonium Sulphate Solutions (Dr. John A. Whitaker and Dr. Robert Hughes), 603
Rapid Method for Examining Diapause Embryos of *Acheta commodus* W. (T. W. Hogan), 269
Rapid Micro-quantitative Method for Estimating Serum Calcium (T. A. Harper), 232
Rapid Quantitative Horizontal Paper Chromatography at an Elevated Temperature—Determination of Aspartic and Glutamic Acids (Henry R. Roberts and Michael G. Kolor), 460
Rapid Specific Method for Determination of Aldosaccharides in Body Fluids (Dr. Eric Hultman), 108
Rare-Earth Minerals from the Pegmatites of South Harris, Outer Hebrides : Niobium–Zirconium–Thorium–Uranium and (Dr. O. von Knorring and R. Dearnley), 255
Rare Radioelements : Chemistry of the—Polonium–Actinium (Dr. K. W. Bagnall), *review* by G. R. Hall, 962
Rare Sperm Abnormality—'Corkscrew-sperms' associated with Sterility in Bulls (Dr. Erik Blom), 1280
Rare Variant of B in a Human Blood Sample belonging to Group AB (Dr. J. Moullec and Dr. P. Le Chevrel), 1733
Rashbass, C. : Barbiturate Nystagmus and the Mechanisms of Visual Fixation, 897

- Rasmussen, Erik : Behaviour of Sacculinized Shore Crabs (*Carcinus maenas* Pennant), 479
- Rat : Effects of Deficiency of Pantothenic Acid on Oxygen Poisoning in the (Dr. D. W. Taylor), 257
  - Effect of Insulin and Phenazine Methosulphate on Pathways of Glucose Catabolism in the Mammary Gland of the (P. McLean), 182
  - Synthesis of Dextran Sulphate labelled with Carbon-14 and Tracer Experiments in the (Dr. H. Weigel and Dr. K. Walton), 981
  - The Water–Salt Receptor and Preference in the (Dr. J. A. Deutsch and A. D. Jones), 1472
- Rat (Living) : Formation of Urea from Arginine in the Brain of the (Michael B. Sporn, Wesley Dingman, Alfred Defalco and Robert K. Davies), 1520
- Rat (White) : Effect of Norleucine and related Compounds on Growth of the (M. Rechcigl, jun., H. H. Williams and J. K. Loosli), 1519
- Rat Brain : Effect of Toxopyrimidine on Glutamic-decarboxylase and Glutamic-oxalacetic Transaminase of (Dr. G. Rindi, V. Perri and U. Ventura), 1126
- Rat Brain Stem : Selective Staining of Visceral Efferents in the, by a Modified Koelle Technique (Dr. P. R. Lewis and Dr. C. C. D. Shute), 1743
- Rat Cartilage (Rachitic) : Influence of Vitamin D on Synthesis of Hexosamine by (P. K. Dikshit), 334
- Rat Diaphragm : Influence of Ions on the Uptake of Glucose and on the Effect of Insulin on it by (Dr. Gangagobinda Bhattacharya), 324
- Rat Liver : Effect of Protein-free Diet on the Vitamin A Storage in the (M. Rechcigl, jun., S. Berger, J. K. Loosli and H. H. Williams), 1597
  - Partition of Selenium-75 in the Intracellular Particulate Matter of (Dr. Kenneth P. McConnell, Dorothy M. Roth and R. Duncan Dallam), 183
  - Vitamin B_{12} and Biosynthesis in (Vitamin B_{12} and Protein Biosynthesis), (Dr. H. R. V. Arnstein and Dr. J. L. Simkin), 523
- Rat Sarcoma (Growing) : Collagen Content of Normal Connective Tissue, of Tissue surrounding a Tumour and of (Maria Grabowska), 1186
- Rat Tail Tendon : Effect of Cross-linking by Formaldehyde on the Contraction–Relaxation of (Dr. Harry R. Elden), 332
  - Elongation of, on Hydration (Dr. Harry R. Elden), 1681
- Rat–Mouse Chimera : Life-Span of Rat and Mouse Erythrocytes in the (Dr. Joan W. Goodman and Dr. L. H. Smith), 1833
- Rat and Mouse Erythrocytes in the Rat–Mouse Chimera : Life-Span of (Dr. Joan W. Goodman and Dr. L. H. Smith), 1833
- Ratcliffe, Dr. J. A. : Gas Discharges, 91
- Rate of Bilirubin Conjugation *in vitro* : Factors affecting the (Dr. E. Talafant and J. Továrek), 111
- Rate of Elimination of Digoxigenin in the Guinea Pig : Effect of the, on the Determination of its Lethal Dose (M. Rand and Anne Stafford), 688
- Rate of Exchange of Phosphate in Red Blood Cells—Effect of Thyroid Hormones (A. M. Ermans and Prof. P. A. Bastenie), 679
- Rates (Relative), of Liver Storage of Pure α-, β-, γ- and δ-Tocopherols in the Growing Chick (T. W. Griffiths), 1061
- Rathgeber, Dr. H. D. : Multiple Geiger Counter Telescope Measurements of the Directions of Air Shower Particles, 386
- Ratio of Visible to Lethal Mutations produced in *Drosophila* by Phenylalanine Mustard (L. S. Altenburg and Edgar Altenburg), 699
- Rational Discussion, *review* by Dr. E. H. Hutten, 1078
- Rations (Standard), in the Tropics : A Possible Vitamin E Deficiency occurring in a Herd of Pigs fed (W. J. A. Payne), 828
- Ratios (Lattice Constant), of Lithium-6- and Lithium-7-rich Fluorides : Refractivity and (Dr. R. W. H. Stevenson and P. T. Nettley), 1000
- Rats : Anti-Thyroid Action of β-Aminoethylisothiouronium Dibromide in (John Osmer, Dr. Robert B. Jennings and Dr. Robert M. Dowben), 470
  - Effect of Reduction of Stimulation on Consumption of Food, Intake of Water and Weight of Body in (Dr. Karl Weiss and Harry M. B. Hurwitz), 344
  - Effect of Salicylate on Blood and Liver Xanthine Dehydrogenase of (Emilio Mitidieri and Ottilia R. Affonso), 471
  - Effect of Tranquillizing Agents on the Resistance of, to Histamine Stress (Dr. Arthur M. Sackler, Dr. A. S. Weltman and Dr. Raymond R. Sackler), 896
  - Effects of Vanadium upon Liver Coenzyme *A* in (E. Mascitelli-Coriandoli and C. Citterio), 1527
  - 5-Hydroxytryptamine in Blood during Experimental Traumatic Shock in (M. Medaković and I. Spuzić), 1685
  - Influence of Dietary Cod-liver Oil and some Fractions of Cod-liver Oil on Serum Cholesterol-level of (A. P. de Groot and S. A. Reed), 1191
  - Succinic Dehydrogenase Activity of Brain Tissue of, after Ovariectomy and Steroid Administration (H. Sobel and B. Eckstein), 54
- Rats sentitized by *Bordetella pertussis* : Reduced Activity of Histaminase in (Makoto Niwa, Yutaka Yamadeya, Toshitaka Matsui and Prof. Yoshio Kuwajima), 755 ; (Toshitaka Matsui, Masayoshi Kishigami and Prof. Yoshio Kuwajima), 756
- Rats adapted to Intermittent Starvation : Liver Hexokinase Activity in (Dr. R. Petrásek), 329
- Rats treated with Toxopyrimidine : γ-Aminobutyric Acid and Glutamic Acid Content of Brains of (Dr. G. Rindi and G. Ferrari), 608
- Rats (Ageing) : Sex Incidence of Vascular Lesions in, in relation to Previous Pregnancies (Prof. Theodore Gillman and Michael Hathorn), 1139
- Rats (Hypophysectomized) : *In vitro* Effects of Insulin and Glucose on Leucine-2-^{14}C Incorporation into Protein of Diaphragms of (Dr. J. L. Kostyo), 1518
- Rats (Irradiated) : Effect of High Oxygen Pressure on the Protective Action of Cystamine and 5-Hydroxytryptamine in (H. A. S. van den Brenk and Ruth Moore), 1530
- Rats (Male) : Influence of Temperature and Light on Reproduction in (F. A. Soliman and A. S. Abd-El-Malek), 266
- Rats (Normal and Alloxanized) : Action of Nicotinamide on Acetoacetate Metabolism of Liver Homogenates of (S. Eser, S. Tekman and A. Araz), 184
- Rausch, Douglas A., and others : Aliphatic Fluorine Compounds, *review* by Prof. R. N. Haszeldine, 139
- Ravasi, M. (Setnikar, Dr. I., and) : Inhibition of Sensitiveness to Nicotine of Rabbit Aorta by Reserpine, Hexamethonium, Ethyl Flavone-7-Oxyacetate and other Compounds, 898
- Rawlins, F. I. G. : Papers and Correspondence of C. S. Pierce, *review*, 276
  - Critique of Wittgenstein's Philosophy, *review*, 494
  - Truth and Denotation, *review*, 1628
- Ray, Carleton, and Ciampi, Elgin : The Underwater Guide to Marine Life, *review* by Dr. D. P. Wilson, 852
- Ray, Dr. N. H. : Effect of the Carrier Gas on the Sensitivity of a Thermal-conductivity Detector in Gas Chromatography, 674
- Ray (Cosmic-) Equator and the Geomagnetic Dip Equator : Difference between (Takashi Oguchi and Masahiro Kodama), 103
- Ray (Cosmic-) Exposure Ages of Meteorites : Calculation of Erosion in Space from the (Dr. F. L. Whipple and Dr. E. L. Fireman), 1315
- Ray (Cosmic-) Intensity : Storm-Time Increase of (Prof. Sekiko Yoshida and Masami Wada), 381
- Ray (Cosmic-) Showers, *review* by Dr. R. M. Tennent, 1555
- Raybould, Prof. S. G. (edited by) : Trends in English Adult Education, *review* by T. H. Hawkins, 1419
- Raynor, Prof. G. V. : Elected a Fellow of the Royal Society, 861
- Reaction : Gas Phase Oxidation of Hydrocarbons—Endothermic Nature of the Initial Stage of (Dr. K. C. Salooja), 602
- Reaction of some Silicates with Chelating Agents (Dr. D. A. Sutton, M. D. Middleton and R. A. F. Body), 99, *erratum*, 1719
- Reaction of Sodium Borohydride with Wool (J. M. Gillespie), 322
- Reaction (A Colour), for Thiolsulphinates (John F. Carson and Francis F. Wong), 1673
- Reaction (A Diagnostic), of *Desulphovibrio desulphuricans* (Dr. John Postgate), 481
- Reaction (Differential), of Saprophytic and Parasitic Soil-inhabiting Fungi to Indoleacetic Acid (E. W. B. Ward and Prof. A. W. Henry), 1064
- Reaction (Exchange), induced by Radiation between Diethyl Sulphate and Labelled Sulphuric Acid—a Possibly Ionic Reaction (Dr. Paul Y. Feng and Ahren Jacobson), 251
- Reaction (Feulgen), in the Fucales (Dr. M. Naylor), 627
- Reaction (Feulgen–Naphthoic Acid Hydrazide), applied to Blood Smears (Dr. R. K. Archer), 820
- Reaction (Grain Boundary), of Aluminium–Zinc Alloys : Crystallographic Orientation of Nodules formed by the (Dr. Ryoji Watanabe and Dr. Shigeyasu Koda), 1667
- Reaction (Homotransplantation) : Antibody Formation by Isolated Spleen Cells transferred to Recipients in Absence of (Dr. Z. Trnka and I. Ríha), 546
- Reaction (Ionic) : Exchange Reaction induced by Radiation between Diethyl Sulphate and Labelled Sulphuric Acid—a Possibly (Dr. Paul Y. Feng and Ahren Jacobson), 251
- Reaction (Systemic Tuberculin), in Rabbits : Demonstration of Endogenous Pyrogen in Serum during (Dr. J. Johanovsky), 693
- Reaction Zone in Detonation : Suppressed Light Emission of the (Prof. C. H. Johansson and L. Sternhoff), 247
- Reactions (Chemical) : Electronic Theory and (R. W. Stott), fourth edition, *review* by Dr. R. I. Reed, 968
- Reactions (Staining), for Mast Cells : Differences in Mechanism in (Dr. Harold M. Fullmer), 1274
- Reactions (Thermal) : Initiation of, by the Flash Illumination of Absorbing Bodies (Dr. J. L. Lundberg and Dr. L. S. Nelson), 1560
- Reactions (Thermal), of Highly Fluorinated *Cyclo*hexadienes (B. Gething, Dr. C. R. Patrick and Prof. J. C. Tatlow, and Dr. R. E. Banks, Dr. A. K. Barbour and A. E. Tipping), 586
- Reactions (Thermoregulatory), of Dairy Heifers : Effect of Clipping the Coat on the (N. Berman and H. H. Kibler), 606
- Reactivation of Heat-inactivated Poxviruses—a General Phenomenon which includes the Fibroma–Myxoma Virus Transformation of Berry and Dedrick (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340
- Reactivation (Bud), in *Splachnum ampullaceum* (L.) Hedw. : Interaction between Kinetin and Indoleacetic Acid in the Control of (Prof. K. E. von Maltzahn), 60
- Reactor (*HERO*) to be built at Windscale : New, 508
- Reactor (Atomic) : First Hungarian, 1162
- Reactor (High-Flux) : Neutron Diffraction at a (Dr. G. E. Bacon and R. F. Dyer), 35
- Reactor (Medical Research), at the Brookhaven Medical Research Center (Dr. E. E. Stickley), 1013
- Reactor Accident (Windscale) : Measurements at Leeds following the—Iodine-131 in Human Thyroids and Iodine-131 and Caesium-137 in Milk (Dr. P. R. J. Burch), 515 ; Increase in Background Gamma-Radiation and its Correlation with Iodine-131 in Milk (Prof. F. W. Spiers), 517
- Reactor Control (Nuclear), and Instrumentation (J. H. Bowen and E. F. O. Masters), *review* by R. Vaux, 1149
- Reactor Heat Transfer (W. B. Hall), *review* by R. Vaux, 1149
- Reactor Metallurgy : Nuclear (Walter D. Wilkinson and William F. Murphy), *review* by Prof. A. H. Cottrell, 1628
- Reactor Power Stations : Advanced Gas-cooled, 508
- Reactor Shielding : Nuclear (J. R. Harrison), *review* by R. Vaux, 1149
- Reactor Theory : Nuclear (J. J. Syrett), *review* by R. Vaux, 1149
- Reactors : Control and Instrumentation of (Harwell Reactor School Second Course on), 153
- Reactors (Nuclear), on a Commercial Basis, 436
- Read, Prof. John : Selected for the 1959 Dexter Award of the American Chemical Society, 1304
- Readings in Perception (selected and edited by Prof. David C. Beardslee and Prof. Michael Wertheimer), *review* by Prof. R. W. Pickford, 1625
- Reagan, Daryl : A Non-Thermal Direct-Current Plasma-heating Mechanism, 102
- Reagents (Anthrone and Seliwanoff) : Determination of Galactosediethylmercaptal and 3,6 Anhydrogalactose-diethylmercaptal with the (W. Yaphe), 44
- Reception (Anomalous Night-Time), of a Major Solar Radio Burst (Prof. Alex. G. Smith, T. D. Carr and W. H. Perkins), 597
- Receptor (The Water–Salt), and Preference in the Rat (Dr. J. A. Deutsch and A. D. Jones), 1472
- Receptor Membrane : Properties of a—Spatial Summation of Electric Activity in a Non-myelinated Nerve Ending (Prof. Werner R. Loewenstein), 1724: Spontaneous Fluctuations in Generator Potential in a Receptor Membrane (Nobusada Ishiko and Prof. Werner, R. Loewenstein), 1725
  - Spontaneous Fluctuations in Generator Potential in a (Properties of a Receptor Membrane), (Nobusada Ishiko and Prof. Werner R. Loewenstein), 1725

Receptor Substances (Erythrocyte) : New Inhibitor and, for certain Asian Strains of Influenza Virus (Gy. Takátsy and K. Barb), 52
Receptor-destroying Enzyme (Bacterial Neuraminidase) : Purification of (G. L. Ada and E. L. French), 1740
Receptors (Hair), in Locusts—Hair Plates on the First Cervical Sclerites of the Orthoptera (Dr. L. J. Goodman), 1106 ; Function of certain Prothoracic Hair Receptors in the Desert Locust (Dr. P. T. Haskell), 1107
Rechcigl, jun., M., and others : Effect of Norleucine and related Compounds on Growth of the White Rat, 1519
  Effect of Protein-free Diet on the Vitamin A Storage in the Rat Liver, 1597
Recherche Scientifiques en Afrique Centrale, Institut pour le : Annual Report for 1956, 1718
Recipients : Antibody Formation by Isolated Spleen Cells transferred to, in Absence of Homotransplantation Reaction (Dr. Z. Trnka and I. Ríha), 546
Reciprocal Difference : Assortative Mating and, in the Blue–Snow Goose Complex (Dr. F. G. Cooch and Dr. J. A. Beardmore), 1833
Reclassification of *Leuconostoc mesenteroides P.*60 as a *Pediococcus* (Ellen I. Garvie), 1411
Recombination of Haemoglobin I with S and C : Formation of Normal and Doubly Abnormal Haemoglobins by (Constituents of Human Haemoglobin), (Dr. Harvey A. Itano and Elizabeth Robinson), 1799
Reconstructing the Past, *review* by M. C. Burkitt, 1486
Recording Activity and Behaviour in a Group of Small Animals : A Photographic Method for (Dr. D. K. Edwards), 625
Recording Inhibition and Excitation in the Cat's Retinal Ganglion Cells with Intracellular Electrodes (Dr. Torsten N. Wiesel), 264
Recording Radio Signals from Earth Satellites (G. H. Munro and L. H. Heisler), 809
Recording (Direct), of Column Chromatograms : Adaptation of a Photometer for the (Prof. M. Verzele), 604
Recording (Integration) : A New Method of (Allen Strickler and Dr. William S. Gallaway), 1110
Recording (Photographic), of Agar Diffusion Plates (J. R. Hunter), 1283
Records of Young Eels in Kenya Rivers (Dr. Vernon D. van Someren and Peter J. P. Whitehead), 950
Recoverable Lethal Mutations in *Drosophila* Sperm (Prof. K. G. Lüning and H. O. Henriksson), 1211
Recovery of Injected Progesterone and its relation to the Onset of Human Labour (Prof. Lars Ph. Bengtsson), 405
Recruitment in Government Services and Security Regulations, 1483
Recurrent Conditioning of Spinal Reflexes : Pattern of (Dr. V. J. Wilson, W. H. Talbot and F. P. J. Diecke), 824
Recurrent Inhibition in Cerebral Cortex (Dr. Roger M. Morrell), 979
Red (Neutral) : Effect of, on Plaque Formation by Fowl Plague Virus (Dr. A. P. Waterson), 628
Red Blood Cells : Rate of Exchange of Phosphate in—Effect of Thyroid Hormones (A. M. Ermans and Prof. P. A. Bastenie), 679
Red Cell (Human) : Haemoglobin and 'Apparent Protein' in the (Dr. Eric Ponder), 1330
Red Cell 'Ghosts' : Preparation and the Haemoglobin Content of (Helen M. Anderson and Dr. Joseph C. Turner), 112
Red Cell Haemolysates : Demonstration of Small Components in, by Starch-gel Electrophoresis (Dr. Phaedon Fessas and N. Mastrokalos), 1261
Red Cells : Equilibration of Labelled Magnesium between Sheep Plasma and (A. D. Care, D. C. Macdonald and B. Nolan), 1265
  Impairment of Viral Haemagglutination of, after Treatment with Formalin (F. E. Buckland), 1276
Red Cells of the Mouse after Treatment with Formalin : Increase of Viral Haemagglutinability of (B. Fauconnier and D. Barua), 629
Red Cells (Human) : Effect of Ouabain on Sodium Flux in (Thomas J. Gill and Prof. A. K. Solomon), 1127
Red Muscle as a Possible Character for the Identification of Sharks (Olaf R. Braekkan), 556
Red Pigment : A New Nitrogen-fixing Micro-organism producing a (Gy. Németh), 1460
Red Sandstone (Old), and Silurian Limestones of Monmouth : Heavy Minerals in certain (C. B. Crampton), 485
Reddish, W. : Relaxation Processes (Solid Polymers), 583
Reddy, A. R. N. (Wilman, H., and) : Interfacial Phenomena (Growth of Electro-deposits of Face-centred and Body-centred Cubic Metals on Single Crystals of Face-centred Cubic Substrates), 1098
Redlich, Prof. Frederick C. (Hollingsworth, Prof. August B., and) : Social Class and Mental Illness, *review* by Dr. Clifford Allen, 354
Redman, Prof. R. O. : Elected president for 1959-60 of the Royal Astronomical Society, 510
Reduced Activity of Histaminase in Rats sensitized by *Bordetella pertussis* (Makoto Niwa, Yutaka Yamadeya, Toshitaka Matsui and Prof. Yoshio Kuwajima), 755 ; (Toshitaka Matsui, Masayoshi Kishigami and Prof. Yoshio Kuwajima), 756
Reduced Diphosphopyridine Nucleotide : Effect of, on the Swelling of Isolated Mitochondria (Dr. G. Di Sabato), 997
Reduced Diphosphopyridine Nucleotide–Neotetrazolium Reductase (Dr. T. F. Slater), 1679
Reductase : Reduced Diphosphopyridine Nucleotide–Neotetrazolium (Dr. T. F. Slater), 1679
Reductase (Nitrate), in Higher Plants : Adaptive Synthesis of (Dr. E. J. Hewitt and M. M. R. K. Afridi), 57
Reduction of Carbon Dioxide to Methane during Anaerobic Digestion : Gas–Chromatographic Observation of the (J. Chmielowski and Peter C. G. Isaac), 1120
Reduction in the Lethal Effects of Radiations on *Escherichia coli B* by Treatment with Chloramphenicol (Dr. N. E. Gillies and Tikvah Alper), 237
Reduction of Menadione in Hexane by Chlorophyll *a* under Ultra-Violet Irradiation (Rudolph J. Marcus and Lloyd K. Moss), 990
Reduction of Neotetrazolium Chloride by Vitamin K_3 (T. F. Slater), 50
Reduction of Stimulation : Effect of, on Consumption of Food, Intake of Water and Weight of Body in Rats (Dr. Karl Weiss and Harry M. B. Hurwitz), 344
Reduction (Automatic), of Geophysical Data (Royal Astronomical Society Geophysical Discussion on), 1166
Reduction (Photochemical), of Blue Tetrazolium by Isolated Chloroplasts (John J. Taylor and Prof. Meyer Chessin), 626
Reductones : Oxidation of Ascorbic Acid and similar, by Nitrous Acid (Dr. C. A. Bunton, and Prof. H. Dahn and Dr. Lotte Loewe), 163
Reed, Dr. R. I. : Introductory Electronic Theory, *review*, 279
  An Introduction to Electronic Theory, *review*, 777
  Electronic Theory and Chemical Reactions, *review*, 968
Reed, Dr. R. I., and others : Spore Germination in *Agaricus campestris* L. ex Fr., 1736
Reed, S. A. (de Groot, A. P., and) : Influence of Dietary Cod-liver Oil and some Fractions of Cod-liver Oil on Serum Cholesterol-level of Rats, 1191
Reed, Sheldon C., and others : Variables related to Human Breast Cancer, *review* by Dr. L. Foulds, 955
Rees, Dr. A. L. G. : Appointed chief of the new Division of Chemical Physics of the C.S.I.R.O. Chemical Research Laboratories, 228 ; work of, 228
Rees, Dr. K. R., and others : Differential Effect of Phenothiazines on Oxidative Phosphorylation, 821
Refining of Uranium in the United Kingdom (D. P. Hamilton), 786
Reflexes (Spinal) : Pattern of Recurrent Conditioning of (Dr. V. J. Wilson, W. H. Talbot and F. P. J. Diecke), 824
(III) Reflexion for Diamond : Absolute Measurement of the Intensity of the (Prof. R. Brill and H. Zandy), 1387
Reflexions on the Motility of Muscle, *review* by J. R. Bendall, 278
Reflexions (Radio), from the Moon and Solar Corona (Prof. O. Burkard), 1180
Reform of the Calendar, 509
Refraction of Extra-Terrestrial Radio Waves in the Ionosphere (M. M. Komesaroff and C. A. Shain), 1584
Refractive Index of Uranium Oxide produced by Anodic Oxidation (A. E. Stebbens and Dr. L. L. Shreir), 1113
Refractivity and Lattice Constant Ratios of Lithium-6- and Lithium-7-rich Fluorides (Dr. R. W. H. Stevenson and P. T. Nettley), 1000
Refrigeration : Tenth International Congress of, 1719
Refrigeration, International Institute of (Commission I) : Conference in Copenhagen, 1719
Refsum, A., and others : Effect of Humidity on the Breakdown of a 1-cm. Homogeneous Field Spark Gap in Air, 532
Regeneration of Bone-Marrow in Irradiated Mice : Effect of Pyrimidine Deoxyribonucleotides on the (Dr. Z. Karpfel, J. Soška and V. Drášil), 1600
Regeneration of Cellulose Acetate Membranes used for Zone Electrophoresis (Dr. S. Jacobs), 1326
Regeneration of the Lens of the Eye in the Rabbit (D. Stenhouse Stewart and Prof. Paul G. 'Espinasse), 1815
Regeneration (Caudal), in some Errant Polychaetes : Role of the Supra-Oesophageal Ganglion during the Early Stages of (Dr. R. B. Clark and M. E. Clark), 1834
Regeneration (Proepithelial), in the Midgut of Beetles (A. Ameen and Dr. S. A. Shafiq), 913
Regional Council (Southern), for Further Education : Eleventh Annual Report (1957-58), 1021
Regiomontanus's Astrolabe on exhibition at the National Maritime Museum, 508
Regional Museum Council : Formation of a, 437
  Appointment of Sir John Hobhouse as chairman, 437
Regional Technical Information Services, 1569
Register of Historic Aircraft, 580
Registrar General : Commentary Volume on the Statistical Review of England and Wales for 1956, 1093
Regulation of Morphogenesis in an Oleaceous Tree, *Nyctanthes arbor-tristis* (Subodh Kumar Roy), 1410
Regulations (Security) : Recruitment in Government Services and, 1483
Regulators (Plant Growth) : Geotropic and Morphological Alterations in Rice Seedlings caused by (E. H. Roberts), 1197
Rehovoth Conference on Nuclear Structure : Proceedings of the, held at the Weizman Institute of Science, Rehoveth, 1957, under the auspices of the International Union of Pure and Applied Physics (edited by Dr. H. J. Lipkin), *review* by Prof. B. H. Flowers, 709
Reichard, Dr. Peter, and others : Possible Enzymic Mechanism for the Development of Resistance against Fluorouracil in Ascites Tumours, 939
Reichel, Prof. H., and Bleichert, A. : Excitation–Contraction Coupling in Heart Muscle, 826
Reid, C. S. W. : Function of the Rumen (Treatment and Prevention of Bloat with Anti-foaming Agents), 1645
Reilly, Prof. J., and others : Carotene Content of *Ulex europaeus* (Common Furze), 1680
Reinforced Plastics (British Plastics Federation Conference on), 24
Re-ingestion in *Lepus capensis* L. and *Ochotona roylei* Ogilby (C. H. Tyndale-Biscoe), 471
Reith Lectures (Prof. A. C. B. Lovell), *review* by Dr. R. A. Lyttleton, 1624
Reitler, Dr. R., and others : An Unusual Strain of *Escherichia coli* in Septicaemia as an example of the Transformative Effect of Symbiosis, 339
Reitz, Dr. L. P. : Wheat Genetics, 26
Relation of Education to Research, 1145
Relation of Extracellular to Intracellular Potential Records from Single Cardiac Muscle Fibres (Dr. E. M. Vaughan Williams), 1341
Relation between Lipogenesis and Ketogenesis *in vivo* : Absence of a (Dr. P. A. Mayes), 540
Relation between the Polarizability of Ions and other Significant Properties (Prof. K. Krishnamurti), 1043
Relations (Human), in Industry : Final Report of the Joint Committee on (1954-57), and Report of the Joint Committee on Individual Efficiency in Industry, 1953-57 (Department of Scientific and Industrial Research), 301
Relationship between Auxins and Nucleic Acid Synthesis in Coleoptile Tissues (B. B. Biswas and S. P. Sen), 1824
Relationship between some Bacteria, Protozoa and Diet in Early Weaned Calves (J. Margaret Eadie, Dr. P. N. Hobson and S. O. Mann), 624
Relationship between *Dictyocotyle* and *Calicotyle* (Dr. J. Llewellyn), 835 ; (Dr. Ben Dawes and Dr. Ivor Griffiths), 835
Relationship between Epiphytic Algal Species and their Macrophytic Hosts (G. A. Prowse), 1204
Relationship between the Hake Fishery and a Southerly Sub-surface Return Flow below the Peru Current off the Chilean Coast (Dr. Wilhelm Brandhorst), 1832

Relationship between Proton and Metal Binding by some Peptides, Amino-acid Amides and Amino-acids (Dr. S. P. Datta, R. Leberman and Dr. B. R. Rabin), 745
Relationship between Salinity and Breeding of *Anopheles gambiae* in North-Eastern Tanganyika (A. Smith and J. W. Vail), 1203
Relationship (Dose–Response), in Radiation Leukaemia—the Marking Probit (Dr. D. J. Mewissen), 401
Relationship (Size), of Oocytes and their Nuclei in Two Species of Ascidians (S. R. Venkatasubba Rao), 1454
Relationship (Time), of Metre-Wave and 3-cm. Wave Bursts (M. R. Kundu), 1047
Relationships Opposite to those predicted by the Genetic Correlation between Two Traits in the House Mouse (*Mus musculus*) : Selection for (F. Cockrem), 342
Relationships (Antigenic) : A Critical Test of (Dr. J. G. Feinberg and Hazel Grayson), 987
Relationships (Serological), in the Genus *Gadus* (Prof. Fergus J. O'Rourke), 1192
Relative Rates of Liver Storage of Pure α-, β-, γ- and δ-Tocopherols in the Growing Chick (T. W. Griffiths), 1061
Relativity (General) : Verification of, by means of Artificial Planets (John J. Gilvarry), 666
Relaxation Processes (Faraday Society Discussion on), 583
Relaxation of Glycerol-treated Muscle Fibres by Acetone (Dr. Setsuro Ebashi and Dr. Fumiko Ebashi), 687
Relaxation in Smooth Muscles of Lamellibranch Molluscs: Contraction and (Dr. J. Lowy and B. M. Millman), 1730
Relaxation (Contraction–) of Rat Tail Tendon : Effect of Cross-linking by Formaldehyde on the (Dr. H. R. Elden), 332
Relaxation (Muscle) : Transphosphorylating Enzymes and (J. Molnar and Dr. L. Lorand), 1032
Release of Fixed Ammonium from Soil by Ball Milling (P. M. McDonnell, Prof. F. J. Stevenson and Dr. J. M. Bremner), 1414
Reliability of Statements about Smoking Habits (G. F. Todd and J. T. Laws), (Tobacco Manufacturers Standing Committee Research Paper No. 2), 932
Reliability Award (United States National), for 1958 awarded to Ralph Brewer, 365
Religion : Science, Philosophy and (Sir Russell Brain), 154, 1022
Religion in Seventeenth-Century England : Science and (Prof. Richard S. Westfall), *review* by Dr. H. D. Anthony, 964
Remanent Magnetism of the Allard Lake Ilmenites (Charles M. Carmichael), 1239
Remanent Magnetism of the Cretaceous Basalts of Madagascar (Dr. A. Roche and L. Cattala), 1049
Removal of Dipolar Broadening of Nuclear Magnetic Resonance Spectra of Solids by Specimen Rotation (Prof. E. R. Andrew, A. Bradbury and R. G. Eades), 1802
Renaissance : Paracelsus, an Introduction to Philosophical Medicine in the Era of the (Dr. Walter Pagel), *review* by Prof. Erwin H. Ackerknecht, 1147
Rensselaer Polytechnic Institute, Troy, N.Y. : Appointment of Dr. Walter R. Beam as head of the Department of Electrical Engineering, 1164
Reorganization of Industrial Microbiological Research in Britain, 1
Reorganization of Microbiological Research in Britain (D. J. B. Copp), 416
Repertoire (The Devil's), or Nuclear Bombing and the Life of Man (Victor Gollancz), *review* by R. Brightman, 952
Replacement of Thiamine as a Growth Factor for *Mycobacterium butyricum* (Dr. D. E. Wright), 262
Replication (The Biological), of Macromolecules (edited by F. K. Sanders), *review* by Dr. Roy Markham, 1292
Representation (Polynomial), of Steam Tables (W. G. Berry, G. Black and J. A. Enderby), 598
Reproduction in Male Rats : Influence of Temperature and Light on (F. A. Soliman and A. S. Abd-El-Malek), 266
Reproduction (Chromosomal) : Effect of Colchicine on the Utilization of Thymidine labelled with Tritium during (L. F. La Cour and Dr. S. R. Pelc), 1455
Reproduction and Broadcasting : Stereophonic Sound Recording, (Institution of Electrical Engineers Convention on), 1720
Reproductive Organs of *Hyla aurea* : Histolytic Activity in Seasonal Hypertrophy of the (Prof. L. R. Richardson), 480
Reptiles : Fossil Amphibians and (Dr. W. E. Swinton), second edition, *review*, 73
Reptiles and Amphibians of the United States and Canada East of the 100th Meridian : A Field Guide to (Roger Conant), *review* by A. G. C. Grandison, 958
Reptiles (Fossil), from the Panchet Beds of India (L. B. Tarlo), 912 ; (Dr. Pamela Lamplugh Robinson), 913
Reptilian Nervous System : Environmental Temperature and the (B. B. Boycott and Dr. R. W. Guillery), 62
Research : Advanced European (Council of Europe Competition in), 509
  Building (Department of Scientific and Industrial Research to be the only Government Department with responsibility for), 84, 1367
  Colonial, 1957-58—Reports of the Colonial Research Council ; Committee for Colonial Agricultural, Animal Health and Forestry Research ; Colonial Economic Research Committee ; Colonial Fisheries Advisory Committee ; Colonial Medical Research Committee ; Colonial Pesticides Research Committee ; Colonial Social Science Research Council ; Tsetse Fly and Trypanosomiasis Committee ; Director of the Anti-Locust Research Centre ; and Research Matters not covered by the above Reports of the Specialist Advisory Bodies, 703
  Fisheries, 1567
  Fuel (Prof. R. J. Sarjant), 797
  Fuel (1957)—Report of the Fuel Research Board with the Report of the Director of Fuel Research for 1957 (Department of Scientific and Industrial Research), 797
  Gelatine and Glue (A. G. Ward), 440
  Horticultural and Fruit (Dr. John Grainger), 1507
  Microbiological Defence, 366
  The Relation of Education to, 1145
  Satellite, *review* by Dr. E. B. Armstrong, 963
  Scientific, in Australia, 155
  Space (Royal Society Discussion on), 361
  Submarine Defence, 1432
  Water Pollution (1957)—the Report of the Water Pollution Research Board with the Report of the Director of the Water Pollution Research Laboratory, 161
Research : 1959 Waverley Gold Medal Competition, 510
Research : Educational, Vol. 1, No. 2, 863
Research in Dairying, National Institute for : Appointment of Prof. R. G. Baskett as director, 294, 365
Research on Diseases of the Blood : Scholarships and Fellowships for (Lady Tata Memorial Trust Grants), 581
Research in Education, Scottish Council for : Publication No. 42, Eleven-Year-Olds Grow Up (John S. Macpherson), *review* by Jean Floud, 493
Research on Food, *review* by Dr. Magnus Pyke, 351, 582
Research on Fuel and Power in Britain, 507
Research on Hormones, *review* by Prof. F. G. Young, 1422
Research in Marine Biology or Oceanography : Grants for (Challenger Society), 1368
Research on Phosphates, International Association for : Congress in Biarritz (Phosphates and Organic Substances in Nitrogen Deficiency), 513
Research on Plutonium : Battelle Memorial Institute new laboratory for, 720
Research on the Prevention of Road Accidents, 649
Research in Tropical Medicine, 863
Research in the Under-developed Territories, 703
Research in Water Supply : Government Support for, 1500
Research (Agricultural) : Studentships and Fellowships in (Agricultural Research Council), 722
Research (Antarctic), British National Committee on : To co-ordinate British Antarctic Activities, 292
  Appointment of Sir Raymond Priestley as chairman, 292
Research (Anthropological), Wenner-Gren Foundation for : Viking Fund Medals and Awards of 1,000 dollars awarded to Prof. Raymond W. Firth, Prof. Henri V. Vallois and Dr. Jesse D. Jennings, 1434
Research (Basic and Clinical), of the New Antibiotic, Kanamycin (Maxwell Finland, and 93 other authors), 1570
Research (Biological) : A Century of (Illinois Natural History Survey, Bulletin, Vol. 27), 1233
Research (Building), Studies and Documentation, International Council for : International Congress in Rotterdam, 1783
Research (Cancer) : Clinical and Experimental, *review* by Dr. L. Foulds, 955
Research (Current Scientific), at South African Universities, 1957 : Register of (South African Council for Scientific and Industrial Research), 366
Research (Ecological) : Nature Conservation and, 205
Research (Fishery) : Postgraduate Training Grants in (Development Commissioners, in association with the Ministry of Agriculture, Fisheries and Food, and the Scottish Home Department), 1094
Research (Flavor), and Food Acceptance—a Survey of the Scope of Flavor and Associated Research compiled from papers presented in a series of Symposia given in 1956-57, *review* by Dr. Magnus Pyke, 351
Research (Food) : Advances in (edited by E. M. Mrak and G. F. Stewart), Vol. 8, *review* by Dr. Magnus Pyke, 351
Research (Geological), in Scotland and the north of England (Clough Memorial Research Fund of the Edinburgh Geological Society Grants for), 582
Research (Government), on Food Preservation, 862
Research (Hormone) : Recent Progress in, Vol. 14—Proceedings of the Laurentian Hormone Conference, 1957 (edited by Gregory Pincus), *review* by Prof. F. G. Young, 1422
Research (Industrial Microbiological), in Britain : Reorganization of, 1
Research (Marine), in the United States : Expansion of, 1005
Research (Microbiological), in Britain : Reorganization of (D. J. B. Copp), 416
Research (Microseismic), at the National Institute of Oceanography (Dr. H. M. Iyer and B. J. Hinde), 1558
Research (Nuclear) : Glass in, 292
Research (Nuclear), European Organization for : Annual Report for 1957, 21
Research (Nuclear), Italian National Committee for : Congress on Nuclear Energy, 1094
Research (Operational) : Second International Conference on (International Federation of Operational Research Societies), 934
Research (Operational), in Practice—Report of a NATO Conference (edited by Max Davies and Michel Verhulst), *review* by Dr. Cecil Gordon, 424
Research (Original), and its Encouragement, 563
Research (Radiation) : International Congress on (Publication of the Proceedings), 368
Research (Rural), in the C.S.I.R.O., 228
Research (Scientific), in Britain : Finance of, 156
Research (Scientific), in Central Africa, 1718
Research (Scientific), in Schools (Royal Society Committee on), 435
Research (Scientific and Technological), in Britain, 847
Research (Space) : Appointment of a Steering Group on, 1568
Research (Space), in Britain, 1231, 1302
Research (University), in the United States, 1717
Research (Virus) : Advances in (edited by Kenneth M. Smith and Max A. Lauffer), Vol. 5, *review* by Prof. F. C. Bawden, 636
Research (Vitamin and Hormone) : Progress in, *reviews* by Prof. F. G. Young, 568, 778
Research Associations, 1020
  Position and Functions of the, 275
Research Centre (Nuclear), Grenoble, 858
Research Centre (Nuclear), at Ispra : Italian, 1232
Research Conferences : Gordon, for 1959, 1304
Research Corporation Award for 1958 awarded to Prof. Chien-Shiung Wu, 86
Research Development Corporation, National : Appointment of J. C. Duckworth as managing director, 861
  Appointment of Dennis Hennessey as deputy managing director, 862
  Report and Statement of Accounts for 1957-1958, 1026
Research Development Corporation of India, National : Fourth Annual Report, 1092
Research Fellowships (Mr. and Mrs. John Jaffé Donation) awarded by the Royal Society to Dr. G. Hoyle and to Dr. J. Owen, 1365
Research Fellowships and Grants (Leverhulme Trust), 1499
Research Institute : The McGill—Montreal General Hospital (Prof. J. H. Quastel), 716

Research Laboratory (Mechanical Engineering) : To be known in future as the National Engineering Laboratory, 1162
Research Scholarships : Carlsberg–Wellcome Travelling, 1024
Research Station : The Fish Culture, Malacca (Dr. C. F. Hickling), 287
Research Studentships (Mr. and Mrs. John Jaffé Donation) awarded by the Royal Society to K. L. Manchester and to Dr. M. J. Whelan, 1365
Research Workers : Notes on D.S.I.R. Grants for Graduate Students and (Department of Scientific and Industrial Research), 650
Research and Development (Scientific), in Colleges and Universities—Expenditure and Manpower, 1953-54 (National Science Foundation), 1717
Research and Development (Scientific and Engineering), in British Manufacturing Industry (1955) : Estimates of Resources devoted to (Department of Scientific and Industrial Research), 847
Researches (Special) : Longer-term Grants for (Department of Scientific and Industrial Research), 438
Reserpine Derivatives with Specific Hypotensive or Sedative Activity (S. Garattini, A. Mortari, A. Valsecchi and L. Valzelli), 1273
Reserpine, Hexamethonium, Ethyl Flavone-7-Oxyacetate and other Compounds: Inhibition of Sensitiveness to Nicotine of Rabbit Aorta by (Dr. I. Setnikar and M. Ravasi), 898
Residual House Spraying in the Plains : Effect of, on Anopheline Densities in Huts on the Pare Mountains (Dr. A. Smith), 198
Residual Stresses (Artificially Induced) : Improvement of the Fatigue Strength of Notched Specimens by (T. R. Gurney), 883
Resin-bonded Coatings of Polytetrafluoroethylene (Acheson Colloid, Ltd.), 1501
Resins : Polyamide (Don E. Floyd), *review* by Dr. S. H. Pinner, 851
Resistance of *Anopheles aquasalis* Curry to Dieldrin in Trinidad (T. A. Omardeen), 131
Resistance against Fluorouracil in Ascites Tumours : Possible Enzymic Mechanism for the Development of (Dr. Peter Reichard and Ola Sköld, and Prof. George Klein), 939
Resistance of Rats to Histamine Stress : Effect of Tranquillizing Agents on the (Dr. Arthur M. Sackler, Dr. A. S. Weltman and Dr. Raymond R. Sackler), 896
Resistance (Abnormal), of *Poria vaillantii* (D.C. ex Fr.) Cke. Strains to Copper–Chrome–Arsenate Wood Preservatives (E. W. B. Da Costa), 910
Resistance (Dieldrin), in *Lucilia cuprina* Wied. : Genetics of (G. J. Shanahan), 1540
Resistance (Heat), of Bacterial Endospores : Dependence of the, on their Dipicolinic Acid Content (Brooks D. Church and Harlyn Halvorson), 124
Resistance (Insect), to Insecticides (F. P. W. Wintringham), 1508
Resistance (Insecticide), in Arthropods (Dr. A. W. A. Brown), 1508
Resistance (Varietal), to Spray Damage in Barley (J. Desmond Hayes), 551
Resistance-breaking Biotypes : Testing Populations of Beet Eelworm, *Heterodera schachtii* Schmidt, for, using the Wild Beet (*Beta patellaris* Moq.) as Indicator (Audrey M. Shepherd), 1141
Resistant Houseflies *Musca domestica* : Metabolism of Benzene Hexachloride by (Dr. F. R. Bradbury and H. Standen), 983
Resistant and Non-resistant Seeds : Antimicrobial Substances from (Dr. Jasper C. Maruzzella and Dr. Martin Freundlich), 972
Resolution of Chlorpheniramine and the Pharmacological Properties of its Isomers (R. T. Brittain, Dr. P. F. D'Arcy and Dr. J. H. Hunt), 734
Resolution (High-) Survey of the Andromeda Nebula at 408 Mc./s. (Dr. M. I. Large, D. S. Mathewson and C. G. T. Haslam), 1250
Resolution (High-) Survey of the Coma Cluster of Galaxies at 408 Mc./s. (Dr. M. I. Large, D. S. Mathewson and C. G. T. Haslam), 1663
Resonance : Nuclear Magnetic (H. S. Gutowsky, and seventeen other authors), *review* by R. E. Richards, 969
    Quadrupole, *review* by Dr. R. H. Tredgold, 1078
Resonance (Electron Spin), in Irradiated Deoxyribonucleic Acid (Dr. J. W. Boag and A. Müller), 831
Resonance (Nuclear Magnetic) : Molecular Motion of Enclathrated Compounds as studied by (Dr. D. F. R. Gilson and Prof. C. A. McDowell), 1183
Resonance (Nuclear Magnetic), in Rolled Copper Sheet (E. A. Faulkner), 1043
Resonance (Proton Magnetic) : Positions of Protons in Aluminium Hydroxides derived from (Structure of some Hydroxides and Hydrous Oxides), (D. J. Kroon and C. v. d. Stolpe), 944
Resonance Energies : Interpretation of, in the Photoproduction and Scattering of Pions from Hydrogen (Dr. K. M. Guggenheimer), 1758
Resonance Spectra (Nuclear Magnetic), of Solids : Removal of Dipolar Broadening of, by Specimen Rotation (Prof. E. R. Andrew, A. Bradbury and R. G. Eades), 1802
Resonance Spectroscopy : Nuclear Quadrupole (T. P. Das and E. L. Hahn), *review* by Dr. R. H. Tredgold, 1078
Resonance Spectrum (Electron Spin), of Glycine : Changes in the, with Increasing Doses of Radiation (Dr. J. W. Boag and A. Müller), 831
Resonance Study (An Electron Spin), of the State of Copper in Fungal Lacasse (Dr. Bo G. Malmström, Dr. Rolf Mosbach and Dr. Tore Vänngård), 321
Respiration : Inhibition of Growth and, of *Ophiobolus graminis* var. *avenae* and *Aspergillus niger* by Cystine (Elizabeth M. C. Turner), 1130
Respiration of Corixidae (Hemiptera-Heteroptera), (Dr. Edward J. Popham), 914
Respiration of Excised Tomato Roots (D. R. Morgan and H. E. Street), 1023
Respiratory Chain : Energetic Coupling in the (Dr. Poul E. Glahn and Dr. Sigurd O. Nielsen), 1578
Response of Newly Born Mice to a Chemical Carcinogen (Giuseppe Pietra, Kathryne Spencer and Prof. Philippe Shubik), 1689
Response to Radiation in Barley Roots : Effect of Phosphorylated Methylnaphthohydroquinones on the (A. D. McKelvie), 1194
Response of Rice to Small Differences in Length of Day (Dr. J. Dore), 413 ; (Dr. E. Njoku), 1598
Response Probability : Effects of Independent Variations in Stimulus and (P. M. A. Rabbit), 1212
Response (Differential), of Human Serum Cholinesterase Types to an Inhibitor in Potato (Dr. H. Harris and Mary Whittaker), 1808
Response (Differential), of Male and Female Adults of *Trogoderma granarium* Everts towards Sterilizing Doses of Gamma-radiation (G. C. Carney), 338
Response (Electrical), to Illumination of the Euphausiid Crustacean Eye (Elizabeth M. Kampa ,Brian P. Boden and Bernard C. Abbott), 1820
Response (Katharometer) : Effect of Carrier Gas on (W. A. Wiseman), 1321
Response (Morphogenetic), of *Citrus* Ovules to Growth Adjuvants in Culture (N. S. Ranga Swamy), 735
Responses of Invertebrates, *review* by Dr. G. A. Horridge, 4
Responses of Seedlings to Extracts of Soybean Nodules bearing Selected Strains of *Rhizobium japonicum* (Herbert W. Johnson, Ura M. Means and Francis E. Clark), 308
Retarder (Root-Growth), in Chou Moellier (*Brassica oleracea* var.) : A Germination Inhibitor and (A. G. Campbell), 1263
Retention (Lithium), in Ascites Tumour Mice (Shirley E. Simon, E. M. Trautner and D. A. Coats), 1128
Reticular Cells : Re-utilization of Lymphocyte Remnants by (Dr. M. Hill), 1059
Retina of Anurans : Number of Fibres in the Optic Nerve and the Number of Ganglion Cells in the (Dr. H. R. Maturana), 1406
Retinal Ganglion Cells (Cat's) : Recording Inhibition and Excitation in the, with Intracellular Electrodes (Dr. Torsten N. Wiesel), 264
Return Flow (Southerly Sub-surface), below the Peru Current off the Chilean Coast : Relationship between the Hake Fishery and a (Dr. Wilhelm Brandhorst), 1832
Re-utilization of Lymphocyte Remnants by Reticular Cells (Dr. M. Hill), 1059
Reversal by various Agents : Inhibition of Polynucleotide Phosphorylase by Degraded Ribonucleic Acid—its (Dr. Roland F. Beers, jun.), 1335
Reversal of Antibiotic Action of Cycloheximide (Actidione) by Bivalent Metal Ions (M. Blumauerová and J. Starka), 261
Reversal of Epinephrine Inhibition of Liver Tyrosine Oxidation (Prof. Gerald Litwack and Valentina Wojciechowski), 1675
Revision of the Malayan Myristicaceae (J. Sinclair), 1169
Revolution (Industrial) : Technology of the, *review* by G. B. L. Wilson, 70
Reynolds, Dr. Stanley I. : Surface Charges produced on Insulators by Short- and Long-time Ionization, 671
Reynolds Number at the Transition from Streamline to Turbulent Flow : Variations in the Value of (Dr. P. J. Isaac, I. B. Williams and Dr. W. M. Jones), 531
Rhenium : Lowest Oxidation States of Technetium and (R. Colton, J. Dalziel, W. P. Griffith and Prof. G. Wilkinson), 1755
Rheumatoid Synovial Fluid : Colloid Osmotic Pressure of (Paavo Mäkinen and Eino Kulonen), 475
Rhinogs Nature Reserve (Nature Conservancy), 1649
Rhizobium japonicum : Responses of Seedlings to Extracts of Soybean Nodules bearing Selected Strains of (Herbert W. Johnson, Ura M. Means and Francis E. Clark), 308
Rhodium : Ductility of (A. Calverley and D. W. Rhys), 599
Rhodnius : Oxygen Deficiency and Radiation Damage in the Insect (W. F. Baldwin and T. N. Salthouse), 974
Rhodopsin contain a Trace Metal? : Does (Isao Fukami, Prof. Bert L. Vallee and Prof. George Wald), 28
Rhodopsins : Invertebrate Lumi- and Meta- (Action of Light on Visual Pigments), (Dr. Ruth Hubbard, Paul K. Brown and Dr. Allen Kropf), 442
Rhodopsins (Lumi- and Meta-), of Squid and Octopus (Action of Light on Visual Pigments), (Dr. Allen Kropf, Paul K. Brown and Dr. Ruth Hubbard), 446
Rhys, D. W. (Calverley, A., and) : Ductility of Rhodium, 599
Ribaud, Prof. G. : Presented with a Gold Medal of the Institut Français des Combustibles et de l'Energie, 151
Riboflavin : Crystals of, making up the Tapetum Lucidum in the Eye of a Lemur (Antoinette Pirie), 985
Ribonucleic Acid : Nuclear Origin of (M. Zalokar), 1330
    Synthesis of, during the Division Cycle of Bacteria (M. Schaechter, M. W. Bentzon and Prof. O. Maaløe), 1207
Ribonucleic Acid synthesized by *Escherichia coli B*: Biochemical Heterogeneity of, after Irradiation with Ultra-Violet Light (Kenshi Suzuki and Joji Ono), 395
Ribonucleic Acid (Degraded) : Inhibition of Polynucleotide Phosphorylase by—its Reversal by various Agents (Dr. Roland F. Beers, jun.), 1335
Ribonucleic Acid (Infectious), as Precursor of Tobacco Mosaic Virus (Reto Engler and Prof. Gerhard Schramm), 1277
'Ribonucleic Acid' (Infective) : Yield of, from Impure Murray Valley Encephalitis Virus after Different Treatments (G. L. Ada and S. G. Anderson), 799
Ribonucleic Acid *in vivo*? (Mammalian) : Are Nucleoside Triphosphates Precursors of (Prof. Paul Mandel, Jacques-David Weill, Marc Ledig and Suzanne Busch), 1114
Ribonucleic Acid and Protein in a Cell-free System of a *Mycobacterium* : Effect of Streptomycin on the Incorporation of Amino-Acids labelled with Carbon-14 into (T. Erdös and Agnes Ullmann), 618
Ribonucleoprotein : Failure of, to transfer Antibody Formation (Dr. B. D. Janković, Dr. K. Isaković and J. Horvat), 1400
Ribonucleoprotein from Adult Rabbits : Serum Antibody and γ-Globulin in Baby Rabbits after Transfer of (Dr. Miroslava Hrubešova, Dr. Brigitte A. Askonas and Dr. J. H. Humphrey), 97
Ribonucleoprotein in the Nucleolus of Mammalian Cells : Two Types of (Dr. Robert Love and Dr. T. P. Bharadwaj), 1453
Ribonucleotides (Purine) : Feedback Control of Purine Biosynthesis by (Dr. James B. Wyngaarden and Doris M. Ashton), 747
Rice : Response of, to Small Differences in Length of Day (Dr. J. Dore), 413 ; (Dr. E. Njoku), 1598
Rice Seedlings : Effect of Coumarin on the Germination and Growth of (Dr. G. Misra and S. N. Patnaik), 989
    Geotropic and Morphological Alterations in, caused by Plant Growth Regulators (E. H. Roberts), 1197
Rice Stylet Nematode (*Tylenchorhynchus martini* Fielding, 1956) : Effect of Fatty Acid Mixtures on the (Dr. Titus M. Johnston), 1392
Richards, Prof. O. W. : Elected a Fellow of the Royal Society, 861
Richards, Dr. R. E. : Elected a Fellow of the Royal Society, 861
    Nuclear Magnetic Resonance, *review*, 969
Richards, Dr. R. E., and others : Liquid/Solid Content of Fats, 44
Richardson, Prof. E. G. : Physical Acoustics and the Properties of Solids, *review*, 1221
    Musical Acoustics, 1293
Richardson, Prof. L. R. : Histolytic Activity in Seasonal Hypertrophy of the Reproductive Organs of *Hyla aurea*, 480
Richardson, Sir Owen : *Obituary* by E. W. Foster, 928
Richharia, Dr. R. H. : Elected president for 1959 of the Indian Society of Genetics and Plant Breeding, 722

Richmond, Dr. M. H.: Awarded a Ciba Fellowship for 1959-1960, 1161
Richmond, P. T., and others: Effect of Gibberellic Acid on Development of Autumn Colour and Leaf-fall of Deciduous Woody Plants, 58
Richter, Charles F.: Elementary Seismology, *review* by Ernest Tillotson, 708
Ricinine: A Chromatographic Analysis for (Trevor Robinson and Elvin Fowell), 833
Rickets: Histochemical Changes in the Epiphyseal Cartilage during (Prof. J. T. Irving), 1734
Rickettsial Infections: Symposium on Latency and Masking in Viral and—the Proceedings of a Conference held at the University of Wisconsin Medical School, 1957 (edited by Duard L. Walker, Robert P. Hanson and Alfred S. Evans), *review* by Dr. Kenneth M. Smith, 71
Riddell, R. W., and others: Immunological Aspects of Allergic Disorders (Allergic Hypersensitivity in Man to *Aspergillus fumigatus*), 297
Riddet, Prof. W.: *Obituary* by Dr. F. H. McDowall, 646
Riddlestone, H. G. (Nethercot, W., and): Effects of Arc Stage of Electrical Discharge on Ignition of Inflammable Gas, 669
Riecken, Dr. Henry W.: Appointed head of the Office of Social Sciences of the United States National Science Foundation, 1018
Rigby, Dr. W.: Appointed lecturer in the Department of Organic Chemistry, University of Leeds, 1024
Riggs, Austen: Molecular Adaptation in Haemoglobins—Nature of the Bohr Effect, 1037
Říha, I. (Trnka, Dr. Z., and): Antibody Formation by Isolated Spleen Cells transferred to Recipients in Absence of Homotransplantation Reaction, 546
Riley, N. D.: *Obituary* of Dr. Karl Jordan, 788
Riley, Dr. Ralph: Wheat Genetics, 25
Riley, Dr. Ralph, and others: Genetic Control of Chromosome Pairing in Intergeneric Hybrids with Wheat, 1241
Rindi, Dr. G., and Ferrari, G.: The γ-Aminobutyric Acid and Glutamic Acid Content of Brains of Rats treated with Toxopyrimidine, 608
Rindi, Dr. G., and others: Effect of Toxopyrimidine on Glutamic-decarboxylase and Glutamic-oxalacetic Transaminase of Rat Brain, 1126
'Ring Angels' over South-East England (E. Eastwood, J. D. Bell and N. R. Phelp), 1759
Riordan, John: An Introduction to Combinatorial Analysis, *review* by Dr. L. S. Goddard, 970
Ripley, Dr. S. Dillon: Appointed director of the Peabody Museum, Yale University, 1019; work of, 1019
Rise and Decay of Intensity of Luminescence of Short-Persistence Phosphors (Dr. R. Feinberg), 1546
Riseman, Prof. David: Education in the Age of Science, 1437
River Bottoms: Cover on (Dr. D. Scott and Dr. J. M. Rushforth), 836
River Conway: Feeding of the Oystercatcher (*Haemotopus ostralegus*) on the Edible Mussel (*Mytilus edulis*) in the Estuary of the (R. E. Drinnan), 153
River Estuary (Sierra Leone): Seasonal and Tidal Fluctuations in the Trawl Catches from the (J. C. D. Watts), 1748
River Flow in Great Britain, 1955-56 (Prof. David L. Linton), 714
River Niger as a Barrier in the Spread Eastwards of Haemoglobin C—a Survey of Haemoglobins in the Ibo (Dr. H. Lehmann and Dr. C. Nwokolo), 1587
Rivero, Juan A., and others: Chlorophyll *a* in some Corals and Marine Plants, 1338
Rivers (Kenya): Records of Young Eels in (Dr. Vernon D. van Someren and Peter J. P. Whitehead), 950
Road Accidents: Research on the Prevention of, 649
Robb, Prof. J. C. (Lehrle, Dr. R. S., and): Direct Examination of the Degradation of High Polymers by Gas Chromatography, 1671
Robbins, Prof. Lionel: Life peerage conferred on, 294
Robbins, Dr. R. G.: Humid Tropics Vegetation (Vegetational Mapping in Eastern New Guinea by Air Survey and Ground Reconnaissance), 795; (A New Classification of Mountain Vegetation), 795
Roberts, Prof. A. L. (Chaklader, A. C. D., and): Sintering of Quartz Crystal, 1252
Roberts, Dr. D. F., and Weiner, Dr. J. S. (edited by): The Scope of Physical Anthropology and its Place in Academic Studies—a Symposium held at the Ciba Foundation, 1957, *review* by Dr. Kenneth Little, 70
Roberts, Dr. D. F. (Floyd, Dr. W. F., and): Anatomical, Physiological and Anthropometric Principles in the Design of Office Chairs and Tables, 1022
Roberts, Dr. E. A. H.: Chemistry of Condensed Tannins (Oxidative Condensation in Tea Fermentation), 1168
Roberts, E. H.: Geotropic and Morphological Alterations in Rice Seedlings caused by Plant Growth Regulators, 1197

Roberts, J. B. (Morris, M. B., and): A Group of Pseudomonads able to Synthesize Poly-β-hydroxybutyric Acid, 1538
Roberts, Dr. J. J., and Warwick, Dr. G. P.: Metabolism of Myleran (1:4-Dimethane-sulphonyloxybutane), 1509
Roberts, Prof. R. Alun: *Obituary* of Prof. Thomas Thomson, 1159
Roberts, Dr. W. M.: Appointed lecturer in physical chemistry at Queen's University, Belfast, 1024
Roberts, W. M. B.: Estimation of Strontium in Animal Bone using X-Ray Fluorescence Analysis, 887
Roberts, Dr. W. T.: Appointed lecturer in industrial metallurgy at the University of Birmingham, 438
Robertson, Dr. N.: Experimental Approaches to the Problems of Growth and Form in Plants (Growth and Form of Fungi), 585
Robertson, W. A.: *Obituary* of Sir Ralph Pearson, 150
Robertson, W. D. (Dew-Hughes, D., and): Interfacial Phenomena (Mechanism of Hardening in Aluminium–Copper Alloys), 1099
Robertson (W. H. A.) Medal and Premium of the Institute of Metals awarded to Dr. R. B. Sims, 793
Robin, G. de Q.: Antarctic Meteorology (Snow and Ice Characteristics), 1503
Robin, Dr. Louis: Fonctions Sphériques de Legendre et Fonctions Sphéroidales, Tome 2, *review* by Prof. T. A. A. Broadbent, 1421
Robinson, Dr. B. W.: Of What Use is Acoustics to the Musician?, 1294
Robinson, Elizabeth (Itano, Dr. Harvey A., and): Constituents of Human Haemoglobin—Formation of Normal and Doubly Abnormal Haemoglobins by Recombination of Haemoglobin I with S and C, 1799
Robinson, Dr. F. A., and others: A New Short-acting Thiobarbiturate, 1443, *erratum*, 1571
Robinson, G., and others: Co-ordination Chemistry (Determinations of the Crystal Structure of some Organo-transition Metal Complexes), 1785
Robinson, Kathleen W.: Adrenal Cortical Function in the Pregnant Sheep, 690
Robinson, Dr. Pamela Lamplugh: Fossil Reptiles from the Panchet Beds of India, 913
Robinson, Roy: Genetic Independence of Four Mutants in the Syrian Hamster, 125
Robinson, Trevor, and Fowell, Elvin: A Chromatographic Analysis for Ricinine, 833
Roche, A.: Phosphates and Organic Substances in Nitrogen Deficiency, 513
Roche, Dr. A., and Cattala, L.: Remanent Magnetism of the Cretaceous Basalts of Madagascar, 1049
Rock (Trap-Shotten), from the Biligirirangan Hills, Mysore State, India (Prof. C. S. Pichamuthu), 483
Rockefeller Foundation: Election of Dr. J. George Harrar as vice-president, 1018
  Election of Dr. Robert S. Morison as director for medical and natural sciences, 1018
  Appointment of Dr. John C. Bugher as consultant on nuclear energy, 1018
  Appointment of Dr. Albert H. Moseman as deputy director for agricultural sciences, 1018
  Annual Report for 1957, 1306
Rockefeller Institute, New York: Fellowships for Foreign Students, 1365
Rockefeller Institute, New York—a New Graduate University (L. J. F. Brimble), 1629
Rockefeller Institute Press: Establishment of the, 509
Rocks from Newfoundland: Palaeomagnetism of certain (Dr. A. E. M. Nairn, D. V. Frost and B. G. Light), 596
Rocks (Chinese): Some Palaeomagnetic Investigations on (Dr. Chang Wen-you and Dr. A. E. M. Nairn), 254, 652
Rocks (Igneous): Magnetostriction and Palaeomagnetism of (P. M. Scott and Dr. F. D. Stacey), 384; (Dr. John W. Graham, A. F. Buddington and J. R. Balsley), 1318
Rodd, Dr. E. H.: Names and Ciphers in Organic Chemistry, *review*, 960
Rogers, Prof. C. A.: Elected a Fellow of the Royal Society, 861
Rogers, Dr. G. E., and others: Structure of α-Keratin, 592
Rogers, Dr. G. E., and Springwell, P. H.: Amino-acid Metabolism in Wool Roots, 993
Rogers, Prof. Stanfield: Induction of Arginase in Rabbit Epithelium by the Shope Rabbit Papilloma Virus, 1815
Roginski, Edward E., and others: Ineffectiveness of Molybdenum, Osmium and Cobalt in Dietary Necrotic Liver Degeneration, 472
Rogosinski, Prof. W. W.: Retirement from the chair of pure mathematics at King's College, Newcastle-upon-Tyne, 1365; work of, 1365
Rohrlich, Dr. F. (Johnson, H. R., and): Atomic Electron Affinities, 244
Role of Liver in Metabolism of Chlorpromazine (Dr. R. L. Young, J. J. Ross, jun., and Dr. A. R. Maass), 1396
Role of Lysine in catalysing Ester Hydrolysis (William R. Chesbro and Prof. Leslie R. Hedrick), 994; (Alexander Gero), 994
Role in Metabolism: Amino-Acetone, its Isolation and (Dr. W. H. Elliott), 1051
Role of Poly-β-Hydroxybutyric Acid in the Assimilation of Organic Carbon by Bacteria (Prof. M. Doudoroff and Prof. R. Y. Stanier), 1440
Role of the Scholar in Society (Symposium on, Tunis, 1959), 1772
Role of the Supra-oesophageal Ganglion during the Early Stages of Caudal Regeneration in some Errant Polychaetes (Dr. R. B. Clark and M. E. Clark), 1834
Role of the Thymus in Murine Leukaemia (J. F. A. P. Miller), 1069
Role (Possible), of Sulphur Compounds: Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in Salt Water, and the (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Role (Possible), of Water in Collagen Structure (R. D. B. Fraser and T. P. Macrae), 179
Rolinson, Dr. G. N., and others: Penicillin Derivatives of *p*-Aminobenzylpenicillin, 180, *erratum*, 224
  Synthesis of Penicillin—6-Aminopenicillanic Acid in Penicillin Fermentation, 257
Rolled Copper Sheet: Nuclear Magnetic Resonance in (E. A. Faulkner), 1043
Rolls-Royce, Ltd.: Offer of £100,000 to the University of Nottingham, to endow a Hives chair of thermodynamics, 224
Romeny, C. Ch. Ter Haar, and others: Composition of Lipids isolated from the Aorta, Coronary Arteries and Circulus Willisii of Atherosclerotic Individuals, 47
Rondanelli, Prof. Elio Guido, and others: Method for Testing the Influence of Drugs and Physical Agents upon Mitosis, 190
Rook, Dr. J. A. F.: Function of the Rumen (Milk Composition in relation to Rumen Metabolism), 1645
Room Temperature: Splitting of the Electrophoretic Pattern of Serum Albumin during Short-term Action of Pepsin at (E. Annau), 190
Root-Growth Retarder in Chou Moellier (*Brassica oleracea* var.): A Germination Inhibitor and (A. G. Campbell), 1263
Root-infecting Fungus: Strain Differentiation in a (Dr. Ida Levisohn), 1065
Rooting of Clematis Cuttings: Effect of Boron on the (Dr. C. J. Weiser), 559
Roots: A Technique for the Sterile Culture of (Dr. N. S. Cohn and Dr. T. Merz), 412
Roots (Barley): Effect of Phosphorylated Methyl-naphthohydroquinones on the Response to Radiation in (A. D. McKelvie), 1194
Roots (Excised Tomato): Respiration of (D. R. Morgan and H. E. Street), 1023
Roots (Seminal and Adventitious): A Method of Growing Grass Plants with Separation of (R. Dorrington Williams), 415
Roots (Wool): Amino-acid Metabolism in (G. E. Rogers and P. H. Springell), 993
Ropar, M.: Antarctic Meteorology, 1504
Roper, J. F. Hodgess: Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
Rorem, Dr. Edward S.: Ultra-Violet Fluorescence of Quinine Sulphate for Detection of Phosphate Ester Spots on Paper, 1739
Rose, B.: Immunological Aspects of Allergic Disorders (Antibodies related to Ragweed Pollen), 296

Rose, Dr. B. A. : Physical and Azeotropic Data, *review*, 709
Rose, Dr. H. : Nuclear Fuel Cycles, 1646
Rose, Dr. H., and Syrett, J. J. : Nuclear Fuel Cycles (Long-term Reactivity Changes), 1646
Rose, Dr. H. E., and Trbojević, M. D. : Grinding at Super-Critical Speeds in 'Ball' Mills, 813
Rose, Dr. J. H. : The Nematodes *Ostertagia lyrata* Sjöberg, 1926, and *Trichostrongylus longispicularis* Gordon, 1933, in British Cattle, 1745
Rose, M. E. : Elementary Theory of Angular Momentum, *review* by Prof. N. Kemmer, 705
Rosenblatt, Dr. F. : The Mechanization of Thought Processes (Recent Theoretical Work on the Behaviour of the 'Perceptron'), 225
Rosenhain Medal of the Institute of Metals awarded to Prof. R. W. K. Honeycombe, 793
Roses : Evidence for the Conversion of Quinic.Acid to Shikimic Acid in (L. H. Weinstein, C. A. Porter and H. J. Laurencot, jun.), 326
Ross, F. F. : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1236
Ross, jun., J. J., and others : Role of Liver in Metabolism of Chlorpromazine, 1396
Rossi-Fanelli, Prof. A., and others : Oxygen Equilibrium of Human Haemoglobin in Strong Salt Solutions, 827
Rossotti, F. J. C. (Martin, D. L., and) : Co-ordination Chemistry (Stability of Metal Complexes—Polynuclear Copper (II) Complexes of Carboxylic Acids), 1784
Rotation (Optical), and Configuration of Poly-L-tyrosine (A. R. Downie, Dr. A. Elliott and W. E. Hanby), 110
Rotation (Specimen) : Removal of Dipolar Broadening of Nuclear Magnetic Resonance Spectra of Solids by (Prof. E. R. Andrew, A. Bradbury and R. G. Eades), 1802
Rotation and Vibration in Diatomic Band Spectra : Changes in Transition Probability due to the Interaction of (R. C. M. Learner and Dr. A. G. Gaydon), 242
Rotational Structure of the 3914 A. N_2^+ Band in Sunlit Aurorae (Dr. D. M. Hunten, H. J. Koenig and Prof. A. Vallance Jones), 453
Rotblat, Prof. J., and others : Variation of Sensitivity to Ionizing Radiation with Age, 1729
Roth, Dorothy M., and others : Partition of Selenium-75 in the Intracellular Particulate Matter of Rat Liver, 183

Rothe, Dr. M. : Synthesis of Peptides (Synthesis of Cyclic Peptides), 152
Rotherham, L. : Nuclear Fuel Cycles, 1647
Rothschild, Lord : Joining the Board of 'Shell' Research Ltd., as part-time adviser on research, 1164
Rous, Dr. Peyton : Awarded the Medal of the New York Academy of Medicine, 294
  Surmise and Fact on the Nature of Cancer, 1357
Rous Sarcoma Virus : Zone Electrophoresis of (Robert Cramer), 195
Route (A New General), to Aromatic Fluorocarbons (B. Gething, Dr. C. R. Patrick, Prof. M. Stacey and Prof. J. C. Tatlow), 588
Routledge, Dr. N. A. : Russian Contributions to the International Geophysical Year, 1087
Roux, Dr. D. G. : Flavan-3, 4-diols and Leucoanthocyanidins of *Guibourtia* spp., 890
  Chemistry of Condensed Tannins (Flavans of the Resorcinol Series in relation to the Chemistry of Commercially Important Condensed Tannins), 1169
Roux, Dr. D. G., and Bill, M. C. : Mechanism of Formation of Anthocyanidins from Leucoanthocyani(di)ns, 42
Rowe (N. E.) Medal of the Royal Aeronautical Society awarded to J. Dunham, 1648
Rowley, Dr. D. : Appointed professor of bacteriology in the University of Adelaide, 1716 ; work of, 1716
Roy, Prof. Rustum (Dachille, Frank, and) : The Spinel–Olivine Inversion in Mg_2GeO_4, 1257
Roy, Dr. Supriya: Variation in Etch Behaviour of Jacobsite with Different Cell Dimensions, 1256
Roy, Subodh Kumar : Regulation of Morphogenesis in an Oleaceous Tree, *Nyctanthes arbor-tristis*, 1410
  Second Flowering in *Oryza sativa* (var. *indica*), 1458
Royal Aeronautical Society : Honorary Companionship conferred on Gustavus Green, 154
  Gold Medal awarded to Marcel Dassault, 794
  Discussion on Hypersonic Flow, 1095
  Lecture Theatre for the, 1569
  Honorary Fellowship conferred on Prof. J. Ackeret, Sir William S. Farren and S. B. Gates, 1648
  Honorary Companionship conferred on E. C. Bowyer and Sir William Hildred, 1648
  Silver Medal awarded to Dr. E. A. Watson, 1648
  Bronze Medal awarded to D. G. King-Hele, 1648
  British Gold Medal for Aeronautics awarded to R. S. Stafford, 1648
  British Silver Medal for Aeronautics awarded to D. J. Farrar and Dr. N. H. Searby, 1648
  Wakefield Gold Medal awarded to K. A. Wood, 1648
  R. P. Alston Medal awarded to A. W. Bedford, 1648
  N. E. Rowe Medal awarded to J. Dunham, 1648
  Simms Gold Medal awarded to R. P. Probert, 1648
  George Taylor (of Australia) Gold Medal awarded to H. L. Cox, 1648
  Edward Busk Memorial Prize awarded to T. R. F. Nonweiler, 1648
  Orville Wright Prize awarded to D. A. Spence, 1649
  Herbert Ackroyd Stuart Memorial Prize awarded to A. A. Lombard, 1649
  J. E. Hodgson Prize awarded to J. E. Allen, 1649
  Branch Prize awarded to B. D. Blackwell, 1649
  Navigation Prize awarded to C. M. Cade, 1649
  Usborne Memorial Prize awarded to Dr. J. S. Przemieniecki, 1649
  Pilcher Memorial Prize awarded to A. W. Kitchenside, 1649
Royal Aircraft Establishment : Appointment of S. F. Follett as deputy director (equipment), 931
  Appointment of Dr. A. G. Touch as senior superintendent of the Radio Department, 931
  Appointment of R. J. Lees as head of the Instrument and Photographic Department, 931
  Table of Artificial Earth Satellites, 1566
Royal Astronomical Society : Gold Medal awarded to Dr. R. A. Lyttleton, 151
  Eddington Medal awarded to Dr. J. S. Hey, 151
  Election of Prof. R. O. Redman as president for 1959-60, 510
  Discussion on Turbidity Currents, 657
  Geophysical Discussion on the Automatic Reduction of Geophysical Data, 1166
Royal Astronomical Society and the British Glaciological Society : Geophysical Discussion on Characteristics of the Antarctic Ice-Sheet, 1575
Royal Australian Chemical Institute : H. G. Smith Memorial Medal awarded to Prof. S. J. Angyal, 794
Royal Botanical Gardens, Kew : Bicentenary of the (Dr. W. B. Turrill), 1488
  Vistas in Botany—a Volume in honour of the Bicentenary of the (edited by Dr. W. B. Turrill), *review* by Prof. W. H. Pearsall, 1484
Royal College of Science and Technology of Glasgow : Annual Report, 1501
Royal College of Surgeons : Gift of £150,000 from G. A. Vandervell for the endowment of a chair of pharmacology, 16
  To establish a sub-department of Biochemistry in the Department of Physiology, 579
  Activity in the, 1232
Royal Geographical Society : Patron's Medal awarded to Comdr. W. R. Anderson, 292
  Founder's Medal awarded to Sir Raymond Priestley, 292
  Victoria Medal awarded to Gerald Seligman, 292
  Murchison Grant awarded to Prof. S. P. Chatterjee, 292
  Back Grant awarded to David Stratton, 292
  Cuthbert Peek Grant awarded to W. George Lowe, 292
  Gill Memorial awarded to G. S. Holland, 292
  Mrs. Patrick Ness Award awarded jointly to J. H. Miller and Dr. George W. Marsh, 292
Royal Greenwich Observatory (Dr. R. v. d. R. Woolley), 640
  Isaac Newton Telescope at the, 579
Royal Institute of Chemistry : Symposium on Separation Processes in Analytical Chemistry, 934
  Election of Officers, 1234
Royal Institute of Chemistry (London Section), and others : Debate on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than in the Humanities', 510, 1235
Royal Institution : Lectures for Sixth-form Children, 294
  Library of the, 1433
  Election of Officers, 1571
Royal Jelly : Activity of 10-Hydroxydecenoic Acid from, against Experimental Leukaemia and Ascitic Tumours (Prof. Gordon F. Townsend, Dr. Joseph F. Morgan and Dr. Barbara Hazlett), 1270
  Identification of 10-Hydroxy-Δ^2-decenoic Acid in (S. A. Barker, Dr. A. B. Foster, D. C. Lamb and N. Hodgson), 996
Royal Meteorological Society : M. E. Shoenberg made a life-member, 368
  Appointment of R. H. Levinson as assistant secretary, 368
Royal Naval College, Greenwich : Appointment of J. Edwards to the new chair of nuclear science and technology, 791
Royal Photographic Society (Scientific and Technical Group) : Symposium on Photography in the International Geophysical Year, 1368
Royal Radar Establishment, Malvern : Appointment of Dr. T. S. England as head of the Airborne Radar Department, 294, 647
  Promotion of Dr. T. S. England to Deputy Chief Scientific Officer, 647
Royal Society of Arts : Swiney Prize awarded to Dr. Keith Simpson, 368
Royal Society of Canada : 'Studia Varia' Series, Vol. 2, Our Debt to the Future—Symposium presented on the Seventy-fifth Anniversary, 1957 (edited by E. G. D. Murray), *review* by R. Brightman, 1702
Royal Society of Edinburgh : Makdougall-Brisbane Prize for 1956-58 awarded to Prof. I. N. Sneddon, 652
  Election of new Fellows, 719
Royal Society of London : Tercentenary Celebrations, 221
  Philosophical Transactions, Series B, Vol. 241, The Ecology of Lagos Lagoon, 1, The Lagoons of the Guinea Coast (J. E. Webb) ; 2, The Topography and Physical Conditions of Lagos Harbour and Lagos Lagoon (M. B. Hill and J. E. Webb) ; 3, The Life History of *Branchiostoma nigeriense* Webb (J. E. Webb) ; 4, On the Reactions of *Branchiostoma nigeriense* Webb to its Environment (M. B. Hill and J. E. Webb), 295
  Discussion on Space Research, 361
  Committee on Scientific Research in Schools, 435
  New Fellows of the, 860
  New Foreign Members, 1230, 1498
  Research Appointments, 1365
  Election under the special Statute of H.M. King Gustaf VI Adolf of Sweden as a Fellow, 1571
  Artificial Earth Satellites Programme, 1640
  Discussion on the Ear under Water, 1787
Royal Society and Nuffield Foundation : Fifth Annual Report on the Commonwealth Bursaries Scheme, 1304
Royal Society Base, Halley Bay : Work at the, 1718
Royal Society of South Africa : Election of Officers for 1959, 1502
Royal Society of Tasmania : Election of Officers for 1959, 1643
Royal Society of Victoria : Centenary of the, 86
  Symposium on the Evolution of Living Organisms, 86
  Tiegs Memorial Lecture, 86
Royal Veterinary College : Appointment of Dr. J. A. Laing to the Courtauld chair of animal husbandry, 365
Rubber—Fundamentals of its Science and Technology (Dr. Jean Le Bras), translated by Dr. Irene E. Berck, *review* by Dr. W. J. S. Naunton, 779
  Biosynthesis of (Dr. J. A. Gascoigne and Patricia Jones), 819
  British Compounding Ingredients for (compiled by Brian J. Wilson), *review* by Dr. W. J. S. Naunton, 779
  Propagation of Finite Elastic Waves in (P. Mason), 812
  Science and Technology of, *review* by Dr. W. J. S. Naunton, 779
Rubber (Stretched) : X-Ray Diffraction Measurement of Radiation Damage in (Wesley E. Shelberg and Lewis H. Gevantman), 456
Rubber Hydrocarbons : Estimation of Chain Fracture during the Cross-linking of, by High-Energy Radiation (Dr. L. Mullins and Dr. D. T. Turner), 1547
Rubber Industry, Institution of the : Establishment of a South African Section, 580
Rubber Manufacturers (British), Research Association of : British Compounding Ingredients for Rubber (compiled by Brian J. Wilson), *review* by Dr. W. J. S. Naunton, 779

Rubbers (Natural and Synthetic) : Chemistry of (Prof. Harry. L Fisher), *review* by Dr. W. J. S. Naunton, 779
Ruben, Dr. Laurens N. : Delayed Denervation and Accessory Limb Formation in Urodeles, 765
Rubin, M. J. : Antarctic Meteorology, 1503
Ruch, E., Co-ordination Chemistry (Symmetry of Chromium Dibenzene), 1785
Rudinger, Dr. J. : Synthesis of Peptides (Peptides of the Diamino and Dicarboxylic Acids), 152
Rudimentary Government, *review* by Prof. M. Fortes, 1006
Rudner, Merritt Allen : Fluorocarbons, *review* by Dr. S. H. Pinner, 851
Rudwick, Dr. M. J. S. : Awarded a moiety of the Daniel Pidgeon Fund for 1959 of the Geological Society of London, 1434
Ruebner, Dr. Boris, and Bramhall, James L. : Effect of Dietary Protein on the Severity of Experimental Mouse Hepatitis, 609
Rugby School Natural History Society : Report for 1958, 1718
Ruhemann, Dr. M. : Hydrogen Liquefaction and Associated Techniques, 1505
Rulers : Tribes without—Studies in African Segmentary Systems (edited by John Middleton and the late David Tait), *review* by Prof. M. Fortes, 1006
Rulers (Future) : The Education of our, should be primarily in the Sciences rather than the Humanities (London Section of the Royal Institute of Chemistry, the London Branch of the Classical Association and the Haldane Society Debate on the Motion that), 510, 1235
Rumen : Function of the (Nutrition Society Symposium on), 1644
  A Gram-negative Sporing Bacterium from the (Dr. P. N. Hobson and M. R. Purdom), 904
Rumen Bacteria : Assimilation of Ammonia Nitrogen by (A. T. Phillipson, Marjorie J. Dobson and T. H. Blackburn), 402
Rumen Micro-organisms of the Sheep : Hydrolysis of Lecithin and Lysolecithin by (Dr. R. M. C. Dawson), 1822
Rumford Premium for 1959 of the American Academy of Arts and Sciences awarded to Prof. George Wald, 435
Rumination in Sheep caused by Injection of Adrenaline (R. N. B. Kay), 552
Runaway (Ion), in ZETA : Possibility of (Dr. A. Gibson), 101
Rural Life : Agriculture and (British Agricultural History Society and the Economic History Society Joint Conference on), 582
Rural Life (English), Museum of (Reading) : Exhibition of Old-time Bee-keeping, 1782
Rural Research in the C.S.I.R.O., 228
Rural Wales, Society for the Preservation of (Caernarvonshire Branch) : Annual Report, 222
Rush, Dr. J. H. : The Dawn of Life, *review* by T. H. Hawkins, 966
Rushforth, Dr. J. M. (Scott, Dr. D., and) : Cover on River Bottoms, 836
Russell, Bertrand : Common Sense and Nuclear Warfare, 1351
Russell, Dr. F. S. : *Obituary* of E. W. Sexton, 790
  Obituary of Dr. W. R. G. Atkins, 1228
  Bathyscaphe *F.N.R.S.* III, 1651
Russell, P., and others : Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in Salt Water, and the Possible Role of Sulphur Compounds, 1346
Russell, P. D. D., and others : Nuclear Fuel Cycles (Choice of Fuel Cycle for Nuclear Power Stations), 1647
Russell, Prof. Richard J. : Elected a member of the United States National Academy of Sciences, 1575
Russell, Dr. R. Scott, and Garner, Dr. R. J. : Uptake of Strontium by Pasture Plants and its Possible Significance in relation to the Fall-out of Strontium-90, 1806
Russian Artificial Planet, 83
Russian Contributions to the International Geophysical Year (Dr. N. A. Routledge), 1087
Russian *Journal of Inorganic Chemistry* : A cover-to-cover translation of the *Zhurnal neorganicheskoi Khimii* to be published by the Chemical Society, 1092
Rust (Yellow), of Wheat : 'Karathane'—the Value of its Differential Fungicidal Effect in relation to Mildew and (D. A. Doling and Shirley Hepple), 622
Rustad, Ronald C. : Molecular Orientation at the Surface of *Amoebae* during Pinocytosis, 1058
Rutgers, Prof. A. J. : Electrical Double Layer in Colloid Science (Streaming Currents with Non-aqueous Solutions), 79
Rutin in Tobacco grown in a Greenhouse (Dr. T. P. Ferguson and Dr. A. S. Weaving), 64
Ryan, John : Elected a Fellow of the International Academy of Management, 1719
Rybák, M., and others : Fractionation of Brain Extracts for Acid Phosphatase-elevating Activity, 473
Ryder, Dr. M. L. : Some Unusual Outgrowths from Secondary Follicles in Soay Sheep, 1831
Ryhage, Dr. R., and others : Structure of Phthiocerol, 1117
Rys, Dr. Rajmund : Iron Content in the Serum of Cows with Hypocupraemia, 1596

SACCHAROMYCES : Chromosome Maps of (Prof. Carl C. Lindegren, Gertrude Lindegren, Ernest E. Shult and Sharon Desborough), 800
Sacculinized Shore Crabs (*Carcinus maenas* Pennant) : Behaviour of (Erik Rasmussen), 479
Sacher, J. A., and Glasziou, K. T. : Effects of Auxins on Membrane Permeability and Pectic Substances in Bean Endocarp, 757
Sachs, Dr. Leo, and others : *In vitro* Analysis of a Mammalian Tumour Virus, 663
Sackler, Dr. Arthur M., and others : Effect of Tranquillizing Agents on the Resistance of Rats to Histamine Stress, 896
Sackler, Dr. Raymond R., and others : Effect of Tranquillizing Agents on the Resistance of Rats to Histamine Stress, 896
Sacks, Prof. Jacob : Prolonged Muscular Activity without Phosphate Exchange, 825
Sadler, D. H. : The Astronomical Ephemeris, 1960, 1705
Safety and the Nuclear Power Industry (House of Commons Debate on), 292
Saikia, A., and others : Disturbance in the Pattern of Serum Proteins in Experimental Atherosclerosis and its Prevention, 894
Saito, Yasukazu, and others : Effect of Thermal Neutron Irradiation on Oxide Catalysts for the Decomposition of Nitrous Oxide, 388
Salam, Prof. A. : Elected a Fellow of the Royal Society, 861
Sale, P. J. M., and Vince, Dr. D. : Effects of Wave-length and Time of Irradiation on Internode Length in *Pisum sativum* and *Tropaeolum majus*, 1174
Salfeld, Dr. K. (Braun-Falco, Dr. O., and) : Leucine Aminopeptidase Activity in Mast Cells, 51
Salicylate : Effect of, on Blood and Liver Xanthine Dehydrogenase of Rats (Emilio Mitidieri and Ottilia R. Affonso), 471
  Effect of, on Muscle Phosphorylase (Dr. Stanton Segal and Alberta Blair), 1609
  Thyroxine-releasing Effect of, and of 2,4-Dinitrophenol (Dr. L. Korsgaard Christensen), 1189
Salinity and Breeding of *Anopheles gambiae* : Relationship between, in North-Eastern Tanganyika (A. Smith and J. W. Vail), 1203
Saliva : Secretion of Two Types of, by an Aphid (Dr. P. W. Miles), 756
Salivary Glands (Posterior), of Cephalopods : Cephalotoxin, the Crab-paralysing Agent of the (Dr. F. Ghiretti), 1192
Salmonella : Formation of 'Protoplasts' in Mutant Strains of, induced by Galactose (Toshio Fukasawa and Hiroshi Nikaido), 1131
Salmonella–Escherichia Hybrids (T. Miyake and Dr. M. Demerec), 1586
Salooja, Dr. K. C. : Gas Phase Oxidation of Hydrocarbons—Endothermic Nature of the Initial Stage of Reaction, 602
Salt Concentration and Fibrinolytic Activity (Dr. Monamy Buckell and Margaret Truscott), 1268
Salt Excretion in Marine Birds (Dr. L. Harrison Matthews), 202
Salt Solutions (Strong) : Oxygen Equilibrium of Human Haemoglobin in (Prof. A. Rossi-Fanelli, E. Antonini and A. Caputo), 827
Salt Water : Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in, and the Possible Role of Sulphur Compounds (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Salters' Institute of Industrial Chemistry : Appointment of Prof. A. R. J. P. Ubbelohde as director, 1094
Salthouse, T. N. (Baldwin, W. F., and) : Oxygen Deficiency and Radiation Damage in the Insect *Rhodnius*, 974
Salting-out Paper Chromatograms of Antibiotics : New Types of (Dr. Joseph Uri), 1188
Salts (Alkali) : Effect of, on the Steric Course of Hydrogenation of a Cyclic Allylic Alcohol (M. C. Dart and Prof. H. B. Henbest), 817
Samoan Artificial Aurora (Dr. H. Elliot and J. J. Quenby), 810
Samples of Known Age : Radiocarbon Measurements on (W. S. Broecker, Edwin A. Olson and Junius Bird), 1582
Samples labelled with Phosphorus-32 and Sulphur-35 : An Autoradiographic Method for distinguishing (Dr. W. G. Duncombe), 319
Sanchez-Monge, Dr. E. : Wheat Genetics, 26
Sanders, F. K. (edited by) : The Biological Replication of Macromolecules, *review* by Dr. Roy Markham, 1292
Sanders, J. E., and others (edited by) : Progress in Nuclear Energy, Series I, Physics and Mathematics, Vol. 2, *review* by Dr. J. Walker, 422
Sanders, Dr. J. H. : A Proposed Method for the Measurement of the Velocity of Light, 312
Sandison, Dr. A. T. : Persistence of Sudanophilic Lipid in Sections of Mummified Tissue, 196
Sandroni, S. (Malatesta, L., and) : Co-ordination Chemistry (Carbonyls of Iridium(III)), 1785
Sands of Forvie Nature Reserve (Nature Conservancy), 366
Sandstone (Old Red), and Silurian Limestones of Monmouth : Heavy Minerals in certain (C. B. Crampton), 485
Sandwith, N. Y. : Flora of Manitoba, *review*, 966
Sang, Dr. J. H. : Elected a Fellow of the Royal Society of Edinburgh, 719
Sanger, Dr. Ruth (Race, Dr. R. R., and) : Blood Groups in Man, third edition, *review* by Dr. F. Stratton, 280
Sankar, Prof. D. V. Siva, and Theis, Henry W. : Biosynthesis of Ovalbumin, 1057
Sankey, John : A Guide to Field Biology, *review* by W. H. Dowdeswell, 1081
Santi, R., and de Pietri-Tonelli, P. : Mode of Action and Biological Properties of the S-(Methylcarbamyl) Methyl 0,0-Dimethyl-Dithiophosphate, 398
Saprophytic and Parasitic Soil-inhabiting Fungi : Differential Reaction of, to Indoleacetic Acid (E. W. B. Ward and Prof. A. W. Henry), 1064
Sarcoma (Growing Rat) : Collagen Content of Normal Connective Tissue, of Tissue surrounding a Tumour and of (Maria Grabowska), 1186
Sarcoma Virus (Rous) : Zone Electrophoresis of (Robert Cramer), 195
Sarjant, Prof. R. J. : Fuel Research, 797
Satellite (1958ζ) : The United States Atlas, 17
Satellite Observations (Earth) : Atmospheric Tides and (D. G. Parkyn), 1045 ; (G. V. Groves), 1047
Satellite Orbits : Changes in the Inclination of, to the Equator (R. H. Merson, D. G. King-Hele and R. N. A. Plimmer), 239
  Density of the Atmosphere at Heights between 200 km. and 400 km., from Analysis of Artificial (D. G. King-Hele), 1224
  A New Value for the Earth's Flattening, derived from Measurements of (D. G. King-Hele and R. H. Merson), 881
Satellite Research, *review* by Dr. E. B. Armstrong, 963
Satellites : Artificial Earth (Royal Society Programme), 1640
  Corpuscular Radiation and the Acceleration of Artificial (Dr. Luigi G. Jacchia), 1662
  Deduction of Ionospheric Electron Content from the Faraday Fading of Signals from Artificial Earth (W. T. Blackband, B. Burgess, I. L. Jones and G. J. Lawson), 1172
  Irregularities in the Density of the Upper Atmosphere—Results from (D. G. King-Hele and D. M. C. Walker), 527
  Origin of the Radiation near the Earth discovered by means of (Prof. T. Gold), 355
  Recording Radio Signals from Earth (G. H. Munro and L. H. Heisler), 809
  Scientific Uses of Earth (edited by Prof. James A. Van Allen), second edition, *review* by Dr. E. B. Armstrong, 963
  Table of Artificial Earth (Royal Aircraft Establishment), 1566
  Two Atmospheric Effects in the Orbital Acceleration of Artificial (Dr. Luigi G. Jacchia), 526
Satyanarayan, Dr. Y. : Humid Tropics Vegetation (Evaluating Dominance, in Bombay Forests by Estimating Crown-coverage), 795 ; (The Vegetation of the Western Ghats), 796
Savage, Dr. Robert H. : A Micrographic Study of Wear of Graphite, 315
  Wear of Graphite Surface by Punching and Planing, 454
Savory, Theodore : American Arachnida, 1170

Saxe, Dr. R. F. : Appointed to the University of London readership in nuclear engineering at Queen Mary College, 794
Sayce, George : Awarded a University Scholarship for chemistry by Pfizer Ltd., 1719
Sayers, Prof. J. : Space Research (Ionospheric Work using *Skylark* Rockets), 363
Scaff, J. H., and others (edited by) : Transistor Technology (Members of the Technical Staff of Bell Telephone Laboratories), Vol. I, *review* by Dr. J. R. Tillman, 72
Scaife, J. F. : Stability of Cholinesterase of the Electric Eel, 541
Scald (Superficial), in Stored Apples : Control of (W. Hugh Smith), 760
Scale on Plain Carbon Steels : Structure of (Dr. S. Garber), 1387
Scale-rich Material from Wool : Separation and Analysis of (Dr. J. H. Bradbury), 305
Scanning (Visual), of Photographs of Paper Chromatograms : Quantitative Estimation of Purines by the (B. M. Johnstone and G. P. Briner), 681
Scarf, Herbert, and others : Studies in the Mathematical Theory of Inventory and Production, *review* by Dr. L. S. Goddard, 1557
Scarselli, V. : Spectrophotometric Investigation on the Orcein Derivative of Elastin, 1739
Scattering : Nuclear (K. B. Mather and Dr. P. Swan), *review*, 639
Scattering of Pions from Hydrogen : Interpretation of Resonance Energies in the Photoproduction and (Dr. K. M. Guggenheimer), 1758
Scatturin, Dr. Vladimiro, and others : Tetra-co-ordination of Nickel(II)—some Complexes with *Cyclo*hexylphosphine, 601
Scent Trail : Interaction between Ants on a (J. H. Sudd), 1588
SCEPTRE III : New Investigations with—Axial Positive Ion Velocities in SCEPTRE III (T. P. Hughes and Dr. S. Kaufman), 7 ; The Positive Ion Heating Mechanism in SCEPTRE III (Dr. A. A. Ware), 8
Schachter, Dr. M. (Herxheimer, Dr. A., and) : Weal and Flare in Human Skin produced by Histamine and other Substances, 1510
Schaechter, M., and others : Synthesis of Deoxyribonucleic Acid during the Division Cycle of Bacteria, 1207
Schaeffer, Oliver A., and Fisher, David E. : Cosmogenic Noble Gases in the Washington County Meteorite, 660
Schäffer, C. E. : Chemistry and Quantum Chemistry, 159
  Co-ordination Chemistry (Effect of the Thiocyanate Ion on the Spectra of Metal Ions), 1784
Schairer, Marie U. (Woods, Philip S., and) : Distribution of Newly Synthesized Deoxyribonucleic Acid in Dividing Chromosomes, 303
Scheffer, Dr. F. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Scheffer, Dr. Victor B. : Seals, Sea Lions and Walruses, *review* by Prof. V. C. Wynne-Edwards, 1420
Schenkel, Dr. J. H. (Kitchener, Dr. J. A., and) : Electrical Double Layer in Colloid Science (Electrophoretic Measurements), 79
Schiffer, Anna P., and Kovács, András : Tetragonin, a Yeast Growth-regulating Substance from *Tetragonia expansa*, 988
Schistosoma mansoni : Generic Nomenclature of the Intermediate Hosts of (Dr. C. A. Wright), 906
Schläfer, H. L. : Co-ordination Chemistry (Kinetics of the Hydrolysis of Chromic Complexes), 1784
Schmauch, L. J., and Dinerstein, R. A. : Effect of the Carrier Gas on the Sensitivity of a Thermal-conductivity Detector in Gas Chromatography, 673
Schmeidler, Dr. Gertrude Raffel, and McConnell, Prof. R. A. : ESP and Personality Patterns, *review* by Dr. R. H. Thouless, 964
Schmid, Dr. Rudi, and others : Bilirubin Metabolism in the Foetus, 1823
Schmitt, Dr. L. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Schmoyer, L. F., and Case, Prof. L. C. : A Simple Synthesis of Oxetanes, 389
Schofield, D., and others : Use of Approximate Wave Functions for Extrapolation to True Energy Values, 175
Scholar in Society : The Role of the (Symposium on, Tunis, 1959), 1772
Scholarship : Cotton Industry War Memorial Trust (Textile Institute), 933
  Peter Coats (Textile Institute), 933
  Rowland Spencer (Textile Institute), 933
Scholarships : Carlsberg–Wellcome Travelling Research, 1024
Scholarships Abroad, 1959-60 (British Council), 650
Scholarships in Mathematics for Courses in Statistics and Computational Methods (London School of Economics and Political Science), 85
Scholarships and Fellowships (Grants,), for Research on Diseases of the Blood (Lady Tata Memorial Trust), 581
Scholes, Dr. G., and others : Determination of the Yields of Molecular Hydrogen Peroxide in the Radiolysis of Water labelled with Oxygen-18, 176
School Leavers : Jobs for, 1500
School Mathematics, 1092
School Mathematics (Secondary) : An Emerging Programme of (Prof. Max Beberman), 1366
School Natural History Societies, 1718
Schools : Chemistry in, *review* by Prof. M. J. S. Dewar, 566
  Science in—Proceedings of a Conference under the auspices of the British Association for the Advancement of Science, London, 1958 (edited by W. H. Perkins), *review*, 211
  Scientific Research in (Royal Society Committee on), 435
Schools (American) : Laboratory Equipment in, 1163
Schools (American Secondary) : Mathematics in, 1366
Schools (Secondary) : Teaching Mathematics in (Ministry of Education), *review* by W. J. Langford, 1076
Schramm, Prof. Gerhard, and Mohr, Elisabeth : Purification of Neuraminidase from *Vibrio cholerae*, 1677
Schramm, Prof. Gerhard (Engler, Reto, and) : Infectious Ribonucleic Acid as Precursor of Tobacco Mosaic Virus, 1277
Schreiber, Dr. V., and others : Fractionation of Brain Extracts for Acid Phosphatase-elevating Activity, 473
Schreuder, A., et autres : Archives de l'Institut de Paléóntologie Humaine, Mémoire 29, La Grotte de Fontéchevade, Troisième partie, Géologie et Paléontologie, 1369
Schrödinger, Prof. Erwin : Mind and Matter, *review* by Prof. W. H. McCrea, 1218
  Science Theory and Man, *review* by Prof. W. H. McCrea, 1218
Schück, Ota (Andrysek, Oskar, and) : Absorption of Radioiodine through the Bladder-Wall in the Rabbit, 893
Schuster, George N. : Education in the Age of Science, 1436
Schwabe, Dr. W. W. : Experimental Approaches to the Problems of Growth and Form in Plants (Some Effects of Environment and Hormone Treatment on Reproductive Morphology in *Chrysanthemum*), 585
Schwartz, Drew : Patterns in the Amino-Acid Sequences of the Corticotropins, 464
Schwartz, Dr. Robert, and Dameshek, Dr. William : Drug-induced Immunological Tolerance, 1682
Schwartz, Dr. Steven O., and others : Oral Induction of Leukaemia in Mice, 1816
Schwarz, Prof. Egbert : Elected a member of the Surgery Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Schwarz, Dr. Klaus, and others : Ineffectiveness of Molybdenum, Osmium and Cobalt in Dietary Necrotic Liver Degeneration, 472
Schwarzenbach, G. : Co-ordination Chemistry (Stability of Metal Complexes—A Study of Thio-complexes), 1784
Science : Institutes for Advanced Study in (NATO support for), 509
  Education in the Age of, 1436
  An Indian History of, *review* by Dr. F. R. Allchin, 1353
  Language, Literature and (Prof. A. Norman Jeffares), 1366
  Presenting, to the Public, 1569
  The Psychopathology of, *review* by Dr. A. R. Hall, 1419
  Scientific Applications of, *review* by Dr. Cecil Gordon, 424
Science in Britain : Government Aid to (House of Commons Debate on), 156
Science in New Zealand (edited by F. R. Callaghan), *review*, 1010
Science in Schools—Proceedings of a Conference under the auspices of the British Association for the Advancement of Science, London 1958 (edited by W. H. Perkins), *review*, 211
Science in Universities Past and Present : The Place of (Rt. Hon. Lord Adrian), 1706
Science, Australian Academy of : Symposium on Haematin Enzymes (under the auspices of the International Union of Biochemistry), 1571
Science, British Society for the Philosophy of : Fourth Annual Conference, 1783
Science, Indian Association for the Cultivation of : Annual Report for 1957-58, 1789
Science and Education (Science Masters' Association Discussion on), 300
Science, Industry and Broadcasting : Television Engineering in (British Institution of Radio Engineers Convention on), 1234
Science of Management : Art and, 419
Science, Philosophy and Religion (Sir Russell Brain), 154, 1022
Science and Public Policy (Dr. J. R. Killian), 1215
Science and Religion in Seventeenth-Century England (Prof. Richard S. Westfall), *review* by Dr. H. D. Anthony, 964
Science and Society, *review* by R. Brightman, 1702
Science and Technology in the United States, 1215
Science and Technology in the University of Bristol—Opening of Queen's Building (Prof. J. F. Baker), 217
Science and Technology of Western Germany : The Council for (Dr. J. Horne), 512
Science and Technology : National Lending Library for, 16
  The Yard and the Pound (Avoirdupois) for, 80
Science and Technology, Royal College of (Glasgow) : Annual Report, 1501
Science and Technology of Rubber, *review* by Dr. W. J. S. Naunton, 779
Science (American) : A Statement by the President, and Strengthening—a Report of the President's Science Advisory Committee, 1215
Science (Colloid) : Electrical Double Layer in (Colloid and Biophysics Committee of the Faraday Society Discussion on), 78
Science (Cosmetic): British Congress of (Society of Cosmetic Chemists), 934
Science (Defence), Commonwealth Advisory Committee on—Meeting in Australia (Sir Leslie Martin), 1165
Science (Nuclear), and Technology at the Royal Naval College, Greenwich, 791
Science (Veterinary) : Advances in (edited by C. A. Brandly and E. L. Jungherr), Vol. 4, *review* by Prof. H. Burrow, 1555
Science Advisory Committee (President's) : A Statement by the President, and Strengthening American Science—a Report of the, 1215
Science Association of Nigeria : Inaugural Meeting, 1163
  Election of Dr. Eni Njoku as president, 1163
Science Graduates : An Invitation to (Ministry of Supply and Central Office of Information, 651
Science Information News (National Science Foundation), Vol. 1, No. 1, 1501
Science Laboratory Technicians (City and Guilds of London Institute and the Institute of Science Technology to rationalize the examinations and qualifications for), 863
Science Lectures (City Literary Institute, London), 18
Science Masters' Association : Annual Meeting, 299
  Election of D. G. James as president, 299
  Discussion on Science and Education, 300
  Summer Meeting, 1571
  Discussion on General Trends in Science Teaching in the Universities of the Commonwealth, 1571
Science Museum, London : Retirement of A. Barclay as keeper of the Department of Chemistry, 224
  Retirement of E. W. White as deputy keeper in the Department of Aeronautics, 224
  Appointment of Dr. S. E. Janson as keeper of the Department of Chemistry, 224
  Appointment of F. Greenaway and W. Winton as deputy keepers in the Department of Chemistry, 224
  Exhibition on the Principles underlying the Manufacture of Iron and Steel, 293
  Soddy's Cubic Equation Machine handed over to the, 863
  Handbook of the Collection Illustrating Time Measurement, Part I (Dr. F. A. B. Ward), fourth edition, 933
  Set of research publications of the Rand Corporation presented to the Library, 1022
Science Officers (New), for American Embassies, 15
Science Teaching in the Universities of the Commonwealth : General Trends in (Science Masters' Association Discussion on), 1571
Science Technology, Institute of (City and Guilds of London Institute and the) : Rationalization of examinations and qualifications for science laboratory technicians, 863
Science Theory and Man (Prof. Erwin Schrödinger), *review* by Prof. W. H. McCrea, 1218

Sciences : Queen and Servant of the, *review* by W. J. Langford, 1076
Sciences rather than the Humanities : The Education of our Future Rulers should be primarily in the (London Section of the Royal Institute of Chemistry, the London Branch of the Classical Association and the Haldane Society Debate on the Motion that), 510, 1235
Sciences, Czechoslovak Academy of, and the Purkyne Medical Society : Symposium on Antibiotics, 154
Sciences of Indonesia, Council for (Unesco and the) : Symposium on Humid Tropics Vegetation, 795
Sciences (Biological), in the United States : Nuclear Training in the, 1091
Sciences (Physical) : Mathematics for the, *review* by Prof. T. A. A. Broadbent, 1703
Sciences (Physiological) : Twenty-first International Congress of, 1304
Sciences (Social) : Fact and Value in the, *review* by Prof. T. S. Simey, 4
  Matching and Prediction in the (W. A. Belson), 772
Scientific Applications of Science, *review* by Dr. Cecil Gordon, 424
Scientific Attaché (British), in Moscow, 1018
Scientific Attachés Overseas : British, 16
Scientific Basis of Land Planning in the Tropics (Prof. L. Dudley Stamp), 20
Scientific Books : Polish (Exhibitions at Oxford, Cambridge and Glasgow), 582
Scientific Careers in the Ministry of Supply, 651
Scientific Centenaries of 1959 (Joan M. Eyles), 12
Scientific Co-operation within the British Commonwealth (H.R.H. the Duke of Edinburgh), 425
Scientific Co-operation in the Commonwealth, 775
Scientific Council for Africa South of the Sahara : Publication No. 32, Ninth Meeting of the Scientific Council, Accra (1958), 585
Scientific Discovery: The Logic of (Prof. Karl R. Popper), *review* by Dr. E. H. Hutten, 1078
  Tools of (City Literary Institute, London, Course of Science Lectures), 18
Scientific Document Centre, Indian National : Report for 1957-58, 721
Scientific Film Association : Appointment of Edmund J. Cooper as general secretary, 18
Scientific Film Association, British : Thirteenth Congress of the International Scientific Film Association, 1783
Scientific Film Association, International : Thirteenth Congress of the (British Scientific Film Association), 1783
Scientific Hydrology, International Association of : Symposium on Water and Woodlands, 438
  Symposium on Lysimeters, 438
Scientific Information : Availability of, 135
  International Conference on (U.S. National Academy of Sciences–National Research Council, the U.S. National Science Foundation and the American Documentation Institute), 147
Scientific Instrument Research Association, British : Establishment of an Electrical Instrument Test Service, 436
Scientific Linguists in the United States, 863
Scientific Literature : Chinese (Lending Library Unit of the Department of Scientific and Industrial Research collection of), 932
Scientific Man-power in Europe (Edward McCrensky), 489
Scientific Man-power and Development in Britain, 67
Scientific Policy, Advisory Council on : Eleventh Annual Report (1957-58), 67
Scientific Research in Australia, 155
Scientific Research in Britain : Finance of, 156
Scientific Research in Central Africa, 1718
Scientific Research in Schools (Royal Society Committee on), 435
Scientific Research (Current), at South African Universities, 1957 : Register of (South African Council of Scientific and Industrial Research), 366
Scientific Research and Development in Colleges and Universities—Expenditure and Manpower, 1953-54 (National Science Foundation), 1717
Scientific Unions, International Council of : Second meeting of the Committee on Contamination by Extra-Terrestrial Exploration, 925
Scientific Unions, International Council of, and others : International Oceanographic Congress, 1093, 1502
Scientific Uses of Earth Satellites (edited by Prof. James A. Van Allen), second edition, *review* by Dr. E. B. Armstrong, 963
Scientific and Engineering Research and Development in British Manufacturing Industry, 1955 : Estimates of Resources devoted to (Department of Scientific and Industrial Research), 847
Scientific and Industrial Research, Council for : Annual Report for 1958, 1699
Scientific and Industrial Research, Department of : New Five-Year Plan, 16
  To take over part of the former Royal Ordnance Factory at Thorp Arch, Yorks., for the use of the new National Lending Library for Science and Technology, 16
  The Automatic Computing Engine at the National Physical Laboratory (J. H. Wilkinson and D. W. Davies), 22
  To be the only Government Department with responsibility for Building Research, 84
  Water Pollution Research, 1957—the Report of the Water Pollution Research Board with the Report of the Director of the Water Pollution Research Laboratory, 161
  International Symposium at the National Physical Laboratory, on Interferometry, 223
  Symposium at the National Physical Laboratory on the Mechanization of Thought Processes, 225
  Problems of Progress in Industry, 3, Management and Technology (Joan Woodward), 300
  Final Report of the Joint Committee on Human Relations in Industry, 1954-57, and Report of the Joint Committee on Individual Efficiency in Industry, 1953-57, 301
  The Microbiology of Fish and Meat Curing Brines—Proceedings of the Second International Symposium on Food Microbiology (Cambridge, 1957), (edited by Dr. B. P. Eddy), *review* by Dr. Magnus Pyke, 351
  Longer-term Grants for Special Researches, 438
  The Tropical Products Institute to become one of the research stations of the, 507
  Translations Bulletin of the Lending Library Unit, 581
  Grant of £2,500 to the University of Bristol, as a renewal of grant for Prof. C. F. Powell's work in the Department of Physics, 581
  Notes on Grants for Graduate Students and Research Workers, 650
  The new Warren Spring Laboratory at Stevenage to be opened by Lord Hailsham, 722
  Grant of more than £15,000 to the Department of Fuel Technology and Chemical Engineering, University of Sheffield, for the study of the formation and combustion of coal smoke, 794
  Grant of £6,000 to the School of Social Studies, University of Sheffield, to investigate the transition to work of boys and girls from secondary modern schools in the Sheffield area, 794
  Grant of £30,500 to the Department of Electrical Engineering, University of Sheffield, for the study of almost fully ionized gases by millimetre wave-probe techniques, 794
  Fuel Research 1957—Report of the Fuel Research Board with the Report of the Director of Fuel Research for 1957, 797
  Estimates of Resources devoted to Scientific and Engineering Research and Development in British Manufacturing Industry (1955), 847
  Ditton Laboratory, the Low Temperature Research Station and the Pest Infestation Laboratory to be transferred to the Agricultural Research Council, 862
  Graduates in British Industry, 864
  Wolfe Award presented to Dr. L. Essen, 930
  Collection of Chinese Scientific Literature, 932
  Appointment of J. McNicholas and Dr. C. H. Mortimer as members of the Water Pollution Research Board, 934
  Grant of £2,075 to the Department of Physics, University of Bristol, for research in cosmic rays under Prof. C. F. Powell, 1024
  Mechanical Engineering Research Laboratory at East Kilbride to be known in future as the National Engineering Laboratory, 1162
  Food Investigation 1957—the Report of the Food Investigation Board with the Reports of the Superintendents of the Torry Research Station, the Low Temperature Research Station, and the Ditton Laboratory, 1239
  Holdings of the Lending Library Unit, 1432
  To give financial support to the Water Research Association, 1500
  Committee on Metal Fatigue, 1568
  Report of the Research Council for 1958, 1699
  Appointment of Dr. J. S. Anderson as director of the National Chemical Laboratory, 1719
Scientific and Industrial Research, Department of (New Zealand) : Annual Report (1957-58), 90
Scientific and Industrial Research, South African Council for (Dr. S. M. Naudé), 853
  Register of Current Scientific Research at South African Universities (1957), 366
  Report of the Symposium on Design for Tropical Living (prepared by the National Building Research Institute), 1022
Scientific and Industrial Research Organization, Commonwealth (Australia) : Ninth Annual Report (1956-57), 155
  Chemical Research Laboratories, 228
  Appointment of Dr. I. W. Wark as the first director of the Chemical Research Laboratories, 228
  Appointment of Dr. A. L. G. Rees as chief of the new Division of Chemical Physics, 228
  Appointment of Dr. K. L. Sutherland as chief of the new Division of Physical Chemistry, 228
  Rural Research, 228
  Annual Report for 1957-58 of the Division of Electrotechnology, 1781
Scientific and Learned Societies of Great Britain, 59th edition, *review*, 1151
Scientific and Technical Aspects of Health Physics in Atomic Installations (European Nuclear Energy Agency and the Danish Atomic Energy Commission Symposium on), 934
Scientific and Technical Books : Recent, Supp. v, January 31 ; Supp. vi, February 28 ; Supp. vi, March 28 ; Supp. vi, April 25 ; Supp. vi, May 30 ; dcclxx, June 27
Scientific and Technical Education : Expansion of, 1763
Scientific and Technological Man-power, 489
Scientific and Technological Research in Britain, 847
Scientist Shortage : Solving the (David C. Greenwood), 489
Scientists (Consulting), Association of : Formation of, 651
  Election of Dr. J. G. Davis as chairman, 651
Scientists and Technologists in the United States : Employment of, 1028
Scoggan, H. J. : Flora of Manitoba, *review* by N. Y. Sandwith, 966
Scoop (An 'Australopithecine'), from Herefordshire (Prof. Raymond A. Dart), 844
Scoops : Apple- (Dr. J. Menzies Campbell), 1542
Scope of Physical Anthropology and its Place in Academic Studies—a Symposium held at the Ciba Foundation, 1957 (edited by D. F. Roberts and J. S. Weiner), *review* by Dr. Kenneth Little, 70
Scorgie, Prof. N. J. : *Obituary*, 220
Scorpion Venoms : Distribution of 5-Hydroxytryptamine in (Dr. K. R. Adam and Dr. C. Weiss), 1398
Scothorne, Dr. R. J.: Elected a Fellow of the Royal Society of Edinburgh, 719
Scotland : Intelligence, Family Background and Educational Progress in, *review* by Jean Floud, 493
Scotland and the north of England : Geological Research in (Clough Memorial Research Fund of the Edinburgh Geological Society Grants for), 582
Scott, Dr. B. A., and Williamson, Dr. A. G. : Effect of the Carrier Gas on the Sensitivity of Thermal Conductivity Detectors in Gas Chromatography, 1322
Scott, Dr. D., and Rushforth, Dr. J. M. : Cover on River Bottoms, 836
Scott, Dr. David B., and Nylen, Marie U. : Improved Preservation of Tendon for Electron Microscopy through Wet Freeze-drying, 1205
Scott, E. A., and Scott, Dr. F. H. : Broadening of the X-Ray Diffraction Lines in Teeth affected by Fluorine, 479
Scott, Dr. F. H. (Scott, E. A., and) : Broadening of the X-Ray Diffraction Lines in Teeth affected by Fluorine, 479
Scott, J. A. : Changing Industry (Forecasting and Controlling the Return on Capital), 657
Scott, P. M., and Stacey, Dr. F. D. : Magnetostriction and Palaeomagnetism of Igneous Rocks, 384
Scott, R. P. W. : Nylon Capillary Columns for use in Gas–Liquid Chromatography, 1753
Scott Base : Microseisms at (Dr. T. Hatherton and R. H. Orr), 1760
Scottish Council for Research in Education : Publication No. 42, Eleven-Year-Olds Grow Up (John S. Macpherson), *review* by Jean Floud, 493
Scottish Home Department (Development Commissioners, in association with the Ministry of Agriculture, Fisheries and Food, and the) : Postgraduate Training Grants in Fishery Research, 1094

Scottish Technical Education Consultative Council : Terms of reference, 1367
Scouloudi, Dr. Helen : The Myoglobin Molecule, 374
Screening Anti-Parkinsonian Drugs : Use of 'Tremorine' for (E. M. Trautner and S. Gershon), 1462
Scurfield, Dr. G., and Biddiscombe, E. F. : Effects of Gibberellic Acid on Winter Pasture Production, 1196
Scutellaria sp. : Flavone Glucosiduronic Acids from—a Correction (C. A. Marsh), 1824
Sea, International Council for the Exploration of the, and others : International Conference on Fishery Statistics, 1783
Sea (Black) : Microbiology and Water Circulation in the (A. E. Kriss), 437
Sea Fishes : The Observer's Book of (A. Laurence Wells), *review* by Dr. D. P. Wilson, 140
Sea Floor : Biological Origin of Manganese-rich Deposits of the (John W. Graham and Susan C. Cooper). 1050
Sea-Floor 160 Metres Deep : Occurrence of *Pyrosoma* on the (Dr. D. E. Hurley and D. G. McKnight), 554
Sea Lions and Walruses : Seals, (Dr. Victor B. Scheffer), *review* by Prof. V. C. Wynne-Edwards, 1420
Sea Water containing Phosphorus-32 : A Sex Difference in Radioactivity of *Artemia* cultured in (Prof. Daniel S. Grosch and Mary Ellen Plumb), 122
Seakins, Dr. J. W. T. : Chemistry of Condensed Tannins, 1168
Sealing of Aluminium Oxide Anodic Films (Dr. R. M. Hinde, E. A. Kellett and P. H. Harris), 39
Seals, Sea Lions and Walruses (Dr. Victor B. Scheffer), *review* by Prof. V. C. Wynne-Edwards, 1420
Seals (Weddell) : Carbon Monoxide Content of the Blood and other Observations on (Dr. L. G. C. E. Pugh), 74
Searby, Dr. N. H. : Awarded the British Silver Medal for Aeronautics of the Royal Aeronautical Society, 1648
Search Coils (Iron-cored) : Improvement in the Magnetic Detecting Power of (D. F. Walker), 173
Sears, Dr. E. R. : Wheat Genetics, 26
Seasonal Changes in the Brain-case of the Common Shrew (*Sorex araneus* L.), (Peter Crowcroft and Jean M. Ingles), 907
Seasonal Hypertrophy of the Reproductive Organs of *Hyla aurea* : Histolytic Activity in /Prof. L. R. Richardson), 480
Seasonal Variations in the Pituitary Gland of the Ferret (Dr. R. L. Holmes), 1521
Seasonal and Tidal Fluctuations in the Trawl Catches from the Sierra Leone River Estuary (J. C. D. Watts), 1748
Seaton, Dr. M. J. : Appointed to the University of London readership in physics at University College, 368
Sebruyns, Prof. M., and others: Virus-like Particles in Chemically induced Carcinoma of the Uterine Cervix, 694
Secker, P. E. (Guile, Dr. A. E., and) : Gas Discharges (Forward Continuous Motion of an Arc Cathode in a Transverse Magnetic Field in Air at Atmospheric Pressures), 92
Second Flowering in *Oryza sativa* (var. *indica*), (Subodh Kumar Roy), 1458
Second Yellow Compound from *Drosophila melanogaster*: Characterization of a (Dr. H. S. Forrest, Dolph Hatfield and Dr. C. Van Baalen), 1269
Secondary Education for All—a New Drive (White Paper on), 511
Secondary Education in Britain, 511
Secondary Electrons : Emission of Slow (Prof. J. M. Anderson), 241
Secondary Follicles in Soay Sheep : Some Unusual Outgrowths from (Dr. M. L. Ryder), 1831
Secondary Ionization in Humid Air (Prof. J. M. Meek), 1805
Secondary School Mathematics : An Emerging Programme of (Prof. Max Beberman), 1366
Secondary Schools : Teaching Mathematics in (Ministry of Education), *review* by W. J. Langford, 1076
Secondary Schools (American) : Mathematics in, 1366
Secretion of 20α-Hydroxypregn-4-en-3-one by the Adrenal Gland of Young Calves : Changes in the (Dr. W. E. Balfour, Dr. R. S. Comline and R. V. Short), 467
Secretion of Two Types of Saliva by an Aphid (Dr. P. W. Miles), 756
Secretion (Adrenal 17-Hydroxycorticosteroid), in the Dog : Effect of Morphine upon the (Prof. Tatuzi Suzuki, Kazukuni Yamashita, Seiichi Zinnouchi and Takaaki Mitamura), 825
Secretion (Gas), in Coregonids (Dr. G. Sundnes), 986
Sectioning of Tissues embedded in 'Araldite' for Electron Microscope Examination : Preparation and (J. M. Davis), 200
Security Regulations : Recruitment in Government Services and, 1483
Sedative Activity : Reserpine Derivatives with Specific Hypotensive or (A. Garattini, A. Mortari, A. Valsecchi and L. Valzelli), 1273
Seddon, W. L. : Hydrogen Liquefaction and Associated Techniques (Production of Liquid Hydrogen), 1505
Sedimentation-Rates : Correlation of, by Dimensionless Groups (Colin Harris), 530
Sediments (Jurassic/Cretaceous), in Malaya (Geology and Palaeontology in Malaya), (J. R. Paton), 231
Sedum telephium : Bulbil Formation in (Dr. E. C. Humphries and J. M. Thurston), 1343
Seedlings : Responses of, to Extracts of Soybean Nodules bearing Selected Strains of *Rhizobium japonicum* (Herbert W. Johnson, Ura M. Means and Francis E. Clark), 308
Seedlings (Albino Citrus) : Inducing Chlorophyll Formation in (Dr. Faisal A. Minessy), 553
Seedlings (Flax) : Effect of Boron Supply on the Sugars, Soluble in 80 per cent Ethanol, in (T. F. Neales), 483
Seedlings (Forest), and Mycorrhiza Development on Fly Ash (A. Sobotka and J. Materna), 1066
Seedlings (Pea) : Utilization of Alcohol in Germinating (E. A. Cossins and Dr. E. R. Turner), 1599
Seedlings (Peach) : Temperature Control of Physiological Dwarfing in (Prof. Bruce M. Pollock), 1687
Seedlings (Rice) : Effect of Coumarin on the Germination and Growth of (Dr. G. Misra and S. N. Patnaik), 989
    Geotropic and Morphological Alterations in, caused by Plant Growth Regulators (E. H. Roberts), 1197
Seeds : Effect of Gibberellin on the Termination of Dormancy in some (Prof. Paavo Kallio and Pirkko Piiroinen), 1830
    Non-respiratory Gas released from, during Moistening (Alan H. Haber and Nancy Brassington), 619
Seeds from a Wild Plant grown on Uraniferous and Non-Uraniferous Soils: Comparative Sensitivity to Radiation of (Dr. D. J. Mewissen, J. Damblon and Prof. Z. M. Bacq), 1449
Seeds (Broad Bean) : Effect of Light on Maturing (Dr. G. R. Lane and R. D. Butler), 1063
Seeds (Leguminous) : Paper Electrophoretic Separation of the Proteins of some (Dr. Esam M. Moustafa), 199
Seeds (Resistant and Non-resistant) : Antimicrobial Substances from (Dr. Jasper C. Maruzzella and Dr. Martin Freundlich), 972
Seegmiller, Dr. J. E., and others : Excessive Uric Acid Production in the Human induced by 2-Ethylamino-1,3,4-thiadiazole, 1463
Segal, Dr. Stanton, and Blair, Alberta : Effect of Salicylate on Muscle Phosphorylase, 1609
Segaloff, Albert, and others : 'Dual Antagonists' ; Alkyl N-(*bis*-(ethylenimido)phosphoro)-carbamates, a New Series of Anti-Tumour Agents, 399
    Anti-Tumour Activity of 5-Mercaptouracil, 612
Segmentary Systems (African) : Tribes without Rulers—Studies in (edited by John Middleton and the late David Tait), *review* by Prof. M. Fortes, 1006
Seifter, Prof. Sam, and others : Occurrence of 'Ester-like' Linkages in Collagen, 1659
Seismology : Elementary (Charles F. Richter), *review* by Ernest Tillotson, 708
Sekiguchi, Dr. Mutsuo, and Takagi, Dr. Yasuyuki: Synthesis of Deoxyribonucleic Acid by Phage-infected *Escherichia coli* in the Presence of Mitomycin *C*, 1134
Selborne Society : Library deposited in the care of Ealing Public Libraries, 721
Selected Strains of *Rhizobium japonicum:* Responses of Seedlings to Extracts of Soybean Nodules bearing (Herbert W. Johnson, Ura M. Means and Francis E. Clark), 308
Selection of Bacterial Mutants of Increased Sensitivity to 'Aminopterin' (Dr. Charles A. Nichol), 550
Selection for Relationships Opposite to those predicted by the Genetic Correlation between Two Traits in the House Mouse (*Mus musculus*), (F. Cockrem), 342
Selection (Food), by Silkworm Larvae (Dr. Yasuji Hamamura), 1746
Selection (Natural) To-day : The Theory of (Prof. J. B. S. Haldane), 710
Selection (Natural), in Man (Society for the Study of Human Biology Symposium on), 159
Selective Inhibition of Formation of Deoxyribonucleic Acid in *Escherichia coli* by Mitomycin *C* (S. Shiba, A. Terawaki, T. Taguchi and Prof. J. Kawamata), 1056
Selective Permeability of Living Tissues to Carbonic Acid (Dr. B. N. Halpern and R. Binaghi), 1397
Selective Staining of Visceral Efferents in the Rat Brain Stem by a Modified Koelle Technique (Dr. P. R. Lewis and Dr. C. C. D. Shute), 1743
Selenite as a Relatively Weak Inhibitor of some Sulphydryl Enzymes (Dr. Cho Ching Tsen and Prof. H. Bruce Collier), 1327
Selenium-75 : Partition of, in the Intracellular Particulate Matter of Rat Liver (Dr. Kenneth P. McConnell, Dorothy M. Roth and R. Duncan Dallam), 183
Self-Cure of Sheep infected with *Haemonchus contortus* : Antigenic Stimulus of Exsheathing Fluid in (E. J. L. Soulsby, R. I. Sommerville and D. F. Stewart), 553
Self-Incompatibility and Self-Sterility : Differences between (J. S. Bubar), 411
Self-Organizing Systems : Interdisciplinary Conference on (Information Systems Branch of the Office of Naval Research and the Armour Research Foundation), 86
Self-Regulation in Living Systems (National Research Council of Canada Symposium on), 370
Self-Sterility : Differences between Self-Incompatibility and (J. S. Bubar), 411
Selfridge, Dr. O. G. : The Mechanization of Thought Processes (A Process (a 'Pandemonium') which would adapt and improve itself to handle Recognition Problems), 225
Seliger, H. H. (Mann, W. B., and) : Preparation, Maintenance and Application of Standards of Radioactivity, 1023
Seligman, Gerald : Awarded the Victoria Medal of the Royal Geographical Society, 292
Seliwanoff Reagents (Anthrone and) : Determination of Galactosediethylmercaptal and 3,6 Anhydrogalactosediethylmercaptal with the (W. Yaphe), 44
Sellinger, Dr. Otto Z., and Miller, Dr. O. Neal : Anion Inhibition of α-Glycerophosphate Dehydrogenase, 889
Semantical Theory : Truth and Denotation, a Study in (Prof. R. M. Martin), *review* by F. I. G. Rawlins, 1628
Semeonoff, Boris, and Trist, Eric : Diagnostic Performance Tests, *review* by Prof. O. L. Zangwill, 1767
Semiconductor Devices : Transistors and Associated (Institution of Electrical Engineers International Convention on), 652
Semi-Conductors, *review* by Dr. G. T. Wright, 1356
Semiconductors and Metals : Electric Conduction in (Dr. W. Ehrenberg), *review* by Dr. P. T. Landsberg, 138
Semi-Micro Chelometric Titrations : A New Sensitive Indicator for (Prof. Robert H. Maier), 461
Seminal Vesicle of the Mouse : Incorporation of Labelled Thymidine in the (Dr. S. R. Pelc and P. B. Gahan), 335
Seminal and Adventitious Roots : A Method of Growing Grass Plants with Separation of (R. Dorrington Williams), 415
Sen, S. P. (Biswas, B. B., and) : Relationship between Auxins and Nucleic Acid Synthesis in Coleoptile Tissues, 1824
Sen, Sri Samarendranath : Bijnaner Itihas (A History of Science), Vol. 2 (in Bengali), *review* by Dr. F. R. Allchin, 1353
Senescence (Leaf) : Control of, by Auxins (Daphne J. Osborne), 1459
Senescent Leaves : Identity of the Abscission-accelerating Substance in (Daphne J. Osborne), 1593
Senior, D. A. : Appointed scientific attaché to the British Embassy in Moscow, 1018 ; work of, 1018
Sense of Taste: Exploratory Physico-chemical Studies on the (Dr. Aetius R. Lawrence and Lloyd N. Ferguson), 1469
Sense (Common), and Nuclear Warfare (Bertrand Russell), 1351
Sensenbrenner, M., and others : Oxygen Consumption of Different Forms of Stable L *Proteus* P 18 growing in Hypertonic Liquid Medium, 194

Sensitive Indicator (A New), for Semi-Micro Chelometric Titrations (Prof. Robert H. Maier), 461
Sensitiveness to Nicotine of Rabbit Aorta : Inhibition of, by Reserpine, Hexamethonium, Ethyl Flavone-7-Oxyacetate and other Compounds (Dr. I. Setnikar and M. Ravasi), 898
Sensitivity to Ionizing Radiation : Variation of, with Age (M. L. Crosfill, Patricia J. Lindop and Prof. J. Rotblat), 1729
Sensitivity of a Thermal-conductivity Detector in Gas Chromatography: Effect of the Carrier Gas on the (L. J. Schmauch and R. A. Dinerstein), 673 ; (Dr. N. H. Ray), 674
Sensitivity of Thermal Conductivity Detectors in Gas Chromatography : Effect of the Carrier Gas on the (Dr. B. A. Scott and Dr. A. G. Williamson), 1322
Sensitivity (Comparative), to Radiation of Seeds from a Wild Plant grown on Uraniferous and Non-Uraniferous Soils (Dr. D. J. Mewissen, J. Damblon and Prof. Z. M. Bacq), 1449
Sensitivity (Drug-), among Oriental Subjects : Incidence of the Erythrocytic Defect associated with (Dr. Ernest Beutler, Mary K. Y. Yeh and Thomas Necheles), 684
Sensitivity (Increased), to 'Aminopterin' : Selection of Bacterial Mutants of (Dr. Charles A. Nichol), 550
Sensitized Erythrocyte-Complement ($EAC'_{1,4,2}$) : Comparison of the Formation of the Complex, in Haemolytic Systems differing in their Haemolysin and Complement-fixing Activities (Dr. Harold S. Goodman), 331
Sensory Cells (Pineal Eye) : Ultrastructure of (Dr. W. Steyn), 764
Separation of Anthocyanins from Plant Extracts (Dr. B. V. Chandler and Dr. T. Swain), 989
Separation of Mono-*n*-butyl Phosphate and Di-*n*-butyl Phosphate by means of Ion Exclusion (E. Cerrai and F. Gadda), 1528
Separation of the Peptide Chains of Human Globin (Constituents of Human Haemoglobin), (Dr. V. M. Ingram), 1795
Separation of Seminal and Adventitious Roots : A Method of Growing Grass Plants with (R. Dorrington Williams), 415
Separation of Specific and Non-Specific Effects of Chemicals on Plants (Prof. T. J. Muzik and J. M. Lawrence), 482
Separation of Strontium-90 from Calcium (P. S. Davis), 674
Separation of Strontium-90 from Calcium in Milk (Dr. N. A. Myers), 1807
Separation of *m*-Xylene and *p*-Xylene by Gas Chromatography (D. H. Desty, A. Goldup and W. T. Swanton), 107
Separation (Group) : Gel Filtration—a Method for Desalting and (Dr. Jerker Porath and Dr. Per Flodin), 1657
Separation (Paper Electrophoretic), of the Proteins of some Leguminous Seeds (Dr. Esam M. Moustafa), 199
Separation Processes in Analytical Chemistry (Royal Institute of Chemistry Symposium on), 934
Separation and Analysis of Scale-rich Material from Wool (Dr. J. H. Bradbury), 305
Septicaemia : An Unusual Strain of *Escherichia coli* in, as an example of the Transformative Effect of Symbiosis (Dr. R. Reitler, M. Teicher and Dr. A. Valero), 339
Sequences (Amino-Acid), of the Corticotropins : Patterns in the (Drew Schwartz), 464
Sera (Activated) : Granulocyte Precipitins of Human Tissues and (Dr. Leonhard Korngold, Gerda Van Leeuwen and Daniel G. Miller), 330
Series (A New), of Anti-Tumour Agents : 'Dual Antagonists' ; Alkyl N-(*bis*-(ethylenimido)phosphoro-carbamates (Thomas J. Bardos, Zinon B. Paranastassiou, Albert Segaloff and Julian L. Ambrus), 399
D-Serine in Lombricine : Occurrence of (Biochemistry of Lombricine), (Iva M. Beatty, Dr. D. I. Magrath and Prof. A. H. Ennor), 591
Serine (Free), in Urine from Irradiated Humans : An Alteration in the Excretion of (Dr. Arthur L. Kretchmar), 1809
Serological Relationships in the Genus *Gadus* (Prof. Fergus J. O'Rourke), 1192
Serologische Eigenschaften der Bartonellen : Morphologische, Biologische und (Dr. Reinhard Wigand), *review* by Dr. A. Lwoff, 207
Serotonin and Change of Colour in Frogs (Dr. K. G. Davey), 1271
Serra, Prof. J. A. : A Position-Effect Explanation of Gene Conversion, 700
Serum : Demonstration of Endogenous Pyrogen in, during Systemic Tuberculin Reaction in Rabbits (Dr. J. Johanovsky), 693
Serum of Cattle recovering from Foot-and-Mouth Disease : Changes in Specificity and Electrophoretic Mobility of the Precipitating Antibodies present in the (F. Brown and J. H. Graves), 1688
Serum of Cows with Hypocupraemia : Iron Content in the (Dr. Rajmund Rys), 1596
Serum through Glass Capillaries : An Equation for the Flow of Blood, Plasma and (Dr. G. W. Scott Blair), 613
Serum of the Hen : Phosvitin in the (Prof. R. H. Common and Chi-Ching Mok), 1811
Serum from Mice treated with Endotoxin : Sparing Effect of, upon certain Murine Virus Diseases (A. W. Gledhill), 185
Serum (Guinea Pig), which may cause Antigens to show an Apparent Anticomplementary Effect : Normal Components of (M. M. H. Sewell), 1062
Serum (Human) : Discrepancy between the Distributions of Iodine in, when estimated by Iodine-131 and Iodine-127 (Dr. Sidney C. Werner and Dr. Richard J. Block), 406, *erratum*, 722
  Measurement of a Staphylococcal Antibody in, by a Mouse Protection Test (Dr. Myron W. Fisher), 1692
  Prealbumin as a Complex in the α-Globulin Fraction in (Dr. J. R. Tata), 877
Serum (Normal) : Neutralization of Bacteriophage by (Andre J. Toussaint and Louis H. Muschel), 1825
Serum (Precolostral Calf) : Immunological Activity of (J. L. Turk), 838
Serum (Blood and), of Non-immunized and Immunized Animals : Factors Inhibiting and Stimulating Growth of *Mycobacteria* in the (J. Hubáček and I. Málek), 187
Serum–Agar Technique : A Quantitative (S. T. C. Wright), 1282
Serum and Lymph (Dogs') : Determination of Transaminase Activity in, after Hepatic Damage due to Acute Biliary Obstruction (Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 48
Serum Albumin during Short-term Action of Pepsin at Room Temperature : Splitting of the Electrophoretic Pattern of (E. Annau), 190
Serum Antibody and γ-Globulin in Baby Rabbits after Transfer of Ribonucleoprotein from Adult Rabbits (Dr. Miroslava Hrubešova, Dr. Brigitte A. Askonas and Dr. J. H. Humphrey), 97
Serum Calcium : A Rapid Micro-quantitative Method for estimating (T. A. Harper), 232
Serum Cholesterol-level of Rats : Influence of Dietary Cod-liver Oil and some Fractions of Cod-liver Oil on (A. P. de Groot and S. A. Reed), 1191
Serum Cholinesterase Types (Human) : Differential Response of, to an Inhibitor in Potato (Dr. H. Harris and Mary Whittaker), 1808
Serum Globulin Permeability Factor : Enzymic Nature of the (E. L. Becker, D. L. Wilhelm and Prof. A. A. Miles), 1264
Serum Lipoproteins of Dogs : Changes produced in, by Cellulose containing Methyl Groups (Margaret M. Fröhlich, V. Balázs, K. Kovács and A. Benkö), 1119
Serum Proteins in Experimental Atherosclerosis : Disturbance in the Pattern of, and its Prevention (Prof. M. C. Nath, A. Saikia and B. I. Uppin), 894
Serum Proteins of Sheep infected with *Haemonchus contortus* : Electrophoretic Patterns of the (D. L. Mould and P. H. Silverman), 1735
Serum Transaminase Activity : Changes in, following Myocardial Damage due to Lymphatic Congestion (M. Földi, Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 1333
Serum Transferrins (E. R. Giblett, C. G. Hickman and Dr. O. Smithies), 1589
Servant of the Sciences : Queen and, *review* by W. J. Langford, 1076
Service of Business : Electronic Computers in the (W. L. C. Garrett), 11
Services (Government) : Recruitment in, and Security Regulations, 1483
Setnikar, Dr. I., and Ravasi, M. : Inhibition of Sensitiveness to Nicotine of Rabbit Aorta by Reserpine, Hexamethonium, Ethyl Flavone-7-Oxyacetate and other Compounds, 898
Setyodiwiryo, Prof. Kusnoto : Humid Tropics Vegetation (Flora Malesiana), 795
Seventeenth-Century Chemistry : Robert Boyle and (Prof. Marie Boas), *review* by Dr. R. E. W. Maddison, 850
Seventeenth-Century England : Science and Religion in (Prof. Richard S. Westfall), *review* by Dr. H. D. Anthony, 964
Severi, Lucio (edited by) : Proceedings of the Second International Symposium on Mammary Cancer, held at Perugia, 1957, *review* by Dr. L. Foulds, 955
Severity of Experimental Mouse Hepatitis : Effect of Dietary Protein on the (Dr. Boris Ruebner and James L. Bramhall), 609
Sewell, Dr. Geoffrey W. F., and Brown, Dr. Juliet C. : Ecology of *Mucor ramannianus* Moller, 1344
Sewell, M. M. H. : Normal Components of Guinea Pig Serum which may cause Antigens to show an Apparent Anticomplementary Effect, 1062
Sex : Water and Electrolyte Metabolism in relation to Age and (Ciba Foundation Colloquia on Ageing, Vol. 4), (edited by G. E. W. Wolstenholme and Maeve O'Connor), *review* by Prof. P. L. Krohn, 777
XXY Sex-determining Mechanism : A Case of Human Intersexuality having a possible (Patricia A. Jacobs and Dr. J. A. Strong), 302
Sex Difference in Radioactivity of *Artemia* cultured in Sea Water containing Phosphorus-32 (Prof. Daniel S. Grosch and Mary Ellen Plumb), 122
Sex Incidence of Vascular Lesions in Ageing Rats in relation to Previous Pregnancies (Prof. Theodore Gillman and Michael Hathorn), 1139
Sex-linked Locus : Stable Equilibrium at a (S. P. H. Mandel), 1347
Sexton, E. W. : *Obituary* by Dr. F. S. Russell, 790
Sexton, M. C. : Gas Discharges (Micro-wave Studies on Recombination and Attachment in the Afterglow of Rare Gases and Oxygen), 92
Sexual Maturity in *Drosophila* (Oistein Strømnaes), 409
Shafiq, Dr. S. A. (Ameen, A., and) : Proepithelial Regeneration in the Midgut of Beetles, 913
Shain, C. A. (Komesaroff, M. M., and) : Refraction of Extra-Terrestrial Radio Waves in the Ionosphere, 1584
Shalaby, A. F. A. Mawgoud, and others : Pharmacological and Toxicological Properties of 5-Benzylidenerhodamine, 607
Shalgosky, H. I. (Campbell, J. T., and) : X-Ray Spectrographic Determination of Strontium, 1481
Shanahan, G. J.: Genetics of Dieldrin Resistance in *Lucilia cuprina* Wied., 1540
Shand, J. A., and others : Possible Causes of Geomagnetic Fluctuations having a 6-Sec. Period, 1479, *erratum*, 1783
Shannon, Prof. Leland M., and others : Malonate Metabolism by Plant Tissues, 683
Shapiro, I. (Lehmann, W. J., and) : Isotopic Composition of Boron and its Atomic Weight, 1324
Shapiro, N. (Brewbaker, Dr. J. L., and) : Homozygosity and *S* Gene Mutation, 1209
Sharks : Red Muscle as a Possible Character for the Identification of (Olaf R. Braekkan), 556
Sharman, G. B., and others : Œstrous Cycle, Gestation Period and Parturition in the Marsupial *Trichosurus vulpecula*, 622
Sharp, Dr. A. A. : Haematology, 1372
Sharp, Dr. D. Gordon, and Sorvall, Inc., Ivan : A New Method of Particle-counting on the Electron Microscope, 1642
Sharpe, Dr. A. G. : *Obituary* of Dr. W. H. Mills, 929
Shatoury, H. H. : Early Formation of Sperms in the ey^2 Mutant of *Drosophila*, 1696
Shaw, Dr. B., and Denton, W. H. : Hydrogen Liquefaction and Associated Techniques (Storing Liquid Hydrogen), 1505
Shaw, B. J. (Johnson, A. A., and) : Ductile Cleavage Fracture of Molybdenum, 1542
Shaw, P. J. R. : Antarctic Meteorology, 1503
Shaw, Dr. S. H. : Appointed director of Overseas Geological Surveys, 1230 ; work of, 1230
Shawcross, Sir Hartley : Life peerage conferred on, 294
Shebeski, Dr. L. : Wheat Genetics, 26
Sheep : An Abnormality in the Skin of (Mary Dempsey and G. H. Green), 909
  Balance Trials with Magnesium-28 in (Alexander C. Field), 983
  A Hepatotoxin from *Sporidesmium bakeri* capable of producing Facial Eczema Diseases in (Dr. R. H. Thornton and J. C. Percival), 63
  Hydrolysis of Lecithin and Lysolecithin by Rumen Micro-organisms of the (Dr. R. M. C. Dawson), 1822
  Isolation of Two Types of *Pasteurella haemolytica* from (Geoffrey R. Smith), 1132
  Rumination in, caused by Injection of Adrenaline (R. N. B. Kay), 552
Sheep infected with *Haemonchus contortus* : Antigenic Stimulus of Exsheathing Fluid in Self-Cure of (E. J. L. Soulsby, R. I. Sommerville and D. F. Stewart), 553
  Electrophoretic Patterns of the Serum Proteins of (D. L. Mould and P. H. Silverman), 1735

Sheep (Pregnant) : Adrenal Cortical Function in the (Kathleen W. Robinson), 690
Sheep (Soay) : Some Unusual Outgrowths from Secondary Follicles in (Dr. M. L. Ryder), 1831
Sheep Anterior Pituitary Glands : Bioassay of (Dr. D. R. Lamond, H. M. Radford and A. L. Wallace), 1597
Sheep Plasma and Red Cells : Equilibration of Labelled Magnesium between (A. D. Care, D. C. Macdonald and B. Nolan), 1265
Sheet (Rolled Copper) : Nuclear Magnetic Resonance in (E. A. Faulkner), 1043
Sheet Forming : Plastic (Robert L. Butzko), *review* by Dr. S. H. Pinner, 851
Shelberg, Wesley E., and Gevantman, Lewis H. : X-Ray Diffraction Measurement of Radiation Damage in Stretched Rubber, 456
Shelesnyak, Prof. M. C. : Awarded the Oliver Bird Prize for 1958, 1643
'Shell' Research, Ltd. : Lord Rothschild joining the Board of, as part-time adviser on research, 1164
Shellac (Indian) : Microwave Dielectric Properties of, in the 8-mm. Range (Dr. S. S. Srivastava and Dr. D. D. Puri), 37
Shells (Gastropod) : Manganese in Modern and Fossil (Dr. David Krinsley), 770
Shemyakin, Prof. M. M. : Synthesis of Peptides (Peptides of α-Substituted α-Amino-Acids), 152
Shepard, Harold H. (edited by) : Methods of Testing Chemicals on Insects, Vol. I, *review* by Dr. W. A. L. David, 352
Shepherd, Audrey M. : Testing Populations of Beet Eelworm, *Heterodera schachtii* Schmidt, for Resistance-breaking Biotypes, using the Wild Beet (*Beta patellaris* Moq.), as Indicator, 1141
Shepherd, K. : Two New Basic Chromosome Numbers in the Musaceae, 1539
Sheppard, Dr. N. : Relaxation Processes (Ultrasonic Relaxation observed in Toluene), 584
Sheppard, Dr. N. (Powell, D. B., and) : Co-ordination Chemistry (Metal Complexes of Amines and Ethylenediamine), 1784
Sheppard, Dr. P. M. : Natural Selection in Man, 160
Shercliff, Dr. J. A. : Hypersonic Flow (Possible Aeronautical Applications of Magnetogasdynamics), 1096
Sheridan, Dr. J., and others : Molecular Symmetry in *Cyclo*pentadienyl Thallium and some related Substances from their Microwave Spectra, 1182
Sherrington—Physiologist, Philosopher and Poet (Rt. Hon. Lord Cohen of Birkenhead), *review* by Prof. K. J. Franklin, 209
Sherrington, Sir Charles : In commemoration of, 1857-1952—Ciba Foundation Symposium on the Neurological Basis of Behaviour (edited by G. E. W. Wolstenholme and Cecilia M. O'Connor), *review* by Dr. P. B. Bradley, 954
Sherrington Lectures, Vol. 5 (The Excitable Cortex in Conscious Man, by Dr. Wilder Penfield), *review* by Dr. P. B. Bradley, 781
Shiba, S., and others : Selective Inhibition of Formation of Deoxyribonucleic Acid in *Escherichia coli* by Mitomycin *C*, 1056
Shifrin, Sidney, and Kaplan, Dr. Nathan O. : Structure of Dihydrodiphosphopyridine Nucleotide, 1529
Shielding : Nuclear Reactor (J. R. Harrison), *review* by R. Vaux, 1149
Shikimic Acid in Roses : Evidence for the Conversion of Quinic Acid to (L. H. Weinstein, C. A. Porter and H. J. Laurencot, jun.), 326
Shils, Prof. Edward : The Role of the Scholar in Society, 1773
Shin, Masateru, and others : Peroxidases from Wheat Germ, 111
Shinton, N. K. (Chalmers, Dr. J. N. Marshall, and) : Effect of D-Sorbitol on the Absorption of Orally Administered Vitamin B_{12}, 120
Shippingport Atomic Power Station : Training Courses at the (United States Atomic Energy Commission), 153
Shive, J. N., and others (edited by) : Transistor Technology (Members of the Technical Staff of Bell Telephone Laboratories), Vol. I, *review* by Dr. J. R. Tillman, 72
Shock, Dr. Nathan W. : A Classified Bibliography of Gerontology and Geriatrics, Supplement 1, 1949-1955, *review* by Porf. P. L. Krohn, 777
  Trends in Gerontology; second edition, *review* by Prof. P. L. Krohn, 777
Shock (Experimental Traumatic), in Rats : 5-Hydroxytryptamine in Blood during (M. Medaković and I. Spuzić), 1685
Shoenberg, Dr. D. : The De Haas–Van Alphen Effect in Copper, 171
Shoenberg, M. E. : Made a life-member of the Royal Meterorological Society, 368
Shoosmith, J. (Herzberg, Dr. G., and) : Spectrum and Structure of the Free Methylene Radical, 1801
Shoot Apex : Use of Radioactive Tracers in Studies of the (Dr. A. Booth, Dr. E. G. Cutter, Dr. S. N. Postlethwait, B. R. Voeller and Prof. P. F. Wareing), 1580
Shoot Buds on the Protonema of *Pohlia nutans* : Effects of Kinetin, Gibberellic Acid and certain Auxins on the Development of (Dr. G. C. Mitra and Dr. A. Allsopp), 974
Shope Rabbit Papilloma Virus : Induction of Arginase in Rabbit Epithelium by the (Prof. Stanfield Rogers), 1815
Shoppee, Prof. Charles W. : Chemistry of the Steroids, *review* by Dr. E. Stedman, 636
Shore Crabs, *Carcinus maenas* Pennant (Sacculinized) : Behaviour of (Erik Rasmussen), 479
Shorewards Upslope of the Layer of Minimum Oxygen off Bombay—its Influence on Marine Biology, especially Fisheries (Dr. J. N. Carruthers, S. S. Gogate, J. R. Naidu and T. Laevastu), 1084
Short, E. I., and others : Immunological Aspects of Allergic Disorders (Allergic Hypersensitivity in Man to *Aspergillus fumigatus*), 297
Short, R. V., and others : Changes in the Secretion of 20α-Hydroxypregn-4-en-3-one by the Adrenal Gland of Young Calves, 467
Short Duration : Neuromuscular Blocking Agents of (C. G. Haining, R. G. Johnston and J. M. Smith), 542
Short-Persistence Phosphors : Rise and Decay of Intensity of Luminescence of (Dr. R. Feinberg), 1546
Short-term Action of Pepsin at Room Temperature : Splitting of the Electrophoretic Pattern of Serum Albumin during (E. Annau), 190
Short- and Long-time Ionization : Surface Charges produced on Insulators by (Dr. Stanley I. Reynolds), 671
Short-acting Thiobarbiturate : A New (Dr. M. E. Peel, Barbara Macauley, Dr. H. O. J. Collier, Dr. J. H. Hunt, Dr. F. A. Robinson and Dr. E. P. Taylor), 1443, *erratum*, 1571
Shortage (Scientist) : Solving the (David C. Greenwood), 489
Shorter, D. E. L. : Stereophonic Sound Recording, Reproduction and Broadcasting (Broadcast Stereophony), 1721
Shower Particles (Air) : Multiple Geiger Counter Telescope Measurements of the Directions of (Dr. H. D. Rathgeber), 386
Showers : Cosmic-Ray, *review* by Dr. R. M. Tennent, 1555
  Extensive Air (Dr. William Galbraith), *review* by Dr. R. M. Tennent, 1555
Shreir, Dr. L. L. (Stebbens, A. E., and) : Refractive Index of Uranium Oxide produced by Anodic Oxidation, 1113
Shrew (Common), *Sorex araneus* L. : Seasonal Changes in the Brain-case of the (Peter Crowcroft and Jean M. Ingles), 807
Shropshire Hills : Protection of the, 932
Shubik, Prof. Philippe, and others : Response of Newly Born Mice to a Chemical Carcinogen, 1689
Shull, Prof. H. : Chemistry and Quantum Chemistry, 158
Shull, Kenneth H. : A Microsomal Malic Dehydrogenase, 259
Shult, Ernest E., and others : Chromosome Maps of *Saccharomyces*, 800
Shurcliff, Dr. William A. : Colour Vision Phenomenon of a New Class, 202
Shute, Dr. C. C. D. (Lewis, Dr. P. R., and) : Selective Staining of Visceral Efferents in the Rat Brain Stem by a Modified Koelle Technique, 1743
Shuttleworth, T. H., and Camp, M. : Electron Microscopy of Sodium Laurate, 535
Sialic Acid : Detection of, in various *Escherichia coli* Strains and in other Species of Bacteria (Prof. Guy T. Barry), 117
Sibatani, Prof. A. (Tchoe, Yuong-Tchel, and) : Effects of X- and Ultraviolet Irradiation on the Incorporation of Phosphorus-32 into Isolated Nuclei of Rabbit Appendix, 1334
Side-Chain : Effect of Substitution in the, on β-Oxidation of Aryloxyalkylcarboxylic Acids by *Nocardia opaca* (D. M. Webley, R. B. Duff and V. C. Farmer), 748
Siegelman, H. W. (Butler, Warren L., and) : Conversion of Caffeic Acid to Esculetin during Paper Chromatography, 1813
Sierra Leone River Estuary : Seasonal and Tidal Fluctuations in the Trawl Catches from the (J. C. D. Watts), 1748
Sigalla, Dr. J. : A New Iodine Compound, I_2OH^-, 178
Signal Strength from 1958 $\delta 2$(*Sputnik* 3) : A Type of Variation of the (Ludwik Liszka), 1383
Signals from Artificial Earth Satellites : Deduction of Ionospheric Electron Content from the Faraday Fading of (W. T. Blackband, B. Burgess, I. L. Jones and G. J. Lawson), 1172
Signals from *Sputnik III* : Diurnal Lapse of (G. H. Munro), 1549
Signals (Radio), from Earth Satellites : Recording (G. H. Munro and L. H. Heisler), 809
Signals (Radio), received via the Ionosphere : Phase Characteristics of (D. W. Morris and C. J. Hughes), 310
Significance (Possible), in relation to the Fall-out of Strontium-90 : Uptake of Strontium by Pasture Plants and its (Dr. P. B. Vose and Dr. H. V. Koontz), 1447
Significant Properties : Relation between the Polarizability of Ions and other (Prof. K. Krishnamurti), 1043
Silcock, J. M. : Precipitation in Alloys (Precipitation in Aluminium Alloys when using X-Ray Diffraction Techniques), 796
Silha, Dr. M. : Effect of X-Rays on the Cell, 1531
Silica : Synthesis of Colour Centres in, and their Thermoluminescence (J. R. Hensler), 672, *erratum*, 1434
Silica-Glass (Libyan Desert) : Origin of (Dr. Alvin J. Cohen), 1548
Silicates : Reaction of some, with Chelating Agents (Dr. D. A. Sutton, M. D. Middleton and R. A. F. Body), 99, *erratum*, 1719
Silicide (A New), in a 12 per cent Chromium Steel (H. Hughes), 1543
Silicides of the Platinum Metals : Borides and (B. Aronsson, J. Åselius and E. Stenberg), 1318
Silicon in Britain : Bulk Production of (Imperial Chemical Industries, Ltd.), 932
Silicon Carbide (United States Air Force Cambridge Research Center Conference on), 722
Silk : Utilization of the Carboxyl Group of Glycine for the Synthesis of the Amino-Acids of, S by *Bombyx mori* (Dr. S. Bricteux-Grégoire, W. G. Verly and Prof. M. Florkin), *erratum*, 294
Silk Glands of the Spider *Nephila maculata* Fabr., 1763 : Amounts of Deoxyribonucleic Acid in the (Prof. N. B. Inamdar and U. V. Wagh), 1541
Silk Proteins : Activation of Amino-Acids in relation to the Synthesis of (Prof. J. Heller, Dr. P. Szafrański and Dr. E. Sulkowski), 397
Silkworm Larvae : Food Selection by (Dr. Yasuji Hamamura), 1746
Silliman (Mrs. Hepsa Ely) Memorial Lectures (Dr. John von Neumann), *review* by A. H. Armstrong, 350
Silurian Limestones of Monmouth : Heavy Minerals in certain Old Red Sandstone and (C. B. Crampton), 485
Silver : Effects of Electron Bombardment upon Bromides of Cadmium and (Sho Suzuki), 1755
Silver Medal of the Royal Aeronautical Society awarded to Dr. E. A. Watson, 1648
Silver Medal (British) for Aeronautics of the Royal Aeronautical Society awarded to D. J. Farrar, 1648
Silverman, Dr. P. H. : *In vitro* Cultivation of the Histotrophic Stages of *Haemonchus contortus* and *Ostertagia* spp., 197
Silverman, Dr. P. H. (Mould, D. L., and) : Electrophoretic Patterns of the Serum Proteins of Sheep infected with *Haemonchus contortus*, 1735
Simay-Kramár, Margarete, and others : Target Organ Activation by Stress, 1522
Simbonis, Stanley, and others : Phagocytosis and Cell Division, 476
  Variability of Content of Deoxyribonucleic Acid in *L*-strain Fibroblasts, 1818
Simey, Prof. T. S. : Fact and Value in the Social Sciences, *review*, 4
Siminovitch, L., and others : A Cytopathogenic Agent from a Mammary Tumour in a *C3H* Mouse that produces Tumours in Swiss Mice and Hamsters, 1535
Simkin, Dr. J. L. (Arnstein, Dr. H. R. V., and) : Vitamin B_{12} and Protein Biosynthesis—Vitamin B_{12} and Biosynthesis in Rat Liver, 523
Simmonds, Prof. Sofia (Fruton, Prof. Joseph S., and) : General Biochemistry, second edition, *review* by D. H. Northcote, 968
Simmons, Eric L., and others : Long-term Survival of Irradiated Mice treated with Homologous Tissue Suspensions, 556
Simms Gold Medal of the Royal Aeronautical Society awarded to R. P. Probert, 1648
Simon, Brian (edited by) : Psychology in the Soviet Union (translated by J. and M. Ellis, J. McLeish, H. Milne, N. Parsons and others), *review* by Dr. Peter McKellar, 1008
Simon, Shirley E., and others : Lithium Retention in Ascites Tumour Mice, 1128

Simons, J. : Industry and the Individual (Cost and Changing Place of Fringe Benefits in Salary and Wage Agreements), 89
Simple Method for the Concentration of Fluids containing Protein (Dr. J. Kohn), 1055
Simple Micro-Stirrer (R. Morris), 201
Simple Synthesis of Oxetanes (L. F. Schmoyer and Prof. L. C. Case), 389
Simplified Physico-chemical Method for Determination of Human Urinary Œstrogens (Dr. Tawfik El-Attar), 1607
Simpson, Prof. John A. : Elected a member of the United States National Academy of Sciences, 1575
Simpson, Dr. Keith : Awarded the Swiney Prize of the Royal Society of Arts, 368
Simpson, Dr. Scott : Appointed professor of geology in the University of Exeter, 1432 ; work of, 1432
Sims, Dr. R. B. : Awarded the W. H. A. Robertson Medal and Premium of the Institute of Metals, 793
Simulation of Lunar Craters—a Blowhole Theory (Dr. A. G. Gaydon and R. C. M. Learner), 37
Simulator System : A Radar (A. F. Wilkins), 157
Simultaneous Decomposition Processes in Soils (H. F. Birch), 1415
Simultaneous Occurrence of Sub-Visual Aurorae and Radio Noise Bursts on 4·6 kc./s. (R. A. Duncan and G. R. Ellis), 1618
Sinclair, J. : A Revision of the Malayan Myristicaceae, 1169
Singapore : Darwin, Wallace and Linnaeus Celebrations in (Prof. R. D. Purchon), 723
Singer, Charles, and others (edited by) : A History of Technology, Vol. 4, The Industrial Revolution, *review* by G. B. L. Wilson, 70
Singer, Prof. S. J. : Preparation of an Electron-dense Antibody Conjugate, 1523
Singh, A. D., and Pathria, R. K. : Bose—Einstein Statistics and Helium Films, 668
Singing : Nature of the Vibrato and the Control Loop in (Dr. J. A. Deutsch and J. K. Clarkson), 167
Singing Pattern of the Common Chaffinch, *Fringilla coelebs* Linn. (D. R. Barber), 129
Single Cardiac Muscle Fibres : Relation of Extracellular to Intracellular Potential Records from (Dr. E. M. Vaughan Williams), 1341
Sintering of Quartz Crystal (A. C. D. Chaklader and Prof. A. L. Roberts), 1252
Sirlin, J. L. (Edwards, Dr. R. G., and) : Fate of Spermatozoa penetrating into the Tissues of the Fallopian Tube, 1744
Site (Physiological), of Anserine Formation : Pathways and the (Prof. Theodore Winnick and R. E. Winnick), 1466
Site and Mode of Trehalose Biosynthesis in the Locust (D. J. Candy and Dr. B. A. Kilby), 1594
Size of Antigens : Estimation of the, by Gel Diffusion Methods (Dr. A. C. Allison and Dr. J. H. Humphrey), 1590
Size of Ascospore in *Neurospora crassa* : Linkage of Polygenes controlling (B. T. O. Lee and J. A. Pateman), 698
Size Distribution of Tobacco Smoke Particles (Elaine Harris and Dr. H. F. Kay), 741
Size Relationship of Oocytes and their Nuclei in Two Species of Ascidians (S. R. Vankatasubba Rao), 1454
Skarzyński, Dr. Boleslaw, and Szczepkowski, Tadeusz W. : Oxidation of Thiosulphate by *Thiobacillus thioparus*, 1413
Skeletal Muscle (Mammalian) : Synthesis of Adenylosuccinic Acid in Preparations of (C. L. Davey), 995
Skill : Training for (Lady Gertrude Williams), 1780
Skill in Gambling : Preferences for Different Combinations of Chance and (Prof. John Cohen and C. E. M. Hansel), 841
Skim Milk : Distribution of Kappa-Casein in (Royal A. Sullivan, Margaret M. Fitzpatrick and Elizabeth M. Stanton), 616
Skin: Action of Ultra-Violet Light on—Effect of the Histamine Liberator 48/80 and Methotrimeprazine (Prof. S. Claesson, G. Wettermark and L. Juhlin), 1451
Skin in the Newt *Triturus taeniatus* : Inhibitory Effect of Colchicine upon the Transplantable Fibroma of the (Prof. A. Stolk), 555
Skin of Sheep : An Abnormality in the (Mary Dempsey and G. H. Green), 909
Skin (Human) : Weal and Flare in, produced by Histamine and other Substances (Dr. A. Herxheimer and Dr. M. Schachter), 1510
Skinner, Dr. F. A. : Decomposition of Anionic Surface-Active Agents by Soil Bacteria, 548
Skinner, Prof. H. W. B. : The Elusive Particle, *review*, 1421
Sköld, Ola, and others : Possible Enzymic Mechanism for the Development of Resistance against Fluorouracil in Ascites Tumours, 939
Skomer Island as a Nature Reserve, 222
Skoulios, A., and Luzzati, Dr. V. : Structure of Anhydrous Sodium Soaps at High Temperatures, 1310
Skua (Arctic) : Possibility of Assortive Mating in the (P. O'Donald), 1210
Skulls (The Fontéchevade), and the Origin of *Homo sapiens* (Dr. J. C. Trevor), 1369
Sky : The Night, in January, 18 ; in February, 294 ; in March, 581 ; in April, 865 ; in May, 1164 ; in June, 1502
Sky Spectrum (Twilight) : New Bands and Lines in the (I. A. Khvostikov and T. G. Megrelishvili), 811
Slade, J. H. R. (Kent, L. H., and) : Immunochemically Active Cross-linked Polystyrene, 325
Sladen, Dr. William J. L. : The Adélie Penguin, *Pygoscelis adeliae* (Hombron and Jacquinot), 23
Slater, Dr. T. F. : Reduction of Neotetrazolium Chloride by Vitamin K_3, 50
  Elected to a fourth year Fellowship by the Beit Memorial Trust, 1569
  Reduced Diphosphopyridine Nucleotide–Neotetrazolium Reductase, 1679
Slaughter : Changes in *p*H and Temperature in Poultry Breast Muscles at (F. E. Peters and J. W. Dodge), 687
Sleepwalkers : The—a History of Man's Changing Vision of the Universe (Arthur Koestler), *review* by Dr. A. R. Hall, 1419
Sleight, P. E. : Appointed to the Board of the College of Technologists, 1500
Sletten, A. M. : Electric Strength and High-Field Conduction Current in *n*-Hexane, 311
Slip Sources on Sodium Chloride Surfaces (Z. Morlin), 1319
Slow Contraction of Smooth Muscle produced by Human Plasma (Dr. Yousry Gabr and Raga H. Aly), 897
Slow Muscles (Fast and), in Mammals (Dr. A. J. Buller, Dr. A. C. Dornhorst, Dr. R. Edwards, Dr. D. Kerr and Dr. R. F. Whelan), 1516
Slow Secondary Electrons : Emission of (Prof. J. M. Anderson), 241
Small Amounts of Water in Fluids : An Automatically Operating, Coulometric Titration Method for continually measuring (E. Barendrecht), 1181
Small Animals : Measuring Productivity in Breeding of (Dr. W. Lane-Petter, Annie M. Brown, Margaret J. Cook, G. Porter and A. A. Tuffery), 339
  A Photographic Method for Recording Activity and Behaviour in a Group of (Dr. D. K. Edwards), 625
Small Differences in Length of Day : Response of Rice to (Dr. E. Njoku), 1598
Smaller, Dr. Bernard, and Avery, Dr. Eugene C. : Radiation Protection and Free Radicals, 539
Smallman, R. E. : Precipitation in Alloys (Precipitation of Vacancies in Pure Metals and Alloys), 797
Smears (Blood) : Feulgen–Naphthoic Acid Hydrazide Reaction applied to (Dr. R. K. Archer), 820
Smiley, Dr. Charles H. : Poisson's Law and the Frequency of Hurricanes, 814
Smith, Dr. A. : Effect of Residual House Spraying in the Plains on Anopheline Densities in Huts on the Pare Mountains, 198
Smith, Dr. A., and Vail, J. W. : Relationship between Salinity and Breeding of *Anopheles gambiae* in North-Eastern Tanganyika, 1203
Smith, Prof. Alex. G., and others : Anomalous Night-Time Reception of a Major Solar Radio Burst, 597
Smith (Bosworth) Trust : Grants in 1959 from the (Institution of Mining and Metallurgy), 18
Smith, D. C. : Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
Smith, David S., and Wigglesworth, Prof. V. B. : Collagen in the Perilemma of Insect Nerve, 127
Smith, E.: Interfacial Phenomena (Precipitate–Dislocations Interaction), 1099
Smith, Sir Ewart : Retirement from the Board of Imperial Chemical Industries, Ltd., 1090 ; work of, 1090
Smith, Sir F. Ewart (Heynes, William Munger, and) : Awarded jointly the James Clayton Prize for 1958 of the Institution of Mechanical Engineers, 865
Smith, Frederick E., and others : General Zoology, *review* by Dr. V. Fretter, 1290
Smith, Geoffrey R. : Isolation of Two Types of *Pasteurella haemolytica* from Sheep, 1132
Smith, Sir Harold : Industry and the Individual (Problem of Responsibility and Efficiency in a Nationalized Industry), 87
Smith (H. G.) Memorial Medal of the Royal Australian Chemical Institute awarded to Prof. S. J. Angyal, 794
Smith, Isabel W. : *Vibrio* spp. in Finnock from the Aberdeenshire Dee, 1409
Smith, Prof. J. E. : Zoology in Nigeria—Ecology of Lagos Lagoon, 295
Smith, J. M., and others : Neuromuscular Blocking Agents of Short Duration, 542
Smith, K. C., and Gardner, Dr. J. B. : Hydrogen Liquefaction and Associated Techniques (Storing Liquid Hydrogen), 1505
Smith, K. H. : Awarded the Mervyn Premium of the Television Society, 1161
Smith, Dr. Kenneth M. : Occult Viruses, *review*, 71
Smith, Dr. Kenneth M., and Lauffer, Dr. Max A. (edited by) : Advances in Virus Research, Vol. 5, *review* by Prof. F. C. Bawden, 636
Smith, Dr. L. H. (Goodman, Dr. Joan W., and) : Life-Span of Rat and Mouse Erythrocytes in the Rat–Mouse Chimera, 1833
Smith, L. P. : Farming Weather, *review* by James A. Taylor, 3
Smith, Maynard : Darwinism and the Study of Society, 1563
Smith, Marion Edmonds (Newman, Dr. Henry, and) : Triiodothyronine in Acute Alcoholic Intoxication, 689
Smith, Prof. Otto J. M. : Feedback Control Systems, *review* by M. J. Somerville, 73
Smith, Richard F. (Krueger, Prof. A. P., and) : An Enzymatic Basis for the Acceleration of Ciliary Activity by Negative Air Ions, 1332
Smith, Dr. D. W. : Appointed lecturer in physical metallurgy at the University of Birmingham, 1571
Smith, S. R. (Bowen, H. J. M., and) : Effect of γ-Radiation on Weeds, 907
Smith, Dr. W. Campbell : Gem Testing, *review*, 781
  Obituary of Dr. L. J. Spencer, 1564
Smith, W. Hugh : Control of Superficial Scald in Stored Apples, 760
Smith-Rose, Dr. R. L. : Radio Transmission by Wave-Guide, 727
Smithies, Dr. O., and others : Serum Transferrins, 1589
Smithsonian Institution : Presented by W. M. Brucker with a replica of *Explorer I* together with its *Jupiter-C* Carrier Rocket, 510
  Branchiosaurus Exhibit, 649
  Annual Report of the Board of Regents for 1956-57, 1022
Smoczkiewiczowa, Dr. Aleksandra : Sodium, Potassium, Calcium and Chloride Ion Contents and Protein Fractions in the Fluids of Chick Embryos, 1260
Smoke is Your Enemy (Ministry of Housing and Local Government and the Central Office of Information), 1163
Smoke (Tobacco) : Bibliography on the Chemistry of, 1434
  The Constituents of—an Annotated Bibliography (edited by H. R. Bentley and E. G. N. Berry), 1424
Smoke Control, 1163
Smoke Emission of Coal : Alicyclicity and (B. K. Mazumdar, S. S. Choudhury and A. Lahiri), 1613
Smoke Emission of Low-Temperature Chars (W. N. Adams, A. F. Gaines, D. H. Gregory and G. J. Pitt), 33 ; (Prof. Morris W. Travers), 1321
Smoke Particles (Tobacco) : Size Distribution of (Elaine Harris and Dr. H. F. Kay), 741
Smoking Habits : The Reliability of Statements about (G. F. Todd and J. T. Laws), (Tobacco Manufacturers Standing Committee Research Paper No. 2), 932
Smooth Muscle : Slow Contraction of, produced by Human Plasma (Dr. Yousry Gabr and Raga H. Aly), 897
Smooth Muscles of Lamellibranch Molluscs : Contraction and Relaxation in (Dr. J. Lowy and B. M. Millman), 1730
Smyth, Prof. J. D. : Appointed to the chair of zoology at University College, Canberra, 648 ; work of, 648
Smythies, Dr. J. R. : Quantitative Measurement of the Effect of Lysergic Acid Diethylamide on Mice and its Interactions with other Drugs, 545
SNAP III : The American Miniature Nuclear Generator (W. S. Eastwood, L. B. Mullett and J. L. Putman), 643
Snaydon, R. W. (Bradshaw, A. D., and): Population Differentiation within Plant Species in Response to Soil Factors, 129, *erratum*, 368

Sneddon, Prof. I. N. : Awarded the Makdougall-Brisbane Prize for 1956-58 of the Royal Society of Edinburgh, 652
Snow, Dr. D. W. : A Study of Blackbirds, *review* by Dr. R. A. Hinde, 1767
Snowdonia (edited by E. Vale), (National Parks Guide No. 2), 721
Snows (New Zealand) : Organic Nitrogen in (A. T. Wilson), 318
Soaps (Anhydrous Sodium) : Structure of, at High Temperatures (A. Skoulios and Dr. V. Luzzati), 1310
Soay Sheep : Some Unusual Outgrowths from Secondary Follicles in (Dr. M. L. Ryder), 1831
Sobel, H., and Eckstein, B. : Succinic Dehydrogenase Activity in Brain Tissue of Rats after Ovariectomy and Steroid Administration, 54
Sobotka, A., and Materna, J. : Forest Seedlings and Mycorrhiza Development in Fly-Ash, 1066
Sobotka, Dr. Harry, and Stewart, Dr. C. P. (edited by): Advances in Clinical Chemistry, Vol. 1, *review* by Prof. J. N. Davidson, 5
Social Anthropology : Method in (Prof. A. R. Radcliffe-Brown), *edited* by Prof. M. N. Srinivas, *review* by Dr. Kenneth Little, 70
Social Change : Social Policies and, *review* by M. P. Hall, 1147
Social Class and Mental Illness (Prof. August B. Hollingsworth and Prof. Frederick C. Redlich), *review* by Dr. Clifford Allen, 354
Social Implications of Mendelism versus Michurinism (A. Quintanilha), 1222
Social Policies and Social Change, *review* by M. P. Hall, 1147
Social Sciences : Fact and Value in the, *review* by Prof. T. S. Simey, 4
  Matching and Prediction in the (W. A. Belson), 770
Social Theory : Value in (Dr. Gunmar Myrdal), *review* by Prof. T. S. Simey, 4
Società Italiana di Fisica : Summer Courses of the International School of Physics, 1368
Societies (Scientific and Learned), of Great Britain, 59th edition, *review*, 1151
Society : Darwinism and the Study of (Scottish Branch of the British Sociological Association Conference to mark the Centenary of 'The Origin of Species'), 1562
  The Role of the Scholar in (Symposium on, Tunis, 1959), 1772
  Science and, *review* by R. Brightman, 1702
Society Medal for 1959 of the Society of Chemical Industry awarded to Dr. Francis H. Carr, 722
Sociological Association, British (Scottish Branch) : Conference on Darwinism and the Study of Society, to mark the Centenary of 'The Origin of Species', 1562
Sociology : Introduction to Difference Equations with Illustrative Examples from Economics, Psychology and (Prof. Samuel Goldberg), *review* by Dr. L. S. Goddard, 970
Soddy's Cubic Equation Machine handed over to the Science Museum, London, 863
Soddy (Frederick) Trust : First Report, 1163
Sodium Borohydride : Reaction of, with Wool (J. M. Gillespie), 322
Sodium Chloride : Adaptation of Marine Bacteria to Growth in Media lacking (Prof. D. B. Pratt and G. Waddell), 1208
Sodium Chloride Surfaces : Slip Sources on (Z. Morlin), 1319
Sodium Fluoride (Fused) : Nature of Fluorescence of Uranium in (Haydée le Roux), 1180
Sodium Flux in Human Red Cells : Effect of Ouabain on (Thomas J. Gill and Prof. A. K. Solomon), 1127
Sodium Sulphate (Anhydrous) : Polymorphic Transitions in (Dr. C. N. R. Rao and L. V. Gregor), 1391
NaH^{14}CO$_3$: Labelled Keto-Acids in Duck Blood incubated *in vitro* with (A. Breccia, A. L. Fantola, G. Giustina and E. Lazzarini), 1328
Sodium Laurate : Electron Microscopy of (T. H. Shuttleworth and M. Camp), 535
Sodium Soaps (Anhydrous) : Structure of, at High Temperatures (A. Skoulios and Dr. V. Luzzati), 1310
Sodium Sulphonates (Some Alkyl-Aryl), as Standard Substances in Detergent Chemistry (E. Q. Laws and W. Hancock), 1473
Sodium and Lithium in the Upper Atmosphere : Origin of (Dr. T. M. Donahue), 1480
Sodium and Potassium : Distinction between, in Change in Permeability effected by Lipid-soluble Analogues of Acetylcholine (Dr. Wolf D. Dettbarn), 465
Sodium, Potassium, Calcium and Chloride Ion Contents and Protein Fractions in the Fluids of Chick Embryos (Dr. Aleksandra Smoczkiewiczowa), 1260
Soil : Micro-Organisms in the (Prof. Alan Burges), *review* by D. M. Webley, 1010
  Release of Fixed Ammonium from the, by Ball Milling (P. M. McDonnell, Prof. F. J. Stevenson and Dr. J. M. Bremner), 1414
Soil (Swedish Milk and) : Caesium-137 in (K. Löw and K. Edvarson), 1104
Soil Bacteria : Decomposition of Anionic Surface-Active Agents by (Dr. F. A. Skinner), 548
Soil Crumbs : Stability of (Dr. W. W. Emerson), 538
Soil Factors : Population Differentiation within Plant Species in Response to (A. D. Bradshaw and R. W. Snaydon), 129, *erratum*, 368
Soil Organic Matter : Iodine and Copper Uptake by (J. M. Northmore), 1309
Soil Properties in the Triaxial Test : The Measurement of (Dr. Alan W. Bishop and D. J. Henkel), *review* by Thomas Whitaker, 1151
Soil-inhabiting Fungi (Saprophytic and Parasitic) : Differential Reaction of, to Indoleacetic Acid (E. W. B. Ward and Prof. A. W. Henry), 1064
Soils : Simultaneous Decomposition Processes in (H. F. Birch), 1415
Soils of the Aberystwyth Area (Welsh Soils Discussion Group Discussion on), 865
Soils for the Archaeologist (Dr. I. W. Cornwall), *review* by Dr. Alex Muir, 1355
Soils (Uraniferous and Non-Uraniferous) : Comparative Sensitivity to Radiation of Seeds from a Wild Plant grown on (Dr. D. J. Mewissen, J. Damblon and Prof. Z. M. Bacq), 1449
Soils Discussion Group, Welsh : Discussion on the Soils of the Aberystwyth Area, 865
Soils, Plant Ashes and Animal Bones : Radioactivity of (Sir Ernest Marsden), 924
Sokoloff, Dr. Louis, and others : Effects of Pyridoxine Withdrawal on Cerebral Circulation and Metabolism in a Pyridoxine-dependent Child, 751
Sokolowski, Jan : Ptaki Ziem Polskich (The Birds of Poland), Tom 2, *review* by B. Nowosielski-Slepowron, 73
Solar Corona : A New Theory of the (Prof. Paul J. Kellogg and Prof. Edward P. Ney), 1297
  Radio Reflexions from the Moon and (Prof. O. Burkard), 1180
Solar Flares (Strong) : Observations of Intense Ionization of Long Duration below 50 km. Altitude after some (Dr. Bengt Hultqvist and Johannes Ortner), 1179
Solar Origin : Van Allen Radiation of (Prof. Paul J. Kellogg), 1295
Solar Radio Burst : Anomalous Night-Time Reception of a Major (Prof. Alex. G. Smith, T. D. Carr and W. H. Perkins), 597
Solid Crystalline Fluors : Radioassay of Aqueous Solutions mixed with (Dr. Daniel Steinberg), 1253
'Solid-Image' Microscope (R. L. Gregory and P. E. K. Donaldson), 246
  The Three-Dimensional or (W. D. Jackson), 1048
Solid Insecticides : 'Vapour Toxicity' of (P. Gerolt), 1121
Solid Lithium Fluoride containing varying Proportions of Lithium Isotopes : Infra-red Dispersion Wave-lengths for (Prof. D. J. Montgomery and R. H. Misho), 103
Solid State : *Cis–trans* Isomerism of Thioindigo Dyes in the (Dr. G. S. Egerton), 389
Solid State Physical Electronics (Prof. Aldert van der Ziel), *review* by Dr. G. T. Wright, 1356
Solid State Physics (Prof. Adrianus J. Dekker), *review* by Prof. G. F. J. Garlick, 1007 ; (Australian Branch of the Institute of Physics Conference on), 1643
Solids : Physical Acoustics and the Properties of (Dr. Warren P. Mason), *review* by Prof. E. G. Richardson, 1221
  Removal of Dipolar Broadening of Nuclear Magnetic Resonance Spectra of, by Specimen Rotation (Prof. E. R. Andrew, A. Bradbury and R. G. Eades), 1802
  Thermal Properties of Gases, Liquids and (American Society of Mechanical Engineers and Purdue University Thermo-physical Properties Research Center Symposium on), 294
Solids (Irradiated) : Thermal Decomposition of (Dr. E. G. Prout), 884
Solids and Liquids : The Study of Molecular and Atomic Motions in, by Radiofrequency Methods (British Radio Frequency Spectroscopy Group and the Groupement AMPERE Joint Meeting on), 652
Soliman, F. A., and Abd-El-Malek, A. S. : Influence of Temperature and Light on Reproduction in Male Rats, 266
Solomon, Prof. A. K. (Gill, Thomas J., and) : Effect of Ouabain on Sodium Flux in Human Red Cells, 1127
Solution of Iodine in Phosphorus (III) *Iso*cyanate (Dr. Ervin Colton and Lewis St. Cyr), 1042
Solution (Aqueous) : Interaction between Organic Hydroxy Acids and Germanic Acid in (E. R. Clark), 536
Solution (A New), to the Atlantic Eel Problem (Dr. Denys W. Tucker) 495
Solutions (Ammonium Sulphate) : A Rapid Method for determining, the Concentration of (Dr. John A. Whitaker and Dr. Robert Hughes), 603
Solutions (Aqueous) : Effects of Gamma-Radiation on some Carbohydrates, Hydroxyacids and Amino-acids in (Dr. S. A. Barker, Dr. P. M. Grant, Prof. M. Stacey and Dr. R. B. Ward), 376
Solutions (Aqueous), of Protein : Production of Amide Groups and Ammonia in the Radiolysis of (Dr. Winifred Bennett and Dr. Warren M. Garrison), 889
Solutions (Aqueous), mixed with Solid Crystalline Fluors : Radioassay of (Dr. Daniel Steinberg), 1253
Solutions (Old and New), to the Eel Problem (Prof. Umberto D'Ancona), 1405 ; (Dr. Denys W. Tucker), 1406
Solutions (Strong Salt) : Oxygen Equilibrium of Human Haemoglobin in (Prof. A. Rossi-Fanelli, E. Antonini and A. Caputo), 827
Solvay, Dr. E. J. : Appointed president of the Society of Chemical Industry, 1024
Solving the Scientist Shortage (David C. Greenwood), 489
Somasekhara, S., and others : Infra-red and the Near Ultra-violet Absorption Spectra of Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b*, 1475
Somerset, O. E. A. (Fraser, H. H., and) : Awarded jointly the Consolidated Gold Fields of South Africa, Ltd. Premium for 1957-58 of the Institution of Mining and Metallurgy, 1499
Somerville, Prof. J. M. : Gas Discharges (Anode Marks made by an Arc Channel during the Early Stages of Growth, from 20 mμ sec. to 200 μsec.), 92
Somerville, M. J. : Feedback Control Systems, *review*, 73
  Basic Automatic Control Theory, *review*, 211
Somerville, T. : Of What Use is Acoustics to the Musician ?, 1293
  Stereophonic Sound Recording, Reproduction and Broadcasting, 1720
Sommerville, R. I., and others : Antigenic Stimulus of Exsheathing Fluid in Self-Cure of Sheep infected with *Haemonchus contortus*, 553
Sophorose in Cultures of certain Micro-organisms growing in Defined Glucose-containing Media : Detection of Gentiobiose and (A. W. Khan, D. N. Pellegrino and Prof. T. K. Walker), 682
D-Sorbitol : Effect of, on the Absorption of Orally Administered Vitamin B$_{12}$ (Dr. J. N. Marshall Chalmers and N. K. Shinton), 120
Sörbo, Bo (Holmberg, Bo, and) : Protective Effect of β-Aminoethylthiosulphuric Acid against Ionizing Radiation, 832
Sorex araneus L. : Seasonal Changes in the Brain-case of the Common Shrew (Peter Crowcroft and Jean M. Ingles), 907
Sorghums (Nigerian Cultivated) : A Chemical Basis for the Classification of Glume Colour in (W. R. Stanton, T. B. Miller and D. L. Curtis), 807
Sorption Complexes : β-Type Interlamellar (F. Aragón, J. Cano Ruiz and Dr. D. M. C. MacEwan), 740
Sorvall, Inc., Ivan (Sharp, Dr. D. Gordon, and) : A New Method of Particle-counting on the Electron Microscope, 1642
Soška, J., and others : Effect of Pyrimidine Deoxyribonucleotides on the Regeneration of Bone-Marrow in Irradiated Mice, 1600
Soulsby, E. J. L., and others : Antigenic Stimulus of Exsheathing Fluid in Self-Cure of Sheep infected with *Haemonchus contortus*, 553
Sound Recording (Stereophonic), Reproduction and Broadcasting (Institution of Electrical Engineers Convention on), 1720
Sounds (Distorted) : Unpleasantness of—a Criterion derived from the Distortion Spectrum (E. R. Wigan), 1320
Source of Atmospheric Ice Nucleic : Volcanoes as a (K. Isono, M. Komabayasi and A. Ono), 317
Source of Error in Microbiological Assays attributable to a Bacterial Inhibitor in Distilled Water (S. A. Price and L. Gare), 838
Source of Natural Tin Whiskers (Malcolm J. Fraser), 670
Sources (Slip), on Sodium Chloride Surfaces (Z. Morlin), 1319
South Africa : Academic Freedom and the Universities of, 1551
South African Council for Scientific and Industrial Research (Dr. S. M. Naudé), 863

South African Council for Scientific and Industrial Research : Register of Current Scientific Research at South African Universities (1957), 366
  Report of the Symposium on Design for Tropical Living (prepared by the National Building Research Institute), 1022
South African Museum : Report for 1957-58, 1570
South African Stone Age Cultures : Some (Dr. R. J. Mason), 377
South African Universities : Register of Current Scientific Research at (1957), (South African Council for Scientific and Industrial Research), 366
South Australian Museum : *Records* of the, Vol. 13, No. 2, 1092
South Harris, Outer Hebrides : Niobium–Zirconium–Thorium–Uranium and Rare-Earth Minerals from the Pegmatites of (Dr. O. von Knorring and R. Dearnley), 255
South-East England : 'Ring Angels' over (E. Eastwood, J. D. Bell and N. R. Phelp), 1759
South-Eastern Pacific : Heat-Flow Values from the (Dr. R. Von Herzen), 882
Southam, J. A. : The Inferior Mesenteric Ganglion in Man, 697
Southerly Sub-surface Return Flow below the Peru Current off the Chilean Coast : Relationship between the Hake Fishery and a (Dr. Wilhelm Brandhorst), 1832
Southern Regional Council for Further Education : Eleventh Annual Report (1957-58), 1021
Southernmost Part of Norway : A Marine Transgression of Boreal Age in the (Gunnar Gabrielsen), 1616
Southgate, Dr. B. A. : The Metropolitan Water Board—Report for 1955-56, 798
  Appointed to the Council of the Water Research Association, 1500
Soviet Astronomy–AJ : An English translation of the *Astronomical Journal of the Academy of Sciences, U.S.S.R.*, to be published by the American Institute of Physics in co-operation with the National Science Foundation, under the title of, 1164
Soviet Physics—Solid State (Fizika Tverdogo Tela), No. 1 (Academy of Sciences of the U.S.S.R.), 1717
Soviet Psychology, *review* by Dr. Peter McKellar, 1008
Soviet State Committee for Cultural Relations with Foreign Countries (Soviet Relations Committee of the British Council and the) : Discussions on Anglo-Soviet educational and other exchanges, 582
Soviet Union : Applied Mathematics in the, 863
  Iron Ore in the (Prof. S. I. Tomkeieff), 1028
  Psychology in the (edited by Brian Simon), translated by J. and M. Ellis, J. McLeish, H. Milne, N. Parsons and others, *review* by Dr. Peter McKellar, 1008
Soybean Nodules bearing Selected Strains of *Rhizobium japonicum* : Responses of Seedlings to Extracts of (Herbert W. Johnson, Ura M. Means and Francis E. Clark), 308
Space : Calculation of Erosion in, from the Cosmic-Ray Exposure Ages of Meteorites (Dr. F. L. Whipple and Dr. E. L. Fireman), 1315
'Space Age' : The Universe at the Beginning of the (Dr. R. A. Lyttleton), 1019
Space Flight : Biological Effects of, 651
Space Monkeys, 1568
Space Research (Royal Society Discussion on), 361
  Appointment of a Steering Group on, 1568
Space Research in Britain, 1231, 1302
Space (Outer) : Peaceful Uses of (United Nations Committee to study the question of international co-operation in the), 649
Spacing Anomaly in Electron Microscope Images of Crystal Lattices (Dr. H. Hashimoto and Dr. H. Yotsumoto), 1001
Spain : Predatory Animals in, 1782
Spallanzani, Lazzaro : International Symposium on Experimental Biology to be held in commemoration of, 582
Sparing Effect of Serum from Mice treated with Endotoxin upon certain Murine Virus Diseases (A. W. Gledhill), 185
Spark Breakdown Voltage : Effect of Humidity on the (K. R. Allen and Dr. K. Phillips), 174
Spark Gap (1-cm. Homogeneous Field), in Air : Effect of Humidity on the Breakdown of a (Dr. K. Phillips, K. R. Allen and A. Refsum), 532
Sparrow, Arnold H., and others : Bibliography on the Effects of Ionizing Radiations on Plants, 1896-1955, *review* by Dr. Alma Howard, 639
Spatial Summation of Electric Activity in a Non-myelinated Nerve Ending (Properties of a Receptor Membrane), (Prof. Werner R. Loewenstein), 1724
Special Researches : Longer-term Grants for (Department of Scientific and Industrial Research), 438
Species : Distribution of Alkaline Phosphatase in the Arteries of several (Dr. Manuel René Malinow, Martha A. Fernandez, Alvaro L. Gimeno and Grato E. Bur), 1262
  The Origin of (Scottish Branch of the British Sociological Association Conference on Darwinism and the Study of Society, to mark the Centenary of), 1562
Species of Bacteria : Detection of Sialic Acid in various *Escherichia coli* Strains and in other (Prof. Guy T. Barry), 117
Species of *Pseudomonas* : Production of 5-Keto-gluconic Acid by a (D. J. Stewart), 1133
Species (A Third), of 'Pepper' in West Africa (J. Yanney Wilson), 1142
Species (Two), of Ascidians : Size Relationship of Oocytes and their Nuclei in (S. R. Venkatasubba Rao), 1454
Specific Heats (Low-temperature), of Body-centred Cubic Chromium–Iron and Chromium–Manganese Alloys (C. T. Wei, C. H. Cheng and Prof. P. A. Beck), 315
Specific Hypotensive or Sedative Activity : Reserpine Derivatives with (S. Garattini, A. Mortari, A. Valsecchi and L. Valzelli), 1273
Specific Method (Rapid), for Determination of Aldosaccharides in Body Fluids (Dr. Eric Hultman), 108
Specific Precipitates on Paper Electrophoresis Strips : Detection of Antigens as (S. Buttery), 686
Specific Taste? : Has Water a (Prof. Yngve Zotterman and Herman Diamant), 191
Specific and Non-Specific Effects of Chemicals on Plants : Separation of (Prof. T. J. Muzik and J. M. Lawrence), 482
Specificity and Electrophoretic Mobility of the Precipitating Antibodies present in the Serum of Cattle recovering from Foot-and-Mouth Disease : Changes in (F. Brown and J. H. Graves), 1688
Specimen Rotation : Removal of Dipolar Broadening of Nuclear Magnetic Resonance Spectra of Solids by (Prof. E. R. Andrew, A. Bradbury and R. G. Eades), 1802
Specimens in Powder Photographs : Use of Synthetic Quartz Crystals as a Support for (Hitosi Hagihara, Shuji Yamashita and Akitsu Takeda), 1666
Specimens (Notched) : Improvement of the Fatigue Strength of, by Artificially Induced Residual Stresses (T. R. Gurney), 883
Speck, Prof. Marvin L., and others : Dairy Microbiology, *review* by Dr. C. A. E. Briggs, 637
Spectra (Absorption), and Associated Photoconductivity of Pure and Decomposed Crystals of Thallous Azide (B. L. Evans and A. D. Yoffe), 1241
Spectra (Diatomic Band) : Changes in Transition Probability due to the Interaction of Rotation and Vibration in (R. C. M. Learner and Dr. A. G. Gaydon), 242
Spectra (Infra-red and the Near Ultra-violet Absorption), of Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b* (Dr. C. N. R. Rao, J. Ramachandran, M. S. C. Iah, S. Somasekhara and T. V. Rajakumar), 1475
Spectra (Microwave) : Molecular Symmetry in *Cyclo*pentadienyl Thallium and some related Substances from their (J. K. Tyler, A. P. Cox and Dr. J. Sheridan), 1182
Spectra (Nuclear Magnetic Resonance), of Solids : Removal of Dipolar Broadening of, by Specimen Rotation (Prof. E. R. Andrew, A. Bradbury and R. G. Eades), 1802
Spectral Casework, *review* by Dr. D. J. West, 351
Spectral Changes (Infra-red), occurring upon the Interaction of Polynucleotides : A Proposed Interpretation of (H. Todd Miles), 1814
Spectrographic Determination (X-Ray), of Strontium (J. T. Campbell and H. I. Shalgosky), 1481
Spectrophotometric Investigation on the Orcein Derivative of Elastin (V. Scarselli), 1739
Spectrophotometric Method for the Determination of Chlorine (Zd. Spurny), 1390
Spectroscopy : Mass (Prof. Henry E. Duckworth), *review* by Prof. K. T. Bainbridge, 638
  Molecular Structure and (Ohio State University Symposium on), 722
  Nuclear Quadrupole Resonance (T. P. Das and E. L. Hahn), *review* by Dr. R. H. Tredgold, 1078
Spectroscopy (Mass) : Apparatus and Applications of, *review* by Prof. K. T. Bainbridge, 638
Spectroscopy (Radiofrequency), of Free Atoms and Molecules (Radiofrequency Spectroscopy Group Autumn Meeting on), 1502
Spectroscopy Group, Radiofrequency : Autumn Meeting (Radiofrequency Spectroscopy of Free Atoms and Molecules), 1502
Spectroscopy Group (Radiofrequency), and the Groupement AMPERE : Joint Meeting on the Study of Molecular and Atomic Motions in Solids and Liquids by Radiofrequency Methods, 652
Spectrum (Absorption), and Decay Kinetics of the Metastable State of Chlorophyll *b* (Prof. Stig Claesson, Lars Lindqvist and Bertil Holmström), 661
Spectrum (AlO) : Hollow-Cathode Emission of the (V. Wilson Goodlett and K. Keith Innes), 243
Spectrum (Distortion) : Unpleasantness of Distorted Sounds—a Criterion derived from the (E. R. Wigan), 1320
Spectrum (Electron Spin Resonance), of Glycine : Changes in the, with Increasing Doses of Radiation (Dr. J. W. Boag and A. Müller), 831
Spectrum (Twilight Sky) : New Bands and Lines in the (I. A. Khvostikov and T. G. Megrelishvili), 811
Spectrum and Structure of the Free Methylene Radical (Dr. G. Herzberg and J. Shoosmith), 1801
Speeds (Dual Pumping), of some Ionization Pumps (G. Carter), 1619
Speeds (Super-Critical) : Grinding at, in 'Ball' Mills (Dr. H. E. Rose and M. D. Trbojević), 813
Spees, S. T., and Adamson, A. W. : Co-ordination Chemistry (Mechanisms of the Photochemical Reactions of Complex Ions), 1784
Spence, D. A. : Awarded the Orville Wright Prize of the Royal Aeronautical Society, 1649
Spence, Dr. R. : Elected a Fellow of the Royal Society, 861
Spencer, Kathryne, and others : Response of Newly Born Mice to a Chemical Carcinogen, 1689
Spencer, Dr. L. J. : *Obituary* by Dr. W. Campbell Smith, 1564
Spencer (Rowland) Scholarship (Textile Institute), 933
Sperm : Synthetic Activity of Polynucleotide Phosphorylase from (Prof. Anwar A. Hakim), 334
Sperm (*Drosophila*) : Recoverable Lethal Mutations in (Prof. K. G. Lüning and H. O. Henriksson), 1211
Sperm Abnormality : A Rare—'Corkscrew-sperms' associated with Sterility in Bulls (Dr. Erik Blom), 1280
Spermatic Vein Blood : Androgens in the Bovine Testis and (H. R. Lindner), 1605
Spermatozoa : Entry of, into the Fallopian-Tube Mucosa (Dr. C. R. Austin), 908
Spermatozoa penetrating into the Tissues of the Fallopian Tube : Fate of (Dr. R. G. Edwards and J. L. Sirlin), 1744
Spermine as a Protective Agent against Osmotic Lysis (J. Mager), 1827
Sperms in the ey^2 Mutant of *Drosophila* : Early Formation of (H. H. Shatoury), 1696
Sperms' ('Corkscrew-), associated with Sterility in Bulls : A Rare Sperm Abnormality—(Dr. Erik Blom), 1280
SPERT III (Special Power Excursion Reactor Test) achieves criticality at the United States Atomic Energy Commission's National Reactor Testing Station, Idaho Falls, 365
Sphere Gaps (Homogeneous Field and) : Effect of Radiation on the Breakdown of (K. R. Allen and Dr. K. Phillips), 233
Spheres (Nutritive), in the *Proteus* Group of *Amoebae* : Utilization of (Sister Monica Taylor), 1458
Spider *Nephila maculata* Fabr., 1763 : Amounts of Deoxyribonucleic Acid in the Silk Glands of the (Prof. N. B. Inamdar and U. V. Wagh), 1541
Spider Family Dictynidae in America North of Mexico : (Prof. Ralph V. Chamberlin and Willis J. Gertsch), 1170
Spiders : The World of (Dr. W. S. Bristowe), *review* by Dr. Eric Duffey, 1079
Spiders (British) : Natural History of, *review* by Dr. Eric Duffey, 1079
Spiegel, Herbert E., and others : Isolation of an Activator for Phospholipase D, 1393
Spiers, Charles W. : Elected to honorary membership of the Institution of Electrical Engineers, 507 ; work of, 507

Spiers, Prof. F. W. : Measurements at Leeds following the Windscale Reactor Accident—Increase in Background Gamma-Radiation and its Correlation with Iodine-131 in Milk, 517
Spinal Neurones : Chemical Excitation of (Dr. D. R. Curtis, J. W. Phillis and Dr. J. C. Watkins), 611
Spinal Reflexes : Pattern of Recurrent Conditioning of (Dr. V. J. Wilson, W. H. Talbot and F. P. J. Diecke), 824
Spinel–Olivine Inversion in Mg_2GeO_4 (Frank Dachille and Prof. Rustum Roy), 1257
Spines (Dendrite), of the Cerebral Cortex : Electron Microscopy of Synaptic Contacts on (Dr. E. G. Gray), 1592
Spinoza, Benedict de—the Elements of his Philosophy (Prof. H. F. Hallett), *review* by Dr. Peter Nidditch, 964
Spiral Nebula : The Galactic System as a (Dr. R. H. Garstang), 1308
Spirifer disjunctus, its Evolution and Paleoecology in the Catskill Delta (Hugo Greiner), *review* by Dr. H. M. Muir-Wood, 959
Spirifers (Upper Devonian), of the Catskill Delta, *review* by Dr. H. M. Muir-Wood, 959
Spirobacillus cienkowskii Metchnikoff : Carotenoid Pigment in, a Pathogen of Cladocera (J. Green), 56
Spirogyra pratensis Cultures : Formation of Purple Pigment in (Dr. Ann Allen and Dr. R. E. Alston), 1064
Splachnum ampullaceum (L.) Hedw. : Interaction between Kinetin and Indoleacetic Acid in the Control of Bud Reactivation in (Prof. K. E. von Maltzahn), 60
Spleen Cells (Isolated), transferred to Recipients in Absence of Homotransplantation Reaction : Antibody Formation by (Dr. Z. Trnka and I. Ríha), 546
Splitting of the Electrophoretic Pattern of Serum Albumin during Short-term Action of Pepsin at Room Temperature (E. Annau), 190
Spontaneous Fluctuations in Generator Potential in a Receptor Membrane (Properties of a Receptor Membrane), (Nobusada Ishiko and Prof. Werner R. Loewenstein), 1725
Spooner, G. M. : New Members of the British Marine Bottom Fauna, 1695
Sporadic *E*-Region Ionization, 'Spread F', and the Twinkling of Radio Stars (Dr. D. F. Martyn), 1382
Spore Germination in *Agaricus campestris* L. ex Fr. (Dr. D. M. McTeague, Dr. S. A. Hutchinson and Dr. R. I. Reed), 1736
Spores : Formation of Aberrant Cell Walls and of, by the Growing Yeast Protoplast (A. A. Eddy and D. H. Williamson), 1101
  Pattern of Synthesis of Deoxyribonucleic Acid in *Bacillus cereus* growing synchronously out of (Dr. I. Elizabeth Young and Prof. Philip C. Fitz-James), 372
Spores of *Bacillus anthracis* : Inactivation of, by γ-Radiation (T. Horne, G. C. Turner and A. T. Willis), 475
Spores (Vegetative Cells and), of *Bacillus cereus* and *Bacillus megaterium* : Differences in Cyst(e)ine Content between (Vladimír Vinter), 998
Sporidesmium bakeri : A Hepatotoxin from, capable of producing Facial Eczema Diseases in Sheep (Dr. R. H. Thornton and J. C. Percival), 63
Sporing Bacterium (A Gram-negative), from the Rumen (Dr. P. N. Hobson and M. R. Purdom), 904
Sporn, Michael B., and others : Formation of Urea from Arginine in the Brain of the Living Rat, 1520
Spotted Wilt Virus (Tomato): Leaf-Enations in *Dahlia variabilis* Desf. induced by (A. A. Brunt), 627
Spradau, M., and others : Anticoagulant Action of Fibrin Surfaces on Mammalian Blood, 1683
Spratt, H. Philip : The Birth of the Steamboat, *review* by A. W. Jones, 1626
Spray Damage in Barley : Varietal Resistance to (J. Desmond Hayes), 551
Spraying of Barley with 2,4-Dichlorophenoxyacetic Acid (E. L. Leafe), 621
Spraying (Residual House): Effect of, in the Plains on Anopheline Densities in Huts on the Pare Mountains (Dr. A. Smith), 198
Spread Eastwards of Haemoglobin C : The River Niger as a Barrier in the—a Survey of Haemoglobins in the Ibo (Dr. H. Lehmann and Dr. C. Nwokolo), 1587
'Spread F', and the Twinkling of Radio Stars : Sporadic *E*-Region Ionization, (Dr. D. F. Martyn), 1382
Spriggina floundersi : A New Fossil (M. F. Glaessner), 1782
Springell, P. H. (Rogers, Dr. G. E., and) : Amino-acid Metabolism in Wool Roots, 993
Springer, Dr. George F. (edited by) : Polysaccharides in Biology—Transactions of the Second Josiah Macy Jr. Foundation Conference (Princeton, 1956), *review* by Prof. M. Stacey, 1219
Spurny, Zd. : A Spectrophotometric Method for the Determination of Chlorine, 1390
Spurrier, Wilma A., and others : Oral Induction of Leukaemia in Mice, 1816
Sputnik 3 (1958 δ2): A Type of Variation of the Signal Strength from (Ludwik Liszka), 1383
  Diurnal Lapse of Signals from (G. H. Munro), 1549
Spuzić, I. (Medaković, M., and) : 5-Hydroxytryptamine in Blood during Experimental Traumatic Shock in Rats, 1685
Squassi, F. : Presented with a Gold Medal of the Institut Français des Combustibles et de l'Energie, 151
Squid Axon Membrane: Excitation of the, in Isosmotic Potassium Chloride (Dr. John W. Moore), 265
Squid and Octopus : Lumi- and Meta-Rhodopsins of (Action of Light on Visual Pigments), (Dr. Allen Kropf, Paul K. Brown and Dr. Ruth Hubbard), 466
Squirrels (Ground) : Aortic Medial Calcification and Lowered Metabolism in (Dr. George R. Zimmerman and Prof. G. Edgar Folk, jun.), 754
Srinivas, Prof. M. N. (edited by) : Method in Social Anthropology (Prof. A. R. Radcliffe-Brown), *review* by Dr. Kenneth Little, 70
Srivastava, Dr. S. S., and Puri, Dr. D. D. : Microwave Dielectric Properties of Indian Shellac in the 8-mm. Range, 37
St. Cyr, Lewis (Colton, Dr. Ervin, and): Solution of Iodine in Phosphorus (III) *Iso*cyanate, 1042
St. John's College, Cambridge : Election to the Kenneth Craik Research Award, 18
Stability of Cholinesterase of the Electric Eel (J. F. Scaife), 541
Stability of Soil Crumbs (Dr. W. W. Emerson), 538
Stability of Stone Polygons in North Wales (John H. Tallis and Dr. K. A. Kershaw), 485
Stability (Configurational), of Deoxyribonucleic Acids : Dependence on Composition of the (Heterogeneity of Deoxyribonucleic Acids, I), (Dr. Julius Marmur and Prof. Paul Doty), 1427
Stable Configuration of Methyl Groups in Dimethyl Ether (Katsumi Kimura and Masaji Kubo), 533
Stable Equilibrium at a Sex-linked Locus (S. P. H. Mandel), 1347
Stable L *Proteus* P 18 growing in Hypertonic Liquid Medium : Oxygen Consumption of Different Forms of (Prof. P. Mandel, T. Terranova, M. Sensenbrenner and F. Feo), 194
Stacey, Dr. F. D. (Scott, P. M., and) : Magnetostriction and Palaeomagnetism of Igneous Rocks, 384
Stacey, Dr. F. D., and Lovering, Dr. J. F. : Natural Magnetic Moments of Two Chondritic Meteorites, 529
Stacey, Prof. M. : Carbohydrates Complete, *review*, 1079
  Topics in Carbohydrate Chemistry, *review*, 1219
Stacey, Prof. M., and others : Effects of Gamma-Radiation on some Carbohydrates, Hydroxyacids and Amino-acids in Aqueous Solutions, 376
  A New General Route to Aromatic Fluorocarbons, 588
Stafford, Anne (Rand, M., and) : Effect of the Rate of Elimination of Digoxigenin in the Guinea Pig on the Determination of its Lethal Dose, 688
Stafford, R. S. : Awarded the British Gold Medal for Aeronautics of the Royal Aeronautical Society, 1648
Stage (Perfect), of *Keratinomyces ajelloi* (Christine O. Dawson and J. C. Gentles), 1345
Staining (Selective), of Visceral Efferents in the Rat Brain Stem by a Modified Koelle Technique (Dr. P. R. Lewis and Dr. C. C. D. Shute), 1743
Staining Reactions for Mast Cells : Differences in Mechanism in (Dr. Harold M. Fullmer), 1274
Stainsby; Dr. G. : At the sixteenth meeting of the Research Panel of the British Gelatine and Glue Research Association (Some Factors influencing the Melting of Gelatin Gels), 440
Stainsby, Dr. G. (Courts, Dr. A., and) : At the sixteenth meeting of the Research Panel of the British Gelatine and Glue Research Association (Solubilized Collagen), 440
Stakman, Dr. E. C. : Wheat Genetics, 26
Stalk-rotting Fungi : An Antifungal Substance in the Corn Plant and its Effect on Growth of Two (N. J. Whitney and C. G. Mortimore), 341
Ställberg-Stenhagen, Dr. S., and others : Structure of Phthiocerol, 1117
Stamp, Prof. L. Dudley : Scientific Basis of Land Planning in the Tropics, 20
Standard of Frequency : Canadian Caesium-Beam (S. N. Kalra, R. Bailey and H. Daams), 575
Standard Rations in the Tropics : A Possible Vitamin E Deficiency occurring in a Herd of Pigs fed (W. J. A. Payne), 828
Standard Substances in Detergent Chemistry : Some Alkyl-Aryl Sodium Sulphonates as (E. Q. Laws and W. Hancock), 1473
Standards of Radioactivity : Preparation, Maintenance and Application of (W. B. Mann and H. H. Seliger), 1023
Standards, United States National Bureau of : Circular No. 594, Preparation, Maintenance and Applications of Standards of Radioactivity. (W. B. Mann and H. H. Seliger), 1023
Standards (International), for Drinking Water (United Nations : World Health Organization), 867
Standards Institution, British : B.S. 3044, Anatomical, Physiological and Anthropometric Principles in the Design of Office Chairs and Tables (Dr. W. F. Floyd and Dr. D. F. Roberts), 1022
Standen, H. (Bradbury, Dr. F. R., and) : Metabolism of Benzene Hexachloride by Resistant Houseflies *Musca domestica*, 983
Standen, Dr. O. D. : Chemotherapy of Parasitic Diseases (Experimental Chemotherapy of Helminthiases), 1029
Stanier, Prof. R. Y. (Doudoroff, Prof. M., and) : Role of Poly-β-Hydroxybutyric Acid in the Assimilation of Organic Carbon by Bacteria, 1440
Stanley, R. C. : Etch Pits on Calcite Cleavage Faces, 1548
Stant, Dr. M. Y. : Experimental Approaches to the Problems of Growth and Form in Plants (Some Growth Responses to Gibberellic Acid), 585
Stanton, Elizabeth K., and others : Distribution of Kappa-Casein in Skim Milk, 616
Stanton, W. R., and others : A Chemical Basis for the Classification of Glume Colour in Nigerian Cultivated Sorghums, 807
Staphylococcal Antibody in Human Serum : Measurement of a, by a Mouse Protection Test (Dr. Myron W. Fisher), 1692
Starch Convention : International (German Cereal Research Station, Detmold), 510
Starch-gel Electrophoresis : Demonstration of Small Components in Red Cell Haemolysates by (Dr. Phaedon Fessas and N. Mastrokalos), 1261
Starch Gel Electrophoresis Studies on Abnormal Proteins in Myeloma and Macroglobulinaemia (Dr. J. M. Fine and Dr. R. Creyssel), 392
Starck, Prof. Dietrich : Elected a member of the Anatomy Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Stárka, J. (Blumauerová, M., and) : Reversal of Antibiotic Action of Cycloheximide (Actidione), by Bivalent Metal Ions, 261
Starr, Prof. Mortimer P. (Kilgore, Wendell W., and) : Uronate Oxidation by Phytopathogenic Pseudomonads, 1412
Starr, Prof. Mortimer P. (edited by Clifton, Charles E., in association with Raffel, Sidney, and) : Annual Review of Microbiology, Vol. 12, *review*, 1219
Starr, Dr. Theodore J., and Pollard, Dr. Morris : Complement Fixation with Tissue Culture and Liver Antigens of Mouse Hepatitis, 1690
Stars (Radio) : Sporadic *E*-Region Ionization, 'Spread F', and the Twinkling of (Dr. D. F. Martyn), 1382
Starvation (Intermittent) : Liver Hexokinase Activity in Rats adapted to (Dr. R. Petrásek), 329
Starvation and Diphenylamine: Effects of, on Carotenoids in *Phycomyces* (T. N. R. Varma, Prof. C. O. Chichester and G. Mackinney), 188
State of Copper in Fungal Laccase : An Electron Spin Resonance Study of the (Dr. Bo G. Malmström, Dr. Rolf Mosbach and Dr. Tore Vänngård), 321
State' ('The Welfare) : Essays on (Prof. Richard M. Titmuss), *review* by M. P. Hall, 1147
Statements about Smoking Habits : The Reliability of (G. F. Todd and J. T. Laws), (Tobacco Manufacturers Standing Committee Research Paper No. 2), 932
Statistical Review of England and Wales for 1956 : Commentary Volume on the (Registrar General), 1093
Statistics : Defence, 1959-60 (White Paper on), 1483
  Fishery (Food and Agriculture Organization of the United Nations, the International Commission for the North West Atlantic Fisheries and the International Council for the Exploration of the Sea International Conference on), 1783

Statistics (Bose—Einstein), and Helium Films (A. D. Singh and R. K. Pathria), 668
Statistics and Computational Methods : Scholarships in Mathematics for Courses in (London School of Economics and Political Science), 85
Steam Cycles for Nuclear Power Plant (W. R. Wootton), *review* by R. Vaux, 1149
Steam Tables : Polynomial Representation of (W. G. Berry, G. Black and J. A. Enderby), 598
Steamboat : The Birth of the (H. Philip Spratt), *review* by A. W. Jones, 1626
Steamboats : Early, *review* by A. W. Jones, 1626
Stebbens, A. E., and Shreir, Dr. L. L. : Refractive Index of Uranium Oxide produced by Anodic Oxidation, 1113
Stedman, Dr. E. : Chemistry of the Steroids, *review*, 636
Steel (12 per cent Chromium) : A New Silicide in a (H. Hughes), 1543
Steel (Iron and) : Principles underlying the Manufacture of (Exhibition at the Science Museum, London), 293
Steel Industry : The Development of the (Political and Economic Planning, Broadsheet No. 428), 222
Steele, R., and others : Mechanism of Action of Insulin, 1123
Steels (Plain Carbon) : Structure of Scale on (Dr. S. Garber), 1387
Steichele, D., and others : Anticoagulant Action of Fibrin Surfaces on Mammalian Blood, 1683
Stein, Peter (Wodzicki, Kazimierz, and) : Migration and Dispersal of New Zealand Gannets, 1790
Stein, Dr. W. D. : Elected to a Junior Fellowship by the Beit Memorial Trust, 1569
Steinberg, Dr. Daniel : Radioassay of Aqueous Solutions mixed with Solid Crystalline Fluors, 1253
Steinbuch, Dr. M., and Quentin, M. : Preparation of Ceruloplasmin, 323
Stenberg, E., and others : Borides and Silicides of the Platinum Metals, 1318
Stenhagen, Prof. E., and others : Structure of Phthiocerol, 1117
Steno, Nicolaus (Niels Stensen) : The Earliest Geological Treatise (1667), translated from 'Canis Carchariae Dissectum Caput' with introduction and notes by Dr. Axel Garboe, *review* by Prof. L. Hawkes, 1487
Stephens, Dr. R. W. B. : Relaxation Processes (Relaxation Times in Energy Transfer in Gases), 584
Stephenson, John L., and others : Use of Katharometers in Gas Chromatography, 1322
Stereophonic Sound Recording, Reproduction and Broadcasting (Institution of Electrical Engineers Convention on), 1720
Stereospecific Polymers and Block and Graft Co-polymers (Bradford Institute of Technology Course on), 224
Steric Course of Hydrogenation of a Cyclic Allylic Alcohol : Effect of Alkali Salts on the (M. C. Dart and Prof. H. B. Henbest), 817
Sterile Culture of Roots : A Technique for the (Dr. N. S. Cohn and Dr. T. Merz), 412
Sterility in Bulls : A Rare Sperm Abnormality—'Corkscrew-sperms' associated with (Dr. Erik Blom), 1280
Sterilization : Disinfection and (G. Sykes), *review* by Dr. A. M. Cook, 277
Sterilizing Doses of Gamma-radiation : Differential Response of Male and Female Adults of *Trogoderma granarium* Everts towards (G. C. Carney), 338
Stern, Prof. Curt : Colour-blindness in Klinefelter's Syndrome, 1452
  Evolution of Genetic Systems, *review*, 1553
Sternberg, Dr. H. W. : Co-ordination Chemistry (Experimental Work on the Reactions of Acetylenes, etc., with Metal Carbonyls), 1785
Sternberg, Dr. H. W., and others : Behaviour of Dicobalt Octacarbonyl at Elevated Temperature and Carbon Monoxide Pressure, 457
Sternhoff, L. (Johansson, Prof. C. H., and) : Suppressed Light Emission of the Reaction Zone in Detonation, 247
Steroid Administration : Succinic Dehydrogenase Activity in Brain Tissue of Rats after Ovariectomy and (H. Sobel and B. Eckstein), 54
Steroids : Chemistry of the (Prof. Charles W. Shoppee), *review* by Dr. E. Stedman, 636
  Destruction of Cortisone and related, by Traces of Copper during Purification Procedures (Marvin L. Lewbart and Vernon R. Mattox), 820
  A New Method for the Microbiological Oxidation of (Dr. G. Wix and K. Albrecht), 1279
Sterzl, Dr. J. : Presence of Antigen—a Factor determining the Duration of Antibody Formation by Transferred Cells, 547
Steven, Dr. W. : Transferred from superintendent of the Development and Research Department Laboratory of the Mond Nickel Co., Ltd., Birmingham, to the Development and Research Division of the International Nickel Co., Inc., New York, as director of research, 1432 ; work of, 1432
Stevenson, Prof. F. J., and others : Release of Fixed Ammonium from Soil by Ball Milling, 1414
Stevenson, George S. (edited by) : Administrative Medicine—Transactions of the Fifth Conference, Princeton, 1956, *review* by Dr. G. A. Clark, 639
Stevenson, Dr. R. W. H., and Nettley, P. T. : Refractivity and Lattice Constant Ratios of Lithium-6- and Lithium-7-rich Fluorides, 1000
Stewart, Dr. C. P. (edited by Sobotka, Dr. Harry, and) : Advances in Clinical Chemistry, Vol. I, *review* by Prof. J. N. Davidson, 5
Stewart, D. F., and others : Antigenic Stimulus of Exsheathing Fluid in Self-Cure of Sheep infected with *Haemonchus contortus*, 553
Stewart, D. J. : Production of 5-Ketogluconic Acid by a Species of *Pseudomonas*, 1133
  The Phenylalanine Test on Kligler's Iron Agar for the Identification of *Proteus*, 1537
Stewart, D. Stenhouse, and 'Espinasse, Prof. Paul G. : Regeneration of the Lens of the Eye in the Rabbit, 1815
Stewart, Prof. F. H. : *Obituary* of Dr. Alexander M. Cockburn, 1017
Stewart, G. F. (edited by Mrak, E. M., and) : Advances in Food Research, Vol. 8, *review* by Dr. Magnus Pyke, 351
Stewart, G. T. : Liquid Crystals of Lipid in Normal and Atheromatous Tissue, 871
Stewart, J. C. C. : The Chapelcross Nuclear Power Station, 1361
Stewart, J. C. C., and Franklin, Dr. N. L. : Nuclear Fuel Cycles (The Operational Problem associated with Fuel Cycling), 1648
Stewart, Sarah, E., and others : Induction of Subcutaneous Nodules in Rabbits with the *SE* Polyoma Virus, 766
Steyn, Dr. W. : Ultrastructure of Pineal Eye Sensory Cells, 764
Stickland, A. C. (edited by) : Reports on Progress in Physics, Vol. 20 (1957), Vol. 21 (1958), (Physical Society), *review* by S. Weintroub, 138
Stickley, Dr. E. E. : The Medical Research Reactor at the Brookhaven Medical Research Center, 1013
Stiles, Prof. Walter : *Obituary* of Prof. E. J. Maskell, 219
  Plant Physiology in Czechoslovakia, 369
  Recent Developments in Plant Physiology, *review*, 1703
Stimulating Growth (Factors Inhibiting and), of *Mycobacteria* in the Blood and Serum of Non-Immunized and Immunized Animals (J. Hubáček and I. Málek), 187
Stimulation : Effect of Reduction of, on Consumption of Food, Intake of Water and Weight of Body in Rats (Dr. Karl Weiss and Harry M. B. Hurwitz), 344
Stimulus (Antigenic), of Exsheathing Fluid in Self-Cure of Sheep infected with *Haemonchus contortus* (E. J. L. Soulsby, R. I. Sommerville and D. F. Stewart), 553
Stimulus and Response Probability : Effects of Independent Variations in (P. M. A. Rabbit), 1212
Stirrer (Micro-) : A Simple (R. Morris), 201
Stizolobic Acid, a New Amino-Acid in *Stizolobium hassjoo* (Prof. S. Hattori and Dr. A. Komamine), 1116
Stizolobium hassjoo: Stizolobic Acid, a New Amino-Acid in (Prof. A. Hattori and Dr. A. Komamine), 1116
Stock, C. Chester, and others: Biological Activity of L-Tryptophan Esters, 116
Stokes, Brig. R. S. G. : Honorary membership of the Institution of Mining and Metallurgy conferred on, 1499
Stolk, Prof. A. : Inhibitory Effect of Colchicine upon the Transplantable Fibroma of the Skin in the Newt *Triturus taeniatus*, 555
  Development of Ovarial Teratomas in Viviparous Toothcarps by Pathological Parthenogenesis, 763
Stollery, J. L. : Troubled Waters, *review*, 421
Stolpe, C. v. d. (Kroon, D. J., and) : Structure of some Hydroxides and Hydrous Oxides—Positions of Protons in Aluminium Hydroxides derived from Proton Magnetic Resonance, 944
Stone, Robert S., and Moore, Prof. Dan H. : Purification of the Mouse Mammary Carcinoma Agent by means of a Fluorocarbon, 1275
Stone Age Cultures : Some South African (Dr. R. J. Mason), 377
Stone Polygons in North Wales : Stability of (John H. Tallis and Dr. K. A. Kershaw), 485
Stoneley, Dr. R. : Turbidity Currents, 658
Storage (Frozen) : Aggregation of Cod Myosin during (J. J. Connell), 664
Storage (Liver), of Pure α-, β-, γ- and δ-Tocopherols in the Growing Chick : Relative Rates of (T. W. Griffiths), 1061
Stored Apples : Control of Superficial Scald in (W. Hugh Smith), 760
Stored Urine : Changes in Œstrogen Titre in (Y. A. Leon, R. D. Bulbrook and F. C. Greenwood), 189
Storey, G. C., and others : Interfacial Phenomena (Work of the J. Lucas Research Group on Electro-deposition), 1098
Storm-Time Increase of Cosmic-Ray Intensity (Prof. Sekiko Yoshida and Masami Wada), 381
Stott, J. B. : The Nature of Coal (Effects of Evaporation on the Early Stage of Spontaneous Combustion of Coal), 1438
Stott, R. W. : Electronic Theory and Chemical Reactions, fourth edition, *review* by Dr. R. I. Reed, 968
Stover, R. H. : Vascular Wilt Disease of Bananas caused by *Fusarium oxysporum* f. *cubense*, 1782
Stowe School : An Account of the Birds of Stowe, 1718
Stowers, A. : *Obituary* of L. E. Harris, 1639
Strain (An Unusual), of *Escherichia coli* in Septicaemia as an example of the Transformative Effect of Symbiosis (Dr. R. Reitler, M. Teicher and Dr. A. Valero), 339
Strain Differentiation in a Root-infecting Fungus (Dr. Ida Levisohn), 1065
Strains of *Azotobacter* : Production of Acid from Arabinose and Xylose by (Vagn Jensen), 1536
Strains (Asian), of Influenza Virus : New Inhibitor and Erythrocyte Receptor Substances for certain (Gy. Takátsy and K. Barb), 52
Strains (Selected), of *Rhizobium japonicum* :. Responses of Seedlings to Extracts of Soybean Nodules bearing (Herbert W. Johnson, Ura M. Means and Francis E. Clark), 308
Stranks, D. R., and Weston, G. J. : Co-ordination Chemistry (Mechanisms of the Photochemical Reactions of Complex Ions), 1784
Stratigraphic Succession (Pre-Tertiary), in Malaya (Geology and Palaeontology in Malaya), (J. B. Alexander), 230
Stratton, David : Awarded the Back Grant of the Royal Geographical Society, 292
Stratton, Dr. F. : Blood Groups in Man, *review*, 280
Strawberry : Effect of Gibberellic Acid on Length and Number of Epidermal Cells in Petioles of (C. G. Guttridge and P. A. Thompson), 197
Streamline to Turbulent Flow : Variations in the Value of Reynolds Number at the Transition from (Dr. P. J. Isaac, I. B. Williams and Dr. W. M. Jones), 531
Street, Prof. H. E. : *Obituary* of Prof. Florence A. Mockeridge, 150
Street, Prof. H. E. (Morgan, D. R., and) : Respiration of Excised Tomato Roots, 1023
Strength (Fatigue), of Notched Specimens : Improvement of the, by Artificially Induced Residual Stresses (T. R. Gurney), 883
Strength (Tensile), of Asbestos (R. Zukowski and Dr. R. Gaze), 35
Strengthening American Science : A Statement by the President, and—a Report of the President's Science Advisory Committee, 1215
Streptococci (Group *A* and 'Human *C*') : Biochemical Differentiation of (R. W. Henningson), 182
Streptomyces sp. : Effect of Lytic Enzyme from *Bacillus circulans* and Chitinase from, on *Aspergillus oryzae* (Koki Horikoshi and Dr. Shigeji Iida), 186
Streptomycin : Effect of, on the Incorporation of Amino-Acids labelled with Carbon-14 into Ribonucleic Acid and Protein in a Cell-free System of a *Mycobacterium* (T. Erdös and Agnes Ullmann), 618
Stress : Target Organ Activation by (Prof. Jenö Kramár, Harry H. McCarthy Margarete Simay-Kramár and Anthony J. Carnazzo), 1522
Stress (Histamine) : Effect of Tranquillizing Agents on the Resistance o Rats to (Dr. Arthur M. Sackler, Dr. A. S. Weltman and Dr. Raymond R. Sackler), 896
Stress Activation of Adrenal Glomerulosa (Dr. M. Hill, K. Dvořák and M. Pospíšil), 1819
Stresses (Artificially Induced Residual) : Improvement of the Fatigue Strength of Notched Specimens by (T. R. Gurney), 883
Stretched Rubber : X-Ray Diffraction Measurement of Radiation Damage in (Wesley E. Shelberg and Lewis H. Gevantman), 456

Stretching Frequencies (Metal–Oxygen), in the Metal Chelate Compounds of β-Diketones (Kazuo Nakamoto, Paul J. McCarthy and Arthur E. Martell), 459
Strickler, Allen, and Gallaway, Dr. William S. : A New Method of Integration Recording, 1110
Stromnaes, Øistein : Sexual Maturity in *Drosophila*, 409
Strong, Dr. H. M. : Fusion Curve of Iron to 96,000 Atmospheres—Temperature of the Earth's Core, 1381
Strong, Dr. J. A. (Jacobs, Patricia A., and) : A Case of Human Intersexuality having a possible XXY Sex-determining Mechanism, 302
Strong Salt Solutions : Oxygen Equilibrium of Human Haemoglobin in (Prof. A. Rossi-Fanelli, E. Antonini and A. Caputo), 827
Strong Solar Flares : Observations of Intense Ionization of Long Duration below 50 km. Altitude after some (Dr. Bengt Hultqvist and Johannes Ortner), 1179
Strontium : Uptake of, by Pasture Plants and its Possible Significance in relation to the Fall-out of Strontium-90 (Dr. P. B. Vose and Dr. H. V Koontz), 1447 ; (Dr. R. Scott Russell and Dr. R. J. Garner), 1806
  X-Ray Spectrographic Determination of (J. T. Campbell and H. I. Shalgosky), 1481
Strontium in Animal Bone : Estimation of, using X-Ray Fluorescence Analysis (W. M. B. Roberts), 887
Strontium-90 : Separation of, from Calcium (P. S. Davis), 674
  Separation of, from Calcium in Milk (Dr. N. A. Myers), 1807
  Uptake of Strontium by Pasture Plants and its Possible Significance in relation to the Fall-out of (Dr. P. B. Vose and Dr. H. V. Koontz), 1447 ; (Dr. R. Scott Russell and Dr. R. V. Garner), 1806
Strontium (Radio-) : Bone and (Arne Engström, Rolf Björnerstedt, Carl-Johan Clemendson and Arne Nelson), *review* by J. Vennart, 965
Strontium and Yttrium (Radioactive), in the Tissues of the Rabbit's Eye : Differential Distribution of (R. H. Mole, Antoinette Pirie and Janet M. Vaughan), 802
Structural Chemistry of Promethium (M. Bruno and Prof. U. Croatto), 601
Structural Chromosome Changes : Induction of, by Visible Light (Dr. B. A. Kihlman), 976
Structural Control of Polymorphism in Micas (E. W. Radoslovich), 253
Structure : Nuclear (Dr. Leonard Eisenbud and Prof. Eugene P. Wigner), *review* by Prof. B. H. Flowers, 492
  Nuclear (Queen's University, Kingston, Ontario, and Atomic Energy of Canada, Ltd., International Conference on), 1571
  Nuclear—Proceedings of the Rehovoth Conference on, held at the Weizmann Institute of Science, Rehovoth, 1957, under the auspices of the International Union of Pure and Applied Physics (edited by Dr. H. J. Lipkin), *review* by Prof. B. H. Flowers, 709
Structure of an Acephaline Gregarine (*Apolocystis elongata*, Phillips and MacKinnon) : Observations by Electron Microscopy on the (Dr. D. Lacy and H. B. Miles), 1456
Structure of Anhydrous Sodium Soaps at High Temperatures (A. Skoulios and Dr. V. Luzzati), 1310
Structure of 'Cystine Disulphoxide' (B. J. Sweetman), 744
Structure of Dihydrodiphosphopyridine Nucleotide (Sidney Shifrin and Dr. Nathan O. Kaplan), 1529
Structure of the Free Methylene Radical : Spectrum and (Dr. G. Herzberg and J. Shoosmith), 1801
Structure of Glass (Prof. I. Náray-Szabó), 886
Structure of some Hydroxides and Hydrous Oxides—Binding of Water in some Hydroxides and Hydrous Oxides (Prof. O. Glemser), 943 ; Positions of Protons in Aluminium Hydroxides derived from Proton Magnetic Resonance (D. J. Kroon and C. v. d. Stolpe), 944
Structure of α-Keratin (Dr. R. D. B. Fraser, T. P. Macrae and Dr. G. E. Rogers), 592
Structure of Kish and other Graphites (Eitaro Matuyama), 670
Structure of Liquids : A Geometrical Approach to the (Prof. J. D. Bernal), 141
Structure of Malvalic Acid and some related C_{18} and C_{19} *Cyclo*propane Fatty Acids (Dr. B. Craven and Prof. G. A. Jeffrey), 676
Structure of Phthiocerol (Dr. M. Demarteau-Ginsburg, Dr. E. Lederer, Dr. R. Ryhage, Dr. S. Ställberg-Stenhagen and Prof. E. Stenhagen), 1117
Structure of Poliomyelitis Virus (J. T. Finch and Dr. A. Klug), 1709
Structure of the Public Library Service in England and Wales (Ministry of Education), 1289, 1437
Structure of Scale on Plain Carbon Steels (Dr. S. Garber), 1387
Structure (Collagen) : Possible Role of Water in (R. D. B. Fraser and T. P. Macrae), 179
Structure (Crystal), of Calcium Thymidylate (P. Horn, Dr. V. Luzzati and Dr. K. N. Trueblood), 880
Structure (Crystal), of Foshagite ($Ca_4Si_3O_9(OH)_2$), (Dr. J. A. Gard and Dr. H. F. W. Taylor), 171
Structure (Crystal), of β-Glycine (Dr. Yoichi Iitaka), 390
Structure (Galeal), in Adult Mosquitoes (Gordon Surtees), 971
Structure (Molecular), and Spectroscopy (Ohio State University Symposium on), 722
Structure (Motivation), and Measurement : Personality and (Prof. Raymond B. Cattell), *review* by Prof. M. D. Vernon, 140
Structure (Rotational), of the 3914 A. N_2^+ Band in Sunlit Aurorae (Dr. D. M. Hunten, H. J. Koenig and Prof. A. Vallance Jones), 453
Structure and Function of Genetic Elements (Twelfth Brookhaven Symposium in Biology), 1094
Structure and Mode of Action of the Contact γ-Aluminium Oxide/Platinum (Prof. Alfons Krause), 1615
Structures (Alicyclic), in Coals (S. Ergun and V. H. Tiensuu), 1668
Structures (Archaeological) : Denudation and Burial of (Formation by Section H of the British Association for the Advancement of Science of a special Committee to investigate the), 1233
Strutts and the Arkwrights, 1758-1830 : The—a Study of the Early Factory System (R. S. Fitton and A. P. Wadsworth), *review* by Prof. W. H. G. Armytage, 635
Struvite (Guanite) : Crystal Symmetry of (J. A. Bland and S. J. Basinski), 1385
Stuart (Herbert Ackroyd) Memorial Prize of the Royal Aeronautical Society awarded to A. A. Lombard, 1649
Stubbings, Dr. H. G. : Abnormal Development of the Basis in *Balanus emphitrite* var. *stutsburi* Darwin, 1282
Stubblefield, Dr. C. J. : Elected president of the Geological Society of London, 1502
Students : Admission of, to Universities, 1723
Students in Britain : Grants to (National Union of Students Memorandum on), 864
Students for Technical Experience, International Association for the Exchange of : Eleventh Annual Report, 85
  Report for 1957-58, 650
Students, National Union of : Memorandum on Grants to Students in Britain, 864
Students (Commonwealth), in Britain : Funds for, 793
Students (Graduate), and Research Workers: Notes on D.S.I.R. Grants for (Department of Scientific and Industrial Research), 650
Studentships : Research (Mr. and Mrs. John Jaffé Donation), awarded by the Royal Society to K. L. Manchester and to Dr. M. J. Whelan, 1365
Studentships (John Murray Travelling) in Oceanography and Limnology for 1959 awarded by the Royal Society to A. D. Ansell and to G. Evans, 1365
Studentships and Fellowships (NATO), 793
Studentships and Fellowships in Agricultural Research (Agricultural Research Council), 722
Studies : Anthropological, *review* by Dr. Kenneth Little, 70
  Population—Animal Ecology and Demography (Cold Spring Harbor Symposia on Quantitative Biology, Vol. 22), *review* by Dr. A. Milne, 1220
Studies in Indonesia, 1304
Studies in the Mathematical Theory of Inventory and Production (Kenneth J. Arrow, Samuel Karlin and Herbert Scarf), *review* by Dr. L. S. Goddard, 1557
Studies of Pilot Proficiency Measurement : Aviation Psychology in Western Europe and a Report on (Western-European Association for Aviation Psychology), 1092
Studies of the Shoot Apex: Use of Radioactive Tracers in (Dr. A. Booth, Dr. E. G. Cutter, Dr. S. N. Postlethwait, B. R. Voeller and Prof. P. F. Wareing), 1580
Studies (Academic) : The Scope of Physical Anthropology and its Place in—a Symposium held at the Ciba Foundation, 1957 (edited by D. F. Roberts and J. S. Weiner), *review* by Dr. Kenneth Little, 70
Studies (Bacterial Population), in the Chemostat, *review* by Dr. A. C. R. Dean, 424
Studies (Botanical) : Present Trends in, *review* by Prof. W. H. Pearsall, 1484
Studies (Diffusion and Extraction), across the Liquid–Liquid Interface : An Experimental Method for (Dr. Thomas W. Martin), 312
Studies (Experimental), of Perception, *review* by Prof. R. W. Pickford, 1625
Studies (Exploratory Physico-chemical), on the Sense of Taste (Dr. Aetius R. Lawrence and Lloyd N. Ferguson), 1469
Studies (Management) : Urwick Medal for (Polytechnic Management Association), 1643
Studies (Marine), in the Inshore Waters of Antarctica near Mawson, 1956 (Dr. J. S. Bunt), 1541
Studies (Meteorological and Ionospheric), in the Arctic, *review* by James Paton, 279
Studies (Recent), of Noise Problems (Acoustics Group of the Physical Society Symposium on), 438
Studies (Starch Gel Electrophoresis), on Abnormal Proteins in Myeloma and Macroglobulinaemia (Dr. J. M. Fine and Dr. R. Creyssels), 392
Studies (Systematic and Experimental), on Protozoal Blood Parasites of Egyptian Birds (Dr. A. H. Helmy Mohammed), *review* by Dr. Elizabeth U. Canning, 1081
Study of Adenovirus Antigens by Immunoelectrophoresis (Dr. H. G. Pereira, Dr. A. C. Allison and Dr. C. P. Farthing), 895
Study of Antibiotic Combinations : Application of Logarithms to the Base 2 in the Use of Exponential Dilution Series for the (H. J. Oskam and A. Koelman), 840
Study of the Aphididae (Homoptera) of East Africa (V. F. Eastop), *review* by Dr. W. J. Hall, 208
Study of Blackbirds (Dr. D. W. Snow), *review* by Dr. R. A. Hinde, 1767
Study of the Early Factory System : The Strutts and the Arkwrights, 1758-1830—a (R. S. Fitton and A. P. Wadsworth), *review* by Prof. W. H. G. Armytage, 635
Study of Earthquakes, *review* by Ernest Tillotson, 708
Study of Human Biology, Society for the : Symposium on Natural Selection in Man, 159
Study of Mental Images, Institute for the : Communications of the, Vol. 1, Part 1, and Vol. 1, Parts 2 and 3, Introduction to Parapsychology (C. C. L. Gregory and Anita Kohsen), 229
Study of Molecular and Atomic Motions in Solids and Liquids by Radio-frequency Methods (British Radio Frequency Spectroscopy Group and the Groupement AMPERE Joint Meeting on), 652
Study of Society : Darwinism and the (Scottish Branch of the British Sociological Association Conference to mark the Centenary of 'The Origin of Species'), 1562
Study (Advanced), in Science: Institutes for (NATO support for), 509
Study (Electron-Microscopic), of Finback Whale Myoglobin Crystals (D. Bradley), 941
Study (An Electron Spin Resonance), of the State of Copper in Fungal Laccase (Dr. Bo G. Malmström, Dr. Rolf Mosbach and Dr. Tore Vänngård), 321
Study (A Micrographic), of Wear of Graphite (Dr. Robert H. Savage), 315
Study Overseas : Grants for, 650
Studying the Mechanism of Surface Catalysis : A Chromatographic Technique for (Kenzi Tamaru), 319
Stylet (Rice) Nematode (*Tylenchorhynchus martini* Fielding, 1956) : Effect of Fatty Acid Mixtures on the (Dr. Titus M. Johnston), 1392
Subcutaneous Nodules in Rabbits : Induction of, with the *SE* Polyoma Virus (Dr. Bernice E. Eddy, Sarah E. Stewart, Ruth L. Kirschstein and Ralph D. Young), 766
Sublimation of Molybdenum Disulphide : Melting Point and (Dr. Peter Cannon), 1612
Submarine Defence Research, 1432
Submicroscopic Organization of Post-synaptic Membranes (Dr. B. Csillik), 1684
Subsequent Treatment with 'Freon' 113 : Bacteriophage Enrichment in a Liquid Two-Phase System with (Dr. G. Frick and Dr. P. Å. Albertsson), 1070
Substances : Weal and Flare in Human Skin produced by Histamine and other (Dr. A. Herxheimer and Dr. M. Schachter), 1510
Substances shown on Electron Micrographs : The Possibility of Distinguishing between (Dr. Robin C. Valentine), 761

Substances (Basic), as Synergists for Fat Antioxidants (H. S. Olcott and E. J. Kuta), 1812
Substitution in the Side-Chain : Effect of, on β-Oxidation of Aryloxyalkyl-carboxylic Acids by *Nocardia opaca* (D. M. Webley, R. B. Duff and V. C. Farmer), 748
Substrate for Non-Keratinolytic Fungi : Hair as a (Dr. D. M. Griffin), 1281
Sub-surface Return Flow (Southerly), below the Peru Current off the Chilean Coast : Relationship between the Hake Fishery and a (Dr. Wilhelm Brandhorst), 1832
Sub-surface Temperatures on the Moon (Prof. J. C. Jaeger), 1316 ; (Dr. J. H. Fremlin), 1317
Sub-Visual Aurorae and Radio Noise Bursts on 4·6 kc./s. : Simultaneous Occurrence of (R. A. Duncan and G. R. Ellis), 1618
Succession of Life through Geological Time (Dr. Kenneth P. Oakley and Helen M. Muir-Wood), third edition, *review*, 73
Successive Generations of Mice : Congenital Transmission of Toxoplasmosis through (Dr. J. K. A. Beverley), 1348
Succinic Dehydrogenase Activity in Brain Tissue of Rats after Ovariectomy and Steroid Administration (H. Sobel and B. Eckstein), 54
Sudanophilic Lipid in Sections of Mummified Tissue : Persistence of (Dr. A. T. Sandison), 196
Sudd, J. H. : Interaction between Ants on a Scent Trail, 1588
Sudiman, —: Humid Tropics Vegetation, 796
Sueoka, Dr. Noboru, and others : Heterogeneity in Deoxyribonucleic Acids, 2, Dependence of the Density of Deoxyribonucleic Acids on Guanine–Cytosine Content, 1429
Sugar Sulphates : Some Methods for the Purification of (Dr. J. R. Turvey and M. J. Clancy), 537
Sugars, Soluble in 80 per cent Ethanol, in Flax Seedlings : Effect of Boron Supply on the (T. F. Neales), 483
Sugars (Unfermentable), in Barley Mash fermented by the Amylo Process (Hideo Ono and Michio Dazai), 1055
Sugden, Dr. T. M. (Page, Dr. F. M., and) : Bond Energies of some Alkali Fluorides, 1672
Sulitzeanu, D., and others: Immunizing Properties of Insoluble Cell Material derived from *Brucella*, 1693
Sulkowski, Dr. E., and others : Activation of Amino-Acids in relation to the Synthesis of Silk Proteins, 397
Sullivan, Royal A., and others: Distribution of Kappa-Casein in Skim Milk, 616
Sullivan, W. H. : Replacement sheets for the Trilinear Chart of Nuclides (United States Atomic Energy Commission), 1719
Sulphate (Anhydrous Sodium) : Polymorphic Transitions in (Dr. C. N. R. Rao and L. V. Gregor), 1391
Sulphate (Dextran), labelled with Carbon-14 : Synthesis of, and Tracer Experiments in the Rat (Dr. H. Weigel and Dr. K. Walton), 981
Sulphate (Diethyl), and Labelled Sulphuric Acid : Exchange Reaction induced by Radiation between—a Possibly Ionic Reaction (Dr. Paul Y. Feng and Ahren Jacobson), 251
Sulphate (Inorganic) : Utilization of, by Baker's Yeast (Dr. A. Kleinzeller, A. Kotyk and L. Kováč), 1402
Sulphate (Quinine) : Ultra-violet Fluorescence of, for Detection of Phosphate Ester Spots on Paper (Dr. Edward S. Rorem), 1739
Sulphate Conjugation : Glucuronide and, *in vivo* and *in vitro* (K. H. Harper and G. Calcutt), 463
Sulphate Pattern (Ester), of Rabbit Bile (Dr. Harry Boström and Anders Vestermark), 1593
Sulphate Solutions (Ammonium) : A Rapid Method for determining the Concentration of (Dr. John A. Whitaker and Dr. Robert Hughes), 603
Sulphates (Hexosamine) : Chemical Synthesis of Hexose and (Dr. A. G. Lloyd), 109
Sulphates (Sugar) : Some Methods for the Purification of (Dr. J. R. Turvey and M. J. Clancy), 537
Sulphide (Polycrystalline Cadmium), and Polyethylene : Conductivity induced by Radiation in (C. G. Clayton, B. C. Haywood and Dr. J. F. Fowler). 1112
Sulphide (Zinc) : High-Temperature Oxidation of (Gordon S. G. Beveridge and Prof. Kenneth G. Denbigh), 106
Sulphobromophthalein : Metabolism of (G. M. Grodsky, J. V. Carbone and R. Fanska), 469
Sulphonates (Some Alkyl-Aryl Sodium), as Standard Substances in Detergent Chemistry (E. Q. Laws and W. Hancock), 1473
Sulphoxide (Dimethyl) : Prevention of Freezing Damage to Living Cells by (Dr. J. E. Lovelock and Dr. M. W. H. Bishop), 1394
Sulphur-35 : An Autoradiographic Method for distinguishing Samples labelled with Phosphorus-32 and (Dr. W. G. Duncombe), 319
Sulphur Compounds : Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in Salt Water, and the Possible Role of (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Sulphur Compounds boiling below 200°C. : Physical and Azeotropic Data —Hydrocarbons and (G. Claxton), *review* by Dr. B. A. Rose, 709
Sulphuric Acid (Labelled) : Exchange Reaction induced by Radiation between Diethyl Sulphate and—a Possibly Ionic Reaction (Dr. Paul Y. Feng and Ahren Jacobson), 251
Sulphydryl Content of Blood and Tissues : Amperometric Determination of (Dr. S. K. Bhattacharya), 1327
Sulphydryl Enzymes : Selenite as a Relatively Weak Inhibitor of some (Dr. Cho Ching Tsen and Prof. H. Bruce Collier), 1327
Sulphydryl Groups in Muscle : Effect of Insulin on (Dr. G. Ungar and Dr. S. Kadis), 49
Summer Courses of the International School of Physics of the Società Italiana di Fisica, 1368
Summer Laboratory Course (Annual), in Techniques and Applications of the Electron Microscope (Cornell University), 1094
Summerhayes, V. S. : How to Know Western Australian Wildflowers, *review*, 1628
Sun Phenomena (Low) : The Green Flash and other (D. J. K. O'Connell), *review* by James Paton, 423
Sundnes, Dr. G. : Gas Secretion in Coregonids, 986
Sunlit Aurorae : Rotational Structure of the 3914 A. N_2^+ Band in (Dr. D. M. Hunten, H. J. Koenig and Prof. A. Vallance Jones), 453
Sunner, Dr. S. : Chemistry and Quantum Chemistry, 158
Sunspot Group : A Large, 152
Supercontraction in Actomyosin : Proton Transfer and (Dr. F. G. E. Pautard), 1391
Super-Critical Speeds : Grinding at, in 'Ball' Mills (Dr. H. E. Rose and M. D. Trbojević), 813
Superficial Scald in Stored Apples : Control of (W. Hugh Smith), 760
Supply, Ministry of : Promotion of J. H. Phillips to Deputy Chief Scientific Officer and appointment to the headquarters post of director of Guided Weapons (Techniques), 648
  Appointment of Lewis Boddington to the rank of chief scientific officer, and director-general of Aircraft Research and Development (R.A.F.), 1231
Supply, Ministry of, and Central Office of Information : An Invitation to Science Graduates, 651
Support for Specimens in Powder Photographs : Use of Synthetic Quartz Crystals as a (Hitosi Hagihara, Shuji Yamashita and Akitsu Takeda), 1666
Support (Government), for Research in Water Supply, 1500
Suppressed Light Emission of the Reaction Zone in Detonation (Prof. C. H. Johansson and L. Sternhoff), 247
Supra-oesophageal Ganglion : Role of the, during the Early Stages of Caudal Regeneration in some Errant Polychaetes (Dr. R. B. Clark and M. E. Clark), 1834
Surface of *Amoebae* during Pinocytosis : Molecular Orientation at the (Ronald C. Rustad), 1058
Surface (Earth's) : Emissivity of the (J. T. Houghton), 367
Surface (Graphite) : Wear of, by Punching and Planing (Dr. Robert H. Savage), 454
Surface-Active Agents (Anionic) : Decomposition of, by Soil Bacteria (Dr. F. A. Skinner), 548
Surface Catalysis : A Chromatographic Technique for Studying the Mechanism of (Kenzi Tamaru), 319
Surface Charges produced on Insulators by Short- and Long-time Ionization (Dr. Stanley I. Reynolds), 671
Surfaces (Fibrin) : Anticoagulant Action of, on Mammalian Blood (Dr. A. L. Copley, D. Steichele, M. Spradau and R. S. Thorley), 1683
Surfaces (Mica) : Adhesion and Ion-Exchange between (George L. Gaines, jun.), 1109
Surfaces (Sodium Chloride) : Slip Sources on (Z. Morlin), 1319
Surgeons, Royal College of : Gift of £150,000 from G. A. Vandervell for the endowment of a chair of pharmacology, 16
  To establish a sub-department of Biochemistry in the Department of Physiology, 579
  Activity in the, 1232
Surmise and Fact on the Nature of Cancer (Dr. Peyton Rous), 1357
Surtees, Gordon : Influence of Larval Population Density on Fluctuation in Mosquito Numbers, 269
  Galeal Structure in Adult Mosquitoes, 971
Survey of Polymers (Oil and Colour Chemists' Association Conference on), 652
Survey (Gravity), on the Kuttyaro Caldera by means of a Worden Gravimeter (Prof. Izumi Yokoyama and Hirokazu Tajima), 739
Survey (A High-resolution), of the Andromeda Nebula at 408 Mc./s. (Dr. M. I. Large, D. S. Mathewson and C. G. T. Haslam), 1250
Survey (A High-Resolution), of the Coma Cluster of Galaxies at 408 Mc./s. (Dr. M. I. Large, D. S. Mathewson and C. G. T. Haslam), 1663
Surveys (Overseas), Directorate of : Gambia Land Use Map, Sheet 12/1, Janneh Kunda ; Gambia Land Use Map, Sheet 14/11, Mansa Konko, 20
Survival of Airborne Bacteria : Chloramphenicol and the (S. J. Webb), 1072
Survival (Long-term), of Irradiated Mice treated with Homologous Tissue Suspensions (Eric L. Simmons, Leon O. Jacobson, Edna K. Marks and Evelyn O. Gaston), 556
Survival (Prolonged), of *Trichomonas vaginalis* at —79°C. (Dr. M. G. McEntegart), 270
Survival Curve for Mammalian Cells irradiated *in vivo* (Dr. H. B. Hewitt and C. W. Wilson), 1060
Suspensions : Measurement of the Flocculation of (Dr. R. L. Whitmore), 313 ; (E. R. Braithwaite), 740
Sutcliffe, Dr. J. F., and Counter, E. R. : Absorption of Alkali Cations by Plant Tissue Cultures, 1513
Sutcliffe, R. C. (edited by) : Polar Atmosphere Symposium, Oslo, 1956, Meteorology Section, *review* by James Paton, 279
Sutherland, Dr. G. B. B. M. : Appointed to the Board of the College of Technologists, 1500
Sutherland, Dr. L. K. : Appointed chief of the new Division of Physical Chemistry of the C.S.I.R.O. Chemical Research Laboratories, 228 ; work of, 228
Sutton, Dr. D. A., and others : Reaction of some Silicates with Chelating Agents, 99, *erratum*, 1719
Suvatabandhu, Kasin : Humid Tropics Vegetation (Thailand Forests), 795
Suzuki, Kenshi, and Ono, Jóji : Biochemical Heterogeneity of the Ribonucleic Acid synthesized by *Escherichia coli B* after Irradiation with Ultra-violet Light, 395
Suzuki, Sho : Effects of Electron Bombardment upon Bromides of Cadmium and Silver, 1755
Suzuki, Prof. Tatuzi, and others : Effect of Morphine upon the Adrenal 17-Hydroxycorticosteroid Secretion in the Dog, 825
Swain, Dr. T. : Chemistry of Condensed Tannins (Methods for the Investigation of Complex Leucoanthocyanins), 1169
Swain, Dr. T. (Chandler, Dr. B. V., and) : Separation of Anthocyanins from Plant Extracts, 989
Swan, Dr. P. (Mather, K. B., and) : Nuclear Scattering, *review*, 639
Swanton, W. T., and others : Separation of *m*-Xylene and *p*-Xylene by Gas Chromatography, 107
Swedish Milk and Soil : Caesium-137 in (K. Löw and K. Edvarson), 1104
Swedish National Committee for Physics (University of Uppsala, in collaboration with the) : Fourth International Conference on Ionization Phenomena in Gases, 1164
Sweetman, B. J. : Structure of 'Cystine Disulphoxide', 744
Swelling of Clay–Water Systems (L. A. G. Aylmore and Dr. J. P. Quirk), 1752
Swelling of Isolated Mitochondria : Effect of Reduced Diphosphopyridine Nucleotide on the (Dr. G. Di Sabato), 997
  Effects of 2:4-Dinitrophenol and other Agents on the (Dr. J. B. Chappell and Dr. G. D. Greville), 1737
  Inhibition of Electron Transport and the (Dr. J. B. Chappell and Dr. G. D. Greville), 1525
Swiney Prize of the Royal Society of Arts awarded to Dr. Keith Simpson, 368

Swinton, Dr. W. E. : Fossil Amphibians and Reptiles, second edition, *review*, 73
  Fossil Birds, *review*, 73
Swiss Mice and Hamsters : A Cytopathogenic Agent from a Mammary Tumour in a *C3H* Mouse that produces Tumours in (Dr. E. A. McCulloch, A. F. Howatson, L. Siminovitch, A. A. Axelrad and A. W. Ham), 1535
Sykes, G. : Disinfection and Sterilization, *review* by Dr. A. M. Cook, 277
Sykes, J. (Dagley, Dr. S., and) : Effect of Drugs upon Components of Bacterial Cytoplasm, 1608
Sykes, Dr. P. H. : Hydrogen Liquefaction and Associated Techniques, 1504
Sylvester-Bradley, Prof. P. C. : Appointed to the chair of geology in the University of Leicester, 1230 ; work of, 1230
Symbiosis : An Unusual Strain of *Escherichia coli* in Septicaemia as an example of the Transformative Effect of (Dr. R. Reitler, M. Teicher and Dr. A. Valero), 339
Symbiotic Nitrogen Fixation : Temperature and (D. R. Meyer and A. J. Anderson), 61
Symmetry (Crystal), of Struvite (Guanite), (J. A. Bland and S. J. Basinski), 1385
Symmetry (Molecular), in *Cyclo*pentadienyl Thallium and some related Substances from their Microwave Spectra (J. K. Tyler, A. P. Cox and Dr. J. Sheridan), 1182
Symonds, Rev. H. H. : *Obituary* by Sir Herbert Griffin, 930
Sympathomimetic Agent (Methoxamine Hydrochloride) : Effect of a, on Growth of Hair in the House Mouse (*Mus musculus*), (F. Cockrem), 614
Synaptic Contacts on Dendrite Spines of the Cerebral Cortex : Electron Microscopy of (Dr. E. G. Gray), 1592
Syndrome (Acute Radiation), in the Plaice : Leucocytosis in Response to Bacteraemia as a Feature of the (A. Preston), 832
Syndrome (Klinefelter's) : Colour-blindness in (Prof. Curt Stern), 1452
Synergistic Effect of Zinc and Gibberellin (Dr, John Dancer), 901
Synergists for Fat Antioxidants : Basic Substances as (H. S. Olcott and E. J. Kuta), 1812
Synovial Fluid (Rheumatoid) : Colloid Osmotic Pressure on (Paavo Mākinen and Eino Kulonen), 475
Synovial Pathology : Entropy and (D. P. Page Thomas and J. T. Dingle), 543
Synthesis of Adenylosuccinic Acid in Preparations of Mammalian Skeletal Muscle (C. L. Davey), 995
Synthesis of the Amino-Acids of Silk by *Bombyx mori :* Utilization of the Carboxyl Group of Glycine for the (Dr. S. Bricteux-Grégoire, W. G. Verly and Prof. M. Florkin), *erratum*, 294
Synthesis of Amylose by Potato *D*-Enzyme (Dr. Gwen J. Walker and Dr. W. J. Whelan), 46
Synthesis of Cellulose in Ethanol Extracts of *Acetobacter xylinum* (Dr. J. Ross Colvin), 1135
Synthesis of Colour Centres in Silica and their Thermoluminescence (J. R. Hensler), 672, *erratum*, 1434
Synthesis of Deoxyribonucleic Acid in *Bacillus cereus* growing synchronously out of Spores : Pattern of (Dr. I. Elizabeth Young and Prof. Philip C. Fitz-James), 372
Synthesis of Deoxyribonucleic Acid during the Division Cycle of Bacteria (M. Schaechter, M. W. Bentzon and Prof. O. Maaløe), 1207
Synthesis of Deoxyribonucleic Acid by Phage-infected *Escherichia coli* in the Presence of Mitomycin *C* (Dr. Matsuo Sekiguchi and Dr. Yasuyuki Takagi), 1134
Synthesis of Dextran Sulphate labelled with Carbon-14 and Tracer Experiments in the Rat (Dr. H. Weigel and Dr. K. Walton), 981
Synthesis of Hexosamine by Rachitic Rat Cartilage : Influence of Vitamin D on (P. K. Dikshit), 334
Synthesis of DL- and L-Lombricine (Biochemistry of Lombricine), (Iva M. Beatty and Dr. D. I. Magrath), 591
Synthesis of Long-Chain Fatty Acids from 2-^{14}C-Acetate and ^{14}C-Glucose in *Trichoderma viride* (Dr. W. Mary Crombie and P. E. Ballance), 1195
Synthesis of Oxetanes : A Simple (L. F. Schmoyer and Prof. L. C. Case), 389
Synthesis of Oxytocin by the Nitrophenyl Ester Method (Dr. Miklos Bodanszky and Prof. Vincent du Vigneaud), 1324
Synthesis of Penicillin—6-Aminopenicillanic Acid in Penicillin Fermentation (F. R. Batchelor, F. P. Doyle, J. H. C. Nayler and Dr. G. N. Rolinson), 257
Synthesis of Peptides (Czechoslovak Academy of Science International Symposium on), 152
Synthesis of Silk Proteins : Activation of Amino-Acids in relation to the (Prof. J. Heller, Dr. P. Szafrański and Dr. E. Sulkowski), 397
Synthesis (Adaptive), of Nitrate Reductase in Higher Plants (Dr. E. J. Hewitt and M. M. R. K. Afridi), 57
Synthesis (Chemical), of Hexose and Hexosamine Sulphates (Dr. A. G. Lloyd), 109
Synthesis (Human Haptoglobin) : Genetic Control of (Dr. A. C. Allison), 1312
Synthesis (*In vitro*), of the Crown-Gall Tumour-inducing Principle (Alan J. Thomas and Richard M. Klein), 113
Synthesis (Nucleic Acid), in Coleoptile Tissues : Relationship between Auxins and (B. B. Biswas and S. P. Sen), 1824
Synthesis (Peptide) : An Effect of Insulin on, independent of Glucose or Amino-Acid Transport (Prof. Ira G. Wool and Dr. M. E. Krahl), 1399
Synthesize Poly-β-hydroxybutyric Acid : A Group of Pseudomonads able to (M. B. Morris and J. B. Roberts), 1538
Synthesized (Newly) Deoxyribonucleic Acid in Dividing Chromosomes : Distribution of (Philip S. Woods and Marie U. Schairer), 303
Synthetic Activity of Polynucleotide Phosphorylase from Sperm (Prof. Anwar A. Hakim), 334
Synthetic Carbonatite Magma (Prof. P. J. Wyllie and O. F. Tuttle), 770
Synthetic Dyestuffs : Perkin Centenary, London—100 Years of, *review* by R. Brightman, 709
Synthetic High Polymers (Natural and) : The Effects of Ionizing Radiation on (Dr. Frank A. Bovey), *review* by Prof. C. E. H. Bawn, 637
Synthetic Media : Glutamine Metabolism of Normal and Malignant Cells cultivated in (Arthur E. Pasieka and Dr. Joseph F. Morgan), 1201
Synthetic Quartz Crystals (Western Electric Company and the Bell Telephone Laboratories), 294
  Use of, as a Support for Specimens in Powder Photographs (Hitosi Hagihara, Shuji Yamashita and Akitsu Takeda), 1666
Synthetic Rubbers (Natural and) : Chemistry of (Prof. Harry L. Fisher), *review* by Dr. W. J. S. Naunton, 779
Syrett, J. J. : Nuclear Reactor Theory, *review* by R. Vaux, 1149
Syrett, J. J. (Rose, Dr. H., and) : Nuclear Fuel Cycles (Long-term Reactivity Changes), 1646
Syrett, P. J. (Walker, Janet R., and) : Effect of Heavy Water on the Growth of *Chlorella vulgaris*, 1193
Syrian Hamster : Genetic Independence of Four Mutants in the (Roy Robinson), 125
Systema Helminthum (Prof. Satyu Yamaguti), Vol. I, The Digenetic Trematodes of Vertebrates, *review* by Dr. Ben Dawes, 957
'Systema Naturae' by Linnaeus : Centenary of the formulation of the Theory of Evolution by Charles Darwin and Alfred Russel Wallace and the Bicentenary of the publication of the tenth edition of (Congress in Singapore to celebrate the), 723
Systematic and Experimental Studies on Protozoal Blood Parasites of Egyptian Birds (Dr. A. H. Helmy Mohammed), *review* by Dr. Elizabeth U. Canning, 1081
Systematics of North American *Daphnia* (Dr. John Langdon Brooks), 93
Système du Monde (Prof. Pierre Duhem), Tome 8, Histoire des Doctrines Cosmologiques de Platon à Copernic, *review* by Prof. E. J. Dijksterhuis, 964
Systemic Tuberculin Reaction in Rabbits : Demonstration of Endogenous Pyrogen in Serum during (Dr. J. Johanovsky), 693
Systems : Evolutionary—Animal and Human (Prof. C. H. Waddington), 1634
Systems (Genetic) : Evolution of (Prof. C. D. Darlington), second edition, *review* by Prof. Curt Stern, 1553
Systems (Living) : Self-regulation in (National Research Council of Canada Symposium on), 370
Systems (Modern), for Detecting and Evaluating Optical Radiation (International Commission for Optics Symposium on), 1571
Szabo, L. (Olesen, P. E., and) : Crystallization of Gramicidin, 749
Szafrański, Dr. P., and others : Activation of Amino-acids in relation to the Synthesis of Silk Proteins, 397
Szczepkowski, Tadeusz W. (Skarzyński, Dr. Boleslaw, and) : Oxidation of Thiosulphate by *Thiobacillus thioparus*, 1413
Szentlermai, A., and others : Inhibitory Action of Amino-Acid Esters on the Production of Extracellular Amylase by *Penicillium chrysogenum*, 477

TABLES (Office Chairs and) : Anatomical, Physiological and Anthropometric Principles in the Design of (Dr. W. F. Floyd and Dr. D. F. Roberts), 1022
Tables (Steam) : Polynomial Representation of (W. G. Berry, G. Black and J. A. Enderby), 598
Tagawa, Kunio, and others : Peroxidases from Wheat Germ, 111
Taguchi, T., and others : Selective Inhibition of Formation of Deoxyribonucleic Acid in *Escherichia coli* by Mitomycin *C*, 1056
Tail Tendon (Rat) : Effect of Cross-linking by Formaldehyde on the Contraction–Relaxation of (Dr. Harry R. Elden), 332
  Elongation of, on Hydration (Dr. Harry R. Elden), 1681
Tait, the late David (edited by Middleton, John, and) : Tribes without Rulers—Studies in African Segmentary Systems, *review* by Prof. M. Forte, 1006
Tait, Dr. J. F. : Elected a Fellow of the Royal Society, 861
Tait, Dr. J. S. : Appointed to the Board of the College of Technologists, 1500
Tait, S. A. S. : Elected a Fellow of the Royal Society, 861
Tajima, Hirokazu (Yokoyama, Prof. Izumi, and) : Gravity Survey on the Kuttyaro Caldera by means of a Worden Gravimeter, 739
Takagi, Dr. Yasuyuki (Sekiguchi, Dr. Mutsuo, and) : Synthesis of Deoxyribonucleic Acid by Phage-infected *Escherchia coli* in the Presence of Mitomycin *C*, 1134
Takátsy, Gy., and Barb, K. : New Inhibitor and Erythrocyte Receptor Substances for certain Asian Strains of Influenza Virus, 52
Takeda, Akitsu, and others : Use of Synthetic Quartz Crystals as a Support for Specimens in Powder Photographs, 1666
Talafant, Dr. E., and Továrek, J. : Factors affecting the Rate of Bilirubin Conjugation *in vitro*, 111
Talbot, W. H., and others : Pattern of Recurrent Conditioning of Spinal Reflexes, 824
Taljaard, J. J. : Antarctic Meteorology (Climatological Aspects), 1503
Tallis, Dr. J. H. : Experimental Approaches to the Problems of Growth and Form in Plants (Growth and Form of Mosses), 585
Tallis, Dr. John H., and Kershaw, Dr. K. A. : Stability of Stone Polygons in North Wales, 485
Tamaru, Kenzi : A Chromatographic Technique for Studying the Mechanism of Surface Catalysis, 319
Tanganyika Expedition : University of Oxford (B. E. Juniper), 726
Tanganyika (North-Eastern) : Relationship between Salinity and Breeding of *Anopheles gambiae* in (A. Smith and J. W. Vail), 1203
Tanner, C. S. : Appointed by the Department of Scientific and Industrial Research as a 'visitor' to the Water Research Association, 1500
Tannins (Condensed) : Chemistry of (Plant Phenolics Group Discussion on), 1168
Tapetum Lucidum in the Eye of a Lemur : Crystals of Riboflavin making up the (Antoinette Pirie), 985
Tarbell, Prof. Dean S. : Elected a member of the United States National Academy of Sciences, 1575
Target-Organ Activation by Stress (Prof. Jenö Kramár, Harry H. McCarthy, Margarete Simay-Kramár and Anthony J. Carnazzo), 1522
Tarlo, L. B. : Fossil Reptiles from the Panchet Beds of India, 912
Tarner Lectures delivered at Trinity College, Cambridge, 1956 (Prof. Erwin Schrödinger), *review* by Prof. W. H. McCrea, 1218
Tárnok, Iván, and Czanik, Pál : Malachite Green-reducing Enzyme in *Mycobacteria*, 549
Tartar Emetic : Effect of, on the Growth of Ammonium Dihydrogen Phosphate Crystals (Yutaka Kunisaki), 105
Taschner, Prof. E. : Synthesis of Peptides (Carboxyl Group Protection), 152
Taste : Exploratory Physico-chemical Studies on the Sense of (Dr. Aetius R. Lawrence and Lloyd N. Ferguson), 1469
  Has Water a Specific (Prof. Yngve Zotterman and Herman Diamant), 191
Taste in Monozygotic Twin Calves : Threshold Values for (Dr. F. R. Ball and H. L. Williams), 345

Tata, Dr. J. R. : Prealbumin as a Complex in the α-Globulin Fraction in Human Serum, 877
Elected to a fourth year Fellowship by the Beit Memorial Trust, 1569
Tata Institute of Fundamental Research : Monographs on Mathematics and Physics, No. 2, Tauberian Theorems (Prof. H. R. Pitt), *review* by Prof. T. A. A. Broadbent, 1626
Tata Memorial Trust : Grants, Scholarships and Fellowships for Research on Diseases of the Blood, 581
Tatlow, Prof. J. C. : Appointed to a new chair of organic chemistry in the University of Birmingham, 791 ; work of, 791
Tatlow, Prof. J. C., and others : Thermal Reactions of Highly Fluorinated *Cyclo*hexadienes, 586
A New General Route to Aromatic Fluorocarbons, 588
Tattersfield, Dr. F. : *Obituary* by Dr. C. Potter, 1778
Taube, Prof. Henry : Elected a member of the United States National Academy of Sciences, 1575
Co-ordination Chemistry (Mechanisms of Complex Ion Reactions in Solution), 1784
Tauber, G. M. : Antarctic Meteorology, 1503
Tauberian Analysis : Modern, *review* by Prof. T. A. A. Broadbent, 1626
Tauberian Theorems (Prof. H. R. Pitt), *review* by Prof. T. A. A. Broadbent, 1626
Taurine in Human Blood Platelets (Julian Frendo, Aleksander Koj and Jan M. Zgliczyński), 685
Tawab, Salah A., and others : Pharmacological and Toxicological Properties of 5-Benzylidenerhodanine, 607
Taxonomic Information : The Presentation of—a Short Guide for Contributors to Flora Europaea (Dr. V. H. Heywood), 721
Taylor, B. W., and Whyte, Dr. R. O. : Humid Tropics Vegetation (A 'Land-type' composed of 'Land-units' as an Exploitable Entity), 795
Taylor, Dr. C. A. : Instrument Encyclopedia, *review*, 1768
Taylor, Dr. C. A. (Lipson, Prof. H., and) : Fourier Transforms and X-Ray Diffraction, *review* by Dame Kathleen Lonsdale, 969
Taylor, Dr. D. W. : Effects of Deficiency of Pantothenic Acid on Oxygen Poisoning in the Rat, 257
Taylor, Dr. E. P., and others : A New Short-acting Thiobarbiturate, 1443, *erratum*, 1571
Taylor, Dr. E. Windle : Thirty-seventh Report of the Results of the Bacteriological, Chemical and Biological Examination of the London Waters for the Years 1955-56 (Metropolitan Water Board), 798
International Standards for Drinking Water, 867
Taylor (George) (of Australia) Gold Medal of the Royal Aeronautical Society awarded to H. L. Cox, 1648
Taylor, Dr. H. F. W. (Gard, Dr. J. A., and) : Crystal Structure of Foshagite ($Ca_4Si_3O_9(OH)_2$), 171
Taylor, James A. : Professional Meteorology and Everyday Needs, *review*, 3
Taylor, J. B. : Awarded a Harkness Fellowship for 1959 of the Commonwealth Fund, 1093
Taylor, John J., and Chessin, Prof. Meyer : Photochemical Reduction of Blue Tetrazolium by Isolated Chloroplasts, 626
Taylor, Sister Monica : Utilization of Nutritive Spheres in the *Proteus* Group of *Amoebae*, 1458
Taylor, Dr. T. H. C. : Appointed director of the Anti-Locust Research Centre, 1160 ; work of, 1160
Taylor, Dr. W. K. : The Mechanization of Thought Processes (Visual Pattern Recognition), 226
Tchoe, Yuong-Tchel, and Sibatani, Prof. A. : Effects of X- and Ultra-violet Irradiation on the Incorporation of Phosphorus-32 into Isolated Nuclei of Rabbit Appendix, 1334
Tea Plant : Nomenclature and Classification of the (Dr. W. Wight), 1726
Teachers, National Union of : National Education and Careers Exhibition, 794
Teaching in the Universities, 1623
Teaching of Chemistry (N. F. Newbury), second edition, *review* by Prof. M. J. S. Dewar, 566
Teaching Mathematics in Secondary Schools (Ministry of Education), *review* by W. J. Langford, 1076
Teaching (Science), in the Universities of the Commonwealth : General Trends in (Science Masters' Association Discussion on), 1571
Tebble, Dr. Norman : *Obituary* of Prof. Pierre Fauvel, 1016
Technetium : New Oxidation States of (J. E. Fergusson and Prof. R. S. Nyholm), 1039
Technetium and Rhenium : Lowest Oxidation States of (R. Colton, J. Dalziel, W. P. Griffith and Prof. G. Wilkinson), 1755
Technical Assistance (International Atomic Energy Agency), 864
Technical Aspects (Scientific and), of Health Physics in Atomic Installations (European Nuclear Energy Agency and the Danish Atomic Energy Commission Symposium on), 934
Technical Assistance under the Baghdad Pact, 1367
Technical Assistance Programmes of the International Co-operation Administration, 1163
Technical Books : Recent Scientific and, Supp. v, January 31 ; Supp. vi, February 28 ; Supp. vi, March 28 ; Supp. vi, April 25 ; Supp. vi, May 30 ; dcclxx, June 27
Technical Co-operation in Africa South of the Sahara, Commission for (Food and Agriculture Organization of the United Nations and the) : Technical Meeting on Legumes in Agriculture and Human Nutrition, 439
Technical Education Consultative Council, Scottish : Terms of reference, 1367
Technical Education (Scientific and) : Expansion of, 1763
Technical Exhibition of the Oil and Colour Chemists' Association: Eleventh, 438
Technical Experience, International Association for the Exchange of Students for : Eleventh Annual Report, 85
Report for 1957-58, 650
Technical Films used at the Geneva Conference on the Peaceful Uses of Atomic Energy (United States Atomic Energy Commission), 721
Technical Information Services : Regional, 1569
Technical University, Delft : Honorary degree of doctor of technical science conferred on Sir John Cockcroft, 154
Technical University (Middle East), Ankara : Approval of the charter, 1571
Technical Writing : Premiums for (Radio Industry Council Awards), 1023
Technicians : Science Laboratory (City and Guilds of London Institute and the Institute of Science Technology to rationalize the examinations and qualifications for), 863
Technics and Purpose : No. 5, On Being a Technologist (Prof. D. G. Christopherson) ; No. 6, The Educated Man Today and Tomorrow (Sir John Wolfenden), 1780
Technique : Modern Valve Design (English Electric Valve Co., Ltd., Exhibition of), 224
Technique for the Sterile Culture of Roots (Dr. N. S. Cohn and Dr. T. Merz), 412
Technique (A Chromatographic), for Studying the Mechanism of Surface Catalysis (Kenzi Tamaru), 319
Technique (Modified Koelle) : Selective Staining of Visceral Efferents in the Rat Brain Stem by a (Dr. P. R. Lewis and Dr. C. C. D. Shute), 1743
Techniques : Hydrogen Liquefaction and Associated (Low Temperature Group of the Physical Society Symposium on), 1504
Techniques (Electrical), in Medicine and Biology (American Institute of Electrical Engineers, the Institute of Radio Engineers and the Instrument Society of America twelfth Annual Conference on), 1434
Techniques (Ion-Exchange and Partition) : A Two-Dimensional Paper Chromatographic Method combining (C. S. Knight), 165
Techniques (New), in the Analysis of Noise and Vibration (Acoustics Group of the Physical Society and the Institute of Physics Symposium on), 438, 794
Techniques and Applications of the Electron Microscope (Cornell University Annual Summer Laboratory Course in), 1094
Technological Education in India, 85
Technological Man-power : Scientific and, 489
Technological Research (Scientific and), in Britain, 847
Technologist : On Being a (Prof. D. G. Christopherson), 1780
Technologists, College of : Creation of the, 1500
Appointments to the Board, 1500
Technologists : Early Textile, *review* by Prof. W. H. G. Armytage, 635
Technologists in the United States : Employment of Scientists and, 1028
Technologists (Instrument), and Control Engineers : Education of (J. F. Coales), 1433
Technology in the United States : Science and, 1215
Technology in the University of Bristol : Science and—Opening of Queen's Building (Prof. J. F. Baker), 217
Technology of Western Germany : The Council for Science and (Dr. J. Horne), 512
Technology : A History of (edited by Charles Singer, E. J. Holmyard, A. R. Hall and Trevor I. Williams, assisted by Y. Peel, J. R. Petty and M. Reeve), Vol. 4, The Industrial Revolution, *c.* 1750 to *c.* 1850, *review* by G. B. L. Wilson, 70
Management and (Joan Woodward), (Problems of Progress in Industry, 3), 300
National Lending Library for Science and, 16
Transistor (Members of the Technical Staff of Bell Telephone Laboratories), Vol. 1 (edited by H. E. Bridgers, J. H. Scaff and J. N. Shrive), Vol. 2 (edited by F. J. Biondi), *review* by Dr. J. R. Tillman, 72 ; Vol. 3, (edited by F. J. Biondi), *review* by Dr. J. R. Tillman, 1557
The Yard and the Pound (Avoirdupois) for Science and, 80
Technology, California Institute of : Grant of 73,594 dollars from the U.S. National Foundation to Dr. Renato Dulbecco, for investigations on virus inheritance in experiments involving polio virus mutations, 224
Grant of 33,943 dollars from the U.S. National Foundation to Prof. Linus Pauling, for investigations on the structure of nucleic acids, 224
Appointment of Dr. J. G. Bolton as first director of the newly established Radio Observatory, 506
Technology of the Industrial Revolution, *review* by G. B. L. Wilson, 70
Technology of Instrumentation (Prof. Eric B. Pearson), *review* by R. L. Grimsdale, 970
Technology of Printed Circuits (Dr. Paul Eisler), *review* by J. C. Cluley, 1487
Technology of Rubber : Science and, *review* by Dr. W. J. S. Naunton, 779
Technology of Transistors, *review* by Dr. J. R. Tillman, 72
Technology (Instrument), Society of : Presidential Address, Education of Instrument Technologists and Control Engineers (J. F. Coales), 1433
Technology (Nuclear), at the Imperial College of Science and Technology, 1091
Technology (Nuclear Science and), at the Royal Naval College, Greenwich, 791
Technology (Radioisotope) : Grants for Training in (United States Atomic Energy Commission), 1641
Technology and Distribution (Nutrition, Food and Beverage), 1936-56 ; Bibliography of Food—a Select International Bibliography of (E. Alan Baker and D. J. Foskett), *review* by Dr. Magnus Pyke, 351, 582
Teeth affected by Fluorine : Broadening of the X-Ray Diffraction Lines in (E. A. Scott and Dr. F. H. Scott), 479
Teicher, M., and others : An Unusual Strain of *Escherichia coli* in Septicaemia as an example of the Transformative Effect of Symbiosis, 339
Teixeira-Pinto, Dr. A. A. (Heller, Dr. John H., and) : A New Physical Method of Creating Chromosomal Aberrations, 905
Tekman, S., and others : Action of Nicotinamide on Acetoacetate Metabolism of Liver Homogenates of Normal and Alloxanized Rats, 184
Tektites : Chemical Composition of (Dr. Brian Mason), 254 ; (Prof. Harold C. Urey), 1114
Telecommunication : Economics of, *review* by Prof. Colin Cherry, 778
Telecommunication Economics (T. J. Morgan), *review* by Prof. Colin Cherry, 778
Teleosts : 'Chloride-Secretory' Cells in the Gills of (Gwyneth Parry, F. G. T. Holliday and J. H. S. Blaxter), 1248
Telescope (Multiple Geiger Counter) Measurements of the Directions of Air Shower Particles (Dr. D. H. Rathgeber), 386
Television : College Biology Courses on, 649
Prospects for (Political and Economic Planning, Broadsheet No. 427), 222
Television in Britain : Future of, 222
Television and the Child (Dr. Hilde T. Himmelweit, A. N. Oppenheim and Pamela Vince), *review*, 780
Television Engineering in Science, Industry and Broadcasting (British Institution of Radio Engineers Convention on), 1234
Television Exhibition : Industrial Photographic and (R. J. Hercock), 1721
Television Society : *Wireless World* Premium awarded to B. Overton, 1161
E. M. I. Premium awarded to Dr. R. Theile, 1161
Electronic Engineering Premium awarded to Dr. J. C. Parr, 1161
Pye Premium awarded to L. J. Griffen, 1161
Mervyn Premium awarded to K. H. Smith, 1161
Mullard Premium awarded to J. Polonsky, 1161

Telluride (Mono-) : Indium (H. C. Wright and J. C. Brice), 27
Tempany, Sir Harold, and Grist, D. H. : An Introduction to Tropical Agriculture, *review* by Prof. J. W. Purseglove, 966
Temperature : Influence of, on the Number of Vertebrae in Fish (Dr. Yasuo Itazawa), 1408
Temperature of the Earth's Core : Fusion Curve of Iron to 96,000 Atmospheres—(Dr. H. M. Strong), 1381
Temperature in Poultry Breast Muscles at Slaughter : Changes in *p*H and (F. E. Peters and J. W. Dodge), 687
Temperature Control of Physiological Dwarfing in Peach Seedlings (Prof. Bruce M. Pollock), 1687
Temperature and Light : Influence of, on Reproduction in Male Rats (F. A. Soliman and A. S. Abd-El-Malek), 266
Temperature and Symbiotic Nitrogen Fixation (D. R. Meyer and A. J. Anderson), 61
Temperature (Elevated) : Rapid Quantitative Horizontal Paper Chromatography at an—Determination of Aspartic and Glutamic Acids (Henry R. Roberts and Michael G. Kolor), 460
Temperature (Elevated), and Carbon Monoxide Pressure : Behaviour of Dicobalt Octacarbonyl at (Sol Metlin, Irving Wender and Heinz W. Sternberg), 457
Temperature (Environmental), and the Reptilian Nervous System (B. B. Boycott and Dr. R. W. Guillery), 62
Temperature (High-) Oxidation of Zinc Sulphide (Gordon S. G. Beveridge and Prof. Kenneth G. Denbigh), 106
Temperature (Low-) Chars : Smoke Emission of (W. N. Adams, A. F. Gaines, D. H. Gregory and G. J. Pitt), 33 ; (Prof. Morris W. Travers), 1321
Temperature (Low) Physics and Chemistry—Proceedings of the Fifth International Conference on Low Temperature Physics and Chemistry, Madison, 1957 (edited by Joseph R. Dillinger), *review* by Dr. K. Mendelssohn, 1150
Temperature (Low-) Specific Heats of Body-centred Cubic Chromium–Iron and Chromium–Manganese Alloys (C. T. Wei, C. H. Cheng and Prof. P. A. Beck), 315
Temperature (Room) : Splitting of the Electrophoretic Pattern of Serum Albumin during Short-term Action of Pepsin at (E. Annau), 190
Temperature (Upper Air), over the World (N. Goldie, J. G. Moore and E. E. Austin), 864
Temperatures : Atmospheric, 864
  Low, *review* by Dr. K. Mendelssohn, 1150
Temperatures (High) : Structure of Anhydrous Sodium Soaps at (A. Skoulios and Dr. V. Luzzati), 1310
Temperatures (Low): Deoxyribonucleic Acid Content of the Cell-Nuclei in the Adrenal Medulla after Exposure to (L. Leeman), 1188
Temperatures (Sub-surface), on the Moon (Prof. J. C. Jaeger), 1316 ; (Dr. J. H. Fremlin), 1317
Temple, Prof. G. : An Introduction to Fluid Dynamics, *review* by J. L. Stollery, 421
Temple, Lewis A., and others : Induction of Lung Tumours by Radioactive Particles, 408
Tendon (Rat Tail) : Effect of Cross-linking by Formaldehyde on the Contraction–Relaxation of (Dr. Harry R. Elden), 332
  Elongation of, on Hydration (Dr. Harry R. Elden), 1681
Tendon for Electron Microscopy : Improved Preservation of, through Wet Freeze-drying (Dr. David B. Scott and Marie U. Nylen), 1205
Tennent, Dr. R. M. : Cosmic-Ray Showers, *review*, 1555
Tensile Strength of Asbestos (R. Zukowski and Dr. R. Gaze), 35
Tension (Interfacial), between Water and Hydrocarbons : Effect of Low Concentrations of Alcohols on the (F. Franks and Dr. D. J. G. Ives), 316
Tension (Oxygen), in the Tissues of Mice cooled to 1°C. : Measurements of (Dr. D. B. Cater and Dr. L. Weiss), 1521
Teratomas (Ovarial), in Viviparous Toothcarps by Pathological Parthenogenesis : Development of (Prof. A. Stolk), 763
Terawaki, A., and others : Selective Inhibition of Formation of Deoxyribonucleic Acid in *Escherichia coli* by Mitomycin *C*, 1056
Term (New), for a Class of Biologically Active Substances : 'Pheromones', a (Dr. P. Karlson and Prof. M. Lüscher), 55
Termination of Dormancy in some Seeds : Effect of Gibberellin on the (Prof. Paavo Kallio and Pirkko Piiroinen), 1830
Terminology of Hormones (Dr. D. B. Carlisle and Dr. Penelope M. Jenkin), 336
Ternary Aluminium–Zinc–Magnesium Alloys : Fatigue Properties of (I. J. Polmear), 1388
Terranova, T., and others : Oxygen Consumption of Different Forms of Stable L *Proteus* P 18 growing in Hypertonic Liquid Medium, 194
Territories (Under-developed) : Research in the, 703
Tertiary (Late) Geomagnetic Field in Northwestern Canada (P. M. Du Bois), 1617
Test (A Critical), of Antigenic Relationships (Dr. J. G. Feinberg and Hazel Grayson), 987
Test (A Dose), for Irradiated Polyethylene (E. H. Cornish and D. M. Cutting), 1804
Test (Mouse Protection) : Measurement of a Staphylococcal Antibody in Human Serum by a (Dr. Myron W. Fisher), 1692
Test (The Phenylalanine), on Kligler's Iron Agar for the Identification of *Proteus* (D. J. Stewart), 1537
Test (A Possible Experimental), of Einstein's Second Postulate (Prof. Herbert Dingle), 1761
Test (Triaxial) : The Measurement of Soil Properties in the (Dr. Alan W. Bishop and D. J. Henkel), *review* by Thomas Whitaker, 1151
Test Service : Electrical Instrument (British Scientific Instrument Research Association), 436
Testicular Hyaluronidase : Bacterial and (Prof. Ernst Bárány, Lennart Berggren and Lennart Juhlin), 265
Testing : Errors caused by Partial Drying of Hardened Portland Cement during (Dr. K. M. Alexander), 885
  Gem (B. W. Anderson), sixth edition, *review* by Dr. W. Campbell Smith, 781
Testing Chemicals on Insects : Methods of (edited by Harold H. Shepard), Vol. 1, *review* by Dr. W. A. L. David, 352
Testing the Influence of Drugs and Physical Agents upon Mitosis : Method for (Prof. Elio Guido Rondanelli, Pasquale Gorini and Domenico Pecorari), 190
Testing Populations of Beet Eelworm, *Heterodera schachtii* Schmidt, for Resistance-breaking Biotypes, using the Wild Beet (*Beta patellaris* Moq.) as Indicator (Audrey M. Shepherd), 1141
Testis (Bovine), and Spermatic Vein Blood : Androgens in the (H. R. Lindner), 1605
Tests : Diagnostic Performance (Boris Semeonoff and Eric Trist), *review* by Prof. O. L. Zangwill, 1767
Tetraacetate (Ethylenediamine), and the Intestinal Absorption of Vitamin B_{12} (Dr. J. Abels, M. G. Woldring, H. O. Nieweg, J. G. Faber and J. A. de Vries), 1395
Tetra-co-ordination of Nickel (II)—some Complexes with *Cyclo*hexylphosphine (Dr. Aldo Turco, Dr. Vladimiro Scatturin and Dr. Giovanni Giacometti), 601
Tetragonia expansa: Tetragonin, a Yeast Growth-regulating Substance from (Anna P. Schiffer and András Kovács), 988
Tetragonin, a Yeast Growth-regulating Substance from *Tetragonia expansa* (Anna P. Schiffer and András Kovács), 988
Tetrahedral Co-ordination in Ni(II), (Dr. L. I. Katzin), 1672 ; (Prof. E. C. Lingafelter), 1673
Tetrahedron Letters, 1433
Tetrazolium (Blue) : Photochemical Reduction of, by Isolated Chloroplasts (John J. Taylor and Prof. Meyer Chessin), 626
Textile Institute : Cotton Industry War Memorial Trust Scholarship, 933
  Peter Coats Scholarship, 933
  Rowland Spencer Scholarship, 933
Textile Institute, in collaboration with the Branded Textiles Group : Conference on Detergents, Textiles and Dyes, 1236
Textile Technologists : Early, *review* by Prof. W. H. G. Armytage, 635
Textiles and Dyes : Detergents, (Textile Institute, in collaboration with the Branded Textiles Group Conference on), 1236
Thain, E. M., and others : Glutamic–Aspartic Transaminase of Pig Heart Muscle, 1187
Thallium (*Cyclo*pentadienyl) : Molecular Symmetry in, and some related Substances from their Microwave Spectra (J. K. Tyler, A. P. Cox and Dr. J. Sheridan), 1182
Thallous Azide : Absorption Spectra and Associated Photoconductivity of Pure and Decomposed Crystals of (B. L. Evans and A. D. Yoffe), 1241
Thapar, Dr. Romila : The Role of the Scholar in Society, 1773
Theile, Dr. R. : Awarded the E. M. I. Premium of the Television Society, 1161
Theis, Henry W. (Sankar, Prof. D. V. Siva, and) : Biosynthesis of Ovalbumin, 1057
Theobroma cacao L. : Nuclear Fusion and Non-Fusion in (M. C. Bennett and F. W. Cope), 1540
Theorell, Prof. A. H. T. : Elected a Foreign Member of the Royal Society, 1230, 1499 ; work of, 1499
Théorème de l'Energie utilisable : La Thermodynamique et le (R. Marchal), *review* by R. W. Haywood, 353
Theorems : Tauberian (Prof. H. R. Pitt), *review* by Prof. T. A. A. Broadbent, 1626
Theoretical Principles of Organic Chemistry (Prof. Walter Hüchel), Vol. 2, translated from the corrected seventh German edition by Prof. F. H. Rathmann, *review* by Dr. P. B. D. de la Mare, 852
Theoretical and Applied Mechanics : Fourth Congress on (Indian Society of Theoretical and Applied Mechanics), 366
Theoretical and Applied Mechanics, Indian Society of : Fourth Congress on Theoretical and Applied Mechanics, 366
Theories (Electronic), of Organic Chemistry (John William Baker), *review* by Dr. R. I. Reed, 777
Theories (Electronic), of Organic Chemistry : An Introduction to (G. I. Brown), *review* by Dr. R. I. Reed, 279
Theory : Basic Automatic Control (Prof. Gordon J. Murphy), *review* by M. J. Somerville, 211
  Introductory Electronic, *review* by Dr. R. I. Reed, 279
  Management, 300
  Modern Network (Electrical Engineering Department of the University of Birmingham Residential Conference on), 1783
  Noise, *review* by R. A. King, 353
  Nuclear Reactor (J. J. Syrett), *review* by R. Vaux, 1149
Theory of Evolution by Charles Darwin and Alfred Russel Wallace and the Bicentenary of the publication of the tenth edition of the 'Systema Naturae' by Linnaeus : Centenary of the formulation of the (Congress in Singapore to celebrate the, 723
Theory of Natural Selection To-day (Prof. J. B. S. Haldane), 710
Theory of Practice (Dr. D. R. Cox), *review* by Dr. D. J. Finney, 1766
Theory (Blow-hole) : Simulation of Lunar Craters—a (Dr. A. G. Gaydon and R. C. M. Learner), 37
Theory (Electronic) : An Introduction to, *review* by Dr. R. I. Reed, 777
Theory (Electronic), and Chemical Reactions (R. W. Scott), fourth edition, *review* by Dr. R. I. Reed, 968
Theory (Elementary), of Angular Momentum (M. E. Rose), *review* by Prof. N. Kemmer, 705
Theory (Feedback), and its Application (P. H. Hammond), *review* by R. L. Grimsdale, 280
Theory (Feedback), of Hydrogen Overvoltage (J. F. Chittum), 589
Theory (Information), and its Application to Fundamental Problems in Physics (Prof. L. Brillouin), 501
Theory (Mathematical), of Inventory and Production : Studies in the (Kenneth J. Arrow, Samuel Karlin and Herbert Scarf), *review* by Dr. L. S. Goddard, 1557
Theory (A New), of the Solar Corona (Prof. Paul J. Kellogg and Prof. Edward P. Ney), 1297
Theory (Random Noise) : Principles and Applications of (Dr. Julius S. Bendat), *review* by R. A. King, 353
Theory (Science), and Man (Prof. Erwin Schrödinger), *review* by Prof. W. H. McCrea, 1218
Theory (Semantical) : Truth and Denotation, a Study in (Prof. R. M. Martin), *review* by F. I. G. Rawlins, 1628
Theory (Social) : Value in (Dr. Gunmar Myrdal), *review* by Prof. T. S. Simey, 4
Theory and Design of Magnetic Amplifiers (Dr. E. H. Frost-Smith), *review* by J. G. Henderson, 1627
Thermal Annealing of Chemical Radiation Damage (Dr. A. G. Maddock and S. R. Mohanty), 86
Thermal-conductivity Detector in Gas Chromatography : Effect of the Carrier Gas on the Sensitivity of a (L. J. Schmauch and R. A. Dinerstein), 673 ; (Dr. N. H. Ray), 674
Thermal Conductivity Detectors in Gas Chromatography : Effect of the Carrier Gas on the Sensitivity of (Dr. B. A. Scott and Dr. A. G. Williamson), 1322

Thermal Decomposition of Irradiated Solids (Dr. E. G. Prout), 884
Thermal Neutron Irradiation on Oxide Catalysts : Effect of, for the Decomposition of Nitrous Oxide (Yasukazu Saito, Yukio Yoneda and Shoji Makishima), 388
Thermal Properties of Gases, Liquids and Solids (American Society of Mechanical Engineers and Purdue University Thermophysical Properties Research Center Symposium on), 294
Thermal Reactions : Initiation of, by the Flash Illumination of Absorbing Bodies (Dr. J. L. Lundberg and Dr. L. S. Nelson), 1560
Thermal Reactions of Highly Fluorinated *Cyclo*hexadienes (B. Gething, Dr. C. R. Patrick and Prof. J. C. Tatlow, and Dr. R. E. Banks, Dr. A. K. Barbour and A. E. Tipping), 586
Thermodynamics : Available Energy in, *review* by R. W. Haywood, 353
Thermodynamique et le Théorème de l'Energie utilisable (R. Marchal), *review* by R. W. Haywood, 353
Thermoluminescence : Synthesis of Colour Centres in Silica and their (J. R. Hensler), 672, *erratum*, 1434
Thermoregulatory Reactions of Dairy Heifers : Effect of Clipping the Coat on the (H. Berman and H. H. Kibler), 606
Thiamine as a Growth Factor for *Mycobacterium butyricum* : Replacement of (Dr. D. E. Wright), 262
Thickness of the Earth's Crust in Antarctica (F. F. Evison, C. E. Ingham and R. H. Orr), 306
Thiery, Dr. M., and others : Virus-like Particles in Chemically Induced Carcinoma of the Uterine Cervix, 694
Thimann, Prof. Kenneth V., and others (edited by) : Vitamins and Hormones—Advances in Research and Applications, Vol. 15, *review* by Prof. F. G. Young, 568 ; Vol. 16, *review* by Prof. F. G. Young, 778
Thimann, Prof. Kenneth V., and Beth, Dr. Kurt : Action of Auxins on *Acetabularia* and the Effect of Enucleation, 946
Thin Magnetic Films (R. S. Webley), 999
Thinking : Great, *review* by Prof. W. H. McCrea, 1218
Thiobacillus thioparus : Oxidation of Thiosulphate by (Dr. Boleslaw Skarzyński and Tadeusz W. Szczepkowski), 1413
Thiobarbiturate : A New Short-acting (Dr. M. E. Peel, Barbara Macauley, Dr. H. O. J. Collier, Dr. J. H. Hunt, Dr. F. A. Robinson and Dr. E. P. Taylor), 1443, *erratum*, 1571
Thioindigo Dyes in the Solid State : *Cis–trans* Isomerism of (Dr. G. S. Egerton), 389
Thiolsulphinates : A Colour Reaction for (John F. Carson and Francis F. Wong), 1673
Thionophosphates : Activation of, by Liver Microsomes (Prof. R. D. O'Brien), 121
Thiosulphate : Oxidation of, by *Thiobacillus thioparus* (Dr. Boleslaw Skarzynski and Tadeusz W. Szczepkowski), 1413
Thiouracil : Experimental Colloid Goitre produced by (Dr. R. H. Follis, jun.), 1817
Thomas, Alan J., and Klein, Richard M. : *In vitro* Synthesis of the Crown-Gall Tumour-inducing Principle, 113
Thomas, A. J. (Moss, P., and) : Detection and Estimation of Benzenoid Compounds by Chromatography, 1611
Thomas, D. P. Page, and Dingle, J. T. : Entropy and Synovial Pathology, 543
Thomas, E. Lloyd : Awarded a Premium by the Radio Industry Council, 1023
Thomas, G., and Nicholson, R. B. : Interfacial Phenomena (Modes of Dislocation Precipitate Interactions), 1099
Thomas, G., and Whelan, Dr. M. J.: Precipitation in Alloys (Precipitation in an Aluminium–4 per cent Copper Alloy), 797 ; (Formation of Dislocation Spirals by the Condensation of Vacancies on Screw Dislocations in an Alumihium–4 per cent Copper Alloy), 797
  Interfacial Phenomena (Film showing the Influence of Curvature on the Energy of Incoherent Interfaces), 1099
Thomas, Roland : Detergents, Textiles and Dyes, 1236
Thompson, Prof. F. C. : Retirement from the chair of metallurgy and directorship of the Metallurgical Laboratories of the University of Manchester, 1639 ; work of, 1639
Thompson, F. P. : Detergents, Textiles and Dyes, 1237
Thompson, Dr. J. : Gas Discharges (Collision Processes and Energy Distributions), 93
Thompson, P. A. (Guttridge, C. G., and) : Effect of Gibberellic Acid on Length and Number of Epidermal Cells in Petioles of Strawberry, 197
Thompson, W. B. : Problems of Collective Motion in Physics (Gaseous Plasmas), 866
Thomsen, Ellen, and Møller, Ib : Neurosecretion and Intestinal Proteinase Activity in an Insect, *Calliphora erythrocephala* Meig., 1401
Thomson, Sir George : Nuclear Fuel Cycles, 1646
Thomson, Sir Landsborough : Birds of Cyprus, *review*, 967
Thomson, Dr. R. H. : Naturally Occurring Quinones, *review* by Dr. R. I. T. Cromartie, 1291
Thomson, Prof. Thomas : *Obituary* by Prof. R. Alun Roberts, 1159
Thorium : Uranium and (L. Grainer), *review* by G. R. Hall, 962
Thorium Disilicides (Uranium and) : Beta-Polymorphs of (A. Brown and J. J. Norreys), 673
Thorium–Uranium (Niobium–Zirconium–) and Rare-Earth Minerals from the Pegmatites of South Harris, Outer Hebrides (Dr. O. von Knorring and R. Dearnley), 255
Thorley, R. S., and others : Anticoagulant Action of Fibrin Surfaces on Mammalian Blood, 1683
Thornhill, C. K. : Turbidity Currents, 658
Thornton, Dr. R. H., and Percival, J. C. : A Hepatotoxin from *Sporidesmium bakeri* capable of producing Facial Eczema Diseases in Sheep, 63
Thorpe, H. C. : Wheat Genetics, 26
  The Plant Breeding Station, Njoro, Kenya, 1307
Thought Processes : The Mechanization of (Symposium at the National Physical Laboratory), 225
Thouless, Dr. R. H. : ESP and Personality Patterns, *review*, 964
Three-Dimensional or Solid-Image Microscope (W. D. Jackson), 1048
Threshold Values for Taste in Monozygotic Twin Calves (Dr. F. R. Bell and H. L. Williams), 345
Thrombo-Haemorrhagic Diathesis : Hyperglobulinaemic (Dr. Henry H. Henstell and Miriam Kligerman), 978
Thromboplastin Generation : Heparin and, in the Horse (Dr. R. K. Archer and P. Flute), 235
Thromboplastin' ('Blood) : Arginine Esterase Activity of (Phyllis M. Arscott, J. L. Koppel and John H. Olwin), 753
Thudichum—Chemist of the Brain (Prof. David L. Drabkin), *review* by H. W. Kosterlitz, 568
Thurston, Frank R. : Appointed acting director of the National Aeronautical Establishment of the National Research Council of Canada, 291 ; work of, 291
Thurston, J. M. (Humphries, Dr. E. C., and) : Bulbil Formation in *Sedum telephium*, 1343
Thymidine labelled with Tritium : Effect of Colchicine on the Utilization of, during Chromosomal Reproduction (L. F. La Cour and Dr. S. R. Pelc), 1455
  Incorporation of, by Circulating Cells of Infectious Mononucleosis (Dr. F. Gavosto, A. Pileri and G. Maraini), 1691
Thymidine (Labelled) : Incorporation of, in the Seminal Vesicle of the Mouse (Dr. S. R. Pelc and P. B. Gahan), 335
Thymidylate (Calcium) : Crystal Structure of (P. Horn, Dr. V. Luzzati and Dr. K. N. Trueblood), 880
Thymus in Murine Leukaemia : Role of the (J. F. A. P. Miller), 1069
Thymus, Human Placenta and other Mammalian Organs : Juvenile Hormone in (Prof. Carroll M. Williams, Lynn V. Moorhead and Jean F. Pulis), 405
Thyroid Gland : Effect of Monofluorosulphonate, Difluorophosphate and Fluoroborate Ions on the Iodine Uptake of the (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Thyroid Hormones : Rate of Exchange of Phosphate in Red Blood Cells—Effect of (A. M. Ermans and Prof. P. A. Bastenie), 679
Thyroidectomized Rabbits : Passive Antibody Decay in (Dr. Ignatius L. Trapani, Dr. Allen Lein and Dr. Dan H. Campbell), 982
Thyroids (Human) : Iodine-131 in, and Iodine-131 and Caesium-137 in Milk (Measurements at Leeds following the Windscale Reactor Accident), (Dr. P. R. J. Burch), 515
Thyrotoxic Patients : An Iodine Compound associated with Albumin in the Plasma of (Christina Cameron and K. Fletcher), 116
Thyroxine-releasing Effect of Salicylate and of 2,4-Dinitrophenol (Dr. L. Korsgaard Christensen), 1189
Tick Paralysis : Failure of Acetylcholine Release in (Patricia Emmons and Prof. H. McLennan), 474
Tidal Fluctuations (Seasonal and), in the Trawl Catches from the Sierra Leone River Estuary (J. C. D. Watts), 1748
Tides (Atmospheric), and Earth Satellite Observations (D. G. Parkyn), 1045 ; (G. V. Groves), 1047
Tiegs Memorial Lecture of the Royal Society of Victoria, 86
Tiensuu, V. H. (Ergun, S., and) : Alicyclic Structures in Coals, 1668
Tilapia Spp. (Pisces:Cichlidae) : Methods of Marking (Vernon D. van Someren and Peter J. Whitehead), 1746
Tillman, Dr. J. R. : The Technology of Transistors, *review*, 72
  Transistor Technology, *review*, 1557
Tillotson, Ernest : Study of Earthquakes, *review*, 708
Time (Geological) : The Succession of Life through (Dr. Kenneth P. Oakley and Helen M. Muir-Wood), third edition, *review*, 73
Time Measurement : Handbook of thé Collection illustrating (Dr. F. A. B. Ward), Part I, fourth edition (Science Museum), 933
Time Relationship of Metre-Wave and 3-cm. Wave Bursts (M. R. Kundu), 1047
Time-Scale : The Geological (Dr. K. I. Mayne and Dr. R. St. J. Lambert and D. York), 212
Time of Irradiation : Effects of Wave-length and, on Internode Length in *Pisum sativum* and *Tropaeolum majus* (P. J. M. Sale and Dr. D. Vince), 1174
Timonen, Prof. : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1236
Tin Whiskers : A Source of Natural (Málcolm J. Fraser), 670
Tinbergen, Dr. Niko : Curious Naturalists, *review*, 211
Tincker, Dr. M. A. H. : Elected a Fellow of the Royal Society of Edinburgh, 719
Ting, Dr. S. V., and Deszyck, Dr. E. J. : Isolation of *l*-Quinic Acid in Citrus Fruit, 1404
Tipping, A. E., and others : Thermal Reactions of Highly Fluorinated *Cyclo*hexadienes, 586
Tirunarayanan, Dr. M. O., and Vischer, Dr. W. A. : Inactivation of Isoniazid by Peroxidase, 681
Tissue surrounding a Tumour and of Growing Rat Sarcoma : Collagen Content of Normal Connective Tissue, of (Maria Grabowska), 1186
Tissue (Brain), of Rats : Succinic Dehydrogenase Activity in, after Ovariectomy and Steroid Administration (H. Sobel and B. Eckstein), 54
Tissue (Connective) : Human Muscular Dystrophy as an Aberration of the (Prof. Geoffrey H. Bourne and M. Nelly Golarz), 1741
Tissue (Dried Leaf) : Persistence of Tomato Aucuba Mosaic Virus in (Prof. John Caldwell), 1142
Tissue (Mammalian Connective) : Polysaccharide Fibres in (A. J. Cruise and J. W. Jeffery), 677
Tissue (Mummified) : Persistence of Sudanophilic Lipid in Sections of (Dr. A. T. Sandison), 196
Tissue (Normal and Atheromatous) : Liquid Crystals of Lipid in (G. T. Stewart), 871
Tissue (Normal Connective) : Collagen Content of, of Tissue surrounding a Tumour and of Growing Rat Sarcoma (Maria Grabowska), 1186
Tissue Culture : Antibody Formation in (Marvin Fishman), 1200
Tissue Culture Cells stained with Acridine Orange : Fluorescence of (U. N. Joshi and Dr. K. S. Korgaonkar), 400
Tissue Culture and Liver Antigens of Mouse Hepatitis : Complement Fixation with (Dr. Theodore J. Starr and Dr. Morris Pollard), 1690
Tissue Cultures (Plant) : Absorption of Alkali Cations by (Dr. J. F. Sutcliffe and E. R. Counter), 1513
Tissue Enzyme-Levels : Gene Action in Erythrocyte Deficiency of Glucose-6-phosphate Dehydrogenase— (Prof. Paul A. Marks, Dr. Ruth T. Gross and Dr. Ruth E. Hurwitz), 1266
Tissue Suspensions (Homologous) : Long-term Survival of Irradiated Mice treated with (Eric L. Simmons, Leon O. Jacobson, Edna K. Marks and Evelyn O. Gaston), 556
Tissues : Amperometric Determination of Sulphydryl Content of Blood and (Dr. S. K. Bhattacharya), 1327
  Differences in Chromatographic Patterns of Deoxyribonucleic Acid from various (Nobuko Kondo and Syozo Osawa), 1602
  Effect of Enzymes on Mechanical Properties of (Margaret L. R. Harkness and R. D. Harkness), 1821
Tissues embedded in 'Araldite' : Preparation and Sectioning of, for Electron Microscope Examination (J. M. Davis), 200

Tissues of the Fallopian Tube : Fate of Spermatozoa penetrating into the (Dr. R. G. Edwards and J. L. Sirlin), 1744
Tissues of Mice cooled to 1°C. : Measurements of Oxygen Tension in the (Dr. D. B. Cater and Dr. L. Weiss), 1521
Tissues of the Rabbit's Eye : Differential Distribution of Radioactive Strontium and Yttrium in the (R. H. Mole, Antoinette Pirie and Janet M. Vaughan), 802
Tissues (Coleoptile) : Relationship between Auxins and Nucleic Acid Synthesis in (B. B. Biswas and S. P. Sen), 1824
Tissues (Human), and Activated Sera : Granulocyte Precipitins of (Dr. Leonhard Korngold, Gerda Van Leeuwen and Daniel G. Miller), 330
Tissues (Living) : Selective Permeability of, to Carbonic Acid (Dr. B. N. Halpern and R. Binaghi), 1397
Tissues (Normal), and Neoplasms *in vitro* : Metabolism of (Prof. J. H. Quastel and I. J. Bickis), 281
Tissues (Plant) : Malonate Metabolism by (Prof. Leland M. Shannon, Roger H. Young and Carlton Dudley), 683
Titmuss, Prof. Richard M. : Essays on 'The Welfare State', *review* by M. P. Hall, 1147
Titration : Magnetometric—a New Method of Chemical Analysis (Dr. M. S. Blackie and Dr. V. Gold), 1804
Titration (Potentiometric), of Coal in a Non-Aqueous Medium (W. J. S. Pringle), 815
Titration Method (An Automatically Operating, Coulometric), for continually Measuring Small Amounts of Water in Fluids (E. Barendrecht), 1181
Titrations (Semi-Micro Chelometric) : A New Sensitive Indicator for (Prof. Robert H. Maier), 461
Titre (Œstrogen), in Stored Urine : Changes in (Y. A. Leon, R. D. Bulbrook and F. C. Greenwood), 189
Titus, Elwood, and others : Isolation of an Activator for Phospholipase *D*, 1393
Tiwi : The—their Art, Myth and Ceremony (Charles P. Mountford), *review* by Dr. Phyllis Kaberry, 1080
Toad (*Xenopus laevis*) without Haemoglobin (Prof. D. W. Ewer), 271
Tobacco grown in a Greenhouse : Rutin in (Dr. T. P. Ferguson and Dr. A. S. Weaving), 64
Tobacco Manufacturers Standing Committee : Research Paper No. 2, The Reliability of Statements about Smoking Habits (G. F. Todd and J. T. Laws), 932
Tobacco Mosaic Virus : Infectious Ribonucleic Acid as Precursor of (Reto Engler and Prof. Gerhard Schramm), 1277
  Photoreactivation of Nucleic Acid from (F. C. Bawden and A. Kleczkowski), 503
Tobacco Mosaic Virus Protein of Molecular Weight 18,000 : Native (Allen T. Ansevin and Prof. Max A. Lauffer), 1601
Tobacco Smoke : Bibliography on the Chemistry of, 1434
  The Constituents of—an Annotated Bibliography (edited by H. R. Bentley and E. G. N. Berry), 1434
Tobacco Smoke Particles : Size Distribution of (Elaine Harris and Dr. H. F. Kay), 741
Tobias, Prof. P. V. : The Nuffield—Witwatersrand University Expeditions to Kalahari Bushmen, 1958-59, 1011
α-Tocopherol and Hyaluronidase *in vivo* (Elizabeth A. Irving), 398
Tocopherols (Pure α-, β-, γ- and δ-), in the Growing Chick : Relative Rates of Liver Storage of (T. W. Griffiths), 1061
Todd, G. F., and Laws, J. T. : The Reliability of Statements about Smoking Habits (Tobacco Manufacturers Standing Committee Research Paper No. 2), 932
Tolerance : Drug-induced Immunological (Dr. Robert Schwartz and Dr. William Dameshek), 1682
Tolerance (Acquired Immunological), of Heterografts (Dr. Milan Hašek, Tomáš Hraba and Jan Hort), 1199
Tolman, Prof. Edward Chace : Behaviour and Psychological Man, *review* by Prof. John Cohen, 781
Tomato Aucuba Mosaic Virus : Persistence of, in Dried Leaf Tissue (Prof. John Caldwell), 1142
Tomato Roots (Excised) : Respiration of (D. R. Morgan and H. E. Street), 1023
Tomato Spotted Wilt Virus : Leaf-Enations in *Dahlia variabilis* Desf. induced by (A. A. Brunt), 627
Tomchick, Dr. Robert, and others : Enzymatic N-Methylation of Histamine, 680
Tomkeieff, Prof. S. I. : Iron Ore in the Soviet Union, 1028
Tonna, Dr. E. A., and Pillsbury, Dr. N. : Changes in the Osteoblastic and Mitochondrial Population of Ageing Periosteum, 337
Tools of Scientific Discovery (City Literary Institute, London, Course of Science Lectures), 18
Toothcarps (Viviparous) : Development of Ovarial Teratomas in, by Pathological Parthenogenesis (Prof. A. Stolk), 763
Topics in Carbohydrate Chemistry, *review* by Prof. M. Stacey, 1219
Topping, Dr. J. : Appointed to the Board of the College of Technologists, 1500
Torp, Alf, and others : A New Type of Chromaffin Cells, probably storing Dopamine, 267
Torrey, John G. (edited by Crafts, A. S., in association with Machlis, Leonard, and) : Annual Review of Plant Physiology, Vol. 9, *review* by Prof. W. Stiles, 1703
Tottle, C. R. : Appointed to the chair of metallurgy in the University of Manchester, 1640 ; work of, 1640
Touch, Dr. A. G. : Appointed senior superintendent of the Radio Department, Royal Aircraft Establishment, 931 ; work of, 931
Toussaint, Andre J., and Muschel, Louis H. : Neutralization of Bacteriophage by Normal Serum, 1825
Továrek, J. (Talafant, Dr. E., and) : Factors affecting the Rate of Bilirubin Conjugation *in vitro*, 111
Tovey, Dr. Geoffrey H., and others : Changes in the Group *A* Antigen in a Case of Leukaemia, 892
Tower, Dr. Donald B., and others : Effects of Pyridoxine Withdrawal on Cerebral Circulation and Metabolism in a Pyridoxine-dependent Child, 751
Towers, Bernard : Amniotic Fluid and the Foetal Lung, 1140
Townend, Dr. D. T. A. : Presented with a Gold Medal of the Institut Français des Combustibles et de l'Energie, 151
Townes, C. H., and others : Maser Observations in Radio Astronomy, 223
Townsend, Prof. Gordon F., and others : Activity of 10-Hydroxydecenoic Acid from Royal Jelly against Experimental Leukaemia and Ascitic Tumours, 1270
Townsend, Dr. W. G. : Gas Discharges (Liberation of Electrons from Cold Cathodes in Gases under Electric Fields $\sim 10^5$ V./cm.), 92
Townsend's First Ionization Coefficient in Pure Nitrogen (Dr. A. E. D. Heylen), 1545
Toxic Chemicals released from a Low-flying Aircraft : Drift of (D. Yeo, N. B. Akesson and H. H. Coutts), 131
Toxic Phytohaemagglutinin from Black Beans (*Phaseolus vulgaris*) : Purification of a (Dr. Werner G. Jaffé and Karl Gaede), 1329
Toxicity ('Vapour), of Solid Insecticides (P. Gerolt), 1121
Toxicological Properties of 5-Benzylidenerhodanine : Pharmacological and (Salah A. Tawab, Prof. Ahmed Mustafa and A. F. A. Mawgoud Shalaby), 607
Toxicologists' (Insect) Information Service : Bulletin No. 1, 1093
Toxicology : Industrial Hygiene and (edited by Frank A. Patty), Vol. 1, General Principles, second edition, *review* by Dr. A. I. G. McLaughlin, 1148
Toxicology and Applied Pharmacology, Vol. 1, No. 1, 650
Toxoplasmosis : Congenital Transmission of, through Successive Generations of Mice (Dr. J. K. A. Beverley), 1348
Toxopyrimidine : γ-Aminobutyric Acid and Glutamic Acid Content of Brains of Rats treated with (Dr. G. Rindi and G. Ferrari), 608
  Effect of, on Glutamic-decarboxylase and Glutamic-oxalacetic Transaminase of Rat Brain (Dr. G. Rindi, V. Perri and U. Ventura), 1126
Tozer, B. A. : Electron Affinity of Oxygen, 1389
Trace Elements—Proceedings of the Conference held at the Ohio Agricultural Experiment Station, 1957 (edited by C. A. Lamb, O. G. Bentley and J. M. Beattie), *review* by Dr. E. J. Hewitt, 1009
Trace Metal? : Does Rhodopsin contain a (Isao Fukami, Prof. Bert L. Vallee and Prof. George Wald), 28
Tracer Experiments in the Rat : Synthesis of Dextran Sulphate labelled with Carbon-14 and (Dr. H. Weigel and Dr. K. Walton), 981
Tracers (Radioactive) : Use of, in Studies of the Shoot Apex (Dr. A. Booth, Dr. E. G. Cutter, Dr. S. N. Postlethwait, B. R. Voeller and Prof. P. F. Wareing), 1580
Traces of Copper during Purification Procedures : Destruction of Cortisone and related Steroids by (Marvin L. Lewbart and Vernon R. Mattox), 820
Trail (Scent) : Interaction between Ants on a (J. H. Sudd), 1588
Traill, Dr. D. : Elected a Fellow of the Royal Society of Edinburgh, 719
Training in Radioisotope Technology : Grants for (United States Atomic Energy Commission), 1641
Training for Skill (Lady Gertrude Williams), 1780
Training (Nuclear), in the Biological Sciences in the United States, 1091
Training Courses : Grants for (United States Atomic Energy Commission), 437
Training Courses at the Shippingport Atomic Power Station (United States Atomic Energy Commission), 153
Training Grants (Postgraduate), in Fishery Research (Development Commissioners, in association with the Ministry of Agriculture, Fisheries and Food, and the Scottish Home Department), 1094
Training and Opportunities for Women in Engineering (Women's Engineering Society), 161
Tranquillizing Agents : Effect of, on the Resistance of Rats to Histamine Stress (Dr. Arthur M. Sackler, Dr. A. S. Weltman and Dr. Raymond R. Sackler), 896
Tranquillizing Principle in *Paspalum scrobiculatum* Grain : Pharmacology of a (Dr. N. K. Bhide and R. A. Aimen), 1735
Transaminase (Glutamic-decarboxylase and Glutamic-oxalacetic), of Rat Brain : Effect of Toxopyrimidine on (Dr. G. Rindi, V. Perri and U. Ventura), 1126
Transaminase (Glutamic–Aspartic), of Pig Heart Muscle (B. E. C. Banks, K. G. Oldham, E. M. Thain and C. A. Vernon), 1187
Transaminase Activity in Dogs' Serum and Lymph after Hepatic Damage due to Acute Biliary Obstruction : Determination of (Dr. P. Braun, Dr. M. Papp and Dr. I Horváth), 48
Transaminase Activity (Serum) : Changes in, following Myocardial Damage due to Lymphatic Congestion (M. Földi, Dr. P. Braun, Dr. M. Papp and Dr. I. Horváth), 1333
Transfer of Ribonucleoprotein from Adult Rabbits : Serum Antibody and γ-Globulin in Baby Rabbits after (Dr. Miroslava Hrubešova, Dr. Brigitte A. Askonas and Dr. J. H. Humphrey), 97
Transfer (Linear), of a Potentially Mutant State in Bacteria (Dr. F. Kaudewitz), 871
Transfer (Material), in Monomolecular Layers of a Boundary Lubricant (George L. Gaines, Jun.), 1110
Transfer (Proton), and Supercontraction in Actomyosin (Dr. F. G. E. Pautard), 1391
Transferred Cells : Presence of Antigen—a Factor determining the Duration of Antibody Formation by (Dr. J. Sterzl), 547
Transferrins: Serum (E. R. Giblett, C. G. Hickman and Dr. O. Smithies), 1589
Transformation : Olivine-Spinel (R. H. Wentorf, Jun.), 1617
Transformation (Fibroma–Myxoma Virus), of Berry and Dedrick : Reactivation of Heat-inactivated Poxviruses—a General Phenomenon which includes the (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340
Transformative Effect of Symbiosis : An Unusual Strain of *Escherichia coli* in Septicaemia as an example of the (Dr. R. Reitler, M. Teicher and Dr. A. Valero), 339
Transforms (Fourier), and X-Ray Diffraction (Prof. H. Lipson and Dr. C. A. Taylor), *review* by Dame Kathleen Lonsdale, 969
Transgression (A Marine), of Boreal Age in the Southernmost Part of Norway (Gunnar Gabrielsen), 1616
Transient Reactor Test Facility (TREAT) : Criticality reached by the (United States Atomic Energy Commission), 862
Transition from Streamline to Turbulent Flow : Variations in the Value of Reynolds Number at the (Dr. P. J. Isaac, I. B. Williams and Dr. W. M. Jones), 531
λ-Transition in Helium (Dr. C. G. Kuper), 1544
Transitions (Polymorphic), in Anhydrous Sodium Sulphate (Dr. C. N. R. Rao and L. V. Gregor), 1391
Transistor Technology (Members of the Technical Staff of Bell Telephone Laboratories), Vol. 1 (edited by H. E. Bridgers, J. H. Scaff and J. N. Shive), Vol. 2 (edited by F. J. Biondi), *review* by Dr. J. R. Tillman, 72 ; Vol. 3 (edited by F. J. Biondi), *review* by Dr. J. R. Tillman, 1557

Transistors : From Conductors to, *review* by Dr. P. T. Landsberg, 138
  The Technology of, *review* by Dr. J. R. Tillman, 72
Transistors and Associated Semiconductor Devices (Institution of Electrical Engineers International Convention on), 652
Transition Metal Co-ordination Compounds : Explosion of (Seward E. Beacom), 38
Transition Probability : Changes in, due to the Interaction of Rotation and Vibration in Diatomic Band Spectra (R. C. M. Learner and Dr. A. G. Gaydon), 242
Transitions (Phase) : Co-operative Phenomena and (Physical Society Conference on), 1234, 1643
Translation Service of the Iron and Steel Institute and the British Iron and Steel Research Association, 224
Translation (Braille), by Computer, 1233
Translations Bulletin of the Lending Library Unit of the Department of Scientific and Industrial Research, 581
Transmission of Disease : Biological Aspects of the—Report of the Institute of Biology Symposium (edited by C. Horton-Smith), *review* by Dr. C. W. Dixon, 1221
Transmission (Congenital), of Toxoplasmosis through Successive Generations of Mice (Dr. J. K. A. Beverley), 1348
Transmission (Long-Distance), by Wave-Guide (Radio and Telecommunication Section of the Institution of Electrical Engineers Convention on), 727
Transmission (Mechanical), of Cassava Brown Streak Virus (R. M. Lister), 1588
Transmission (Radio), by Wave-Guide (Dr. R. L. Smith-Rose), 727
Transphosphorylating Enzymes and Muscle Relaxation (J. Molnar and Dr. L. Lorand), 1032
Transplantable Fibroma of the Skin in the Newt *Triturus taeniatus* : Inhibitory Effect of Colchicine upon the (Prof. A. Stolk), 555
Transport (Borrowing Powers) Bill : Second reading in the House of Commons, 938
Transport (Electron) : Inhibition of, and the Swelling of Isolated Mitochondria (J. B. Chappell and Dr. G. D. Greville), 1525
Transport (Glucose or Amino-Acid) : An Effect of Insulin on Peptide Synthesis independent of (Prof. Ira G. Wool and Dr. M. E. Krahl), 1399
Transvaal Ape-Man-bearing Cave Deposits (C. K. Brain), 1433
Transvaal Fauna and Flora : No. 7, Special issue on the Wonderboom Nature Reserve, 1023
Transvaal Museum, Pretoria : Annual Report for 1957-58, 721
  Memoir No. 11, The Transvaal Ape-Man-bearing Cave Deposits (C. K. Brain), 1433
Trap-Shotten Rock from the Biligirirangan Hills, Mysore State, India (Prof. C. S. Pichamuthu), 483
Trapani, Dr. Ignatius L., and others : Passive Antibody Decay in Thyroidectomized Rabbits, 982
Traumatic Shock (Experimental), in Rats : 5-Hydroxytryptamine in Blood during (M. Medaković and I. Spuzić), 1685
Trautner, E. M., and Gershon, S. : Use of 'Premorine' for Screening Anti-Parkinsonian Drugs, 1462
Trautner, E. M., and others : Lithium Retention in Ascites Tumour Mice, 1128
Travelling Ionospheric Disturbances at Night : Occurrence of Giant (L. H. Heisler), 383
Travelling Research Scholarships : Carlsberg–Wellcome, 1024
Travelling Studentships (John Murray) in Oceanography and Limnology for 1959 awarded by the Royal Society to A. D. Ansell and to G. Evans, 1365
Travels of William Bartram (edited by Francis Harper), naturalist's edition, *review* by Dr. L. Harrison Matthews, 1006
Travers, Prof. Morris W. : Smoke Emission of Low-Temperature Chars, 1321
Trawl Catches from the Sierra Leone River Estuary : Seasonal and Tidal Fluctuations in the (J. C. D. Watts), 1748
Trbojević, M. D. (Rose, Dr. H. E., and) : Grinding at Super-Critical Speeds in 'Ball' Mills, 813
TREAT (Transient Reactor Test Facility) : Criticality reached by the (United States Atomic Energy Commission), 862
Treatment with Chloramphenicol : Reduction in the Lethal Effects of Radiations on *Escherichia coli B* by (Dr. N. E. Gillies and Tikvah Alper), 237
Treatment with Formalin : Increase of Viral Haemagglutinability of Red Cells of the Mouse after (B. Fauconnier and D. Barua), 629
  Impairment of Viral Haemaggalutination of Red Cells after (F. E. Buckland), 1276
Treatment with 'Freon' 113 : Bacteriophage Enrichment in a Liquid Two-Phase System with Subsequent (Dr. G. Frick and Dr. P. A. Albertsson), 1070
Treatment of Weakened Fabrics : Museum (E. R. Beecher), 1501
Treatments (Different) : Yield of Infective 'Ribonucleic' Acid from Impure Murray Valley Encephalitis Virus after (G. L. Ada and S. G. Anderson), 799
Tredgold, Dr. R. H. : Quadrupole Resonance, *review*, 1078
Tree (Oleaceous), *Nyctanthes arbor-tristis* : Regulation of Morphogenesis in an (Subodh Kumar Roy), 1410
Trees of Britain (Dr. Robert Gurney), *review* by Dr. F. N. Howes, 1627
Trehalose Biosynthesis in the Locust : Site and Mode of (D. J. Candy and Dr. B. A. Kilby), 1594
Treloar, H. M. : Antarctic Meteorology, 1504
Trematode (A Monogenetic), New to the British Fauna (Z. Kabata), 481
Trematodes (Digenetic) : Classification of the, *review* by Dr. Ben Dawes, 957
'Tremorine' : Use of, for Screening Anti-Parkinsonian Drugs (E. M. Trautner and S. Gershon), 1462
Trenaman, J. : Appointed to the Granada Television Research Fellowship in the University of Leeds, 153 ; work of, 153
Trends in Botanical Studies : Present, *review* by Prof. W. H. Pearsall, 1484
Trends in English Adult Education (edited by Prof. S. G. Raybould), *review* by T. H. Hawkins, 1419
Trends in Gerontology (Dr. Nathan W. Shock), second edition, *review* by Prof. P. L. Krohn, 777
Trends in Science Teaching in the Universities of the Commonwealth : General (Science Masters' Association Discussion on), 1571
Trevor, Dr. J. C. : The Fontéchevade Skulls and the Origin of *Homo sapiens*, 1369
Trewavas, Dr. E. : Anatomy of a Coelacanth, *review*, 566
  Obituary of Dr. Paul Chabanaud, 1496
Trials (Balance), with Magnesium-28 in Sheep (Alexander C. Field), 983
Triaxial Test : The Measurement of Soil Properties in the (Dr. Alan W. Bishop and D. J. Henkel), *review* by Thomas Whitaker, 1151
Tribes without Rulers—Studies in African Segmentary Systems (edited by John Middleton and the late David Tait), *review* by Prof. M. Fortes, 1006
Trichloracetic Acid-insoluble Phosphate Compounds in Cartilage (R. G. Whitehead and Dr. S. M. Weidmann), 876
Trichoderma viride : Synthesis of Long-Chain Fatty Acids from 2-^{14}C-Acetate and ^{14}C-Glucose in (Dr. W. Mary Crombie and P. E. Ballance), 1195
Trichomonas vaginalis : Prolonged Survival of, at –79°C. (Dr. M. G. McEntegart), 270
Trichostrongylus longispicularis Gordon, 1933, in British Cattle : The Nematodes *Ostertagia lyrata* Sjöberg, 1926, and (Dr. J. H. Rose), 1745
Trichosurus vulpecula : Œstrous Cycle, Gestation Period and Parturition in the Marsupial (Dr. A. G. Lyne, Phyllis E. Pilton and G. B. Sharman), 622
Triiodothyronine in Acute Alcoholic Intoxication (Dr. Henry Newman and Marion Edmonds Smith), 689
L-3′,5,3-Triiodothyronine : Influence of, on the Oxidative Phosphorylation of Tumour Mitochondria (Prof. W. Lührs, E. Heise and G. Bacigalupo), 1534
Trincão, Prof. Carlos, and others : Haemoglobin *N* in Portuguese Guinea, 193
Trinidad : Resistance of *Anopheles aquasalis* Curry to Dieldrin in (T. A. Omardeen), 131
1,3,5-Trinitobenzene : Interaction of, with Ethoxide Ion (Dr. R. Foster), 1042
Trinity College, Dublin : Appointment of Prof. J. Brontë Gatenby to a new research chair in cytology, 1716
  Appointment of Dr. J. N. R. Grainger to the chair of zoology and comparative anatomy, 1716
Triphosphates (Nucleoside) : Are, Precursors of Mammalian Ribonucleic Acid *in vivo* ? (Prof. Paul Mandel, Jacques-David Weill, Marc Ledig and Suzanne Busch), 1114
Triple Coitus in the Mealy Bug, *Planococcus citri* (Risso), (Walter A. Nelson-Rees), 479
Trist, Eric (Semeonoff, Boris, and) : Diagnostic Performance Tests, *review* by Prof. O. L. Zangwill, 1767
Triticum carthlicum : An Induced Mutant in, with the Diagnostic Feature of *T. vavilovi* (Z. Barabás, jun.), 1349
Tritium : Effect of Colchicine on the Utilization of Thymidine labelled with, during Chromosomal Reproduction (L. F. La Cour and Dr. S. R. Pelc), 1455
  Incorporation of Thymidine labelled with, by Circulating Cells of Infectious Mononucleosis (Dr. F. Gavosto, A. Pileri and G. Maraini), 1691
Triturus taeniatus : Inhibitory Effect of Colchicine upon the Transplantable Fibroma of the Skin in the Newt (Prof. A. Stolk), 555
Trnka, Dr. Z., and Ríha, I. : Antibody Formation by Isolated Spleen Cells transferred to Recipients in Absence of Homotransplantation Reaction, 546
Trogoderma granarium Everts : Differential Response of Male and Female Adults of, towards Sterilizing Doses of Gamma-radiation (G. C. Carney), 338
Tropaeolum majus : Effects of Wave-length and Time of Irradiation on Internode Length in *Pisum sativum* and (P. J. M. Sale and Dr. D. Vince), 1174
Tropical Africa (West) : Flora of (Dr. J. Hutchinson and Dr. J. M. Dalziel), second edition revised by R. W. J. Keay, *review* by A. W. Exell, 6
Tropical Agriculture : An Introduction to (Sir Harold Tempany and D. H. Grist), *review* by Prof. J. W. Purseglove, 966
Tropical Living : Design for (Report of the Symposium on, prepared by the National Building Research Institute of the South African Council for Scientific and Industrial Research), 1022
Tropical Medicine (United States National Academy of Sciences—National Research Council to organize a survey on), 863
Tropical Products Institute : To become one of the research stations of the Department of Scientific and Industrial Research, 507
Tropics : A Possible Vitamin E Deficiency occurring in a Herd of Pigs fed Standard Rations in the (W. J. A. Payne), 828
  Scientific Basis of Land Planning in the (Prof. L. Dudley Stamp), 20
Tropics (Humid) : Vegetation of the (Dr. E. J. H. Corner), 795
Tropics (Humid) Vegetation (Unesco and the Council for Sciences o Indonesia Symposium on), 795
Troubled Waters, *review* by J. L. Stollery, 421
Trout, G. C. : The Bear Island Cod—Migrations and Movements, 1100
Trout (Brook) : X-Ray Diffraction Patterns from the Egg Membrane of the Egg of the (Dr. Mamoru Kusa and Tsuguyasu Wada), 410
True Book about Insects (John Clegg), *review* by B. D. Moreton, 709
True Energy Values : Use of Approximate Wave Functions for Extrapolation to (P. G. Dickens, Dr. J. W. Linnett and D. Schofield), 175
Trueblood, Dr. K. N., and others : Crystal Structure of Calcium Thymidylate, 880
Trumble, Dr. H. C. : Humid Tropics Vegetation (Climate of Indonesia in relation to Vegetation), 796
Truscott, Margaret (Buckell, Dr. Monamy, and) : Salt Concentration and Fibrinolytic Activity, 1268
Truter, M. R., and co-workers : Co-ordination Chemistry (Structure of β-Diketo Complexes of Trimethyl Platinum (IV)), 1784
Truth and Denotation, a Study in Semantical Theory (Prof. R. M. Martin), *review* by F. I. G. Rawlins, 1628
Trypsin : Electrophoretic Heterogeneity of (J. C. Perrone, L. V. Disitzer and G. Domont), 605
L-Tryptophan Esters : Biological Activity of (Dr. Giulio C. Perri, Louis Kaplan and C. Chester Stock), 116
Tryptophan Peroxidase : Prevention of Adaptive Formation of, by a Carcinogenic Azo Dye (Dr. Silvio Fiala and Anna E. Fiala), 1532
Tsen, Dr. Cho Ching, and Collier, Prof. H. Bruce : Selenite as a Relatively Weak Inhibitor of some Sulphydryl Enzymes, 1327
Tsetse Fly and Trypanosomiasis Committee : Annual Report (1957-58), 703
Tsuchida, Ryutaro, and others : Polarography of Pentacyanocobaltate (III) Complexes, 458

Tuberculin Reaction (Systemic), in Rabbits : Demonstration of Endogenous Pyrogen in Serum during (Dr. J. Johanovsky), 693
Tuberculosis : Vaccination against, with Non-living Vaccines (Centro per la Vaccinazione Antitubercolare of the Istituto d'Igiene dell'Universita di Pisa International Symposium on), 154, 722
Tubular Charge of Explosive : Advance Detonation in a (Dr. D. W. Woodhead), 1756
Tucker, Prof. D. G. : Communications and Electronics Buyers' Guide, Who's Who and Reference Book, 1958-59 edition, *review*, 354
Tucker, Dr. Denys W. : A New Solution to the Atlantic Eel Problem, 495
  Old and New Solutions to the Eel Problem, 1406
Tucker, M. J. : Automatic Reduction of Geophysical Data (Techniques used in the Spectral Analysis of Geophysical Time-Series with particular reference to the Study of Sea Waves), 1167
Tuffery, A. A., and others : Measuring Productivity in Breeding of Small Animals, 339
Tufnell, Olga : Lachish (Tell ed-Duweir) IV, The Bronze Age (The Wellcome–Marston Archaeological Research Expedition to the Near East), *review* by Peter J. Parr, 951
Tukey, Prof. J. W. : Appointed assistant director of research in communication principles at the Bell Telephone Laboratories, 648 ; work of, 648
Tumour, and of Growing Rat Sarcoma : Collagen Content of Normal Connective Tissue, of Tissue surrounding a (Maria Grabowska), 1186
Tumour Cells (Ascites) : Micro-Electrode Penetration of (B. M. Johnstone), 411
Tumour Mitochondria : Influence of L-3',5,3-Triiodothyronine on the Oxidative Phosphorylation of (Prof. W. Lührs, E. Heise and G. Bacigalupo), 1534
Tumour (Ascites) Mice : Lithium Retention in (Shirley E. Simon, E. M. Trautner and D. A. Coats), 1128
Tumour (Mammary), in a *C3H* Mouse : A Cytopathogenic Agent from a, that produces Tumours in Swiss Mice and Hamsters (Dr. E. A. McCulloch, A. F. Howatson, L. Siminovitch, A. A. Axelrad and A. W. Ham), 1535
Tumour Virus (Mammalian) : *In vitro* Analysis of a (Dr. Leo Sachs, Dr. Marian Fogel and Ernest Winocour), 663
Tumour-inducing Principle : *In vitro* Synthesis of the Crown-Gall (Alan J. Thomas and Richard M. Klein), 113
Tumours : Cell Growth and the Development of (Anna Kane Laird and A. D. Barton), 1655
Tumours of Laboratory Animals: Effect of 1,6-Di-(2-Bromoethylamino)-1,6-Dideoxy-D-Mannitol Dihydrobromide on (Prof. J. Baló, G. Kendrey, J. Juhász and I. Besznyák), 395
Tumours in Swiss Mice and Hamsters : A Cytopathogenic Agent from a Mammary Tumour in a *C3H* Mouse that produces (Dr. E. A. McCulloch, A. F. Howatson, L. Siminovitch, A. A. Axelrad and A. W. Ham), 1535
Tumours (Ascites) : Possible Enzymic Mechanism for the Development of Resistance against Fluorouracil in (Dr. Peter Reichard and Ola Sköld, and Prof. George Klein), 939
Tumours (Ascitic) : Activity of 10-Hydroxydecenoic Acid from Royal Jelly against Experimental Leukaemia and (Prof. Gordon F. Townsend, Dr. Joseph F. Gordon and Dr. Barbara Hazlett), 1270
Tumours (Breast), in Mice of the *IF* Strain : Local Inhibition by Lactation of chemically induced (June Marchant), 629
Tumours (Human) : Ploidy of Primary and Metastatic (Dr. Giancarlo Rabotti), 1276
Tumours (Lung) : Induction of, by Radioactive Particles (Lewis A. Temple, D. H. Willard, S. Marks and W. J. Bair), 408
Tunnel (Hypersonic Gun) : A Microwave Method of determining the Displacement and Velocity of a Piston in a (L. Pennelegion), 246
Tupu-Tupu-Tupu (Peter Krott), translated from the German by Edward Fitzgerald, *review*, 354
Turbidity Currents (Royal Astronomical Society Discussion on), 657
'Turbulence' and the Photospheric Granulation (R. E. Loughhead and R. J. Bray), 240
Turbulence (Atmospheric) : Flying Locusts and (Dr. R. C. Rainey), 1367
Turbulent Flow : Variations in the Value of Reynolds Number at the Transition from Streamline to (Dr. P. J. Isaac, I. B. Williams and Dr. W. M. Jones), 531
Turco, Dr. Aldo, and Giacometti, G. : Co-ordination Chemistry (Properties of the Versatile Complexes of Nickel (II) with Substituted Phosphines), 1784
Turco, Dr. Aldo, and others : Tetra-co-ordination of Nickel (II)—some Complexes with *Cyclo*hexylphosphine, 601
Turk, J. L. : Immunological Activity of Precolostral Calf Serum, 838
Turner, Dr. D. T. (Mullins, Dr. L., and) : Estimation of Chain Fracture during the Cross-linking of Rubber Hydrocarbons by High-Energy Radiation, 1547
Turner, Elizabeth M. C. : Inhibition of Growth and Respiration of *Ophiobolus graminis* var. *avenae* and *Aspergillus niger* by Cystine, 1130
Turner, Dr. E. R. (Cossins, E. A., and) : Utilization of Alcohol in Germinating Pea Seedlings, 1599
Turner, G. C., and others : Inactivation of Spores of *Bacillus anthracis* by γ-Radiation, 475
Turner, Dr. Joseph C. (Anderson, Helen M., and) : Preparation and the Haemoglobin Content of Red Cell 'Ghosts', 112
Turner, Dr. J. S. : Turbidity Currents, 658
Turrill, Dr. W. B. : Correspondence of Sir Joseph Banks, *review*, 1353
  Bicentenary of the Royal Botanic Gardens, Kew, 1488
Turrill, Dr. W. B. (edited by) : Vistas in Botany—a Volume in honour of the Bicentenary of the Royal Botanic Gardens, Kew, *review* by Prof. W. H. Pearsall, 1484
Turvey, Dr. J. R., and Clancy, M. J. : Some Methods for the Purification of Sugar Sulphates, 537
Tuttle, O. F. (Wyllie, Prof. P. J., and) : Synthetic Carbonatite Magma, 770
20th Century Mendelism : Genetics and (Twenty-fourth Cold Spring Harbor Symposium on Quantitative Biology), 934
Twiddy, N. D. : Gas Discharges (Probe Measurements in Striated Positive Columns), 93
Twilight Airglow at 6708 A. : Origin of Upper-Atmosphere Lithium Atoms responsible for the New (D. R. Barber), 384
Twilight Airglow in the Northern Hemisphere: Observations of the Lithium Lines in the (Prof. A. Vallance Jones), 1315
Twilight Radiation at 6708 A. (Prof. G. Kvifte), 1384
Twilight Sky Spectrum : New Bands and Lines in the (I. A. Khvostikov and T. G. Megrelishvili), 811
Twin Calves (Monozygotic) : Threshold Values for Taste in (Dr. F. R. Bell and H. L. Williams), 345
Twinkling of Radio Stars : Sporadic *E*-Region Ionization, 'Spread F', and the (Dr. D. F. Martyn), 1382
Two-Dimensional Paper Chromatographic Method combining Ion-Exchange and Partition Techniques (C. S. Knight), 165
Two Liquid Phases in the System Cobalt Chloride–Water–Acetone : Existence of (Dr. J. N. Murrell, Dr. L. I. Katzin and B. L. Davies), 459
Two-Phase System (Liquid) : Bacteriophage Enrichment in a, with Subsequent Treatment with 'Freon' 113 (Dr. G. Frick and Dr. P. Å. Albertsson), 1070
Two Species of Ascidians : Size Relationship of Oocytes and their Nuclei in (S. R. Venkatasubba Rao), 1454
Two-Stage Fermentation of Cassava (Prof. Patrick Collard and Simon Levi), 620
Two Types of Ribonucleoprotein in the Nucleolus of Mammalian Cells (Dr. Robert Love and Dr. T. P. Bharadwaj), 1453
Twyman, Frank : *Obituary* by Dr. A. C. Menzies, 1158
Tylenchorhynchus martini Fielding, 1956 : Effect of Fatty Acid Mixtures on the Rice Stylet Nematode (Dr. Titus M. Johnston), 1392
Tyler, J. K., and others : Molecular Symmetry in *Cyclo*pentadienyl Thallium and some related Substances from their Microwave Spectra, 1182
Tyler, V. J. : Awarded a Premium by the Radio Industry Council, 1023
Tyndale-Biscoe, C. H. : Re-ingestion in *Lepus capensis* L. and *Ochotona roylei* Ogilby, 471
Type of Variation of the Signal Strength from 1958 $\delta 2$ (*Sputnik* 3), (Ludwik Liszka), 1383
β-Type Interlamellar Sorption Complexes (F. Aragón, J. Cano Ruiz and Dr. D. M. C. MacEwan), 740
Type (A New), of Chromaffin Cells, probably storing Dopamine (Bengt Falck, Prof. Nils-Åke Hillarp and Alf Torp), 267
Types (Haptoglobin), in American Negroes (Dr. Eloise R. Giblett), 192
Types (New), of Salting-out Paper Chromatograms of Antibiotics (Dr. Joseph Uri), 1188
Types (Two), of *Pasteurella haemolytica* from Sheep : Isolation of (Geoffrey R. Smith), 1132
Types (Two), of Ribonucleoprotein in the Nucleolus of Mammalian Cells (Dr. Robert Love and Dr. T. P. Bharadwaj), 1453
Tyrosine Oxidation (Liver) : Reversal of Epinephrine Inhibition of (Prof. Gerald Litwack and Valentina Wojciechowski), 1675

UBBELOHDE, Prof. A. R. : Relaxation Processes, 583
  Appointed director of the Salters' Institute of Industrial Chemistry, 1094
  Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1235
Ubbelohde, Prof. A. R., and others : Metallic Conduction in the Crystal Compounds of Graphite, 454
Ulex europaeus (Common Furze) : Carotene Content of (Dr. D. G. O'Donovan, U. O'Leary and Prof. J. Reilly), 1680
Ullmann, Agnes (Erdös, T., and) : Effect of Streptomycin on the Incorporation of Amino-Acids labelled with Carbon-14 into Ribonucleic Acid and Protein in a Cell-free System of a *Mycobacterium*, 618
Ultrasonic Vibrations at 10,000 Megacycles (Dr. E. H. Jackson), 1570
Ultrastructure : Biological (Prof. Arne Engström and Dr. J. B. Finean), *review* by Dr. H. E. Huxley, 956
Ultrastructure of Nucleoli in Oocytes of *Patella coerulea* (A. Bolognari), 1136
Ultrastructure of Pineal Eye Sensory Cells (Dr. W. Steyn), 764
Ultra-violet Absorption Spectra (Infra-red and the Near), of Polyphenyl Derivatives of the Elements of Groups IV*b* and V*b* (Dr. C. N. R. Rao, J. Ramachandran, M. S. C. Iah, S. Somasekhara and T. V. Rajakumar), 1475
Ultra-violet Carcinogenesis in Albino and Pigmented Mice receiving Furocoumarins—Psoralen and 8-Methyoxypsoralen (M. A. Pathak, Prof. F. Daniels, jun., C. E. Hopkins and T. B. Fitzpatrick), 728
Ultra-violet Fluorescence of Quinine Sulphate for Detection of Phosphate Ester Spots on Paper (Dr. Edward S. Rorem), 1739
Ultra-Violet Irradiation : Reduction of Menadione in Hexane by Chlorophyll *a* under (Rudolph J. Marcus and Lloyd K. Moss), 990
Ultra-violet Irradiation (X- and) : Effects of, on the Incorporation of Phosphorus-32 into Isolated Nuclei of Rabbit Appendix (Yoong-Tchel Tchoe and Prof. A. Sibatani), 1334
Ultra-violet Light : Action of, on Skin—Effect of the Histamine Liberator 48/80 and Methotrimeprazine (Prof. S. Claesson, G. Wettermark and L. Juhlin), 1451
  Biochemical Heterogeneity of the Ribonucleic Acid synthesized by *Escherichia coli B* after Irradiation with (Kenshi Suzuki and Jōji Ono), 395
Ultra-Violet Rays : Fluorescence Effects from Corals irradiated with (Dr. R. Catala-Stucki), 949
Under-developed Countries : Educational Advancement and the, 633
  National Food Reserve Policies in (United Nations Food and Agriculture Organization, FAO Commodity Policy Studies No. 11), 635
Under-developed Territories : Research in the, 703
Underwater Guide to Marine Life (Carleton Ray and Elgin Ciampi), *review* by Dr. D. P. Wilson, 852
Unesco : Symposium on Arid Zones, 1234
Unesco and the Council for Sciences of Indonesia : Symposium on Humid Tropics Vegetation, 795
Unesco, and others : International Oceanographic Congress, 1093, 1502
Unfermentable Sugars in Barley Mash fermented by the Amylo Process (Hideo Ono and Michio Dazai), 1055
Ungar, Dr. G., and Kadis, Dr. S. : Effect of Insulin on Sulphydryl Groups in Muscle, 49
Unilever, Ltd. : Exchange of Personnel between the Post Office and, 16
United Kingdom : Forestry in the (Sir Harry Champion), 1238
  The Refining of Uranium in the (D. P. Hamilton), 786
United Kingdom Antarctic Report to the fifth meeting of the Special Committee for the International Geophysical Year, 1718

- United Kingdom Atomic Energy Authority : Appointment of L. Grainger as head of the Metallurgy Division, 84
  - Fuller use of microphotography in order to make atomic information more easily available, 365
  - Appointment of Dr. Nyman Levin as director of the Weapons Group, 582
  - Sir William Penney to succeed Sir John Cockcroft as the member for research, 582
  - Appointment of E. F. Newley as deputy director of the Weapons Group, 582
  - The Nuclear Power Station at Chapelcross, 649
  - Re-organization of the production and marketing of radioactive isotopes, 720
  - Change in the organization of the, 861
  - Appointment of D. W. Fry as director of the Atomic Energy Research Establishment, Winfrith, 861
  - Appointment of Prof. F. A. Vick as deputy director of the Atomic Energy Research Establishment, Harwell, 861
  - The Chapelcross Nuclear Power Station (J. C. C. Stewart), 1361
- United Nations : Committee to study the question of international co-operation in the Peaceful Uses of Outer Space, 649
- United Nations (Food and Agriculture Organisation) : Retirement of Marcel Leloup from the directorship of the Forestry Division, 291
  - Appointment of Egon Glesinger as director of the Division of Forestry and Forest Products (the new title of the Forestry Division), 291
  - FAO Commodity Policy Studies No. 11, National Food Reserve Policies in Underdeveloped Countries, 635
  - Meeting of members of the Co-operative Research Project on Trace Elements, 1368
  - Offer of André Mayer Fellowships in 1959, 1368
- United Nations (Food and Agriculture Organization), and the Commission for Technical Co-operation in Africa South of the Sahara : Technical Meeting on Legumes in Agriculture and Human Nutrition, 439
- United Nations (Food and Agriculture Organization), and others: International Conference on Fishery Statistics, 1783
- United Nations (World Health Organization) : International Standards for Drinking Water, 867
  - Monograph Series No. 38, Insecticide Resistance in Arthropods (Dr. A. W. A. Brown), 1508
- United States : Appointment of Prof. G. B. Kistiakowsky as special assistant for science and technology to the President of the, 1639
  - Employment of Scientists and Technologists in the, 1028
  - Expansion of Marine Research in the, 1005
  - Nuclear Training in the Biological Sciences in the, 1091
  - Science and Technology in the, 1215
  - Scientific Linguists in the, 863
  - University Research in the, 1717
  - Weather Modification in the, 1371
- United States and Canada East of the 100th Meridian : A Field Guide to Reptiles and Amphibians of the (Roger Conant), *review* by A. G. C. Grandison, 958
- United States Air Force Cambridge Research Center : Conference on Silicon Carbide, 722
- United States Air Force Cambridge Research Center (Thermal Radiation Laboratory of the Geophysics Research Directorate) : Conference on Electrically Exploded Wires, 224
- United States Antarctic Research Programme : Appointment of Albert P. Crary as chief scientist, 1090
- United States Army (Mathematics Research Center) : Symposium at the University of Wisconsin on Boundary Problems in Differential Equations, 224
- United States Army Office of Ordnance Research : Grant of 27,243 dollars to Prof. L. A. Page (University of Pittsburgh), to begin a research programme on low-energy nuclear and electron physics, 86
- United States Atlas Satellite (1958ζ), 17
- United States Atomic Energy Commission : Charges for Uranium-233 and Plutonium, 84
  - Grant of 25,421 dollars to Prof. W. E. Wallace (University of Pittsburgh), to continue an investigation of the application of chemical thermodynamics to study the formation of metallic alloys, 86
  - Training Courses at the Shippingport Atomic Power Station, 153
  - SPERT III achieves criticality at the National Reactor Testing Station, Idaho Falls, 365
  - Grants for Training Courses, 437
  - Availability of Technical Films used at the Geneva Conference on the Peaceful Uses of Atomic Energy, 721
  - Criticality reached by the Transient Reactor Test Facility (TREAT), 862
  - Grants to American Colleges and Universities for Nuclear Training in the Biological Sciences, 1091
  - Grants for Training in Radioisotope Technology, 1641
  - Replacement sheets for Sullivan's Trilinear Chart of Nuclides, 1719
- United States Department of the Air Force (sponsored by the) : Guided Missiles—Operations, Design and Theory, *review*, 210
- United States Department of State : Appointment of Science Officers for American Embassies, 15
- United States National Academy of Sciences : Centennial Gift of 1,000,000 dollars from the Equitable Life Assurance Society of the United States, for the erection of a Hall of the Life Sciences, 1574
  - Election of Dr. Hugh L. Dryden as home secretary, 1575
  - Election of Dr. Roger Adams and Dr. William V. Houston as members of the Council, 1575
  - Election of members, 1575
- United States National Academy of Sciences, and others : International Seminar on the Atomic Mechanisms of Fracture, 514
- United States National Academy of Sciences—National Research Council : Armed Forces—National Research Council Committee on Bio-Astronautics to advise on the biological or medical aspects of space exploration, 651
  - Survey on Tropical Medicine, 863
  - Appointment of Harry Polachek as chairman of the editorial committee of *Mathematical Tables and other Aids to Computation*, 865
  - To study technical assistance programmes to be used by the International Co-operation Administration, 1163
  - Grant of 10,000 dollars from the National Science Foundation, for a Conference on the Design and Conduct of Research Programmes in Weather Modification, 1372
- United States National Academy of Sciences—National Research Council, and others : International Conference on Scientific Information, 147
- United States National Bureau of Standards : Circular No. 594, Preparation, Maintenance and Application of Standards of Radioactivity (W. B. Mann and H. H. Seliger), 1023
- United States National Electronics Conference : Fifteenth Annual, 582, 1094
  - Election of Virgil H. Disney as president, 582
- United States National Foundation (formerly the National Foundation for Infantile Paralysis) : Grant of 73,594 dollars to Dr. Renato Dulbecco (California Institute of Technology), for investigations on virus inheritance in experiments involving polio virus mutations, 224
  - Grant of 33,943 dollars to Prof. Linus Pauling (California Institute of Technology), for investigations on the structure of nucleic acids, 224
- United States National Institute of Mental Health : Grant of 40,360 dollars to Prof. G. J. Wischner, to continue graduate training in clinical psychology, 86
- United States National Institutes of Health (Endocrinology Study Section) : Supplies of Follicle-stimulating Hormone, 865
- United States National Institutes of Health (New York Academy of Sciences and the) : Papers presented at the Conference on the Genetic Concept for the Origin of Cancer (Annals of the New York Academy of Sciences, Vol. 71), 1234
- United States National Museum : Annual Report for 1957-58, 1641
- United States National Research Council (National Academy of Sciences—) : Armed Forces—National Research Council Committee on Bio-Astronautics to advise on the biological or medical aspects of space exploration, 651
  - Survey on Tropical Medicine, 863
  - Appointment of Harry Polachek as chairman of the editorial committee of *Mathematical Tables and other Aids to Computation*, 865
  - To study technical assistance programmes to be used by the International Co-operation Administration, 1163
  - Grant of 10,000 dollars from the National Science Foundation, for a Conference on the Design and Conduct of Research Programmes in Weather Modification, 1372
- United States National Research Council (National Academy of Sciences—), and others : International Conference on Scientific Information, 147
- United States National Science Foundation : Grant of 23,000 dollars to Dr. G. Felsenfeld (University of Pittsburgh), to initiate research on the active site in some copper-carrying proteins, 86
  - Inquiry into the knowledge of foreign languages possessed by American Scientists, 863
  - Establishment of an Office of Social Sciences, 1018
  - Appointment of an Advisory Committee for the Social Sciences, to advise on programmes and policy, 1018
  - Appointment of Albert P. Crary as chief scientist of the Antarctic Research Programme, 1090
  - Request to teachers of science for proposals for the construction of better laboratory equipment for use in schools, 1163
  - Graduate and Post-doctoral Fellowships, 1233
  - Grants for laboratory research, field experiments and conferences on meteorological methods directed toward modification of weather, 1371
  - Publication of the *Science Information News*, Vol. 1, No. 1, 1501
  - Eighth Annual Report for 1957-58, 1577
  - Scientific Research and Development in Colleges and Universities—Expenditure and Manpower, 1953-54, 1717
- United States National Science Foundation, and others : International Conference on Scientific Information, 147
  - International Seminar on the Atomic Mechanisms of Fracture, 154
- United States National Science Foundation (American Institute of Physics, in co-operation with the) : To publish an English translation of the *Astronomical Journal of the Academy of Sciences, U.S.S.R.*, under the title *Soviet Astronomy–AJ*, 1164
- United States National Reliability Award for 1958 awarded to Ralph Brewer, 365
- United States Office of Naval Research : Grant of 41,600 dollars to Dr. T. M. Donahue (University of Pittsburgh), to continue studies on capture-ions and ionization cross-sections of ions and neutral particles, 86
  - Grant of 129,000 dollars to Prof. A. J. Allen (University of Pittsburgh), to continue research on precision scattering of nuclear particles, 86
  - Transfer of 50,000 dollars from the National Science Foundation to the, in support of cloud electrification studies by A. D. Little, Inc., under the direction of Bernard Vonnegut, 1371
- United States Office of Naval Research, and others : International Seminar on the Atomic Mechanisms of Fracture, 154
- United States Office of Naval Research (Information Systems Branch), and the Armour Research Foundation : Interdisciplinary Conference on Self-Organizing Systems, 86
- United States *Pioneer 4*, 720
- Universe : The Astronomer's (Prof. Bart J. Bok), *review* by Sir H. Spencer Jones, 1221
  - The Individual and the (Prof. A. C. B. Lovell), *review* by Dr. R. A. Lyttleton, 1624
  - Man and the, *review* by Dr. R. A. Lyttleton, 1624
  - The Sleepwalkers—a History of Man's Changing Vision of the (Arthur Koestler), *review* by Dr. A. R. Hall, 1419
- Universe at the Beginning of the 'Space Age' (Dr. R. A. Lyttleton), 1019
- Universita di Pisa (Centro per la Vaccinazione Antitubercolare of the Istituto d'Igiene) : International Symposium on Vaccination against Tuberculosis with Non-living Vaccines, 154, 722
- Université de Genève : Nessim Habif Prize for 1959, 1093
- Universities : Admission of Students to, 1723
  - Teaching in the, 1623
- Universities in Britain : Increased Grants for, 507
- Universities Past and Present : The Place of Science in (Rt. Hon. Lord Adrian), 1706
- Universities of the British Commonwealth, Association of : Report of the Executive Council for 1957-58, 1717
  - Report of the Proceedings of the 1958 Home Universities Conference, 1764
- Universities of the Commonwealth : General Trends in Science Teaching in the (Science Masters' Association Discussion on), 1571
- Universities of South Africa : Academic Freedom and the, 1551

- Universities (Colleges and) : Scientific Research and Development in—Expenditure and Manpower, 1953-54 (National Science Foundation), 1717
- Universities (South African) : Register of Current Scientific Research at, 1957 (South African Council for Scientific and Industrial Research), 366
- University : The Rockefeller Institute, New York—a New Graduate (L. J. F. Brimble), 1629
- University of Aberdeen : Appointment of Dr. J. R. Raeburn to the Strathcona–Fordyce chair of agriculture, 862
  - Retirement of Prof. J. R. Matthews from the chair of botany, 1640
  - Appointment of Dr. P. E. Weatherley to the chair of botany, 1640
- University of Adelaide : Appointment of Dr. D. Rowley as professor of bacteriology, 1716
- University of Birmingham : Gift of £100,000 from Joseph Lucas, Ltd., for building a hall of residence for graduate students in engineering, 153
  - Title of reader in experimental pathology conferred on Dr. K. W. Walton, 153
  - Title of reader in mathematical economics conferred on Dr. F. H. Hahn, 153
  - Appointment of Dr. D. B. Idle as lecturer in botany, 153
  - Appointment of Dr. B. John as lecturer in cytology in the Department of Genetics, 153
  - Appointment of Dr. R. G. O. Kekwick as lecturer in malting and brewing and applied biochemistry, 153
  - Appointment of G. S. Pittaway as lecturer in chemical engineering, 438
  - Appointment of Dr. W. T. Roberts as lecturer in industrial metallurgy, 438
  - Appointment of Dr. A. L. Haigh as lecturer in physiology, 438
  - Appointment of Dr. J. C. Tatlow to a new chair of organic chemistry, 791
  - Appointment of Dr. N. A. Dudley to the chair of engineering production, 791
  - Conference on the Electric Arc in Welding, 1164
  - Contribution of £140,000 for the purpose of enlarging and developing the Graduate School of Highway and Traffic Engineering, 1571
  - Grant of £12,000 from the Nuffield Foundation, towards the cost of an investigation to be carried out in the Research Department of the Institute of Education into the placing, counselling and teaching of part-time students in a local technical college, 1571
  - Appointment of Dr. J. G. Valatin to a senior lectureship in mathematical physics, 1571
  - Appointment of Dr. G. W. Greenlees to a senior lectureship in physics, 1571
  - Appointment of R. H. Knight to a senior lectureship in physics, 1571
  - Appointment of Dr. D. H. Whiffen to a senior lectureship in chemistry, 1571
  - Appointment of Dr. V. G. Welsby to a senior lectureship in electrical engineering, 1571
  - Appointment of Dr. V. Kondic to a senior lectureship in industrial metallurgy, 1571
  - Appointment of P. T. Geach to a senior lectureship in philosophy, 1571
  - Appointment of Dr. J. B. Finean to a senior lectureship in medical biochemistry and pharmacology, 1571
  - Appointment of Dr. H. B. van der Raay as lecturer in physics, 1571
  - Appointment of Dr. R. W. Smith as lecturer in physical metallurgy, 1571
  - Appointment of J. A. Nelder as a recognised lecturer in the Department of Pure Mathematics, 1571
  - Report of the Vice-Chancellor and Principal for 1958, 1723
- University of Birmingham (Electrical Engineering Department) : Residential Conference on Dielectric Devices, 1783
  - Residential Conference on Modern Network Theory, 1783
- University of Bristol : Science and Technology in the—Opening of Queen's Building (Prof. J. F. Baker), 217
  - Appointment of Margaret Randall as organic chemist at the Long Ashton Research Station, 581
  - Grant of £8,341 from the British Empire Cancer Campaign, for cancer research to be carried out in the Departments of Pathology, Physiology and Surgery, 581
  - Grant of £2,500 from the Department of Scientific and Industrial Research, as a renewal of grant for Prof. C. F. Powell's work in the Department of Physics, 581
  - Grant of £1,492 from the Agricultural Research Council to the Department of Veterinary Medicine, for research on experimental transmission of lymphoid leukosis, 581
  - Grant of £1,172 from the Agricultural Research Council to the Department of Physiology, for research on bovine acetonaemia, 581
  - Grant of £2,075 from the Department of Scientific and Industrial Research to the Department of Physics, for research in cosmic rays, under Prof. C. F. Powell, 1024
  - Appointment of D. F. Gibbs as senior lecturer in physics, 1024
  - Appointment of Dr. R. J. Fitzpatrick as senior lecturer in veterinary pharmacology, 1024
  - Annual Report of the Agricultural and Horticultural Research Station (the National Fruit and Cider Institute), Long Ashton, Bristol, 1957, with Index, 1953-57, 1507
- University of Calcutta : *The Nucleus*, an International Journal of Cytology and allied topics, Vol. 1, No. 1, 366
- University of Cambridge : Election to the Kenneth Craik Research Award by the Council of St. John's College, 18
  - Sir John Cockcroft to become the first Master of Churchill College, Cambridge, 294
  - Recognition of Churchill College as an approved foundation of the University, 349
  - Election of Prof. N. F. Mott as Master of Gonville and Caius College, 438
  - Retirement of Sir James Gray from the chair of zoology, 506
  - Appointment of Prof. C. F. A. Pantin to the chair of zoology, 506
  - Retirement of Prof. T. R. C. Fox from the Shell chair of chemical engineering, 719
  - Appointment of Prof. P. V. Danckwerts to the Shell chair of chemical engineering, 719
  - Exhibition in the Engineering Laboratory to commemorate the centenary of the death of Isambard Kingdom Brunel, 1164
- University of Dublin : Appointment of Prof. J. Brontë Gatenby to a new research chair in cytology in Trinity College, Dublin, 1716
  - Appointment of Dr. J. N. R. Grainger to the chair of zoology and comparative anatomy in Trinity College, Dublin, 1716
- University of Durham : Visit of Prof. E. Lederer to King's College, Newcastle-upon-Tyne, 438
  - Retirement of Prof. W. W. Rogosinski from the chair of pure mathematics at King's College, Newcastle-upon-Tyne, 1365
  - Appointment of F. F. Bonsall to the chair of pure mathematics at King's College, Newcastle-upon-Tyne, 1365
  - Appointment of Prof. N. J. Petch to the chair of metallurgy in King's College, Newcastle-upon-Tyne, 1643
- University of Edinburgh : Retirement of Prof. J. P. Kendall from the chair of chemistry, 151
  - Appointment of Dr. T. L. Cottrell to the chair of chemistry, 151
  - Retirement of Prof. G. F. Marrian from the chair of chemistry in relation to medicine, 1567
  - Appointment of Dr. R. B. Fisher to the chair of chemistry in relation to medicine, 1567
- University of Exeter : Appointment of Dr. Scott Simpson as professor of geology, 1432
- University of Florida : Annual Report of the Florida State Museum for 1957-58, 1433
- University of Leeds : Appointment of J. Trenaman to the Granada Television Research Fellowship, 153
  - Annual Report of the Librarian for 1957-58, 1021
  - Appointment of Dr. A. Ralston as temporary lecturer in the Department of Mathematics (Electronic Computing Laboratory), 1024
  - Appointment of Dr. W. Rigby as lecturer in the Department of Organic Chemistry, 1024
  - Appointment of Dr. F. H. J. Cornish as lecturer in applied mathematics, 1024
- University of Leicester : Appointment of Prof. P. C. Sylvester-Bradley to the chair of geology, 1230
- University of Liverpool : Sherrington Lectures, 4, Sherrington—Physiologist, Philosopher and Poet (Rt. Hon. Lord Cohen of Birkenhead), *review* by Prof. K. J. Franklin, 209
  - Conference on Mathematics, 368
  - Appointment of P. E. Doak as lecturer in applied mathematics, 581
  - Appointment of S. L. Dixon as lecturer in mechanical engineering, 581
  - Appointment of D. Allan as lecturer in applied veterinary pathology, 581
- University of London : Scholarships in Mathematics for Courses in Statistics and Computational Methods (London School of Economics and Political Science), 85
  - Title of reader in plant biochemistry in the University (at King's College) conferred on Dr. D. D. Davies, 86
  - Title of reader in chemical pharmacology in the University (at University College) conferred on Dr. J. L. Mongar, 86
  - Appointment of Dr. Helen K. Porter to the chair of plant physiology in the Imperial College of Science and Technology, 220
  - Appointment of Dr. J. A. Laing to the Courtauld chair of animal husbandry at the Royal Veterinary College, 365
  - Title of professor of physiology in the University (at University College) conferred on Dr. J. A. B. Gray, 368
  - Title of reader in physics in the University (at University College) conferred on Dr. R. L. F. Boyd, 368
  - Title of reader in political economy in the University (at University College) conferred on W. J. Corlett, 368
  - Appointment of Dr. M. J. Seaton to the University readership in physics at University College, 368
  - Fifty-first Annual Report of the Governing Body of the Imperial College of Science and Technology (1957-58), 651
  - Appointment of Dr. A. R. Boothroyd to the University readership in electronics at the Imperial College of Science and Technology, 794
  - Title of reader in crystallography in the University (at Birkbeck College) conferred on Dr. C. H. Carlisle, 794
  - Appointment of Dr. R. F. Saxe to the University readership in nuclear engineering at Queen Mary College, 794
  - Appointment of Dr. B. J. Mason (Imperial College of Science and Technology) as visiting professor of meteorology by the University of California, 794
  - Symposium at the Queen Mary College on Oxidation, 865
  - Postgraduate Course in Biochemical Engineering at University College, London, 933
  - Photoelasticity at University College, London, 934
  - Nuclear Technology at the Imperial College of Science and Technology, 1091
  - Elections to Fellowship of the Imperial College of Science and Technology, 1161
  - Jubilee Commemorative Exhibition of Photoelasticity held in University College, 1495
  - Appointment of Dr. F. G. H. Blyth as reader in engineering geology at the Imperial College of Science and Technology, 1571
  - Appointment of Dr. E. H. Brown as reader in structural analysis at the Imperial College of Science and Technology, 1571
  - Appointment of Dr. J. Edelman as reader in enzymology at the Imperial College of Science and Technology, 1571
  - Appointment of Dr. S. Eilon as reader in production engineering at the Imperial College of Science and Technology, 1571
  - Annual Report of University College for 1957-58, 1642
- University of Manchester : Cost of the Jodrell Bank Radio Telescope, 862
  - Retirement of Prof. F. C. Thompson from the chair of metallurgy, 1639
  - Appointment of C. R. Tottle to the chair of metallurgy, 1640
  - Annual Report for 1957-58 of the Manchester Museum (Dr. D. E. Owen), 1718
- University of Nottingham : Offer of £100,000 from Rolls-Royce, Ltd., to endow the Hives chair of thermo-dynamics, 224
- University of Oxford : Retirement of Sir Harry Champion as professor of forestry, 578
  - Appointment of M. V. Laurie as professor of forestry, 578
  - Retirement of Prof. J. H. Burn from the chair of pharmacology, 790
  - Appointment of Prof. W. D. M. Paton to the chair of pharmacology, 790
  - Retirement of Prof. H. H. Price from the Wykeham chair of logic, 792
  - Appointment of Prof. A. J. Ayer to the Wykeham chair of logic, 792
  - Department of Human Anatomy—New Buildings (Dr. G. Weddell), 1572
- University of Oxford Tanganyika Expedition (B. E. Juniper), 726
- University of Pittsburgh : Grants awarded to the Division of the Natural Sciences, 86

University of Saskatchewan : Retirement of Prof. W. E. Lovell as head of the Department of Electrical Engineering, 1302
  Appointment of N. F. Moody as professor of electrical engineering, 1302
University of Sheffield : Grant of more than £15,000 from the Department of Scientific and Industrial Research to the Department of Fuel Technology and Chemical Engineering, for the study of the formation and combustion of coal smoke, 794
  Grant of £6,000 from the Department of Scientific and Industrial Research to the School of Social Studies, to investigate the transition to work of boys and girls from secondary modern schools in the Sheffield area, 794
  Grant of £30,500 from the Department of Scientific and Industrial Research to the Department of Electrical Engineering, for the study of almost fully ionized gases by millimetre wave-probe techniques, 794
  Appointment of C. L. Kirk as lecturer in the Postgraduate Department of Applied Mechanics, 1024
  Appointment of M. Cable as lecturer in glass technology, 1024
  Appointment of C. A. Fisher to the chair of geography, 1091
University of Uppsala, in collaboration with the Swedish National Committee for Physics : Fourth International Conference on Ionization Phenomena in Gases, 1164
University of Western Australia : Appointment of Dr. D. E. White to the chair of organic chemistry, 578
University of Wisconsin : Mathematics Research Center, United States Army, Symposium on Boundary Problems in Differential Equations held at the, 224
University of Wisconsin Medical School : Proceedings of a Conference held in 1957 on Latency and Masking in Viral and Rickettsial Infections (edited by Duard L. Walker, Robert P. Hanson and Alfred S. Evans), *review* by Dr. Kenneth M. Smith, 71
University of the Witwatersrand : Papers relating to the Interview between the University Council's Deputation and the Hon. the Minister of Education, Arts and Science on 1st April, 1957, on the matter of the Separate University Education Bill, 1552
University, Australian National : Appointment of Dr. A. G. Ogston to the chair of physical biochemistry, 151
  To set up a Field Station for Astronomy, 1091
University (Agricultural), Wageningen (under the auspices of the Comité Européen de Zoologie Agricole and the) : Proceedings of a Symposium on Insect and Food-plant (Wageningen, 1957), *review* by Dr. C. J. Banks, 1767
University (Middle East Technical), Ankara : Approval of the charter, 1571
University (Nigeria's) : The Birth of (Dr. Kenneth Mellanby), *review* by Sir Eric Ashby, 137
University (Technical), Delft : Honorary degree of doctor of technical science conferred on Sir John Cockcroft, 154
University College, Canberra : Appointment of Prof. J. D. Smith to the chair of zoology, 648
University College, Ibadan, *review* by Sir Eric Ashby, 137
University College, London : Title of reader in chemical pharmacology in the University of London conferred on Dr. J. L. Mongar, 86
  Title of professor of physiology in the University of London conferred on Dr. J. A. B. Gray, 368
  Title of reader in physics in the University of London conferred on Dr. R. L. F. Boyd, 368
  Title of reader in political economy in the University of London conferred on W. J. Corlett, 368
  Appointment of Dr. M. J. Seaton to the University of London readership in physics, 368
  Postgraduate Course in Biochemical Engineering, 933
  Photoelasticity at, 934
  Jubilee Commemorative Exhibition of Photoelasticity, 1495
  Annual Report for 1957-58, 1642
University College of North Staffordshire : Appointment of E. M. Hugh-Jones as professor of economics, 1783
  Appointment of A. Eden as lecturer in education, and women's warden, 1783
  Appointment of Dr. V. C. Ewing as lecturer in chemistry, 1783
  Appointment of M. F. Newman as assistant lecturer in mathematics, 1783
University College of Rhodesia and Nyasaland : Appointment of D. J. Eve as lecturer in inorganic and physical chemistry, 438
University College of Sussex : Appointment of J. S. Fulton as vice-chancellor, 582
University Grants Committee : Appointment of Dr. Kitty Anderson, Prof. Asa Briggs, Prof. F. A. Vick and Dr. K. C. Wheare as members, 86
University Research in the United States, 1717
University Support, 1958-59 : Report on (National Research Council of Canada), 1642
Unpleasantness of Distorted Sounds—a Criterion derived from the Distortion Spectrum (E. R. Wigan), 1320
Unrau, Dr. J. : Wheat Genetics, 26
  Appointed a member of the National Research Council of Canada, 1161
Unusual Outgrowths from Secondary Follicles in Soay Sheep : Some (Dr. M. L. Ryder), 1831
Unusual Strain of *Escherichia coli* in Septicaemia as an example of the Transformative Effect of Symbiosis (Dr. R. Reitler, M. Teicher and Dr. A. Valero), 339
Unwin, R. S. : Movement of Auroral Echoes and the Magnetic Disturbance Current System, 1044
Upper Air Temperature over the World (N. Goldie, J. G. Moore and E. E. Austin), 864
Upper Atmosphere : Density of the (Dr. George Grimminger), 811
  Irregularities in the Density of the—Results from Satellites (D. G. King-Hele and D. M. C. Walker), 527
  Origin of Sodium and Lithium in the (Dr. T. M. Donahue), 1480
Upper-Atmosphere Lithium Atoms responsible for the New Twilight Airglow at 6708 A. : Origin of (D. R. Barber), 384
Upper Devonian Spirifers of the Catskill Delta, *review* by Dr. H. M. Muir-Wood, 959
Uppin, B. I., and others : Disturbance in the Pattern of Serum Proteins in Experimental Atherosclerosis and its Prevention, 894
Upslope (Shorewards), of the Layer of Minimum Oxygen off Bombay—its Influence on Marine Biology, especially Fisheries (Dr. J. N. Carruthers, S. S. Gogate, J. R. Naidu and T. Laevastu), 1084
Uptake of Glucose : Influence of Ions on the, and the Effect of Insulin on it by Rat Diaphragm (Dr. Gangagobinda Bhattacharya), 324
Uptake of Strontium by Pasture Plants and its Possible Significance in relation to the Fall-out of Strontium-90 (Dr. P. B. Vose and Dr. H. V. Koontz), 1447 ; (Dr. R. Scott Russell and Dr. R. J. Garner), 1806
Uptake (Iodine), of the Thyroid Gland : Effect of Monofluorosulphonate, Difluorophosphate and Fluoroborate Ions on the (Dr. M. Anbar, S. Guttmann and Z. Lewitus), 1517
Uptake (Iodine and Copper), by Soil Organic Matter (J. M. Northmore), 1309
Uraniferous and Non-Uraniferous Soils : Comparative Sensitivity to Radiation of Seeds from a Wild Plant grown on (Dr. D. J. Mewissen, J. Damblon and Prof. Z. M. Bacq), 1449
Uranium in Fused Sodium Fluoride : Nature of Fluorescence of (Haydée le Roux), 1180
Uranium in the United Kingdom : Refining of (D. P. Hamilton), 786
Uranium and Thorium (L. Grainer), *review* by G. R. Hall, 962
Uranium and Thorium Disilicides : Beta-Polymorphs of (A. Brown and J. J. Norreys), 673
Uranium (Niobium–Zirconium–Thorium–) and Rare-Earth Minerals from the Pegmatites of South Harris, Outer Hebrides (Dr. O. von Knorring and R. Dearnley), 255
Uranium-233 and Plutonium : Charges for (United States Atomic Energy Commission), 84
Uranium Oxide : Refractive Index of, produced by Anodic Oxidation (A. E. Stebbens and Dr. L. L. Shreir), 1113
Urea from Arginine : Formation of, in the Brain of the Living Rat (Michael B. Sporn, Wesley Dingman, Alfred Defalco and Robert K. Davies), 1520
Urey, Prof. Harold C. : Chemical Composition of Tektites, 1114
Uri, Dr. Joseph : New Types of Salting-out Paper Chromatograms of Antibiotics, 1188
Uric Acid Production (Excessive), in the Human induced by 2-Ethylamino-1,3,4-thiadiazole (Dr. J. E. Seegmiller, Arthur I. Grayzel and Lois Liddle), 1463
Urinary Excretion of β-Amino-*iso*butyric Acid in Eskimo and Indian Populations of Alaska (Dr. A. C. Allison, Dr. B. S. Blumberg and Dr. S. M. Gartler), 118
Urinary Œstrogens (Human) : A Simplified Physico-chemical Method for Determination of (Dr. Tawfik El-Attar), 1607
Urine from Irradiated Humans : An Alteration in the Excretion of Free Serine in (Dr. Arthur L. Kretchmar), 1809
Urine (Human) : Excretion of Catechol in (Prof. U. S. von Euler and F. Lishajko), 1123
Urine (Normal) : Acid Mucopolysaccharides of (Dr. J. F. Heremans, J. P. Vaerman and M. Th. Heremans), 1606
Urine (Stored) : Changes in Œstrogen Titre in (Y. A. Leon, R. D. Bulbrook and F. C. Greenwood), 189
Urobilinoid Pigments : Conjugated Forms of (I. L. Kahán and A. Kahán), 463
Urodeles : Delayed Denervation and Accessory Limb Formation in (Dr. Laurens N. Ruben), 765
Uronate Oxidation by Phytopathogenic Pseudomonads (Wendell W. Kilgore and Prof. Mortimer P. Starr), 1412
Urwick, Col. L. : Personnel Management in Perspective—Suggestions on the Correct Place of Personnel Activities in Business Organization, 1372
Urwick, Lyndall F. : Is Management a Profession ?, 419
Urwick Medal for Management Studies (Polytechnic Management Association), 1643
Usborne Memorial Prize of the Royal Aeronautical Society awarded to Dr. J. S. Przemieniecki, 1649
Use : Of What, is Acoustics to the Musician ? (Acoustics Group of the Physical Society Discussion on), 1293
Use of Approximate Wave Functions for Extrapolation to True Energy Values (P. G. Dickens, Dr. J. W. Linnett and D. Schofield), 175
Use of Exponential Dilution Series for the Study of Antibiotic Combinations: Application of Logarithms to the Base 2 in the (H. J. Oskam and A. Koelman), 840
Use of Grass : Chemical Aspects of the Production and (Dublin and District Section and the Agriculture Group of the Society of Chemical Industry Symposium on), 1783
Use of Katharometers in Gas Chromatography (Murray Eden, Arthur Karmen and John L. Stephenson), 1322
Use of Nuclear Energy for the European Mode of Life : Consequences of the (Council for Europe Competition for a thesis on), 509
Use of Radioactive Tracers in Studies of the Shoot Apex (Dr. A. Booth, Dr. E. G. Cutter, Dr. S. N. Postlethwait, B. R. Voeller and Prof. P. F. Wareing), 1580
Use of Synthetic Quartz Crystals as a Support for Specimens in Powder Photographs (Hitosi Hagihara, Shuji Yamashita and Akitsu Takeda), 1666
Use of 'Tremorine' for Screening Anti-Parkinsonian Drugs (E. M. Trautner and S. Gershon), 1462
Uses (Peacetime) : On Nuclear Energy—its Potential for (Dr. Donald J. Hughes), *review* by Prof. G. O. Jones, 1077
Uses (Scientific), of Earth Satellites (edited by Prof. James A. Van Allen), second edition, *review* by Dr. E. B. Armstrong, 963
U.S.S.R. : Applied Analysis in the, *review* by Prof. T. A. A. Broadbent, 1766
Uterine Cervix : Virus-like Particles in Chemically induced Carcinoma of the (Dr. M. Thiery, Dr. M. De Groodt, Prof. F. De Room, Prof. M. Sebruyns and Dr. A. Lagasse), 694
Utilization of Alcohol in Germinating Pea Seedlings (E. A. Cossins and Dr. E. R. Turner), 1599
Utilization of the Carboxyl Group of Glycine for the Synthesis of Amino-Acids of Silk by *Bombyx mori*, (Dr. S. Bricteux-Grégoire, W. G. Verly and Prof. M. Florkin), *erratum*, 294
Utilization of Inorganic Sulphate by Baker's Yeast (Dr. A. Kleinzeller, A. Kotyk and L. Kováč), 1402
Utilization of Nutritive Spheres in the *Proteus* Group of *Amoebae* (Sister Monica Taylor), 1458
Utilization of Thymidine labelled with Tritium during Chromosomal Reproduction : Effect of Colchicine on the (L. F. La Cour and Dr. S. R. Pelc), 1455
Uttley, Dr. A. M. : The Mechanization of Thought Processes (A 'Conditional Probability Computer'), 225

Uvarov, Dr. B. P. : Retirement from the directorship of the Anti-Locust Research Centre, 1160 ; work of, 1160

VACCINATION against Tuberculosis with Non-living Vaccines (Centro per la Vaccinazione Antitubercolare of the Istituto d'Igiene dell'Universita di Pisa International Symposium on), 154, 722
Vaccines (Non-living) : Vaccination against Tuberculosis with (Centro per la Vaccinazione Antitubercolare of the Istituto d'Igiene dell'Universita di Pisa International Symposium on), 154, 722
Vacquier, Dr. Victor : Measurement of Horizontal Displacement along Faults in the Ocean Floor, 452
Vacua (High) : Current Developments in the Production of (Institute of Physics Symposium on), 368
Vacuole-containing Bodies of the Gastric Parietal Cell : Functional Changes in the (A. D. Hally), 408
Vacuum Arc Cathode Spots: An Effect of Oxide Layers on the Behaviour of (H. Wroe and R. H. Alderson), 1544
Vaerman, J. P., and others : Acid Mucopolysaccharides of Normal Urine, 1606
Vail, J. W. (Smith, Dr. A., and) : Relationship between Salinity and Breeding of *Anopheles gambiae* in North-Eastern Tanganyika, 1203
Valatin, Dr. J. G. : Problems of Collective Motion in Physics (The Bardeen–Cooper–Schrieffer Theory of Superconductivity), 866
  Appointed to a senior lectureship in mathematical physics in the University of Birmingham, 1571
Vale, E. (edited by) : Snowdonia (National Parks Guide No. 2), 721
Valentine, Dr. Robin C. : The Possibility of Distinguishing between Substances shown on Electron Micrographs, 761
Valero, Dr. A., and others : An Unusual Strain of *Escherichia coli* in Septicaemia as an example of the Transformative Effect of Symbiosis, 339
Validity of Clapeyron's Equation for Phase Equilibria involving Clathrates. (Dr. J. H. van der Waals and Dr. J. C. Platteeuw), 462 ; (Prof. R. M. Barrer), 463
Vallance, W. S., and McClymont, Prof. G. L. : Depression in Percentage of Milk Fat by Parenteral Glucose Infusion and Glycerol Feeding, 466
Vallarino, L. M. : Co-ordination Chemistry (*Isocyanides of Rhodium (I)*), 1785
Vallee, Prof. Bert L., and others : Does Rhodopsin contain a Trace Metal ?, 28
Vallet, L. (Curzon, Dr. G., and) : Preparation of Caeruloplasmin from the G2 Fraction of Human Plasma, 751
Vallois, Prof. Henri-V. : La Grotte de Fontéchevade, Deuxième partie, Anthropologie (Archives de l'Institut de Paléontologie Humaine, Mémoire 29), 1369
  Awarded a Viking Fund Medal and Award of 1,000 dollars by the Wenner-Gren Foundation for Anthropological Research, 1434
Valsecchi, A., and others : Reserpine Derivatives with Specific Hypotensive or Sedative Activity, 1273
Valtat, B. : Antarctic Meteorology, 1503
Value of its Differential Fungicidal Effect : 'Karathane'—the, in relation to Mildew and Yellow Rust of Wheat (D. A. Doling and Shirley Hepple), 622
Value of Reynolds Number at the Transition from Streamline to Turbulent Flow : Variations in the (Dr. P. J. Isaac, I. B. Williams and Dr. W. M. Jones), 531
Value in the Social Sciences : Fact and, *review* by Prof. T. S. Simey, 4
Value in Social Theory (Dr. Gunmar Myrdal), *review* by Prof. T. S. Simey, 4
Value (A New), for the Earth's Flattening, derived from Measurements of Satellite Orbits (D. G. King-Hele and R. H. Merson), 881
Values (Heat-Flow), from the South-Eastern Pacific (Dr. R. Von Herzen), 882
Values (Threshold), for Taste in Monozygotic Twin Calves (Dr. F. R. Bell and H. L. Williams), 345
Valve Design Technique : Modern (English Electric Valve Co., Ltd., Exhibition of), 224
Valzelli, L., and others : Reserpine Derivatives with Specific Hypotensive or Sedative Activity, 1273
Van Allen, Prof. James A. : Elected a member of the United States National Academy of Sciences, 1575
Van Allen, Prof. James A. (edited by) : Scientific Uses of Earth Satellites, second edition, *review* by Dr. E. B. Armstrong, 963
Van Allen, Prof. James A., and Frank, Louis A. : Radiation around the Earth to a Radial Distance of 107,400 km., 430
Van Allen Radiation of Solar Origin (Prof. Paul J. Kellogg), 1295
Van Baalen, Dr. C., and others : Characterization of a Second Yellow Compound from *Drosophila melanogaster*, 1269
van Dorn, Dr. William G. : Origin of the Lunar Craters and Maria, 737
van Geelen, Dr. B. (Overbeek, Prof. J. Th. G., and) : Electrical Double Layer in Colloid Science (Electrophoresis and Electrical Transport in Solutions of Polymethacrylic Acid), 78
Van Gent, C. M., and others : Composition of Lipids isolated from the Aorta, Coronary Arteries and Circulus Willisii of Atherosclerotic Individuals, 47
Van Leeuwen, Gerda, and others : Granulocyte Precipitins of Human Tissues and Activated Sera, 330
van Loon, H. : Antarctic Meteorology, 1504
Van Mieghem, J. : Antarctic Meteorology (Synoptic Analysis and Forecasting), 1503
van Someren, Dr. Vernon D., and Whitehead, Peter J. P. : Records of Young Eels in Kenya Rivers, 950
  Methods of Marking *Tilapia* Spp. (Pisces : Cichlidae), 1747
Van Steveninck, R. F. M. : Abscission-Accelerators in Lupins (*Lupinus luteus* L.), 1246
van Zyl, C. : Hydrogen Liquefaction and Associated Techniques (Application of Liquid Hydrogen to Pure Research), 1505
Van de Kerckhove, D. : Content of Deoxyribonucleic Acid of the Germinal Vesicle of the Primary Oocyte in the Rabbit, 329
van den Brenk, H. A. S., and Moore, Ruth : Effect of High Oxygen Pressure on the Protective Action of Cystamine and 5-Hydroxytryptamine in Irradiated Rats, 1530
Van der Paauw, Dr. F. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
van der Raay, Dr. H. B. : Appointed lecturer in physics at the University of Birmingham, 1571
van der Veen, Dr. J., and Heyen, C. F. A. : Lens Cells of the Calf in Continuous Culture, 1137
van der Waals, Dr. J. H., and Platteeuw, Dr. J. C. : Validity of Clapeyron's Equation for Phase Equilibria involving Clathrates, 462
van der Ziel, Prof. Aldert : Solid State Physical Electronics, *review* by Dr. G. T. Wright, 1356
Vanadium : Effects of, upon Liver Coenzyme *A* in Rats (E. Mascitelli-Coriandoli and C. Citterio), 1527
Vandervell, G. A. : Gift of £150,000 to the Royal College of Surgeons, for the endowment of a chair of pharmacology, 16
Vänngård, Dr. Tore, and others : An Electron Spin Resonance Study of the State of Copper in Fungal Laccase, 321
Vanterpool, T. C. : Oospore Germination in *Albugo candida*, 1718
'Vapour Toxicity' of Solid Insecticides (P. Gerolt), 1121
Varga, M., and Köves, E. : Phenolic Acids as Growth and Germination Inhibitors in Dry Fruits, 401
Vargha, L., and Horváth, T. : 1,6-Di-(2-Bromoethylamino)-1,6-Dideoxy-D-Mannitol Dihydrobromide, a New Cytostatic Agent, 394
Variability of Content of Deoxyribonucleic Acid in *L*-Strain Fibroblasts (Rolla B. Hill, jun., Klaus G. Bensch, Stanley Simbonis and Prof. Donald W. King), 1818
Variable Long-range Order in nearly Anhydrous Gamma Alumina : Evidence for a (Prof. G. W. Brindley and Dr. M. Nakahira), 1620
Variables related to Human Breast Cancer (A. Elving Anderson, Harold O. Goodman and Sheldon C. Reed), *review* by Dr. L. Foulds, 955
Variant (New), of Human Foetal Haemoglobin (Dr. Phaedon Fessas, N. Mastrokalos and G. Fostiropoulos), 30 ; (Dr. F. Vella, Dr. J. A. M. Ager and Dr. H. Lehmnan), 31
Variant (A Rare), of B in a Human Blood Sample belonging to Group AB (Dr. J. Moullec and Dr. P. Le Chevrel), 1733
Variation in Etch Behaviour of Jacobsite with Different Cell Dimensions (Dr. Supriya Roy), 1256
Variation of Sensitivity to Ionizing Radiation with Age (M. L. Crosfill, Patricia J. Lindop and Prof. J. Rotblat), 1729
Variation of the Signal Strength from 1958 $\delta 2$ (*Sputnik* 3) : A Type of (Ludwik Liszka), 1383
Variation (World), in Annual Rainfall (J. F. Griffiths), 132
Variation and Heredity (Dr. H. Kalmus), *review* by Dr. C. E. Ford, 1354
Variations in the Value of Reynolds Number at the Transition from Streamline to Turbulent Flow (Dr. P. J. Isaac, I. B. Williams and Dr. W. M. Jones), 531
Variations (Independent), in Stimulus and Response Probability : Effects of (P. M. A. Rabbit), 1212
Variations (Seasonal), in the Pituitary Gland of the Ferret (Dr. R. L. Holmes), 1521
Varietal Resistance to Spray Damage in Barley (J. Desmond Hayes), 551
Varley, Prof. G. C. : Density-Dependent Factors in Ecology, 911
Varma, T. N. R., and others : Effects of Starvation and Diphenylamine on Carotenoids in *Phycomyces*, 188
Vascular Lesions in Ageing Rats : Sex Incidence of, in relation to Previous Pregnancies (Prof. Theodore Gillman and Michael Hathorn), 1139
Vascular Wilt Disease of Bananas caused by *Fusarium oxysporum* f. *cubense* (R. H. Stover), 1782
Vaska, L. : Co-ordination Chemistry (Phosphines of Osmium (I)), 1785
Vasudevan, Dr. P. : Awarded the Andrew Carnegie Silver Medal for 1958 of the Iron and Steel Institute, 930
Vaughan, F., and Dinsdale, A. : Adsorption and Desorption of Moisture in Fired Ceramic Materials, 600
Vaughan, Janet M., and others : Differential Distribution of Radioactive Strontium and Yttrium in the Tissues of the Rabbit's Eye, 802
Vaughan, M. F. : Cellulose Acetate Membranes suitable for Osmotic Measurements, 43
Vaughan, T. B., and others : Interfacial Phenomena (Work of the J. Lucas Research Group on Electro-deposition), 1098
Vaux, R. : Nuclear Engineering Monographs, *review*, 1149
Vegetation : Humid Tropics (Unesco and the Council for Sciences of Indonesia Symposium on), 795
Vegetation of the Humid Tropics (Dr. E. J. H. Corner), 795
Vegetative Cells and Spores of *Bacillus cereus* and *Bacillus megaterium* : Differences in Cyst(e)ine Content between (Vladimír Vinter), 998
Vein Blood (Spermatic) : Androgens in the Bovine Testis and (H. R. Lindner), 1605
Vella, Dr. F., and others : New Variant of Human Foetal Haemoglobin, 31
Velocity of Light : A Proposed Method for the Measurement of the (Dr. J. H. Sanders), 312
Velocity of a Piston in a Hypersonic Gun Tunnel : A Microwave Method of determining the Displacement and (L. Pennelegion), 246
Vène, J. : Co-ordination Chemistry (Reactivity of the Cadmium Compounds), 1785
Venezuelans (Native) : Distribution of Haptoglobins in (Dr. M. L. Gallango de Rodríguez and Dr. Tulio Arends), 1465
Vennart, J. : Bone and Radiostrontium, *review*, 965
Venom of *Bothrops jararaca* : Blood-clotting Activity of the (Dr. Olga B. Henriques, Dr. Fajga R. Mandelbaum and Dr. S. B. Henriques), 114
Venoms (Scorpion) : Distribution of 5-Hydroxytryptamine in (Dr. K. R. Adam and Dr. C. Weiss), 1398
Ventura, U., and others : Effect of Toxopyrimidine on Glutamic-decarboxylase and Glutamic-oxalacetic Transaminase of Rat Brain, 1126
Venture to the Arctic (edited by R. A. Hamilton), *review* by Dr. T. E. Armstrong, 1081
Verhulst, Michel (edited by Davies, Max, and) : Operational Research in Practice—Report of a NATO Conference, *review* by Dr. Cecil Gordon, 424
Verification of General Relativity by means of Artificial Planets (John J. Gilvarry), 666
Verly, W. G., and others : Utilization of the Carboxyl Group of Glycine for the Synthesis of the Amino-Acids of Silk by *Bombyx mori*, *erratum*, 294
Vernon, C. A., and others : Glutamic–Aspartic Transaminase of Pig Heart Muscle, 1187
Vernon, Prof. M. D. : Measurement of Personality, *review*, 140
Vertebrae in Fish : Influence of Temperature on the Number of (Dr. Yasuo Itazawa), 1408
Vertebrate Lumi- and Meta-Rhodopsins (Dr. Ruth Hubbard, Paul K. Brown and Dr. Allen Kropf), (Action of Light on Visual Pigments), 442
Verzár, F. (herausgegeben von) : Experimentelle Alternsforschung—Symposium der Europäischen Abteilung des Biologischen und Medizinischen Forschungskomitees der Internationalen Gerontologischen Gesellschaft, Basel, 1956, *review* by Prof. P. L. Krohn, 777

Verzele, Prof. M. : Adaptation of a Photometer for the Direct Recording of Column Chromatograms, 604
Veselovsky, V. S. : The Nature of Coal (Chemical Nature of Caustobioliths from the Point of View of Genesis), 1438
Vesicle (Germinal), of the Primary Oocyte in the Rabbit : Content of Deoxyribonucleic Acid of the (D. Van de Kerckhove), 329
Vesicle (Seminal), of the Mouse : Incorporation of Labelled Thymidine in the (Dr. S. R. Pelc and P. B. Gahan), 335
Vestermark, Anders (Boström, Dr. Harry, and) : Ester Sulphate Pattern of Rabbit Bile, 1593
Veterinary Association, Inc., New Zealand (prepared by the Technical Committee of the) : Diseases of Domestic Animals in New Zealand, *review* by Dr. J. N. Oldham, 967
Veterinary College, Royal : Appointment of Dr. J. A. Laing to the Courtauld chair of animal husbandry, 365
Veterinary Science : Advances in (edited by C. A. Brandly and E. L. Jungherr), Vol. 4, *review* by Prof. H. Burrow, 1555
Vibration : New Techniques in the Analysis of Noise and (Acoustics Group of the Physical Society and the Institute of Physics Symposium on), 438, 794
Vibration in Diatomic Band Spectra : Changes in Transition Probability due to the Interaction of Rotation and (R. C. M. Learner and Dr. A. G. Gaydon), 242
Vibrations (Ultrasonic), at 10,000 Megacycles (Dr. E. H. Jackson), 1570
Vibrato and the Control Loop in Singing : Nature of the (Dr. J. A. Deutsch and J. K. Clarkson), 167
Vibrio spp. in Finnock from the Aberdeenshire Dee (Isabel W. Smith), 1409
Vibrio cholerae : Enterotoxicity of Bacteria-free Culture-filtrate of (Prof, S. N. De), 1533
    Purification of Neuraminidase from (Prof. Gerhard Schramm and Elisabeth Mohr), 1677
Vibrio fetus : Isolation of a Lipopolysaccharide from (S. M. Dennis), 186
Vick, Prof. F. A. : Appointed a member of the University Grants Committee, 86
    Appointed deputy director of the Atomic Energy Research Establishment, Harwell, 861
Victoria Medal of the Royal Geographical Society awarded to Gerald Seligman, 292
Vienna Declaration and Nuclear Disarmament, 1303
View : The Employee's Point of, 371
    To View or Not to, *review*, 780
Vigoureux, Dr. P. : The Ear under Water (Physical Aspects of Sound Propagation under Water), 1788
Viking Fund Medals and Awards of 1,000 dollars awarded to Prof. Raymond W. Firth, Prof. Henri V. Vallois and Dr. Jesse D. Jennings by the Wenner-Gren Foundation for Anthropological Research, 1434
Villee, Claude A., and others: General Zoology, *review* by Dr. V. Fretter, 1290
Vince, Dr. D. (Sale, P. J. M., and) : Effects of Wave-length and Time of Irradiation on Internode Length in *Pisum sativum* and *Tropaeolum majus*, 1174
Vince, Pamela, and others : Television and the Child, *review*, 780
Vinter, Vladimír : Differences in Cyst(e)ine Content between Vegetative Cells and Spores of *Bacillus cereus* and *Bacillus megaterium*, 998
Vinyl Polymerization by Radical Mechanisms : The Kinetics of (Dr. C. H. Bamford, Dr. W. G. Barb, Dr. A. D. Jenkins and Dr. P. F. Onyon), *review* by Prof. C. E. H. Bawn, 637
Viral Haemagglutinability of Red Cells of the Mouse after Treatment with Formalin : Increase of (B. Fauconnier and D. Barua), 629
Viral Haemagglutination of Red Cells : Impairment of, after Treatment with Formalin (F. E. Buckland), 1276
Viral and Rickettsial Infections : Symposium on Latency and Masking in—the Proceedings of a Conference held at the University of Wisconsin Medical School, 1957 (edited by Duard L. Walker, Robert P. Hanson and Alfred S. Evans), *review* by Dr. Kenneth M. Smith, 71
Virus (Cassava Brown Streak): Mechanical Transmission of (R. M. Lister), 1588
Virus (Fowl Plague) : Effect of Neutral Red on Plaque Formation by (Dr. A. P. Waterson), 628
Virus (Impure Murray Valley Encephalitis) : Yield of Infective 'Ribonucleic Acid' from, after Different Treatments (G. L. Ada and S. G. Anderson), 799
Virus (Influenza) : New Inhibitor and Erythrocyte Receptor Substances for certain Asian Strains of (Gy. Takátsy and K. Barb), 52
Virus (Mammalian Tumour) : *In vitro* Analysis of a (Dr. Leo Sachs, Dr. Marian Fogel and Ernest Winocour), 663
Virus (Myxomatosis) : Effect of Infection with, on the Endoparasites of Rabbits (Dr. R. Mykytowycz), 555
Virus (Poliomyelitis) : Structure of (J. T. Finch and Dr. A. Klug), 1709
Virus (*SE* Polyoma) : Induction of Subcutaneous Nodules in Rabbits with the (Dr. Bernice E. Eddy, Sarah E. Stewart, Ruth L. Kirschstein and Ralph D. Young), 766
Virus (Rous Sarcoma) : Zone Electrophoresis of (Robert Cramer), 195
Virus (Shope Rabbit Papilloma): Induction of Arginase in Rabbit Epithelium by the (Prof. Stanfield Rogers), 1815
Virus (Tobacco Mosaic) : Infectious Ribonucleic Acid as Precursor of (Reto Engler and Prof. Gerhard Schramm), 1277
    Photoreactivation of Nucleic Acid from (F. C. Bawden and A. Kleczkowski), 503
Virus (Tomato Aucuba Mosaic) : Persistence, in Dried Leaf Tissue (Prof. John Caldwell), 1142
Virus (Tomato Spotted Wilt) : Leaf-Enations in *Dahlia variabilis* Desf. induced by (A. A. Brunt), 627
Virus Diseases (Murine) : Sparing Effect of Serum from Mice treated with Endotoxin upon certain (A. W. Gledhill), 185
Virus Multiplication (Influenza) : Inhibition of, with a Glucose Antimetabolite (2-deoxy-D-glucose), (Prof. Edwin D. Kilbourne), 271
Virus Protein (Tobacco Mosaic), of Molecular Weight 18,000 : Native (Allen T. Ansevin and Prof. Max A. Lauffer), 1601
Virus Research : Advances in (edited by Kenneth M. Smith and Max A. Lauffer), Vol. 5, *review* by Prof. F. C. Bawden, 636
Virus Transformation (Fibroma–Myxoma), of Berry and Dedrick : Reactivation of Heat-inactivated Poxviruses—a General Phenomenon which includes the (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340
Virus-like Particles in Chemically induced Carcinoma of the Uterine Cervix (Dr. M. Thiery, Dr. M. De Groodt, Prof. F. De Rom, Prof. M. Sebruyns and Dr. A. Lagasse), 694
Viruses : Occult, *review* by Dr. Kenneth M. Smith, 71
Viruses (Arthropod-borne) : Plaque Production with Yellow Fever and related (J. S. Porterfield), 1069
Viruses (Pox-) : Reactivation of Heat-inactivated—a General Phenomenon which includes the Fibroma–Myxoma Virus Transformation of Berry and Dedrick (Prof. Frank Fenner, I. H. Holmes, Dr. W. K. Joklik and Gwendolyn M. Woodroofe), 1340
Viruses and Cells : Contribution of Electron Microscopy of, to the Problem of Cancer (Electron Microscope Society of America Symposium on), 1719
Viruses, Genes and Antigens, *review* by Prof. F. C. Bawden, 636
Vischer, Dr. W. A. (Tirunarayanan, Dr. M. O., and) : Inactivation of Isoniazid by Peroxidase, 681
Visceral Efferents in the Rat Brain Stem : Selective Staining of, by a Modified Koelle Technique (Dr. P. R. Lewis and Dr. C. C. D. Shute), 1743
Viscometric Method : Characterization of Molecular Weight Distributions by a (Dr. P. F. Onyon), 1670
Viscosity (Magnetic) displayed on Hysteresis Loop Traces (R. G. George), 245
Visible to Lethal Mutations : Ratio of, produced in *Drosophila* by Phenylalanine Mustard (L. S. Altenburg and Edgar Altenburg), 699
Visible Light : Induction of Structural Chromosome Changes by (Dr. B. A. Kihlman), 976
Vision (Colour) : Mixed Pigments in (Dr. R. W. G. Hunt), 1601
Vision (Colour) Phenomenon of a New Class (Dr. William A. Shurcliff), 202
Vision (Man's Changing), of the Universe : The Sleepwalkers—a History of (Arthur Koestler), *review* by Dr. A. R. Hall, 1419
Vistas in Botany—a Volume in honour of the Bicentenary of the Royal Botanic Gardens, Kew (edited by Dr. W. B. Turrill), *review* by Prof. W. H. Pearsall, 1484
Visual Fixation : Barbiturate Nystagmus and the Mechanisms of (C. Rashbass), 897
Visual Pigments : Action of Light on—Vertebrate Lumi- and Meta-Rhodopsins (Dr. Ruth Hubbard, Paul K. Brown and Dr. Allen Kropf), 442 ; Lumi- and Meta-Rhodopsins of Squid and Octopus (Dr. Allen Kropf, Paul K. Brown and Dr. Ruth Hubbard), 446 ; Chicken Lumi- and Meta-Iodopsin (Dr. Ruth Hubbard and Dr. Allen Kropf), 448
Visual Scanning of Photographs of Paper Chromatograms : Quantitative Estimation of Purines by the (B. M. Johnstone and G. P. Briner), 681
Vitalism ? : Mechanism or, *review* by Dr. W. Grey Walter, 955
Vitamin A Storage in the Rat Liver : Effect of Protein-free Diet on the (M. Rechcigl, jun., S. Berger, J. K. Loosli and H. H. Williams), 1597
Vitamin B_{12} : Effect of D-Sorbitol on the Absorption of Orally Administered (Dr. J. N. Marshall Chalmers and N. K. Shinton), 120
    Ethylenediamine Tetraacetate and the Intestinal Absorption of (Dr. J. Abels, M. G. Woldring, H. O. Nieweg, J. G. Faber and J. A. de Vries), 1395
    Goniotrichum elegans, a Marine Bed Alga requiring (Lisbeth Fries), 558
Vitamin B_{12} and Biosynthesis in Chick Liver (Vitamin B_{12} and Protein Biosynthesis), (Dr. M. J. Fraser and Dr. E. S. Holdsworth), 519
Vitamin B_{12} and Biosynthesis in Rat Liver (Vitamin B_{12} and Protein Biosynthesis), (Dr. H. R. V. Arnstein and Dr. J. L. Simkin), 523
Vitamin B_{12} and Protein Biosynthesis—Vitamin B_{12} and Biosynthesis in Chick Liver (Dr. M. J. Fraser and Dr. E. S. Holdsworth), 519 ; Vitamin B_{12} and Biosynthesis in Rat Liver (Dr. H. R. V. Arnstein and Dr. J. L. Simkin), 523
Vitamin D : Influence of, on Synthesis of Hexosamine by Rachitic Rat Cartilage (P. K. Dikshit), 334
Vitamin E Deficiency (A Possible), occurring in a Herd of Pigs fed Standard Rations in the Tropics (W. J. A. Payne), 828
Vitamin K_3 : Reduction of Neotetrazolium Chloride by (T. F. Slater), 50
Vitamin and Hormone Research : Progress in, *reviews* by Prof. F. G. Young, 568, 778
Vitamins and Hormones—Advances in Research and Applications, Vol. 15, (edited by Prof. Robert S. Harris, Prof. G. F. Marrian and Prof. Kenneth V. Thimann), *review* by Prof. F. G. Young, 568 ; Vol. 16 (edited by Prof. Robert S. Harris, Prof. G. F. Marrian and Prof. Kenneth V. Thimann), *review* by Prof. F. G. Young, 778
Vitis vinifera : Prolonging Dormancy in, with Gibberellin (Robert J. Weaver), 1198
Viviparous Toothcarps : Development of Ovarial Teratomas in, by Pathological Parthenogenesis (Prof. A. Stolk), 763
Vlček, A. A. : Co-ordination Chemistry (Reactions accompanying the Polarographic Reduction of Iron Carbonyls), 1785
Voeller, B. R., and others : Use of Radioactive Tracers in Studies of the Shoot Apex, 1580
Vogt, Dr. Marthe : New Drugs used by Psychiatrists, *review*, 1007
Volatile Airborne Droplets : Detecting (K. R. May), 742
Volcanoes on the Moon (Dr. J. H. Fremlin), 239
Volcanoes as a Source of Atmospheric Ice Nuclei (K. Isono, M. Komabayasi and A. Ono), 317
Voltage (Spark Breakdown) : Effect of Humidity on the (K. R. Allen and Dr. K. Phillips), 174
Voltammetry (Cyclic Alternating-Current), with a Platinum Electrode (André L. Juliard), 1040
von Engel, Dr. A. : Propulsion by Ions and Ionized Plasmas, 573
von Euler, Prof. U. S., and Lishajko, F. : Excretion of Catechol in Human Urine, 1123
von Frisch, Prof. Karl : Awarded the Kalinga Prize, 1568
von Gierke's Disease : Detection of Heterozygous Carriers in Glycogen Storage Disease of the Liver (Dr. David Yi-Yung Hsia and Eva Gawronska Kot), 1331
Von Herzen, Dr. R. : Heat-Flow Values from the South-Eastern Pacific, 882
von Knorring, Dr. O., and Dearnley, R. : Niobium–Zirconium–Thorium–Uranium and Rare-Earth Minerals from the Pegmatites of South Harris, Outer Hebrides, 255
von Maltzahn, Prof. K. E. : Interaction between Kinetin and Indoleacetic Acid in the Control of Bud Reactivation in *Splachnum ampullaceum* (L.) Hedw., 60
von Neumann, Dr. John : The Computer and the Brain, *review* by A. H. Armstrong, 350
Vose, Dr. P. B., and Koontz, Dr. H. V. : Uptake of Strontium by Pasture Plants and its Possible Significance in relation to the Fall-out of Strontium-90, 1447
Vosschulte, Prof. Karl : Elected a member of the Surgery Section of the Deutsche Akademie der Naturforscher Leopoldina, 652

WADA, Masami, (Yoshida, Prof. Sekiko, and) : Storm-Time Increase of Cosmic-Ray Intensity, 381
Wada, Tsuguyasu (Kusa, Dr. Mamoru, and) : X-Ray Diffraction Patterns from the Egg Membrane of the Egg of the Brook Trout, 410
Waddell, G. (Pratt, Prof. D. B., and) : Adaptation of Marine Bacteria to Growth in Media lacking Sodium Chloride, 1208
Waddington, Prof. C. H. : Darwinism and the Study of Society (The Human Evolutionary System), 1562
  Evolutionary Systems—Animal and Human, 1634
  Canalization of Development and Genetic Assimilation of Acquired Characters, 1654
Wadsworth, A. P. (Fitton, R. S., and) : The Strutts and the Arkwrights, 1758-1830—a Study of the Early Factory System, *review* by Prof. W. H. G. Armytage, 635
Wager, Prof. L. R. : *Obituary* of Augustine Courtauld, 930
Wagh, U. V. (Inamdar, Prof. N. B., and) : Amounts of Deoxyribonucleic Acid in the Silk Glands of the Spider *Nephila maculata* Fabr., 1763, 1541
Wajda, Martha (Davison, Dr. A. N., and) : Persistence of Cholesterol-4-^{14}C in the Central Nervous System, 1606
Wakefield, J., and others : Precipitation on a Dislocation, 34
Wakefield Gold Medal of the Royal Aeronautical Society awarded to K. A. Wood, 1648
Wald, Prof. George : Awarded the Rumford Premium for 1959 of the American Academy of Arts and Sciences, 435 ; work of, 435
Waldmeier, Prof. M. : *Obituary* of Prof. William Brunner, 290
Wales (England and) : An Account of the Fishing Gear of (the late F. M. Davis), revised edition, 1023
  Commentary Volume on the Statistical Review of, for 1956 (Registrar General), 1093
  Public Libraries in, 1437
  The Structure of the Public Library Service in (Ministry of Education), 1289, 1437
Wales (North) : Stability of Stone Polygons in (John H. Tallis and Dr. K. A. Kershaw), 485
Wales (Rural), Society for the Preservation of (Caernarvonshire Branch) : Annual Report, 222
Walker, D. F. : Improvement in the Magnetic Detecting Power of Iron-cored Search Coils, 173
Walker, Duard L., and others (edited by) : Symposium on Latency and Masking in Viral and Rickettsial Infections—the Proceedings of a Conference held at the University of Wisconsin Medical School, 1957, *review* by Dr. Kenneth M. Smith, 71
Walker, D. M. C. (King-Hele, D. G., and) : Irregularities in the Density of the Upper Atmosphere—Results from Satellites, 527
Walker, Dr. Gwen J., and Whelan, Dr. W. J. : Synthesis of Amylose by Potato *D*-Enzyme, 46
Walker, Dr. J. : More Progress in Nuclear Energy, *review*, 422
Walker, Janet R., and Syrett, P. J. : Effect of Heavy Water on the Growth of *Chlorella vulgaris*, 1193
Walker, Prof. T. K., and others : Detection of Gentiobiose and Sophorose in Cultures of certain Micro-organisms growing in Defined Glucose-containing Media, 682
Walker, Jr., Warren F., and others : General Zoology, *review* by Dr. V. Fretter, 1290
Wallace, A. L., and others : Bioassay of Sheep Anterior Pituitary Glands, 1597
Wallace, Prof. W. E. : Awarded a grant of 25,421 dollars by the United States Atomic Energy Commission, to continue an investigation of the application of chemical thermodynamics to study the formation of metallic alloys, 86
Wallace and Linnaeus Celebrations (Darwin,), in Singapore (Prof. R. D. Purchon), 723
Walruses : Seals, Sea Lions and (Dr. Victor B. Scheffer), *review* by Prof. V. C. Wynne-Edwards, 1420
Walsh, Prof. A. D. : Elected a Fellow of the Royal Society of Edinburgh, 719
Walsh, Dr. E. W. : Elected a Fellow of the Royal Society of Edinburgh, 719
Walter, Dr. W. Grey : Mechanism or Vitalism ?, *review*, 955
Walton, Dr. Arthur : *Obituary* by Dr. J. Hammond and Dr. T. Mann, 1777
Walton, Dr. K. (Weigel, Dr. H., and) : Synthesis of Dextran Sulphate labelled with Carbon-14 and Tracer Experiments in the Rat, 981
Walton, Dr. K. W. : Title of reader in experimental pathology in the University of Birmingham conferred on, 153
Wandless, A. M. : Fuel and Power in British Industry, 154
War : No More (Dr. Linus Pauling), *review* by R. Brightman, 952
War (Second World) : Psychiatry in the British Army in the (Dr. Robert H. Ahrenfeldt), *review* by Dr. D. Russell Davis, 208
Warburton, B. : Relaxation Processes, 584
Ward, A. G. : Gelatine and Glue Research, 440
Ward, C. F. : Detergents, Textiles and Dyes, 1236
Ward, Dr. D. J. : Wheat Genetics, 26
Ward, E. W. B., and Henry, Prof. A. W. : Differential Reaction of Saprophytic and Parasitic Soil-inhabiting Fungi to Indoleacetic Acid, 1064
Ward, Dr. F. A. B. : Handbook of the Collection illustrating Time Measurement, Part I, fourth edition (Science Museum), 933
Ward, Prof. George, and others : Does Rhodopsin contain a Trace Metal ?, 28
Ward, Dr. R. B., and others : Effects of Gamma Radiation on some Carbohydrates, Hydroxyacids and Amino-acids in Aqueous Solutions, 376
Wardlaw, Prof. C. W. : Plant Morphogenesis, 584
  Experimental Approaches to the Problems of Growth and Form in Plants (Observational, Experimental and Analytical Methods which have contributed to understanding of Plant Morphogenesis), 584
Wardlaw, Prof. W. : *Obituary* by Prof. W. G. Overend, 505
Ware, Dr. A. A. : New Investigations with SCEPTRE III—The Positive Ion Heating Mechanism in SCEPTRE III, 8
Wareing, Prof. P. F. : Experimental Approaches to the Problems of Growth and Form in Plants (Problems of Juvenility and Flowering in Trees), 585
Wareing, Prof. P. F., and others : Use of Radioactive Tracers in Studies of the Shoot Apex, 1580
Warfare (Nuclear) : Common Sense and (Bertrand Russell), 1351
Wark, Dr. I. W. : Appointed first director of the C.S.I.R.O. Chemical Research Laboratories, 228 ; work of, 228
Warnock, Prof. F. V. : Retirement from the chair of mechanical engineering at the Queen's University, Belfast, 1779 ; work of, 1779
Warren Spring Laboratory, Stevenage : To be opened by Lord Hailsham, 722
Wartime : Psychiatry in, *review* by Dr. D. Russell Davis, 208
Warwick, Dr. G. P. (Roberts, Dr. J. J., and) : Metabolism of Myleran (1:4-Dimethane-sulphonyloxybutane), 1509
Washington County Meteorite : Cosmogenic Noble Gases in the (Oliver A. Schaeffer and David E. Fisher), 660
Wassermann, Prof. Friedrich : Elected a member of the Anatomy Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
Waste (Radioactive) : Disposal of, 437
Watanabe, Dr. Ryoji, and Koda, Dr. Shigeyasu : Crystallographic Orientation of Nodules formed by the Grain Boundary Reaction of Aluminium–Zinc Alloys, 1667
Watanabe, Toshiyuki, and Aso, Kiyoshi : Isolation of Kojibiose from Honey, 1740
Water : Binding of, in some Hydroxides and Hydrous Oxides (Structure of some Hydroxides and Hydrous Oxides), (Prof. O. Glemser), 943
  Binding of, in Ferric Hydrate (Prof. O. Glemser), 1476
  Possible Role of, in Collagen Structure (R. D. B. Fraser and T. P. Macrae), 179
  The Ear under (Royal Society Discussion on), 1787
Water in Fluids : An Automatically Operating, Coulometric Titration Method for continually Measuring Small Amounts of (E. Barendrecht), 1181
Water labelled with Oxygen-18 : Determination of the Yields of Molecular Hydrogen Peroxide in the Radiolysis of (Dr. J. D. Backhurst, Dr. G. R. A. Johnson, Dr. G. Scholes and Prof. J. Weiss), 176
Water Sorbed on Montmorillonite : Density of (Dr. W. F. Bradley), 1614 ; (Dr. Robert C. Mackenzie), 1615
Water a Specific Taste ? : Has (Prof. Yngve Zotterman and Herman Diamant), 191
Water (Distilled) : A Source of Error in Microbiological Assays attributable to a Bacterial Inhibitor in (S. A. Price and L. Gare), 838
Water (Drinking) : International Standards for (United Nations : World Health Organization), 867
Water (Heavy) : Effect of, on the Growth of *Chlorella vulgaris* (Janet R. Walker and P. J. Syrett), 1193
Water (Intake of), and Weight of Body in Rats : Effect of Reduction of Stimulation on Consumption of Food, (Dr. Karl Weiss and Harry M. B. Hurwitz), 344
Water (Salt) : Inactivation of Organo-Mercurial Fungicides in Groundwood Pulp made from Logs stored in, and the Possible Role of Sulphur Compounds (B. H. Browning, P. Russell, Dr. S. W. Kingsnorth and R. J. Peerless), 1346
Water and Electrolyte Metabolism in relation to Age and Sex (Ciba Foundation Colloquia on Ageing, Vol. 4), (edited by G. E. W. Wolstenholme and Maeve O'Connor), *review* by Prof. P. L. Krohn, 777
Water and Hydrocarbons : Effect of Low Concentrations of Alcohols on the Interfacial Tension between (F. Franks and Dr. D. J. G. Ives), 316
Water and Woodlands (International Association of Scientific Hydrology Symposium on), 438
Water Beetles : British (Prof. Frank Balfour-Browne), Vol. 3, *review* by Dorothy J. Jackson, 1420
Water Board, Metropolitan : Thirty-seventh Report on the Results of the Bacteriological, Chemical and Biological Examination of the London Waters for the Years 1955-56 (E. Windle Taylor), 798
Water Circulation in the Black Sea : Microbiology and (A. E. Kriss), 437
Water Circulation in Oceans (V. G. Bogorov and E. M. Kreps), 437
Water Committee, Central Advisory : Fourth Meeting, 152
  Appointment of Prof. J. Proudman as chairman of the Sub-Committee on the Demand for Water, 152
Water Pollution Research 1957—the Report of the Water Pollution Research Board with the Report of the Director of the Water Pollution Research Laboratory, 161
Water Pollution Research Board : Water Pollution Research 1957—the Report of the, with the Report of the Director of the Water Pollution Research Laboratory, 161
  Appointment of J. McNicholas and Dr. C. H. Mortimer as members, 934
Water Research Association : To receive financial support from the Department of Scientific and Industrial Research, 1500
  Appointment of J. E. Beddoe, Dr. B. A. Southgate and G. A. McMillan to the Council, 1500
  Appointment by the Department of Scientific and Industrial Research of Prof. F. H. Garner and C. S. Tanner as 'visitors', 1500
Water–Acetone (Cobalt Chloride–) : Existence of Two Liquid Phases in the System (Dr. J. N. Murrell, Dr. L. I. Katzin and B. L. Davies), 459
Water–Salt Receptor and Preference in the Rat (Dr. J. A. Deutsch and A. D. Jones), 1472
Water Supply : Government Support for Research in, 1500
Water (Sea) containing Phosphorus-32 : A Sex Difference in Radioactivity of *Artemia* cultured in (Prof. Daniel S. Grosch and Mary Ellen Plumb), 122
Waterman, Dr. Alan T., and Bronk, Dr. Detlev W. : The Argus High-Altitude Geophysical Experiments, 1019
Waters : Troubled, *review* by J. L. Stollery, 421
Waters (British East African) : Marlins in (F. Williams), 762
Waters (Inshore), of Antarctica near Mawson, 1956 : Marine Studies in the (Dr. J. S. Bunt), 1541
Waters (London) : Thirty-seventh Report of the Results of the Bacteriological, Chemical and Biological Examination of the, for the Years 1955-56 (E. Windle Taylor), 798
Watson, Prof. Cecil J. : Elected a member of the United States National Academy of Sciences, 1575
Watson, Dr. E. A. : Awarded the Silver Medal of the Royal Aeronautical Society, 1648
Watson, K. C., and others : Penicillin as an Antigen, 468
Waterson, Dr. A. P. : Effect of Neutral Red on Plaque Formation by Fowl Plague Virus, 628
Waterways (Inland), in Britain (House of Lords Debate on), 1305
Watkins, Dr. J. C., and others : Chemical Excitation of Spinal Neurones, 611
Watson, W. N. Boog : Parasitology (*Sarcoptes-scabiei* Infections in Man), 1506
Watt (James) International Medal for 1959 awarded to (the late) Sir Claude Gibb by the Institution of Mechanical Engineers, 224

Watts, Dr. H. : Etch Pits on Calcite Cleavage Faces, 314
Watts, J. C. D. : Seasonal and Tidal Fluctuations in the Trawl Catches from the Sierra Leone River Estuary, 1748
Wave Functions (Approximate) : Use of, for Extrapolation to True Energy Values (P. G. Dickens, Dr. J. W. Linnett and D. Schofield), 175
Wave-Guide : Long-Distance Transmission by (Radio and Telecommunication Section of the Institution of Electrical Engineers Convention on), 727
  Radio Transmission by (Dr. R. L. Smith-Rose), 727
Wave-length and Time of Irradiation : Effects of, on Internode Length in *Pisum sativum* and *Tropaeolum majus* (P. J. M. Sale and Dr. D. Vince), 1174
Wave-lengths (Infra-red Dispersion), for Solid Lithium Fluoride containing varying Proportions of Lithium Isotopes (Prof. D. J. Montgomery and R. H. Misho), 103
Waverley Gold Medal Competition for 1959 (*Research*), 510
Waves (Alfvén), in a Gas Discharge (D. F. Jephcott), 1652
Waves (Extra-Terrestrial Radio), in the Ionosphere : Refraction of (M. M. Komesaroff and C. A. Shain), 1584
Waves (Finite Elastic), in Rubber : Propagation of (P. Mason), 812
Wax : Milk as an Eluant of Polycyclic Aromatic Hydrocarbons added to (Dr. Hans L. Falk, Dr. Paul Kotin and Adele Miller), 1184
Weakened Fabrics : Museum Treatment of (E. R. Beecher), 1501
Weal and Flare in Human Skin produced by Histamine and other Substances (Dr. A. Herzheimer and Dr. M. Schachter), 1510
Wealden Ferns (Characteristic), in the Jabalpur Series: Occurrence of Two (Dr. M. N. Bose and Sukh Dev), 130
Weaned Calves (Early) : A Relationship between some Bacteria, Protozoa and Diet in (J. Margaret Eadie, Dr. P. N. Hobson and S. O. Mann), 624
Wear of Graphite : A Micrographic Study of (Dr. Robert H. Savage), 315
Wear of Graphite Surface by Punching and Planing (Dr. Robert H. Savage), 454
Weather : Cosmic Radiation and the (Prof. Edward P. Ney), 451
  Farming (L. P. Smith), *review* by James A. Taylor, 3
Weather Modification in the United States, 1371
Weatherley, Dr. P. E. : Appointed to the chair of botany in the University of Aberdeen, 1640 ; work of, 1640
Weatherley, Dr. P. E., and Barrs, H. D. : A Climatological Wind Tunnel, 94
Weaver, C., and Benjamin, P. : Interfacial Phenomena (Adhesion of Evaporated Metal Films to Glass), 1098
Weaver, Robert J. : Prolonging Dormancy in *Vitis vinifera* with Gibberellin, 1198
Weaving, Dr. A. S. (Ferguson, Dr. T. P., and) : Rutin in Tobacco grown in a Greenhouse, 64
Webb, Dr. Edwin C. : Further Advances in Enzymology, *review*, 961
Webb, Dr. F. J. : Hydrogen Liquefaction and Associated Techniques (Application to the Production of a Beam of Low-energy Neutrons), 1504
Webb, J. E. : The Ecology of Lagos Lagoon, 1, The Lagoons of the Guinea Coast ; 3, The Life History of *Branchiostoma nigeriense* Webb, 295
Webb, J. E. (Hill, M. B., and) : The Ecology of Lagos Lagoon, 2, The Topography and Physical Conditions of Lagos Harbour and Lagos Lagoon ; 4, On the Reactions of *Branchiostoma nigeriense* Webb to its Environment, 295
Webb, J. K. : Chairman's Address to the Measurement and Control Section of the Institution of Electrical Engineers, 89
Webb, L. J. : Humid Tropics Vegetation (Rain-Forest of Queensland), 796
Webb, S. J. : Chloramphenicol and the Survival of Airborne Bacteria, 1072
Weber, Prof. Hans H. : The Motility of Muscle and Cells, *review* by J. R. Bendall, 278
Webley, D. M. : Micro-Organisms in the Soil, *review*, 1010
Webley, D. M., and others : Effect of Substitution in the Side-Chain on β-Oxidation of Aryloxy-alkylcarboxylic Acids by *Nocardia opaca*, 748
Webley, R. S. : Thin Magnetic Films, 999
Weddell, Dr. G. : Department of Human Anatomy, Oxford—New Buildings, 1572
Weddell Seals: Carbon Monoxide Content of the Blood and other Observations on (Dr. L. G. C. E. Pugh), 74
Weeds : Effect of γ-Radiation on (H. J. M. Bowen and S. R. Smith), 907
Weekes, K. (edited by) : Polar Atmosphere Symposium, Oslo, 1956, Part 2, Ionospheric Section, *review* by James Paton, 279
Wei, C. T., and others : Low-temperature Specific Heats of Body-centred Cubic Chromium–Iron and Chromium–Manganese Alloys, 315
Weidmann, Dr. S. M. (Whitehead, R. G., and) : Trichloracetic Acid-insoluble Phosphate Compounds in Cartilage, 876
Weigel, Dr. H., and Walton, Dr. K. : Synthesis of Dextran Sulphate labelled with Carbon-14 and Tracer Experiments in the Rat, 981
Weigela : Gibberellin Effects on Photoperiod-controlled Growth of (Prof. Martin J. Bukovac and Harold Davidson), 59
Weight of Body in Rats : Effect of Reduction of Stimulation on Consumption of Food, Intake of Water and (Dr. Karl Weiss and Harry M. B. Hurwitz), 344
Weill, A. R. : Precipitation in Alloys (Abnormalities in the Distribution of the θ' Precipitates after Ageing), 797
Weill, Jacques-David, and others : Are Nucleoside Triphosphates Precursors of Mammalian Ribonucleic Acid *in vivo* ?, 1114
Weiner, Dr. J. S. (edited by Roberts, Dr. D. F., and) : The Scope of Physical Anthropology and its Place in Academic Studies—a Symposium held at the Ciba Foundation, 1957, *review* by Dr. Kenneth Little, 70
Weiner, Dr. J. S., and Zoutendyk, Dr. A. : Blood-Group Investigation on Central Kalahari Bushmen, 843
Weinstein, L. H., and others : Evidence for the Conversion of Quinic Acid to Shikimic Acid in Roses, 326
Weintroub, S. : Progress in Physics, *review*, 138
  Basic Physics, *review*, 354
Weiser, Dr. C. J. : Effect of Boron on the Rooting of Clematis Cuttings, 559
Weiss, Dr. C. (Adam, Dr. K. R., and): Distribution of 5-Hydroxytryptamine in Scorpion Venoms, 1398
Weiss, E., and Hübel, W. : Co-ordination Chemistry (Reactions of Cyclopentadienones with Metal Carbonyls), 1785
Weiss, Herbert, and others : Isolation of an Activator for Phospholipase *D*, 1393
Weiss, Prof. J., and others : Determination of the Yields of Molecular Hydrogen Peroxide in the Radiolysis of Water Labelled with Oxygen-18, 176
Weiss, Dr. Karl, and Hurwitz, Harry M. B. : Effect of Reduction of Stimulation on Consumption of Food, Intake of Water and Weight of Body in Rats, 344
Weiss, Dr. L. (Cater, Dr. D. B., and) : Measurements of Oxygen Tension in the Tissues of Mice cooled to 1°C., 1521
Weizmann Institute of Science, Rehovoth : Report for 1956-57, 868
Welding : The Electric Arc in (University of Birmingham Conference on), 1164
Welfare State' : Essays on 'The (Prof. Richard M. Titmuss), *review* by M. P. Hall, 1147
Wellcome Foundation, Ltd. : Appointment of Dr. D. A. Long as chief medical adviser and head of the Medical Research Department, 1234
Wellcome–Marston Archaeological Research Expedition to the Near East : Lachish (Tell ed-Duweir) IV, The Bronze Age (Olga Tufnell), *review* by Peter J. Parr, 951
Wellens, John : The Bulge—its Industrial Impact, 1500
Wells, A. Laurence: The Observer's Book of Sea Fishes, *review* by Dr. D. P. Wilson, 140
Wells, H. W. (Chivers, H. J. A., and) : A New Ionospheric Phenomenon, 1178
Welsby, Dr. V. G.: Appointed to a senior lectureship in electrical engineering in the University of Birmingham, 1571
Welsh Soils Discussion Group : Discussion on the Soils of the Aberystwyth Area, 865
Weltman, Dr. A. S., and others : Effect of Tranquillizing Agents on the Resistance of Rats to Histamine Stress, 896
Weltner, M. : Derivatographic Investigation of the Anthracite of the Don, 1254
Wen-you, Dr. Chang, and Nairn, Dr. A. E. M. : Some Palaeomagnetic Investigations on Chinese Rocks, 254, 652
Wender, Irving, and others : Behaviour of Dicobalt Octacarbonyl at Elevated Temperature and Carbon Monoxide Pressure, 457
Wenner-Gren Foundation for Anthropological Research : Viking Fund Medals and Awards of 1,000 dollars awarded to Prof. Raymond W. Firth, Prof. Henri V. Vallois and Dr. Jesse D. Jennings, 1434
Wentorf, jun., R. H. : Olivine-Spinel Transformation, 1617
Wentzel, Prof. Gregor : Elected a member of the United States National Academy of Sciences, 1575
Werner, Dr. A. E. A. : Appointed keeper of the Research Laboratory of the British Museum, 792 ; work of, 792
Werner, Dr. Sidney C., and Block, Dr. Richard J. : Discrepancy between the Distributions of Iodine in Human Serum when estimated by Iodine-131 and Iodine-127, 406, *erratum*, 722
Wertheimer, Prof. Michael (selected and edited by Beardslee, Prof. David C., and) : Readings in Perception, *review* by Prof. R. W. Pickford, 1625
Wesson, J. A., and Liley, B. S. : Gas Discharges (Operation of SCEPTRE III in the Laboratories of Associated Electrical Industries), 92
West, B. O. (Fee, W. W., and) : Co-ordination Chemistry (Exchange Reaction of Quadridentate Complexes, particularly of Nickel (II)), 1784
West, Dr. D. J. : Spectral Casework, *review*, 351
West Africa : Flora of, *review* by A. W. Exell, 6
  A Third Species of 'Pepper' in (J. Yanney Wilson), 1142
West Tropical Africa : Flora of (Dr. J. Hutchinson and Dr. J. M. Dalziel), second edition revised by R. W. J. Keay, *review* by A. W. Exell, 6
Westerhout, G., and others : Report on the Progress of Astronomy, 1308
Western Australian Wildflowers : How to Know (Dr. William E. Blackall and Dr. Brian J. Grieve), Part 2, A Key to the Flora of the Temperate Regions of Western Australia, *review* by V. S. Summerhayes, 1628
Western Electric Company and the Bell Telephone Laboratories : Synthetic Quartz Crystals, 294
Western Europe : Aviation Psychology in, and a Report on Studies of Pilot Proficiency Measurement (Western-European Association for Aviation Psychology), 1092
Western-European Association for Aviation Psychology : Publication No. 1, Aviation Psychology in Western Europe and a Report of Studies of Pilot Proficiency Measurement, 1092
Western Germany : The Council for Science and Technology of (Dr. J. Horne), 512
Westfall, Prof. Richard S. : Science and Religion in Seventeenth-Century England, *review* by Dr. H. D. Anthony, 964
Weston, G. J. (Stranks, D. R., and) : Co-ordination Chemistry (Mechanisms of the Photochemical Reactions of Complex Ions), 1784
Wet Freeze-drying : Improved Preservation of Tendon for Electron Microscopy through (Dr. David B. Scott and Marie U. Nylen), 1205
Wettermark, G., and others : Action of Ultra-violet Light on Skin—Effect of the Histamine Liberator 48/80 and Methotrimeprazine, 1451
Wexler, H. : Antarctic Meteorology, 1503
Whale Remains in Glacier Ice (D. L. Dineley and P. A. Garrett), 272
Whale (Finback) Myoglobin Crystals : Electron-Microscopic Study of (D. E. Bradley), 941
Whales (Humpback) : Evidence on Growth-rates obtained from Two Marked (W. H. Dawbin), 1749
Wheare, Dr. K. C. : Appointed a member of the University Grants Committee, 86
Wheat : Effects of Heat and Loss of Moisture on the Dormancy of, and some Interactions with 'Mergamma *D*' (P. D. Hewett), 1600
  Genetic Control of Chromosome Pairing in Intergeneric Hybrids with (Dr. Ralph Riley, Victor Chapman and Gordon Kimber), 1241
  'Karathane'—the Value of its Differential Fungicidal Effect in relation to Mildew and Yellow Rust of (D. A. Doling and Shirley Hepple), 622
Wheat Genetics (Dr. Ralph Riley), 25
Wheat Genetics Symposium : First International, 25
Wheat Germ : Peroxidases from (Kunio Tagawa, Masateru Shin and Prof. Kazuo Okunuki), 111
Wheeldon, L. W. (Macfarlane, Dr. Marjorie G., and) : Position of the Fatty Acids in Cardiolipin, 1808
Wheeler, Dr. David J., and others : The Preparation of Programs for an Electronic Digital Computer, second edition, *review* by E. L. Albasiny, 969
Wheeler, Dr. Lynde P. : *Obituary*, 1364
Whelan, Dr. M. J. : Awarded a Royal Society Research Studentship (Mr. and Mrs. John Jaffé Donation), 1365
Whelan, Dr. M. J. (Hirsch, Dr. P. B., and) : Interfacial Phenomena (Low-Energy Interfaces associated with Deformation Twins), 1098

Whelan, Dr. M. J. (Thomas, G., and) : Precipitation in Alloys (Precipitation in an Aluminium–4 per cent Copper Alloy), 797 ; (Formation of Dislocation Spirals by the Condensation of Vacancies on Screw Dislocations in an Aluminium–4 per cent Copper Alloy), 797
Interfacial Phenomena (Film showing the Influence of Curvature on the Energy of Incoherent Interfaces), 1099
Whelan, Dr. R. F., and others : Fast and Slow Muscles in Mammals, 1516
Whelan, Dr. W. J. (Parrish, F. W., and) : Determination of Molecular Weights of Polysaccharides by Over-oxidation with Periodate, 991
Whelan, Dr. W. J. (Walker, Dr. Gwen J., and) : Synthesis of Amylose by Potato *D*-Enzyme, 46
Whelpton, R. V. : Promotion to Deputy Chief Scientific Officer and appointment as Ministry of Supply representative on the Defence Research Policy Staff at the Ministry of Defence, 647 ; work of, 647
Whey : Aerobic Fermentation of, by a Nitrogen-fixing Strain of *Aerobacter aerogenes* (Prof. D. B. Johnstone and M. Pfeffer), 992
Whiffen, Dr. D. H. : Appointed to a senior lectureship in chemistry in the University of Birmingham, 1571
Whipple, Prof. F. L. : Elected a member of the United States National Academy of Sciences, 1575
Whipple, Prof. F. L., and Fireman, Dr. E. L. : Calculation of Erosion in Space from the Cosmic-Ray Exposure Ages of Meteorites, 1315
Whiskers (Tin) : A Source of Natural (Malcolm J. Fraser), 670
'Whistler Mode' Echoes remote from the Conjugate Point (R. L. Dowden and G. T. Goldstone), 385
Whitaker, Dr. John A., and Hughes, Dr. Robert : A Rapid Method for determining the Concentration of Ammonium Sulphate Solutions, 603
Whitaker, Dr. J. W. : The Nature of Coal, 1438
Whitaker, Thomas : The Measurement of Soil Properties in the Triaxial Test, *review*, 1151
White, Clayton S., and others (edited by) : Aviation Medicine—Selected Reviews, *review*, 1291
White, Dr. D. E. : Appointed to the chair of organic chemistry in the University of Western Australia, 578 ; work of, 578
White, E. W. : Retirement as deputy keeper in the Department of Aeronautics in the Science Museum, London, 224
White, G. S. J. : Detergents, Textiles and Dyes, 1237
White, Prof. Harvey E. (Jenkins, Prof. Francis A., and) : Fundamentals of Optics, third edition, *review* by G. R. Noakes, 969
White, J. C., and others : Mucoprotein of Bronchial Mucus Gel, 1810
White Paper on Capital Investment in the Coal, Electricity and Gas Industries, 1651
White Paper on Central Organisation for Defence, 1483
White Paper on Defence Statistics, 1959-60, 1483
White Paper on Overseas Information Services, 1417
White Paper on Progress of the Five-Year Defence Plan, 1483
White Paper on Secondary Education for All—a New Drive, 511
White Rat : Effect of Norleucine and related Compounds on Growth of the (M. Rechcigl, jun., H. H. Williams and J. K. Loosli), 1519
Whitehead, A. N. : The Aims of Education, 1437
Whitehead, Peter J. P. (van Someren, Dr. Vernon D., and) : Records of Young Eels in Kenya Rivers, 950
Methods of Marking *Tilapia* Spp. (Pisces:Cichlidae), 1746
Whitehead, R. G., and Weidmann, Dr. S. M. : Trichloracetic Acid-insoluble Phosphate Compounds in Cartilage, 876
Whiteside, D. T. : Awarded a research grant by the Leverhulme Trust, 1499
Whitley, W., and others : Mucoprotein of Bronchial Mucus Gel, 1810
Whitmarsh, J. M. : British Fermentation Industries, *review*, 967
Whitmore, Dr. R. L. : Measurement of the Flocculation of Suspensions, 313
Whitney, N. J., and Mortimore, C. G. : An Antifungal Substance in the Corn Plant and its Effect on Growth of Two Stalk-rotting Fungi, 341
Whittaker, Mary (Harris, Dr. H., and) : Differential Response of Human Serum Cholinesterase Types to an Inhibitor in Potato, 1808
Whitteridge, Dr. Gweneth (edited, translated and introduced by) : De Motu Locali Animalium, 1627 (William Harvey), *review* by Prof. K. J. Franklin, 1486
Whole Bread and Bread Crumb : Moisture Content of (Y. Pomeranz), 1222
Whyte, Dr. R. O., and Moir, T. R. G. : Legumes in African Agriculture, 439
Whyte, Dr. R. O. (Taylor, B. W., and) : Humid Tropics Vegetation (A 'Land-type' composed of 'Land-units' as an Exploitable Entity), 795
Wieczorek, Zbigniew, and others : Phagocytosis of *Escherichia coli* Protoplasts, 1828
Wieland, Prof. T. : Synthesis of Peptides (Peptide Bond Formation based on Carboxyl Activation), 152
Wiesel, Dr. Torsten N. : Recording Inhibition and Excitation in the Cat's Retinal Ganglion Cells with Intracellular Electrodes, 264
Wigan, E. R. : Unpleasantness of Distorted Sounds—a Criterion derived from the Distortion Spectrum, 1320
Wigand, Dr. Reinhard : Morphologische, Biologische und Serologische Eigenschaften der Bartonellen, *review* by Dr. A. Lwoff, 207
Wigglesworth, Prof. V. B. (Smith, David S., and) : Collagen in the Perilemma of Insect Nerve, 127
Wight, Dr. W. : Nomenclature and Classification of the Tea Plant, 1726
Wigner, Prof. Eugene P. (Eisenbud, Dr. Leonard, and) : Nuclear Structure, *review* by Prof. B. H. Flowers, 492
Wiklander, Dr. L. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Wild Beet (*Beta patellaris* Moq.) as Indicator : Testing Populations of Beet Eelworm, *Heterodera schachtii* Schmidt, for Resistance-breaking Biotypes, using the (Audrey M. Shepherd), 1141
Wild Plant grown on Uraniferous and Non-Uraniferous Soils: Comparative Sensitivity to Radiation of Seeds from a (Dr. D. J. Mewissen, J. Damblon and Prof. Z. M. Bacq), 1449
Wildflowers (Western Australian) : How to Know (Dr. William E. Blackall and Dr. Brian J. Grieve), Part 2, A Key to the Flora of the Temperate Regions of Western Australia, *review* by V. S. Summerhayes, 1628
Wilhelm, D. L., and others : Enzymic Nature of the Serum Globulin Permeability Factor, 1264
Wilkes, Dr. Maurice V., and others : The Preparation of Programs for an Electronic Digital Computer, second edition, *review* by E. L. Albasiny, 969
Wilkie, Dr. D. R. : Muscle Physiology, *review*, 1008
The Work Output of Animals—Flight by Birds and by Man-power, 1515
Wilkins, A. F. : A Radar Simulator System, 157
Wilkins, Sir Hubert : *Obituary* by Sir James Wordie, 149
Wilkins, Dr. M. H. F. : Elected a Fellow of the Royal Society, 861
Wilkins, R. G. (Ahmed, A. K. Shamsuddin, and) : Co-ordination Chemistry (Kinetics of the Dissociation of Complex Cyanides and of Ethylene-Diamine Nickel Complexes), 1784
Wilkinson, Prof. G., and others : Lowest Oxidation States of Technetium and Rhenium, 1755
Wilkinson, J. H., and Davies, D. W. : The Automatic Computing Engine at the National Physical Laboratory, 22
Wilkinson, Walter D., and Murphy, William F. : Nuclear Reactor Metallurgy, *review* by Prof. A. H. Cottrell, 1628
Willard, D. H., and others : Induction of Lung Tumours by Radioactive Particles, 408
Willey, Prof. Basil : Darwinism and the Study of Society, 1564
Williams, Prof. Carroll M., and others : Juvenile Hormone in Thymus, Human Placenta and other Mammalian Organs, 405
Williams, Prof. D. : Awarded the Lyell Medal for 1959 of the Geological Society, 364
Williams, Dr. E. M. Vaughan : Relation of Extracellular to Intracellular Potential Records from Single Cardiac Muscle Fibres, 1341
Williams, F. : Marlins in British East African Waters, 762
Williams, F. A. : Awarded the Consolidated Gold Fields of South Africa, Ltd., Gold Medal for 1957-58 of the Institute of Mining and Metallurgy, 1499
Williams, Lady Gertrude : Training for Skill, 1780
Williams, G. E. : An Albino Specimen of the Common Frog, 1408
Williams, H. H., and others : Effect of Norleucine and related Compounds on Growth of the White Rat, 1519
Effect of Protein-free Diet on the Vitamin A Storage in the Rat Liver, 1597
Williams, H. L. (Bell, Dr. F. R., and) : Threshold Values for Taste in Monozygotic Twin Calves, 345
Williams, I. B., and others : Variations in the Value of Reynolds Number at the Transition from Streamline to Turbulent Flow, 531
Williams, Dr. Rice : The Soils of the Aberystwyth Area, 865
Williams, Dr. R. C. G. : Appointed to the Board of the College of Technologists, 1500
Williams, R. Dorrington : A Method of Growing Grass Plants with Separation of Seminal and Adventitious Roots, 415
Williams, Trevor I., and others (edited by) : A History of Technology, Vol. 4, The Industrial Revolution, *review* by G. B. L. Wilson, 70
Williams Prize for 1958 of the Iron and Steel Institute awarded to H. C. Child, 930
Williamson, Dr. A. G. (Scott, Dr. B. A., and) : Effect of the Carrier Gas on the Sensitivity of Thermal Conductivity Detectors in Gas Chromatography, 1322
Williamson, D. H. (Eddy, A. A., and) : Formation of Aberrant Cell Walls and of Spores by the Growing Yeast Protoplast, 1101
Williamson, K. : Elected a Fellow of the Royal Society of Edinburgh, 719
Willighagen, R. G. J., and Planteydt, H. T. : Aminopeptidase Activity in Cancer Cells, 263
Willis, A. T., and others : Inactivation of Spores of *Bacillus anthracis* by γ-Radiation, 475
Willis, J. B., and others : Precipitation on a Dislocation, 34
Willis, V. : Analysis by Gas Chromatography of a 'Pure' Sample with an 'Impure' Carrier, 1754
Wilman, H. : Interfacial Phenomena (New Examples of Epitaxy), 1097
Wilman, H., and Reddy, A. R. N. : Interfacial Phenomena (Growth of Electro-deposits of Face-centred and Body-centred Cubic Metals on Single Crystals of Face-centred Cubic Substrates), 1098
Wilson, A. T. : Organic Nitrogen in New Zealand Snows, 318
Wilson, Brian J. (compiled by) : British Compounding Ingredients for Rubber, *review* by Dr. W. J. S. Naunton, 779
Wilson, Prof. C. T. R. : Ninetieth Birthday, 435 ; work of, 435
Wilson, C. W. (Hewitt, Dr. H. B., and) : A Survival Curve for Mammalian Cells irradiated *in vivo*, 1060
Wilson, Dr. D. P. : British Marine Fishes, *review*, 140
American Marine Life, *review*, 852
Wilson, G. B. L. : Technology of the Industrial Revolution, *review*, 70
Wilson, J. Yanney : A Third Species of 'Pepper' in West Africa, 1142
Wilson, Dr. P. A. G. : Parasitology, 1506
Wilson, Dr. V. J., and others : Pattern of Recurrent Conditioning of Spinal Reflexes, 824
Winckler, Prof. J. R., and others : Geophysical Effects associated with High-Altitude Explosions, 358
Wind Tunnel : A Climatological (Dr. P. E. Weatherley and H. D. Barrs), 94
Windscale : New Reactor to be built at, 508
Windscale Reactor Accident : Measurements at Leeds following the—Iodine-131 in Human Thyroids and Iodine-131 and Caesium-137 in Milk (Dr. P. R. J. Burch), 515 ; Increase in Background Gamma-Radiation and its Correlation with Iodine-131 in Milk (Prof. F. W. Spiers), 517
Wingstrand, Karl Georg : Bertil Hanström—Zoological Papers in honour of the sixty-fifth Birthday of, *review* by N. B. Marshall, 1767
Winnick, R. E. (Winnick, Prof. Theodore, and) : Pathways and the Physiological Site of Anserine Formation, 1466
Winnick, Prof. Theodore, and Winnick, R. E. : Pathways and the Physiological Site of Anserine Formation, 1466
Winocour, Ernest, and others : *In vitro* Analysis of a Mammalian Tumour Virus, 663
Winstanley, D. P., and others : Chemical Changes in Human Bronchial Epithelium and their relation to Bronchial Cancer, 1743
Winter Pasture Production : Effects of Gibberellic Acid on (Dr. G. Scurfield and E. F. Biddiscombe), 1196
Winton, W. : Appointed a deputy keeper in the Department of Chemistry in the Science Museum, London, 224
Wintringham, F. P. W. : Insect Resistance to Insecticides, 1508
Wireless World Premium of the Television Society awarded to B. Overton, 1161
Wires : Electrically Exploded (Thermal Radiation Laboratory of the Geophysics Research Directorate of the United States Air Force Cambridge Research Center Conference on), 224
Wischner, Prof. G. J. : Awarded a grant of 40,360 dollars by the United States National Institute of Mental Health, to continue graduate training in clinical psychology, 86
Wiseman, W. A. : Effect of Carrier Gas on Katharometer Response, 1321

Wissenschaft : Die Entfaltung der—zum Gedenken an Joachim Jungius, (1587-1657), (Vorträge gehalten auf der Tagung der Joachim Jungius-Gesellschaft der Wissenschaften, Hamburg, 1957, aus Anlass der 300 Wiederkehr des Todestages von Joachim Jungius), 1435
Witch Broom Disease of Cacao : Absence of Gibberellin-like Substances in Filtrates of *Marasmius perniciosus* Stahel (W. F. Dudman and R. Nichols), 899
Witt, Dr. R. E. : Speaking on the motion 'That the Education of our Future Rulers should be primarily in the Sciences rather than the Humanities', 1235
Wittgenstein : The Later Philosophy of (Dr. David Pole), *review* by F. I. G. Rawlins, 494
Wittgenstein's Philosophy : Critique of, *review* by F. I. G. Rawlins, 494
Wix, Dr. G., and Albrecht, K. : A New Method for the Microbiological Oxidation of Steroids, 1279
Wodzicki, Kazimierz, and Stein, Peter : Migration and Dispersal of New Zealand Gannets, 1790
Woernley, D. L. (Nisonoff, Dr. A., and) : Effect of Hydrolysis by Papain on the Combining Sites of an Antibody, 1325
Wojciechowski, Valentina (Litwack, Prof. Gerald, and) : Reversal of Epinephrine Inhibition of Liver Tyrosine Oxidation, 1675
Woldring, M. G., and others: Ethylenediamine Tetraacetate and the Intestinal Absorption of Vitamin B_{12}, 1395
Wolf, P. O. : *Obituary* of F. W. James, 646
Wolfe Award of the Department of Scientific and Industrial Research presented to Dr. L. Essen, 930
Wolfenden, Sir John : The Educated Man Today and Tomorrow, 1780
Wollaston Fund for 1959 of the Geological Society awarded to Dr. M. H. P. Bott, 364
Wollaston Medal for 1959 of the Geological Society awarded to Prof. Pierre Pruvost, 364
Wolsky, Alexander, and Kalicki, Henrietta G. : Oxidative Metabolism and Puparium Formation in the Ebony Mutant of *Drosophila melanogaster*, 1129
Wolstenholme, Dr. G. E. W. : Awarded the Cross of Chevalier de la Légion d'Honneur by the French Government, 1434
Wolstenholme, Dr. G. E. W., and O'Connor, Cecilia M. (edited by) : Ciba Foundation Colloquia on Ageing, Vol. 4, Water and Electrolyte Metabolism in relation to Age and Sex, *review* by Prof. P. L. Krohn, 777
  Ciba Foundation Symposium on the Neurological Basis of Behaviour (in commemoration of Sir Charles Sherrington, 1857-1952), *review* by Dr. P. B. Bradley, 954
Women in Engineering : Training and Opportunities for (Women's Engineering Society), 161
Women Graduates : Part-Time Work for (D. D. Furley), 1790
Women's Engineering Society : Training and Opportunities for Women in Engineering, 161
Womersley, -. : Humid Tropics Vegetation (Work of the Botanical Division of Forestry in eastern New Guinea), 796
Wonderboom Nature Reserve (Special issue of *Transvaal Fauna and Flora*), 1023
Wong, Francis F. (Carson, John F., and) : A Colour Reaction for Thiolsulphinates, 1673
Wood, K. A. : Awarded the Wakefield Gold Medal of the Royal Aeronautical Society, 1648
Wood, R. McKinnon : Elected to Fellowship of the Imperial College of Science and Technology, 1161
Wood, jun., Prof. William B. : Elected a member of the United States National Academy of Sciences, 1575
Wood-Pigeons : Injury-feigning Behaviour of (C. S. Payne), 1643
Wood Preservatives (Copper–Chrome–Arsenate) : Abnormal Resistance of *Poria vaillantii* (D. C. ex Fr.) Cke. Strains to (E. W. B. Da Costa), 910
Woodbury, Max A. : Grant of 58,800 dollars from the National Science Foundation, for a two-year study of the statistical evaluation of weather modification, 1372
Woodford, F. P., and others : Composition of Lipids isolated from the Aorta, Coronary Arteries and Circulus Willisii of Atherosclerotic Individuals, 47
Woodhead, Dr. D. W. : Advance Detonation in a Tubular Charge of Explosive, 1756
Woodhouse, D. L. (Jones, A. S., and) : Bromination of Nucleic Acids and their Derivatives, 1603
Woodhull Lecture (Prof. C. H. Waddington), 1634
Woodlands : Water and (International Association of Scientific Hydrology Symposium on), 438
Woodroofe, Gwendolyn M., and others : Reactivation of Heat-inactivated Poxviruses—a General Phenomenon which includes the Fibroma-Myxoma Virus Transformation of Berry and Dedrick, 1340
Woods, I. (Harrison, Dr. J. Heslop, and) : Experimental Approaches to the Problems of Growth and Form in Plants (Temperature-induced Meristic and other variation in *Cannabis*), 585
Woods, Philip S., and Schairer, Marie U. : Distribution of Newly Synthesized Deoxyribonucleic Acid in Dividing Chromsomes, 303
Woods Hole Oceanographic Institution : Increase of the sea-going fleet by the addition of the ketch *Aries*, 649
Woodward, Joan : Management and Technology (Problems of Progress in Industry, 3), 300
Woody Plants (Deciduous) : Effect of Gibberellic Acid on Development of Autumn Colour and Leaf-fall of (Dr. P. W. Brian, J. H. P. Petty and P. T. Richmond), 58
Wool, Prof. Ira G., and Krahl, Dr. M. E. : An Effect of Insulin on Peptide Synthesis independent of Glucose or Amino-Acid Transport, 1399
Wool : Reaction of Sodium Borohydride with (J. M. Gillespie), 322
  Separation and Analysis of Scale-rich Material from (Dr. J. H. Bradbury), 305
Wool Fibres : Discoloration of, by a Fungus (A. P. Mulcock), 1281
Wool Industries Research Association : Publication No. 212, Report of the Director of Research for 1958 (Dr. A. B. P. Cassie), 1781
Wool Roots : Amino-acid Metabolism in (G. E. Rogers and P. H. Springell), 993
Wooldridge, Dean E., and others (edited by) : Handbook of Automation, Computation and Control, Vol. I, Control Fundamentals, *review* by P. H. Hammond, 1556
Wooldridge, Prof. S. W. : Elected a Fellow of the Royal Society, 861
Woolley, Dr. R. v. d. R. : The Royal Greenwich Observatory, 640
Wootton, W. H. : Steam Cycles for Nuclear Power Plant, *review* by R. Vaux, 1149
Wootton, Dr. I. D. P. : Biochemical Analysis, *review*, 779
Worden Gravimeter : Gravity Survey on the Kuttyaro Caldera by means of a (Prof. Izumi Yokoyama and Hirokazu Tajima), 739
Wordie, Sir James : *Obituary* of Sir Hubert Wilkins, 149
Work Output of Animals—Flight by Birds and by Man-power (Dr. D. R. Wilkie), 1515
Work (Part-Time), for Women Graduates (D. D. Furley), 1790
Worker : The Blackcoated (David Lockwood), *review*, 494
Workers (Research) : Notes on D.S.I.R. Grants for Graduate Students and (Department of Scientific and Industrial Research), 650
Working Life of Males in Great Britain : The Length of (Ministry of Labour and National Service), 1780
World : Upper Air Temperature over the (N. Goldie, J. G. Moore and E. E. Austin), 864
World (Modern): Communication in the (Granada Lectures of the British Association for the Advancement of Science), 293
World of Spiders (Dr. W. S. Bristowe), *review* by Dr. Eric Duffey, 1079
World Disarmament : The Arms Race, a Programme for (Philip Noel-Baker), *review* by R. Brightman, 952
World Health Organization (United Nations) : International Standards for Drinking Water, 867
  Monograph Series No. 38, Insecticide Resistance in Arthropods (Dr. A. W. A. Brown), 1508
World Life Research Institute : Appointment of Bruce W. Halstead as director, 793
World Low Air Temperature Record, 153
World Meteorological Organization : International Meteorological Organization Prize awarded to Prof. J. Bjerknes, 1567
World Variation in Annual Rainfall (J. F. Griffiths), 132
World War (Second) : Psychiatry in the British Army in the (Dr. Robert H. Ahrenfeldt), *review* by Dr. D. Russell Davis, 208
Wright, A. I. : Parasitology (Etiology of Hydatid Disease), 1507
Wright, Sir Charles, and others : Possible Causes of Geomagnetic Fluctuations having a 6-Sec. Period, 1479, *erratum*, 1783
Wright, Dr. C. A. : Generic Nomenclature of the Intermediate Hosts of *Schistosoma mansoni*, 906
  Parasitology (Mechanisms which enable Free-living Stages to Locate their Hosts), 1506
Wright, Dr. D. E. : Replacement of Thiamine as a Growth Factor for *Mycobacterium butyricum*, 262
Wright, Dr. G. T. : Semi-Conductors, *review*, 1356
Wright, H. C., and Brice, J. C. : Indium Mono-Telluride, 27
Wright, J. K., and others : Some Experiments with an Electrodeless Discharge, 1665
Wright, Margaret R., and others : Melatonin in Peripheral Nerve, 1821
Wright (Orville) Prize of the Royal Aeronautical Society awarded to D. A. Spence, 1649
Wright, P. G. (Luck, C. P., and) : Aqueous Humour of the Hippopotamus, 1595
Wright, P. H. : Production of Acute Insulin Deficiency by Administration of Insulin Antiserum, 829
Wright, S. T. C. : A Quantitative Serum–Agar Technique, 1282
Writing (Technical) : Premiums for (Radio Industry Council Awards), 1023
Wroe, H., and Alderson, R. H. : An Effect of Oxide Layers on the Behaviour of Vacuum Arc Cathode Spots, 1544
Wu, Prof. Chien-Shiung : Awarded the 1958 Research Corporation Award, 86
Wünsch, Dr. E. : Synthesis of Peptides (Amino-group Protection), 152
Wyatt-Smith, -. : Humid Tropics Vegetation (The Malayan Forester's Method of Quantitative Assessment of Forest Composition and Structure), 795 ; (Problems of Sylviculture in Malaya), 796
Wycherley, P. R. : Humid Tropics Vegetation (Ruderal Behaviour of *Croton hirtus*), 796
Wykeham Chair of Logic at Oxford, 792
Wyllie, M. R., and others : Parasitology (The *in vitro* Culture of Strigeid Metacercariae to the Sexually Mature Adult Fluke), 1506
Wyllie, Prof. P. J., and Tuttle, O. F. : Synthetic Carbonatite Magma, 770
Wyngaarden, Dr. James B., and Ashton, Doris M. : Feedback Control of Purine Biosynthesis by Purine Ribonucleotides, 747
Wynne-Edwards, Prof. V. C. : The Pinnipedia, *review*, 1420

X- and Ultra-violet Irradiation : Effects of, on the Incorporation of Phosphorus-32 into Isolated Nuclei of Rabbit Appendix (Yoong-Tchel Tchoe and Prof. A. Sibatani), 1334
X-Ray Diffraction : Fourier Transforms and (Prof. H. Lipson and Dr. C. A. Taylor), *review* by Dame Kathleen Lonsdale, 969
X-Ray Diffraction Lines in Teeth affected by Fluorine : Broadening of the (E. A. Scott and Dr. F. H. Scott), 479
X-Ray Diffraction Measurement of Radiation Damage in Stretched Rubber (Wesley E. Shelberg and Lewis H. Gevantman), 456
X-Ray Diffraction Patterns from the Egg Membrane of the Egg of the Brook Trout (Dr. Mamoru Kusa and Tsuguyasu Wada), 410
X-Ray Fluorescence Analysis : Estimation of Strontium in Animal Bone using (W. M. B. Roberts), 887
X-Ray Microanalysis : Second Symposium on X-Ray Microscopy and, 1094
X-Ray Microscopy and X-Ray Microanalysis : Second Symposium on, 1094
X-Ray Spectrographic Determination of Strontium (J. T. Campbell and H. I. Shalgosky), 1481
X-Rays : Effect of, on the Cell (Dr. M. Silha), 1531
  Microscopy with (Dr. V. E. Cosslett), 1423
Xanthine Dehydrogenase (Liver), of Rats : Effect of Salicylate on Blood and (Emilio Mitidieri and Ottilia R. Affonso), 471
Xenopus laevis (A Toad), without Haemoglobin (Prof. D. W. Ewer), 271
m-Xylene and *p*-Xylene : Separation of, by Gas Chromatography (D. H. Desty, A. Goldup and W. T. Swanton), 107
Xylose : Production of Acid from Arabinose and, by Strains of *Azotobacter* (Vagn Jensen), 1536

YADIN, Yigael, and others : Hazor I, an Account of the First Season of Excavations, 1955 (The James A. De Rothschild Expedition at Hazor), *review* by Peter J. Parr, 951

Yagi, Dr. Kunio, and Nagatsu, Dr. Toshiharu : Condensation Products of Ethylene-diamine with Adrenaline, 822
Yale University : Peabody Museum of Natural History, Bulletin No. 11, *Spirifer disjunctus*, its Evolution and Paleoecology in the Catskill Delta (Hugo Greiner), *review* by Dr. H. M. Muir-Wood, 959
  Retirement of Prof. C. O. Dunbar from the directorship of the Peabody Museum, 1019
  Appointment of Dr. S. Dillon Ripley as director of the Peabody Museum, 1019
Yamadeya, Yutaka, and others : Reduced Activity of Histaminase in Rats sensitized by *Bordetella pertussis*, 755
Yamaguti, Prof. Satyu : Systema Helminthum, Vol. I, The Digenetic Trematodes of Vertebrates, *review* by Dr. Ben Dawes, 957
Yamashita, Kazukuni, and others : Effect of Morphine upon the Adrenal 17-Hydroxycorticosteroid Secretion in the Dog, 825
Yamashita, Shuji, and others : Use of Synthetic Quartz Crystals as a Support for Specimens in Powder Photographs, 1666
Yaphe, Dr. W. : Determination of Galactose-diethylmercaptal and 3,6-Anhydrogalactosediethylmercaptal with the Anthrone and Seliwanoff Reagents, 44
Yaphe, Dr. W., and Morgan, Dr. K. : Enzymic Hydrolysis of Fucoidin by *Pseudomonas atlantica* and *Pseudomonas carrageenovora*, 761
Yard and the Pound (Avoirdupois) for Science and Technology, 80
Yeast (Baker's) : Utilization of Inorganic Sulphate by (Dr. A. Kleinzeller, A. Kotyk and L. Kováč), 1402
Yeast (Brewer's) : Endogenous Metabolism of Freshly Harvested Cells of a (V. E. Chester), 902
Yeast Cells : Life Span of Individual (Robert K. Mortimer and John R. Johnston), 1751
Yeast Extract : An Effect of, on the Growth of *Chlorella* (P. J. Casselton), 1404
Yeast Growth-regulating Substance from *Tetragonia expansa* : Tetragonin, a (Anna P. Schiffer and András Kovács), 988
Yeast Protoplast (Growing) : Formation of Aberrant Cell Walls and of Spores by the (A. A. Eddy and D. H. Williamson), 1101
Yeh, Mary K. Y., and others : Incidence of the Erythrocytic Defect associated with Drug-Sensitivity among Oriental Subjects, 684
Yellow Compound (Second), from *Drosophila melanogaster* : Characterization of a (Dr. H. S. Forrest, Dolph Hatfield and Dr. C. Van Baalen), 1269
Yellow Fever and related Arthropod-borne Viruses : Plaque Production with (J. S. Porterfield), 1069
Yellow Rust of Wheat : 'Karathane'—the Value of its Differential Fungicidal Effect in relation to Mildew and (D. A. Doling and Shirley Hepple), 622
Yeo, D., and others : Drift of Toxic Chemicals released from a Low-flying Aircraft, 131
Yield of Infective 'Ribonucleic Acid' from Impure Murray Valley Encephalitis Virus after Different Treatments (G. L. Ada and S. G. Anderson), 799
Yields of Molecular Hydrogen Peroxide in the Radiolysis of Water labelled with Oxygen-18 : Determination of the (Dr. J. D. Backhurst, Dr. G. R. A. Johnson, Dr. G. Scholes and Prof. J. Weiss), 176
Yoffe, A. D. (Evans, B. L., and) : Absorption Spectra and Associated Photoconductivity of Pure and Decomposed Crystals of Thallous Azide, 1241
Yoffey, Prof. J. M. : The Lymphocyte Problem, 76
  Appointed Knight first class of the Order of the Dannebrog, 154
Yokoyama, Prof. Izumi, and Tajima, Hirokazu : Gravity Survey on the Kuttyaro Caldera by means of a Worden Gravimeter, 739
Yoneda, Yukio, and others : Effect of Thermal Neutron Irradiation on Oxide Catalysts for the Decomposition of Nitrous Oxide, 388
Yonge, Prof. C. M. : The Living Mollusc, *review*, 3
  Marine Ecology, *review*, 420
Yonge, P. G. (Crofton, H. D., and) : Parasitology (Control of *Diphyllobothrium* Infections in Trout), 1507
York, D., and others : The Geological Time-Scale, 212
  How Old is the Cambrian System?, 769
Yorke, R. W., and others : Liquid/Solid Content of Fats, 44
Yorkshire Council for Further Education, and others : Symposium on Radiation Chemistry, 18
Yoshida, Prof. Sekiko, and Wada, Masami : Storm-Time Increase of Cosmic-Ray Intensity, 381
Yotsumoto, Dr. H. (Hashimoto, Dr. H., and) : Spacing Anomaly in Electron Microscope Images of Crystal Lattices, 1001
Young, Prof. F. G. : Progress in Vitamin and Hormone Research, *reviews*, 568, 778
  New Biochemistry, *review*, 961
  Textbook of Biochemistry, *review*, 967
  Clinical Enzymology, *review*, 1151
  Research on Hormones, *review*, 1422
Young, Dr. G. T. : Synthesis of Peptides (Racemization in Peptide Synthesis), 152 ; (Peptides containing Cysteine), 153
Young, Dr. I. Elizabeth, and Fitz-James, Prof. Philip C. : Pattern of Synthesis of Deoxyribonucleic Acid in *Bacillus cereus* growing synchronously out of Spores, 372
Young, Prof. J. Z. : The Ear under Water (The Cephalopod Statocyst), 1787
Young, Niels O., and Kowal, Jakym : Optically Active Fluorite Films, 104
Young, Ralph D., and others : Induction of Subcutaneous Nodules in Rabbits with the *SE* Polyoma Virus, 766
Young, Roger H., and others : Malonate Metabolism by Plant Tissues, 683
Young, Dr. R. L., and others : Role of Liver in Metabolism of Chlorpromazine, 1396
Young Calves : Changes in the Secretion of 20α-Hydroxypregn-4-en-3-one by the Adrenal Gland of (Dr. W. E. Balfour, Dr. R. S. Comline and R. V. Short), 467
Young Eels in Kenya Rivers : Records of (Dr. Vernon D. van Someren and Peter J. P. Whitehead), 950
Yttrium (Radioactive Strontium and), in the Tissues of the Rabbit's Eye : Differential Distribution of (R. H. Mole, Antoinette Pirie and Janet M. Vaughan), 802
Yurovsky, A. Z. : The Nature of Coal (Theory of the Origin of Sulphur in Coals), 1438

ZABKA, Dr. G., and others : Dark Fixation of Carbon Dioxide in *Kalanchoe blossfeldiana* in relation to Photoperiodism, 1375
Zalokar, M. : Nuclear Origin of Ribonucleic Acid, 1330
Zaman, V. : Parasitology (Use of Antigen–Antibody Reactions to differentiate Species and Strains of *Entamoeba*), 1506
Zandy, H. (Brill, Prof. R., and) : Absolute Measurement of the Intensity of the (111) Reflexion for Diamond, 1387
Zangwill, Prof. O. L.   Diagnostic Performance Tests, *review*, 1767
Zeitlin, Prof. Harry, and Goya, Harry : Polymorphic Conversion of Mercuric Iodide on Alumina, 1041
Zeller, Dr. A. : Phosphates and Organic Substances in Nitrogen Deficiency, 513
Zeman, Prof. Wolfgang (Fischer, Prof. Roland, and) : Neuronal Dye-Sorption as a Histochemical Indicator of Nervous Activity, 1337
Zener, Prof. Clarence M. : Elected a member of the United States National Academy of Sciences, 1575
Zenker, Prof. Rudolf : Elected a member of the Surgery Section of the Deutsche Akademie der Naturforscher Leopoldina, 652
ZETA : Possibility of Ion Runaway in (Dr. A. Gibson), 101
Zgliczyński, Jan M., and others : Taurine in Human Blood Platelets, 685
Zhurnal neorganicheskoi Khimii : A cover-to-cover translation to the published by the Chemical Society, 1092
Ziegler, Prof. K. : Co-ordination Chemistry (Catalytic Polymerization of Olefines by Aluminium Alkyls), 1784
Zilversmit, Dr. D. B. (Pinter, Dr. G. G., and) : Lack of Effect of Histidine on Rabbit Atheromatosis, 1272
Zimmerman, Dr. George R., and Folk, jun., Prof. G. Edgar : Aortic Medial Calcification and Lowered Metabolism in Ground Squirrels, 754
Zimmerman, J. : Antarctic Meteorology, 1503
Zinc Sulphide : High-Temperature Oxidation of (Gordon S. G. Beveridge and Prof. Kenneth G. Denbigh), 106
Zinc and Gibberellin : Synergistic Effect of (Dr. John Dancer), 901
Zinnouchi, Seiichi, and others : Effect of Morphine upon the Adrenal 17-Hydroxycorticosteroid Secretion in the Dog, 825
Zirconium (Dr. G. L. Miller), second edition, *review* by Dr. W. D. Jones, 1768
Zirconium–Thorium–Uranium (Niobium–) and Rare-Earth Minerals from the Pegmatites of South Harris, Outer Hebrides (Dr. O. von Knorring and R. Dearnley), 255
Zirkle, Dr. Raymond E. : Elected a member of the United States National Academy of Sciences, 1575
Zone (Reaction), in Detonation : Suppressed Light Emission of the (Prof. C. H. Johansson and L. Sternhoff), 247
Zone Electrophoresis : Regeneration of Cellulose Acetate Membranes used for (Dr. S. Jacobs), 1326
Zone Electrophoresis of Rous Sarcoma Virus (Robert Cramer), 195
Zoological Society of India : First All-India Congress of Zoology, 1304
Zoological Society of London (Sir Solly Zuckerman), 1082
  Formation of a Young Zoologists Club, 152
Zoologie Agricole, Comité Européen de, and the Agricultural University, Wageningen (under the auspices of the) : Proceedings of a Symposium on Insect and Food-plant (Wageningen, 1957), *review* by Dr. C. J. Banks, 1767
Zoology at Cambridge, 506
Zoology in Nigeria—Ecology of Lagos Lagoon (Prof. J. E. Smith), 295
Zoology at University College, Canberra, 648
Zoology : First All-India Congress of (Zoological Society of India), 1304
  General (Mary J. Guthrie and Prof. John M. Anderson), *review* by Dr. V. Fretter, 1290
  General (Claude A. Villee, Warren F. Walker, Jr., and Frederick E. Smith), *review* by Dr. V. Fretter, 1290
  Text-books of, *review* by Dr. V. Fretter, 1290
Zoology (Elementary) : Manual of (Borradaile's), thirteenth edition, revised by W. B. Yapp, *review* by Dr. V. Fretter, 1290
Zoology and Comparative Anatomy at Dublin, 1716
Zotterman, Prof. Yngve, and Diamant, Herman : Has Water a Specific Taste?, 191
Zoutendyk, Dr. A. (Weiner, Dr. J. S., and) : Blood-Group Investigation on Central Kalahari Bushmen, 843
Zuckerman, Sir Solly : The Zoological Society of London, 1082
  Quality of Protein Feeding-Stuffs, 1303
Zukowski, R., and Gaze, Dr. R. : Tensile Strength of Asbestos, 35

Printed in Great Britain by FISHER, KNIGHT & CO., LTD., The Gainsborough Press, St. Albans,
and published by MACMILLAN & CO., LIMITED, at St. Martin's Street, London, W.C.2,
and ST. MARTIN'S PRESS, INC., 175 Fifth Avenue, New York 10, N.Y., U.S.A.
